Sandhiya (*name changed*), a homemaker from Andhra Pradesh, lives a simple life with her husband, a daily wage labourer. However, Sandhiya had experienced multiple miscarriages. She even carried two pregnancies to term, but both infants passed away shortly after birth. This **unusual and heart-breaking situation** left the couple emotionally shattered.

When Sandhiya became pregnant in her 40's, they were worried but hopeful for this child who would bring light into their lives. At this time, a well-wisher told them about CMC Vellore. Sandhiya and her husband travelled to CMC and visited the Foetal Medicine Unit at the Department of Obstetrics and Gynaecology.

Due to **high risks** related to her age and previous obstetric history, she was admitted in the general ward. Consults were done with the Medical Genetics unit. With timely and appropriate medical intervention, **they felt reassured**. A few months later, Sandhiya came back to CMC. Despite unexpected complications, our multidisciplinary teams were able to save both mother and baby. Sandhiya delivered a healthy baby of 3 kgs! Her husband shares their joy and gratitude, "We had no hope before coming to CMC, but now our family is blessed with a little one."

Thank you for your thoughtful giving!
