**Question Number : 1 Question Id : 3909006121 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical**

Correct Marks : 1 Wrong Marks : 0

If α, β are the roots of $ax^2 + bx + c = 0$ then $\alpha^3 + \beta^3$ is equal to ...

Options :

1.
$$\frac{3abc + b^3}{a^3}$$

2.
$$\frac{3abc - b^3}{a^3}$$

3.
$$\frac{2ac - b^2}{c^2}$$

4.
$$\frac{b^2 - 2ac}{c^2}$$

Question Number : 2 Question Id : 3909006122 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

If second term of a G.P is 24 and fifth term is 81 then the first term is ...

Options :

1. 20

2. 18

3. 16

4. 14

Question Number : 3 Question Id : 3909006123 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

The number of arrangements that can be formed by taking all the letters $\{T, U, E, S, D, A, Y\}$...

Options :

1. 2040

2. 5040

3. 1200

4. 4020

Question Number : 4 Question Id : 3909006124 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

2015	2016	2017
2016	2017	2018
2017	2018	2019

Options :

1. 2017

2. 2018

3. 2019

4. 0

Question Number : 5 Question Id : 3909006125 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

A dice is tossed thrice. If getting a four is considered a success. The mean of the probability distribution of number of successes is ...

Options :

1. $\frac{1}{6}$

2. $\frac{1}{3}$

3. $\frac{1}{2}$

4. $\frac{5}{6}$

Question Number : 6 Question Id : 3909006126 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Which of the following are the normal equations of the straight line $y = a + bx \dots$

Options :

1. $\sum xy = na + b \sum x, \sum xy = \sum x + \sum x^2$

2. $\sum y = ax + b \sum x^2, \sum xy = a \sum x + b \sum x^2$

3. $\sum y = a + b \sum x, \sum y = a \sum x + b \sum x^2$

4. $\sum y = na + b \sum x, \sum xy = a \sum x + b \sum x^2$

Question Number : 7 Question Id : 3909006127 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

If the probability density function of a random variable is given by

$$f(x) = \begin{cases} \frac{1}{2} \sin x, & 0 \leq x \leq \pi \\ 0, & \text{otherwise} \end{cases}$$
 then the mean of the distribution is ...

Options :

1. 0

2. $\frac{\pi}{2}$

3. 2π

4. $\frac{1}{2}$

Question Number : 8 Question Id : 3909006128 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Chi-square (χ^2) distribution is used to test the

Options :

1. significance of sample variance

2. independence of attributes in a contingency table

3. goodness of fit

4. significance of sample variance, independence of attributes in a contingency table and goodness of fit

Question Number : 9 Question Id : 3909006129 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

If $A = \begin{bmatrix} a & b \\ b & a \end{bmatrix}$ and $A^2 = \begin{bmatrix} \alpha & \beta \\ \beta & \alpha \end{bmatrix}$ then ...

Options :

1. $\alpha = 2ab, \beta = a^2 + b^2$

2. $\alpha = a^2 + b^2, \beta = a^2 - b^2$

3. $\alpha = a^2 + b^2, \beta = 2ab$

4. $\alpha = a^2 + b^2, \beta = ab$

Question Number : 10 Question Id : 3909006130 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Mean and standard deviation of a random variable X are 5 and 4 respectively then $E(X^2) = \dots$

Options :

1. 16

2. 25

3. 9

4. 5

Correct Marks : 1 **Wrong Marks :** 0

A programming style that does not include any shortcuts to improve performance, but instead relies on sheer computing power to try all possibilities until the solution to a problem is found is called

Options :

1. Recursive algorithm

2. Greedy algorithm

3. Backtracking algorithm

4. Brute Force algorithm

Question Number : 13 Question Id : 3909006133 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Nibble is a series of _____ bits

Options :

1. 4

2. 8

3. 6

4. 16

Question Number : 14 Question Id : 3909006134 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

What will be the output of the following C code?

```
1. #include <stdio.h>
2. struct student
3. {
4.     char *name;
5. };
6. struct student s;
7. struct student fun(void)
8. {
9.     s.name = "newton";
10.    printf("%s\n", s.name);
11.    s.name = "alan";
12.    return s;
13. }
14. void main()
```

```
15. {
16.     struct student m = fun();
17.     printf("%s\n", m.name);
18.     m.name = "turing";
19.     printf("%s\n", s.name);
20. }
```

Options :

1. newton alan alan

1.

2. alan newton alan

2.

3. alan alan newton

3.

4. compile time error

4.

Question Number : 15 Question Id : 3909006135 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Which was the first purely object oriented programming language developed?

Options :

1. Java

1.

2. C++

3. SmallTalk

4. Kotlin

Question Number : 16 Question Id : 3909006136 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

The OS that allows different parts of a single program to run concurrently is called

Options :

1. Multiprogram

2. Multiprocessing

3. Multithreading

4. Multi-user

Question Number : 17 Question Id : 3909006137 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Choose the correct option as an inference from the following workspace view

Workspace				
Name	Value	Size	Bytes	
ans	3.1416	1x1	8	
ap	1x1 sym	1x1	112	
abc	'pi'	1x2	4	
p	10	1x1	8	

Options :

1. 'ans', 'p' and 'ap' are double variables

2. 'ans' and 'p' are double variables while 'c' is a character variable

3. 'ap' is symbolic object, 'c' is a double variable

4. 'c' is a symbolic character

Question Number : 18 Question Id : 3909006138 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes

Correct Marks : 1 Wrong Marks : 0

The ~ is

Options :

1. Quaternary operator

2. Relational Operator

3. Arithmetic Operator

4. Unary Operator

Question Number : 19 Question Id : 3909006139 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Competition for light, nutrients and space is most severe between

Options :

1. closely related organisms growing in different niches

2. closely related organisms growing in the same area/niche

3. distantly related organisms growing in the same habitat

4. distantly related organisms growing in different niches.

Question Number : 20 Question Id : 3909006140 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

In a true ecosystem

Options :

1. primary consumers are least dependent upon producers
2. primary consumers out-number producers
3. producers are more than primary consumers
4. secondary consumers are the largest and most powerful.

Question Number : 21 Question Id : 3909006141 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Gas released during Bhopal tragedy was

Options :

1. methyl isocyanate
2. potassium isothiocyanate
3. sodium isothiocyanate
4. ethyl isothiocyanate.

Question Number : 22 Question Id : 3909006142 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Homeostasis refers to the

Options :

1. tendency of biological systems to change with change in environment
2. tendency of biological systems to resist change and maintain a constant internal environment

3. disturbance in the self regulatory system and natural controls

4. biotic materials used in homeopathic medicines

Question Number : 23 Question Id : 3909006143 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Food chain in which microorganisms breakdown the food formed by primary producers is termed

Options :

1. parasitic food chain

2. detritus food chain

3. consumer food chain

4. predator food chain

Question Number : 24 Question Id : 3909006144 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

The disease caused by the consumption of fish contaminated by mercury compounds is called

Options :

1. Osteosclerosis

2. Hashimoto's oxidase

3. Bright's disease

4. Minimata disease

Question Number : 25 Question Id : 3909006145 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Which of the following pairs is a sedimentary type of biogeochemical cycle?

Options :

1. phosphorus and nitrogen
2. phosphorus and sulphur
3. oxygen and nitrogen
4. phosphorus and carbon dioxide

Question Number : 26 Question Id : 3909006146 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

The mottling of teeth is attributed to the long term drinking of water containing excess amounts of

Options :

1. fluorine
2. boron
3. mercury
4. chlorine

Question Number : 27 Question Id : 3909006147 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

The 10% energy transfer theory of food chain was propounded by

Options :

1. Lindemann
2. Tansley

3. Stanley

4. Weismann

Question Number : 28 Question Id : 3909006148 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

The fact that no two species can co-exist for long duration in the same niche or habitat is explained by

Options :

1. Allen's law

2. Gause's hypothesis

3. Dollo's rule

4. Weisman's theory

Question Number : 29 Question Id : 3909006149 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Which one of the following statements is correct?

Options :

1. *Azotobacter* sp. fixes atmospheric nitrogen in root nodules of plants

2. Species of *Anabaena* is an important mobilizer of phosphates for plants

3. Maize cultivation warrants the use of chemical fertilizers

4. Excessive influx of chemical fertilizers may lead to eutrophication of water bodies

Question Number : 30 Question Id : 3909006150 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

If the mean and the median pertaining to a certain character of a population are of the same value, which of the following is most likely to occur?

Options :

1. Bi-modal distribution

2. T-shaped curve

3. Skewed curve

4. Normal distribution

Question Number : 31 Question Id : 3909006151 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

The most common indicator organism that represents polluted water is

Options :

1. *Vibrio cholerae*

2. *Entamoeba histolytica*

3. *Escherichia coli*

4. *Salmonella enterica*

Question Number : 32 Question Id : 3909006152 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Lipopolysaccharide in cell walls is characteristic of

Options :

1. Gram-positive bacteria

2. Gram-negative bacteria

3. Fungi

4. Algae

Question Number : 33 Question Id : 3909006153 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

In fluorescence microscopy, which of the following filters all but the blue light?

Options :

1. Exciter filter

2. Barrier filter

3. Dichoric mirror

4. Mercury arc lamp

Question Number : 34 Question Id : 3909006154 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

K_{eq} is greater than 1.0 when

Options :

1. standard free energy change is negative

2. standard free energy change is positive

3. chemical reaction proceeds in reverse direction

4. products are not formed

Question Number : 35 Question Id : 3909006155 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Vaccination was invented by

Options :

Jenner

1.

Pasteur

2.

Watson

3.

Crick

Question Number : 36 Question Id : 3909006156 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

The upper region of the trickling filter is favorable for the growth of

Options :

1. fungi

2. protozoa

3. algae

4. bacteria

Question Number : 37 Question Id : 3909006157 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Which of the following is used for the recovery of yeast cells?

Options :

1. Fermenter

2. Centrifuge

3. Filter press

4. Mash storage

Question Number : 38 Question Id : 3909006158 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Which of the following is characteristic of sanitizer?

Options :

1. Destroys all microbial forms

2. Prevents the growth or action of microorganisms

3. Reduces the microbial population to safe levels

4. Kills all the bacteria and the bacterial spores

Question Number : 39 Question Id : 3909006159 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Alginic acid is obtained from

Options :

1. Brown algae

2. Red algae

3. Yellow-green algae

4. Golden algae

Question Number : 40 Question Id : 3909006160 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

In which of the phase bacterial growth, the secondary metabolites are produced?

Options :

1. Lag phase

2. Log/Exponential phase

3. Stationary phase

4. Death phase

Question Number : 41 Question Id : 3909006161 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

The portion of the growth curve where a rapid growth of bacteria is observed is

Options :

1. Lag phase

2. Logarithmic phase

3. Stationary phase

4. Decline phase

Question Number : 42 Question Id : 3909006162 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Which bacteria appear purple-violet after staining?

Options :

1. Gram positive

2. Gram negative

3. Both Gram positive and Gram negative

4. Neither Gram positive nor Gram negative

Question Number : 43 Question Id : 3909006163 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Which of the following is used as media for fungal growth?

Options :

1. Nutrient broth
2. Luria-Bertani media
3. Potato Dextrose Agar (PDA) media
4. Mac Conkey Agar media

Question Number : 44 Question Id : 3909006164 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

In which one of the following the Biochemical Oxygen Demand of sewage (S), distillery effluent (DE), paper mill effluent (PE) and sugar mill effluent (SE) is arranged in an ascending order?

Options :

1. $SE < PE < S < DE$
2. $PE < S < SE < DE$
3. $S < DE < PE < SE$
4. $SE < S < PE < DE$

Question Number : 45 Question Id : 3909006165 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Photochemical smog pollution does not contain

Options :

1. Peroxy acyl nitrate
2. Ozone
3. Nitrogen dioxide

4. Carbon dioxide

Question Number : 46 Question Id : 3909006166 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Most hazardous metal pollutant of automobile exhausts is

Options :

1. Mercury

2. Cadmium

3. Lead

4. Copper

Question Number : 47 Question Id : 3909006167 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Aquatic weeds are used in controlling water pollution as

Options :

1. colour removers

2. biological filters

3. pH stabilizers

4. upgrading treatment units

Question Number : 48 Question Id : 3909006168 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Which of the following is a primary pollutant in atmospheric air?

Options :

1. Cl_2

2. SO_3

3. Nitrates

4. Sulphates

Question Number : 49 Question Id : 3909006169 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Mesothelioma is caused by toxicity of

Options :

1. Mercury

2. Lead

3. Arsenic

4. Carbon monoxide

Question Number : 50 Question Id : 3909006170 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Which of the following is designed to reduce the roadside noise?

Options :

1. Sound tube

2. Ear buds

3. Ear repellent

4. Noise repellent

Question Number : 51 Question Id : 3909006171 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Gases that contribute to the greenhouse effect on Earth are, in order of greatest to smallest in importance,

Options :

1. CO₂, H₂O, CH₄

2. H₂O, CO₂, CH₄

3. CH₄, CO₂, H₂O

4. H₂O, CH₄, CO₂

Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

The order of the atmospheric layers, starting from closest to the surface to the top of the atmosphere, is

Options :

1. Mesosphere, Troposphere, Thermosphere, Stratosphere

2. Troposphere, Stratosphere, Mesosphere, Thermosphere

3. Thermosphere, Mesosphere, Troposphere, Stratosphere

4. Troposphere, Mesosphere, Stratosphere, Thermosphere

Question Number : 53 Question Id : 3909006173 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

What is geostrophic balance?

Options :

1. The exact balance of incoming SW and outgoing LW radiation at the top of the atmosphere.

2. The exact balance of vertical pressure gradient and gravity in the atmosphere.

The exact balance of the Coriolis force, horizontal pressure gradient force and friction.

The exact balance of the Coriolis force and the horizontal pressure gradient force

4.

Question Number : 54 Question Id : 3909006174 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Who discovered the ozone layer?

Options :

1. Henri son & Charles Fabry

1.

2. Carl Sagan & Charles Fabry

3. G.M.B Dobson

3.

4. Carl Sagan & G.M.B Dobson

Question Number : 55 Question Id : 3909006175 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Thermal pollution of water is mainly reflected by the

Options :

1. increase in the solubility of oxygen

1.

2. decrease in the solubility of oxygen

2.

3. significant increase in evaporation of water

3.

4. decrease in dissolved salts

4.

Question Number : 56 Question Id : 3909006176 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

What does the ratio of the mass of water vapour to mass of air indicate?

Options :

1. Absolute humidity
2. Specific humidity
3. Relative humidity
4. Approximate humidity

**Question Number : 57 Question Id : 3909006177 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical**

Correct Marks : 1 Wrong Marks : 0

Choose the correct relationship between turbidity and TSS for a settled secondary effluent

Options :

1. $TSS = (2.3) \times \text{Turbidity}$
2. $TSS = (2.0) \times \text{Turbidity}$
3. $TSS = (2.5) \times \text{Turbidity}$
4. $TSS = (1.3) \times \text{Turbidity}$

**Question Number : 58 Question Id : 3909006178 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical**

Correct Marks : 1 Wrong Marks : 0

How is hardness of water represented?

Options :

1. $\text{Hardness} = 2 (\text{Ca}^{2+}) + 2(\text{Mg}^{2+})$
2. $\text{Hardness} = \text{Ca}^{2+} + 2 (\text{Mg}^{2+})$

3. Hardness = $3(\text{Ca}^{2+}) + \text{Mg}^{2+}$

4. Hardness = $3(\text{Ca}^{2+}) + 2(\text{Mg}^{2+})$
