

Dear Parents

I would like to update you about the following;

- We tried Google Meet today for our online classes; unfortunately a lot of us could not connect as the app is very sensitive to network issues, links, and passcodes
- Hence, we will continue using zoom for online classes - for all subjects, including Hindi
- You will continue receiving messages for the Zoom online class, just as you used to

I would also like to request you to;

- Download Google Classroom as soon as possible
- Register your son in class 3, using his school email address and password
- After that, please enroll him into each subject using these class codes:
- English 1 - **hhi6wth**
- English 2 - **vni4xpn**
- Mathematics - **k4cbayq**
- Science - **gontrak**
- Social Studies - **m24rjcy**

Most of you have already started with Google Classroom, and I appreciate the prompt response. It is important to keep your son's work updated through Google classroom by submitting the assignments before the due dates.

The classroom app is a great way to stay connected, just like we were in our actual classrooms in school. It also ensures that all the boys in the class are completing their work at the same pace so that they are in a better position to give online exams whenever we plan for the same.

Once again, thank you for all your support.

Regards
Ms Crescentia
