

NIFTY SPOT : IMMEDIATE SUPPORT AT 24800-24680

Source – TradingView, BP Equities Research

The benchmark index faced decisive rejection near the 25,055–25,100 band and settled below its 50-DMA, confirming a short-term weakness setup. The index opened flat but gradually sold off through the day, forming a strong-bodied red candle with a close near the day's low — a sign of directional selling. Notably, the break below the recent tight-range base has come on relatively higher volumes, indicating that supply is now active. Failing to sustain above 24,860 signals a potential breakdown from the ongoing distribution structure, making the 24,740–24,680 zone critical. From the options front, heavy Call writing is visible at 25,200 and 25,300 strikes, while 25,000 PE shows unwinding, suggesting a weak floor formation in the near term.

Intraday Nifty

Resistance – 25000-25120-25250

Support – 24800-24680-24540

BANKNIFTY SPOT : IMMEDIATE SUPPORT 56340-55900

Source – TradingView, BP Equities Research

The banking index opened at its high and drifted lower throughout the day, closing with a sharp loss of over 500 points. The rejection has come after multiple failed attempts to hold above the 57,000 mark reinforcing the idea of exhaustion in momentum at higher levels. It has now moved closer to the lower bound of the rising channel, and any breach below 56,300–56,200 could result in a structural break of the medium-term trend. The cloud has started flattening, and price action over the past 10–12 sessions shows a gradual topping structure with lower highs on the intraday chart. Open Interest data suggests aggressive unwinding at 57,000 PE and fresh short build-up at 57,000 CE, further indicating pressure overhead.

Intraday Banknifty

Resistance –56700-57300-57700

Support –56340-55900-55500
