

LUBRICANTS

POWER TO PERFORM

HP METAQUENCH 85

QUENCHING OILS

DESCRIPTION

Marquenching oil suitable for usage for bath temperatures 150 to 220 °C. Recommended for all marquenching operations which do not require a high quench speed oil.

MEETING SPECIFICATIONS

IS:4543-1977.

APPLICATION AREAS

Suitable for mass production of high precision, high quality products such as bearing races gears and other components.

PERFORMANCE BENEFITS

- Good thermal conductivity
- Good oxidation stability
- Low volatility
- Low predictable quench distortion
- High core hardness to quenched parts
