MESSAGE FROM THE VICE CHANCELLOR

O.P. Jindal Global University is recognized not only as a leader, but also as a pioneering initiative in the development of private higher education initiatives. The vision of the University is to promote global education across different disciplines. In the last few years, the University has witnessed remarkable developments relating to teaching, research and institution building.

The programs at JGBS have established substantive international collaborations with multiple world-class universities to offer intellectually engaging and professionally relevant learning.

The faculty members bring together a wealth of experience from academia and research, business and industry, government and inter-governmental organisations, as well as the civil society. The curriculum and courses covered bear in mind the need for management education to remain oriented towards problem-solving and to build leadership for addressing global business challenges.

PROFESSOR (DR.) C. RAJ KUMAR

Vice Chancellor O.P. Jindal Global University;
LL.B. (Delhi), B.C.L. (Oxford), LL.M. (Harvard), S.J.D (Hong Kong)

MESSAGE FROM THE DEAN

The MBA program at the Jindal Global Business School seeks to produce leaders in today's fast-changing business environment. Our focus is on providing an intense learning experience that not only informs participants of the solutions of today but readies them for the challenges of tomorrow. Our program is therefore practice-oriented, with a strong connection with the real-world, combining cutting-edge current practice with business theory to anticipate tomorrow's reality.

Business today is inherently global in nature. Even the most typical SME competes, consciously or otherwise, with foreign rivals. Global orientation is therefore central to our curriculum – in our curricular content, in our faculty experiences and backgrounds, in our partnerships with other leading institutions around the world.

Being part of a major university we enjoy the advantage to nesting our business learning within a far wider spectrum of knowledge. That is particularly critical as design thinking and artificial intelligence today blurs the dividing line between disciplines as well as that between humans and machines. A holistic approach to learning helps our students imagine their careers ahead, years and decades after they leave the program.

And all this with loads of fun and games, and a vibrant campus life in one of the most buzzing campuses of the country.

Come to JGBS! Experience a unique journey. Discover your true potential. Emerge as a leader.

DR. RAJESH CHAKRABARTI
