1. The Airtel International Roaming Service & packs are available to Airtel customers travelling abroad. The list of covered countries and the respective products is available in the tables at the end of this document.

Postpaid packs – Appendix 1 & 2

Prepaid packs – Appendix 3 & 4

Zone Realignment:

Postpaid:

2. To facilitate seamless shuffling between multiple countries in a geography, Airtel has revised the countries covered in its international roaming postpaid packs as on 23:59 hrs; 29th Sep, 2020. The countries covered under the new Zonal structure can be seen under Appendices – 1 & 2.
3. For ease of transition, all Postpaid Airtel IR packs which are subscribed but not yet active (i.e. validity of pack didn't start) as of 23:59 hrs; 29th Sep, 2020 will automatically be unsubscribed. Customers are requested to check the correct pack applicable for their country on Airtel website or App and subscribe again to the applicable new pack.
4. For customers whose validity of Postpaid IR pack has already started as of 23:59 hrs; 29th Sep, 2020 – the activated pack will continue to function according to the initial construct. There will be no changes in the pack behavior until its validity expires. Upon expiry, customer is requested to check the correct pack applicable for their country on Airtel website or App and subscribe again to the applicable new pack.

Prepaid:

5. To facilitate seamless shuffling between multiple countries in a geography, Airtel has revised the countries covered in its international roaming postpaid packs as on 23:59 hrs; 12th Oct, 2020. The countries covered under the new Zonal structure can be seen under Appendices – 3, 4 & 5.
6. The new pack construct would be applicable to customers purchasing Airtel Prepaid IR packs after 23:59 hrs, 12th Oct, 2020.
7. For customers who have purchased Prepaid IR pack before 23:59 hrs; 12th Oct, 2020 – the activated pack will continue to function according to the initial construct. There will be no changes in the pack behavior until its validity expires. Upon expiry, customer is requested to check the correct pack applicable for their country on Airtel website or App and purchase again the applicable new pack.

Section-1: International Roaming (IR) Service related

8. IR Service for Postpaid customers is “disabled” by default. Any postpaid customer who buys an international roaming pack would get his/her IR service enabled automatically.
Postpaid customers may also enable the IR service without taking a pack through Airtel Thank app or call center in case they expect their usage to be very low. This will allow the customer to use their mobile services abroad. However customers would be charged as per Standard rates [Link - <http://bit.ly/standardcharges>]. This is not advisable if you plan to use data services. For postpaid customers, IR service (not to be confused with IR packs – refer point 12) once enabled will remain activated till explicitly disabled through Airtel Thanks App or Call center.
9. IR Service for Prepaid customers remains enabled by default. In case a prepaid customer makes usage without purchasing an International roaming pack, the usage will be charged from Main Balance as per Standard rates [Link - <http://bit.ly/standardcharges>]. In case of no main balance, the customer will not be able to make any usage.

10. For customers who want to have the convenience of using their India number abroad, it is advisable to go for International roaming packs [Pack details available in Appendices – 1, 2, 3 & 4]. Upon subscribing to International roaming packs, the customer will be able to use data, voice (IC & OG) and SMS services as per pack details.
11. In the event a customer does not activate any of the packs but travels to a pack-covered country with International Roaming service activated and generates usage, then Airtel has the “Roam-without-Fear” construct to protect him/her from excessive charges. The initial charging shall happen as per standard rates. Once the charges exceed the One-Day pack value for that country, then Airtel automatically applies the One Day pack with all its benefits to the customer (typically 500 Mb data, 100 OG mins and unlimited IC minutes), to protect him/her from any further charges for the day.

This application of One Day Pack shall be in respect of the specific day only. On the next day, the same principle applies again, i.e. standard charges applicable till threshold is reached followed by automatic application of One Day Pack. This option is advisable if the duration of the stay is very short.

12. If postpaid customers on International roaming benefits from such automatic accrual of “Roam-without-Fear” IR packs, he/she will be charged for these packs in the subsequent bill cycle. There shall not be any waiver of these charges whatsoever. Customers, however, have a choice to disable their IR service anytime.

Section-2: IR packs – Activation, validity and quota

13. Customers wishing to subscribe to the Pack may do so by visiting www.airtel.in/IR or Airtel Thanks App. Postpaid customers present in India may call the customer service helpline 121 or +919910099100 (international toll-free number). If the customer wishes to subscribe to pack from international location, he/she is advised to call +919910099100 to avoid any unwanted charges.

For company paid connections, the customers have to get in touch with their respective company coordinators to activate their packs.

14. For Postpaid customers, pack validity starts only when the customer latches on to international network of any country covered by the pack and makes any chargeable usage like Outgoing SMS/incoming or outgoing/Incoming voice call/data consumption. The calculation of validity for postpaid IR packs shall be basis the time zone of the country visited and shall expire at 12 midnight local time.

For instance, if a postpaid customer lands in Singapore at 6 PM local time with 10-day pack activated, then his/her first day of the pack validity will end at 11:59 PM local time on same day. The second day of the pack validity would start at 12:00 AM the next day and last till 11:59 PM local time (and so on).

15. Prepaid subscribers can book their IR pack up to **30 days** prior to the actual date of travel. The pack validity will start only when the customer latches on to international network of any country covered by the pack and makes any chargeable usage like Outgoing/Incoming SMS or outgoing/Incoming voice call/data consumption. In case the customer doesn't travel till the end of 30 days, then the pack automatically expires. The customer will not be entitled to any reimbursement of amounts used to purchase IR pack(s) upon expiry.

16. For Prepaid customers, pack validity starts only when the customer latches on to international network of any country covered by the pack (within 30 days of purchase as stated above) and makes any chargeable usage like Outgoing SMS/incoming or outgoing call/data consumption. The calculation of validity for prepaid IR packs shall be based on Indian Standard Time (IST) and shall expire at 11:59 PM midnight IST.

For instance, if the customer lands in Singapore at 6 PM Indian Standard Time (IST) with 10-day pack activated, then his/her first day of the pack validity will end at 11:59 PM IST on same day. The second day of the pack validity would start at 12:00 AM IST the next day and last till 11:59 PM IST (and so on).

17. Once the Airtel customer returns to India, the benefits of the International roaming pack, if activated, shall cease the moment he/she returns. Once in India, he/she will revert to the bill plan (postpaid) or recharge (prepaid) that he/she was subscribed to before they left India (provided their validity still applies).
However, if the customer returns to the IR pack-covered countries before the end of the pack's validity, then he/she would be able to continue enjoying the IR benefits till the end of pack's validity.
18. The international roaming pack shall remain active till the end of its validity. Once the validity ends, the pack will not get automatically renewed by itself. If the customer wishes to continue enjoying pack-related benefits, then he/she should reactivate the pack by visiting Airtel Thanks App or website or call center.
19. During IR pack usage, if customer exhausts entirety of IC minutes or OG minutes or SMS benefit quotas given by the pack, then any further usage would be charged as per Post-pack benefit rates applicable for that particular pack (refer Appendices – 1, 2, 3 & 4). To avoid such accidental over-usage which results in unwanted charges, customer is advised to keep track of usage of IC minutes and OG minutes and SMS benefits on Airtel Thanks App.
20. During IR pack usage, if customer exhausts entirety of data quota given by the pack, then data usage would be blocked immediately to avoid any further accidental usage. If customer wishes to use data for the rest of the validity, he/she can purchase a data top-up as shown in Appendix – 2 for postpaid and Appendix – 3 for prepaid.
21. Data, Voice and SMS Usage can be tracked on Airtel Thanks App. Data usage will be available real-time but voice/SMS usage update can have a delay of up to 24 to 48 hours. So, customers are advised to take this delay into due consideration while viewing their voice and SMS usages on Airtel Thanks App.

Section-3: IR Packs – Benefits applicability and tracking

22. Usage in international roaming is shared with Airtel by international operators. In case there is a delay in sharing this information, the usage charges may display in the subsequent postpaid bills (up to 3 bills).
23. For countries where Airtel roaming packs are not available, the data services have been barred to avoid any accidental usage by customers. However, the customer will be able to make calls and send SMS and he/she will be charged for the same as per standard rates. [Link - <http://bit.ly/standardcharges>]
24. If prepaid customer makes recharges of 2 or more IR packs with same MRP, then the benefits of the earlier IR pack would get overwritten by the benefits of the latest pack. The validity and benefits of the earlier pack would get nullified.
25. If prepaid customer does recharge with 2 packs of different MRPs, then the following priority will be followed when it comes to benefit and validity start dates:
Priority: Smart packs [Appendix-4] have higher priority than 1199. 1199 has higher priority than 799 and 755.
 - a. The higher priority pack would take precedence and would be activated first. If none of the benefits of the higher priority MRP are exhausted before its validity, then the lower priority pack would be activated only upon completion of the higher priority pack's validity.
 - b. If any of the benefits of the higher priority pack is exhausted within its validity, then the lower priority pack would be activated automatically to provide uninterrupted usage to the customer.
26. Postpaid customer cannot activate two or more packs from the same zone (Appendix-1).
27. Postpaid customers who have taken a smart pack (Appendix-1) can take a data top-up (Appendix-2) if their pack data quota is exhausted only once they are in international roaming. In such a scenario the validity of the data top up is up to the data pack already activated.
28. International Roaming packs benefits are not applicable while calling local toll free numbers abroad. If a customer tries calling such local toll free number abroad, he/she will be charged according to standard rates applicable in that country.

29. For postpaid customers, the validity of International Roaming Pack benefit works independent of the bill cycle of their postpaid bill plan back in India. In other words, the customers' bill cycle start and end dates in India do not affect either the start or the end of the validity of their International roaming pack.
30. For Postpaid customers from UP East, Bihar, West Bengal and Orissa data-service are not available in Dominican Republic. If customers from these circles are planning to travel to Dominican Republic and take IR pack, please be aware that any data benefits mentioned in the pack details are not applicable here.
31. For Prepaid customers Outgoing voice is not available in Timor, Serbia, Isle of Mann, Guinea Bissau, Guinea, El Salvador and Dominican Republic. If customers are planning to travel to these countries and take IR pack, please be aware that Outgoing call benefits mentioned in the pack benefits are not applicable here.
32. If customers wish to protect themselves from any unwanted usage of data while in IR, please be aware that data-services can be switched off from the mobile handset. This is especially advised if the IR service is active and customer is without a pack, as in that case the charges could accumulate rapidly.
33. The benefits of all IR Offers mentioned in Appendices -1, 2, 3, 4 are not applicable for premium rate Numbers / Maritime / Satellite / Aero Mobile / Ship Cruise or Immarsat. Please note that additional charges over and above the pack charges would accumulate if usage is done in any of the above scenarios.
34. For customers having Prepaid SIMs from Assam, North East and J&K circles, International roaming benefits and services will not work while in abroad.

Section-4: Network, Credit Limit, Data barring and other services

35. Customers need not bother with manually selecting network when they land abroad as IR packs are applicable across all operators in the covered countries.
36. Airtel bears no responsibility for the network quality of the select partner network service providers in the respective locations.
37. Customer's credit limit is not monitored on real-time basis while he/she is in International roaming. The IR usage details are dependent on international operators and are not available with Airtel in real-time. Hence, credit-limit as per Airtel is not applicable while in international roaming. Customers are advised to be aware of this fact while he/she is making usage with the IR service being ON.
38. Data barring request to Airtel for local usage in India is different from data barring request for international roaming.
 - a. If a customer has engaged the Data barring service for local usage in India, it does not mean that data would remain barred after connecting to an International network. If IR service is "On", the customer is free to consume Data in IR and accumulate charges irrespective of local Data barring service being active or inactive in India.
 - b. In case the customer wants to deactivate data services while on international roaming, the same needs to be done from the handset or disabling IR service on Airtel Thanks App or by calling the customer care & specifically requesting data barring while on international roaming.
39. If customer has requested and enabled data barring in International roaming, then it shall remain activated (irrespective of amount of time elapsed since enabling) till the customer specifically requests for deactivation of data barring. Even if the customer activates a pack while his/her IR data barring is "on", the customer would not be able to use any data in roaming until the IR data barring service is deactivated.
40. Caller Line Identification Number (CLI) is not guaranteed while any International roaming pack is active. That is, if a customer receives a call on his number while in IR, then it is not guaranteed that the number from whom he/she is receiving the call would be displayed.

41. Video Calls feature provided by select international telecom service providers are NOT guaranteed on international roaming but might be successful in some networks. If successful, the consumption of video call minutes will be charged in a manner similar to voice calls.
42. If call divert or VMS is active on a mobile number, then customers would be charged for both Incoming and outgoing minutes of the call duration as per divert conditions. If IR pack is active, then both OG and IC minutes would be consumed depending on the type of call made. If customers plan to cancel the same, they may do so by dialing ##002# before leaving India network.

Section-5: T&C Applicability and legality

43. These Terms and Conditions shall constitute an agreement between Airtel and each customer and by subscribing to the Offer, customer accepts the same as binding upon him/her.
44. The terms and conditions of usage of Airtel, so far as the same are not inconsistent with the present terms and conditions, continue to be applicable upon you as a user of the mobile services.
45. Airtel will be entitled to postpone, suspend, modify or cancel the Offer or any aspect thereof, across the entire territories of service or any part thereof, at any time with or without notice, for any reason, including, but not limited to, acts of God, force majeure, technical difficulties ,or any other reasons beyond Airtel's reasonable control. If Airtel suspends or cancels the Offer, all aspects of the Offer shall be null and void. Airtel will not be liable to compensate any customer for any postponement or cancellation or for any reason directly or indirectly arising out of this Offer.
46. AIRTEL HAS NO LIABILITY WHATSOEVER IN RESPECT OF ANY CLAIMS OR DISPUTES AND ANY RESULTING DAMAGES OR LOSSES, WHETHER DIRECT OR INDIRECT, RELATING TO THE CUSTOMER AVAILING, NOT RECEIVING OR CUSTOMER'S USE OF THE OFFER.
47. AIRTEL MAKES NO WARRANTIES OR REPRESENTATIONS WHATSOEVER IN RESPECT OF THE OFFER AND THE MOBILE SERVICES INCLUDING AS TO ITS FITNESS FOR ANY PARTICULAR PURPOSE, MERCHANTABILITY, QUALITY, AVAILABILITY, DISRUPTION OR ERROR FREE OPERATION.
48. These Terms and Conditions shall constitute an agreement between Airtel and each customer and by subscribing to the Offer, customer accepts the same as binding upon him/her.
49. Please note that the statements in these terms and conditions do not constitute any general representation from Airtel regarding Airtel's services or its availability. Airtel's network and the provisions of the Offer is available on an 'as is where is available' basis and Airtel makes no representation, guarantee or warranty regarding the availability, fitness for any specified purpose or error free operation of the network. Network availability may be affected due to various reasons including force majeure, acts of god, inclement weather, topographical/ geographic/ demographic factors, maintenance work, availability of interconnection with other networks, etc.

Any dispute or claim (contractual or non-contractual) arising out of or in relation to this agreement, including disputes as to its formation, will be governed by and construed in accordance with Indian laws. Subject to the point above, Airtel and the customer submit to the exclusive jurisdiction of Courts at New Delhi alone.
