

LUBRICANTS

POWER TO PERFORM

PLUTEK 1,2 (Calcium Soap Greases) INDUSTRIAL GREASES

SPECIAL FEATURES

These are extreme pressure greases designed for heavily loaded bearings both plain and anti-friction operating at moderate speeds upto 2000 RPM and temperatures upto 70°C. They have EP properties in excess of 20 Kg Timken ok load, high degree of resistance to water washing and excellent adhesiveness. They are primarily developed for the lubrication of anti-friction work-roll and back-up roll bearings in ferrous and non-ferrous rolling mills.

PHYSICO-CHEMICAL PROPERTIES

	PLUTEK	
	1	2
Colour	Brown	Brown
Worked penetration at 25 °C	310/340	265/295
Drop Point °C, min.	88	88
Type of Soap	Calcium	Calcium
