Pharmaceuticals and Chemicals | Earnings Preview

11<sup>th</sup> July 2018

## Low base due to GST to support growth

We expect the companies under our coverage to report double digit growth in Q1FY19, aided by low base in domestic market due to GST. However, we believe US business continue to witness pricing pressure in the base business mainly due to channel consolidation and increased competition. Few interesting launches in US generic market will help few Indian players to report better performance in Q1. On domestic market front, we expect most of the companies report healthy performance in Q1FY19 due to low base last year same quarter. Overall structural trends in the sector do not give any long-term comfort, however overall earnings decline is expected to bottom out in the near term. Moreover, several companies with significant USFDA-related regulatory issues appear to be coming close to finally rectifying their deficiencies. This should boost approvals and growth in the short term. We expect Glenmark to see significant decline in revenue and profitability on the back of high base in previous year quarter due to gZetia FTF launch in the US. Overall our pharma coverage would post Revenue/EBIDTA/PAT growth of 10%/14%/20% YoY in Q1FY19. We expect the EBITDA margin of our coverage universe to show marginal improvement of 73bps YoY, underpinned by a lower base in domestic market.
