

LUBRICANTS™

POWER TO PERFORM™

HP DRAWMET 22

DESCRIPTION

General purpose compound used for wire/tube drawing of carbon steels and difficult nonferrous alloys. The cream coloured paste consists of inert fillers to impart the requisite film strength.

APPLICATION AREAS

Suitable for use as a coolant in wire / tube drawing of steel and other difficult nonferrous draws. This product is also suitable for use in pressing operations.

PHYSICO-CHEMICAL PROPERTIES

PROPERTIES	TYPICAL VALUES
Appearance Homogenous	Paste
Colour	Whitish /Cream
Total Fatty Matter % Wt	17-20

PERFORMANCE BENEFITS

- Excellent cooling ability
- Excellent film strength
