OVERVIEW

COMPANY OVERVIEW

Vision 360, where innovation meets excellence in the dynamic world of technology development, specifically tailored for the diamond and jewellery industry. Established in the year 2000, Vision 360 has emerged as a prominent player that is reshaping the landscape of this industry with its cutting-edge solutions and unwavering commitment to quality.

Our global footprint is a testament to our dedication to excellence. Vision 360 has seamlessly integrated it self into the manufacturing, B2B, and B2C segments within the diamond and jewellery industry.

ABOUT US

“Innovating Visions, Crafting Excellence.” - Vision 360

Situated in the heart of the diamond city Surat, Vision 360 has thrived in an environment that pulses with the energy of the gem and jewellery trade. Our journey has been marked by continuous evolution, pushing the boundaries of what is possible and redefining industry standards. As a technology development company, Vision 360 has not only kept pace with the ever-changing demands of the market but has consistently stayed ahead of the curve.

We understand that the diamond and jewellery industry demands precision, sophistication, and a keen eye for detail, and thus our team of skilled professionals, comprising visionaries and experts, is committed to crafting solutions that not only meet but exceed these expectations.

Vision 360 continues to be a beacon of excellence in the diamond and jewellery industry. Our vision is 360 degrees – comprehensive, holistic, and all-encompassing.

Vision

To provide a unique solution to the problems in the market and increase the productivity of the same.

Mission

To push ourselves beyond expectations and unlock new avenues of possibilities

OUR CORE VALUES

Integrity

It is our honesty that has helped to develop positive relations with stakeholders.

Transparency

We always strive to keep everything clear and pure with ourselves & the stakeholders.

Determination

A team that is always determined to bring innovation to the market & organization

Discipline

Following the procedure accurately leads to success.

Greatness

We are passionate about reaching high with ground-breaking technology

WHY VISION 360?

With an experience of more than a decade in the diamond industry, Vision 360 has groomed itself as a trustworthy and innovative player in technology. From Vision 360 to introducing Experience Zone, we have always prioritized the customer's needs.

State-of-the-art Manufacturing Facility

We feel pride as we have one of the best manufacturing facilities in the industry. Equipped with the best product line, we design and produce innovative and cutting-edge technology. Our experienced R&D team has expertise in researching and developing instruments that have been a boon to the diamond and gemstones industry.

Delivering Quality

For us, nothing is as valuable as maintaining a quality product. We believe that our seamless and top-notch product line is the result of manufacturing products with world-class raw materials. From microscope lenses to creating the designs of supporting instruments, we ensure to grab raw materials that are top-notch in the industry.

VISION 360°

We have developed a leading-edge, comprehensive diamond photography system, especially for retailers. One of the best technologies, it offers Diamond Optical Performance Image (DOPI) that offers supreme symmetrical features, evaluation of optical performance, and high-quality steady face-up features, including others. The state-of-theart technology introduced for the diamond industry has made a wave as it has changed the viewing experience of the diamond as well as fancy stones that help in easily understanding inclusion with customized magnification in the real world.

With Vision 360, we have contributed mechanisms for B2B and B2C products that help to share diamond inventory 24X7 with the best technology along with easy-to-use plug-ins with all the details (including certificate) in an interactive grid or listing view. The introduction of cloud-based diamond inventory displaying solutions became a boon as it is integrated with password-protecting website listing, detailed diamond pages (diamond DNA), and customized mobile applications.

Micro 360°™

Delivering the finest quality diamonds all around the world is the biggest test. One needs to persevere on the quality, purity, and perfection of each diamond they inspect. Henceforth, we have included the newest product in our product line. More advanced, more reliable, more competent, and more composed- that is what our most advanced solitaire microscope has to offer. One of the most ideal technologies, we introduced the microscopes that help to view the polishing line and diamond's facet easily and without any stress on the analyst's eye. Developed following all the instructions provided by IEEE standards and other recommended standards, the LED lighting is prepared according to the speed of lights. Our research in microscopes made us proud the facility to save 7 programmed lighting settings. It also has the feature of controlling these seven lighting settings through any android device that is connected to WiFi or Bluetooth.

In the jewellery industry, a microscope plays a noteworthy role as a tool. We researched and developed types of microscopes including Solitaire and Advanced Solitaire microscopes. One of the widely used instruments, the Quality Check Microscope Stand, is a prerequisite for the analysis of diamonds that includes clarity, color, finish grade, and the fluorescence of diamonds, to name a few. We have also introduced the most convenient and portable product in our range of products with more competence and include all the features of a small diascope and advanced solitaire microscope.

ZEISS
Premium Business Partner

Measure 360°™

Measure 360 product line is focused on necessary measurement or inspection tools which enhance diamond properties efficiently and increase user productivity & quality. With image processing algorithms to enhance the view, we have given wings to inexperienced polishers by introducing various instruments for polishing. The polisher can take objective decisions without getting tired hence achieving a high level of repeatability.

With the inclusion of Assist + one can easily view very small extra facets that can be polished effortlessly. Therefore, it is less time-consuming and thus increases productivity.

Studio 360°™

It is a platform developed to give the best product experience to customers. We bestow vision, studio, tech, micro, measure, and light to the customers for the perfect product experience as we believe a successful customer experience adds up to the potentiality of buying the product. We have introduced an Experience Zone where the customer can learn more about our products profoundly, analyze, research, and review the equipment we have newly announced. They can have in-depth knowledge about the product, get expert advice's and scrutinize the product themselves.

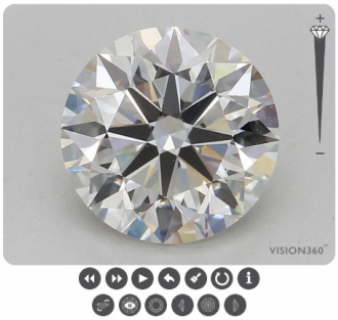

B2B TRADE VIEW

B2B TRADE VIEW + DOPI

B2C TRADE VIEW

We fix the profile according to the requirements of e-commerce and scan the entire vendor inventory with the same profile. One can empower the vendors with the inventory and create a platform without investment and infrastructure. A space beneficial to platform owners for outsourcing without investment, this is also the best platform for multiple vendors where they can manage their online business hassle-free. Whether it is a data security service or in the video, we ensure to host them on the best platform that provides a quick response to our needs.

Jewel Studio

Digitalize Your Inventory *With* Visual Excellence Beyond Expectations

A division of Vision 360, Jewel Studio specializes in providing optimal opportunities for digitalizing your jewellery brand through personalized packages. Our services are designed to not only transition your brand into the digital era but also to safeguard and enhance its intrinsic value, ensuring a seamless and effective digital presence.

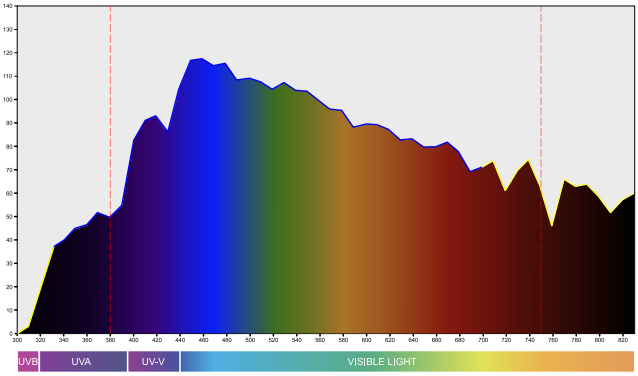

For Product Catalogue

Light 360°™

Light 360 product line is focused on viewing and comfort of inspection of diamonds & gemstones. Since 2000 we have provided the largest number of lights in the diamond industry. One of the oldest services, today Light 360 is one of the trusted services with an advanced and affordable structure in this industry.

With our experience from the past decade, we have designed a revolutionary light source that replicates a vast array of spanning both ultraviolet and visible ranges. This ground-breaking technology precisely matches the diverse spectrum of sunlight seen in different parts of the world at different times of the day. With the integration of the closed-loop system, we ensure precisely repeatable results that meet the highest sunshine standards.

Our goal is to establish a seamless connection between CIE standards and gemstone color standards, providing results widely recognized as Lab, LCH, and CAM 16 Color spaces. The diamond and gemstone industry will be able to rely on embracing global standards for color systems and grading.

Experience Zone

As we believe a successful customer experience increases the potentiality of buying the product, we have introduced an Experience Zone where you can learn more about our product. A place where you can analyze, research, and review the equipment we have introduced. Experience Zone is like an awakening towards the future where you can have indepth knowledge about the product you desire to buy, get expert advice, and scrutinize the product yourself.

After Sale Services

It is not only essential to have a sale of the product, but also the after-sales is as important to us as we believe it is our responsibility to look into every problem faced by our clients while dealing with our products.

Whether it is our microscope products or other instruments or our online services, we are always attentive to our after-sale services.

Design Team

We have an experienced and qualified team that continually works on inventing new technology that revolutionizes the diamond and gemstone industry. At Vision 360, we believe in transforming the industry outlook and making it easily accessible to everyone.

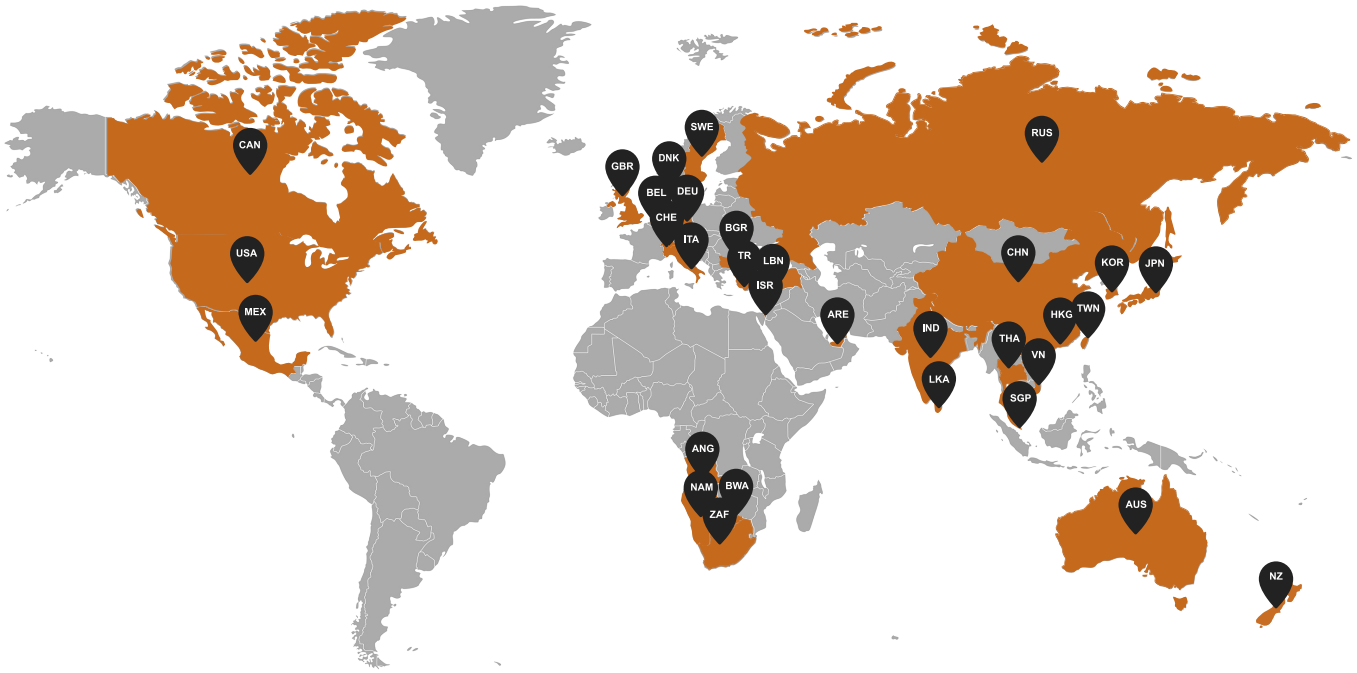

Customer Satisfaction

We have always given priority to our clients as we believe that they are the reason why we are always on toes to give the best quality and innovative products. At Vision 360, client and customer satisfaction encourages us to deliver the best and most innovative products.
