How to make money on crypto: 5 ways

Proven 5 ways to earn money

Before you can learn the secrets of how to make money on crypto, you need to know the types and ways of earning.

## Mining

There are three ways to extract crypto:

1. Self-mining. The miner uses the computational power of its own equipment, configures the programs itself. Plus, all profits are yours. The minus - the growth of costs for equipment and electricity with decreasing remuneration for the unit.
  2. Mining in the pools. Miners combine their capacities for fast and efficient problem solving. Plus - efficiency. Minus - profit is divided by all.
- o

3. Cloud mining. Earning on crypto is done by means of mining on rented equipment. That is, the system setup and costs are mainly on someone else's shoulders. Plus, the equipment and electricity bills do not suffer as much. Minus - earnings are still less.

## Investing

You buy crypt currency at one price and keep it in your wallet until the market goes up. To get the maximum profit, you need to make a proper investment portfolio.

Recall the famous story when in May 2010 for two pizzas paid 10,000 bitcoins. At that time, the deal was justified. But 10 years later, at this rate...

## Trading

Trading on crypto exchanges and earning on exchange rate differences.

The main profit on the crypt currency is the constant price fluctuation.

## Crypt Currency Lending

Lending, borrowing your funds at interest.

**IMPORTANT!**

Plus - passive income. Minus - frozen capital and risk of fraud.

Micro-income

Perform small tasks for a fee. The source of profit can be:

cryptocranes - services that pay with a small amount of cryptocurrency for performing various tasks;

RTS-sites pay for viewing ads on the Internet;

Airdroli - free distribution of tokens for marketing purposes.

However here you will not earn much and you can not get the promised reward.
