

Treating Departments

178 Patients supported

By PTP In January 2023

Aamir* runs a small business in Chittoor renting out vehicles. His daughter and grandson live with him ever since his son-in-law passed away in an accident. Since birth, his grandson had problems walking due to a deformity in his left leg. The little boy needed a brace to help him walk. He developed foot ulcers which made it painful to wear the brace or to walk. Aamir shares his grandson's journey of healing:

My grandson is the apple of my eye. It always pained me to see him walk with difficulty when he was little. The ulcer on his deformed leg only got worse and had a bad smell. He could not walk without support. I took him to different hospitals but it was not treated right. Last year, we came to CMC Vellore after many friends suggested we try treatment here. When he was 12 years old, we met the team at the Paediatrics Orthopaedic Department in CMC Vellore. I could not hold back my tears when the doctors gave an assurance that a surgery would help my grandson walk. After the surgery, we continued to visit CMC for regular follow up. Now, a year later, my grandson confidently walks by himself.

Aamir & his grandson

Aamir is grateful for CMC's financial support for his grandson's surgery. The little boy is delighted to be back in school after his surgery. When he grows up, he wants to be a business man like his *nanaji* (grandfather)!

Thank you for your thoughtful giving!
