

NIFTY SPOT : IMMEDIATE SUPPORT AT 25000-24860

Source – TradingView, BP Equities Research

The benchmark index closed lower at 25,062 after facing strong intraday rejection from 25,240 levels, forming a prominent bearish engulfing candle on the daily chart. The index continues to hover near the lower band of the recent consolidation range with no real directional resolution. Price is showing signs of distribution, as evidenced by rising volumes on down days, reinforcing the presence of active sellers. Structure-wise, the index is still anchored around its 21-DMA, but repeated failures to absorb supply near the 25,230–25,250 zone suggest potential rotational weakness. Option data shows heavy Call writing at 25,200 and 25,300, capping upside, while Put OI at 25,000 is struggling to hold, implying a bearish tilt in sentiment. A decisive break below 25,000 may trigger faster downside momentum.

Support – 25000-24860-24740

BANKNIFTY SPOT : IMMEDIATE SUPPORT 56700-56200

Source – TradingView, BP Equities Research

The banking index slipped marginally to close at 57,066, printing a small-bodied red candle after opening near the intraday high of 57,316. The move marks a second consecutive day of range-bound behaviour. Price remains well within the rising channel, but instead of pushing toward the upper trend line, the index is oscillating around its mid-zone, suggesting momentum fatigue. Notably, volume surged to a weekly high on a mild decline, a sign of distribution at higher levels. The recent candles also show tight-range bodies with upper shadows, indicating supply absorption overhead. Price is hovering just above the 20-DMA but lacks strong trending strength. Option data reflects firm Call writing at 57,300–57,500, with fading bullish support in Puts, making the zone above 57,300 a key tactical pivot for directional clarity.

Intraday Banknifty

Resistance – 57300-57900-58500

Support – 56700-56200-55700
