About the Conference:

As a part of year-long celebration of the 20th year of CRNN, a two-day **International Conference on Nanoscale Materials and Devices for Multifunctional Applications (NMDMA – 2026)** will be organized by CRNN at its premises in Kolkata, India. This conference serves as a specialized scientific forum bringing together researchers, materials scientists, and engineers to discuss break-throughs in material science and engineering. This conference bridges the gap between **fundamental physics/ chemistry and scalable engineering applications**, emphasizing materials that simultaneously serve multiple functions.
