My best Study Hacks

HOW TO STUDY LIKE **A RANKER?**

1. First see the **Trend** of the questions asked (through past papers) of the Concept
2. Then, **learn the concept** according to the trend you analyzed. Most asked will be important and least asked will be not so important
3. After learning, quickly **REVISE** it and make notes, if required.
4. Do **writing practice** of that concept (1-2 questions)
5. Tadaa... that's it! ;)

HOW TO REVISE SMARTLY?

REVISION HACKS

Mind Map

Mind Map is an essential tool to revise as it cut down number of pages of chapter into one single paper.

Index Mapping

Index Mapping is for all those students who are lucky and have got a huge detailed index. As shown in the picture, you also summarize the whole chapter in the index itself without missing out on any point.

1:1:1

As the name suggest, the concept needs to revise within 1 day , within 1 week and within 1 month after you've learn it. You will never forget any concept through this revision hack, trust me! ;)

How to deal with **DISTRACTION**

External Distractions

- Never bring your personal phone inside your room while studying!
- If studying from phone, keep your phone in airplane mode.
- If there's a lot of noise in your house, use mobile apps like "calming sound, rain noise, etc. and listen to that music while studying in high volume, it works..trust me!
- If you cannot at all study at home due to disturbances, visit library.

Internal Distractions

- Always create a boundary in your mind between your overthinking and study.
- You do overthinking as much as you want..but during study..only study! Samjhe?
- Never allow anyone, your gf, your parents, your family, your friends even your own mind to come in between your studies! That's how the DISTRACTION ends!

START SMALL

Don't STUDY then!

A man with dark hair, wearing a white t-shirt, is sitting at a desk. He is looking down at a laptop with a distressed expression, his right hand pressed against his forehead. The laptop lid is covered in various tech-related stickers, including 'CSS3', 'SECURITY', 'HTML5', 'php', 'git', 'apple', 'LARACON', 'node', 'NODEJS', and a GitHub Octocat. The scene is framed by a large, stylized circular graphic with a dark blue background and orange and white geometric patterns.

TRY THIS!

MY BEST STUDY HACKS!

Scribbling

Whenever you are done with a chapter or concept, just be seated in your place and instantly start scribbling either backside of the chapter in module or your note page the concepts you've just learnt in shortform. It can be either numbers, sections, etc. JUST SCRIBBLE IT OUT! And relook the same next time you need to revise that chapter

Using Sticky notes

Use as many sticky notes you can while watching the lecture and you need to pen down things in front of that chapter or while making notes or while preparing index mapping, etc.

Solving Scanners

Tell me honestly, do you actually solve scanners? Like with whole heart and mind? If no then CUTIE just START it right away!! This hack is going to make you an ALL INDIA RANKER, trust me! The best time to solve scanners is during last 2 months of your exams!

Affirmations

- I am doing very good
- I am completing all my targets on time
- I am strong mentally
- I am going to attend 100% paper in exams
- I will never ever give up in this lifetime
- I am trying my best and that's the best thing ever
- I am going to achieve all my dreams
- I will keep working hard for my goals

*Karm Karte Jao, Fal ki Chinta
Mat karo cutieees!*

Best wishes for your exams
