

Wildlife in India Activity

Dear Students,

Wildlife traditionally refers to undomesticated animal species, but has come to include all organisms that grow or live wild in an area without being introduced by humans. Wildlife plays an important role in balancing the environment and keeping that same thought in mind we want you to design a poster of how you depict **Wildlife in India today.**

You can take inspiration from the places you have visited or make something as per the current information on wildlife in India or send out a social message about how to save wildlife. Share with us your work and get a chance to get featured!

Best of Luck!

**Regards
Team Customer Engagement**

Activity : Poster Design Activity
Theme: Wildlife in India

Students need to design a poster of how you depict Wildlife in India today. They can take inspiration from the places they have visited or make something as per the current information on wildlife in India or send out a social message about how to save wildlife etc. The idea is to see the unique depiction of Wildlife in India

Concept
