

Title: How can I append all database for client pc (OPTIMUM)

Normal way (append one by one):

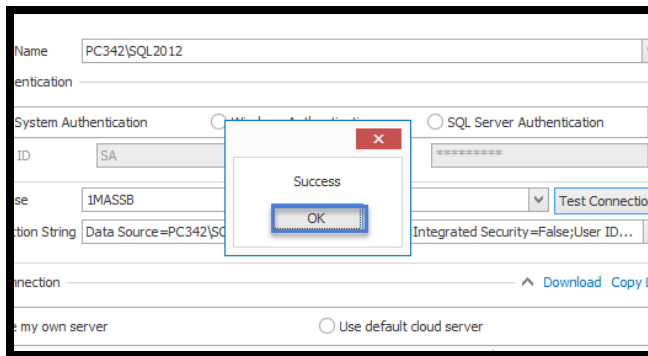

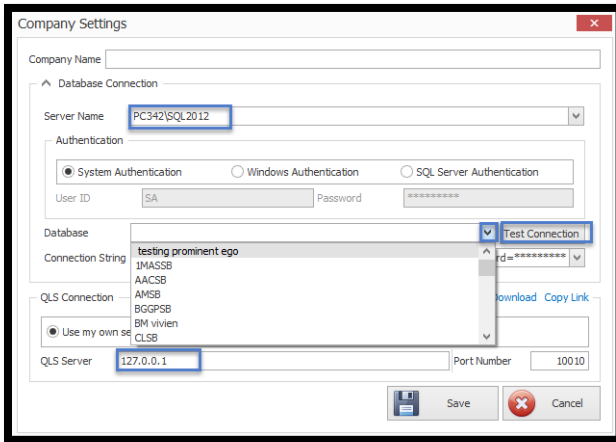

1. Click to open Database wizard

2. Click on Append

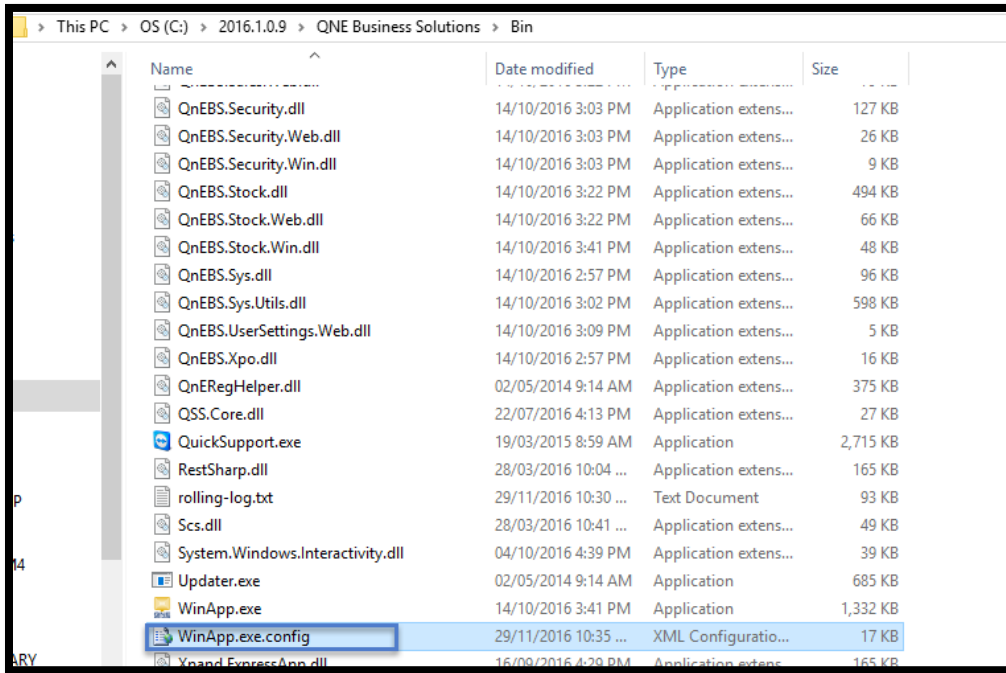

3. Key in Server Name , server IP > select database > Test connection > click OK

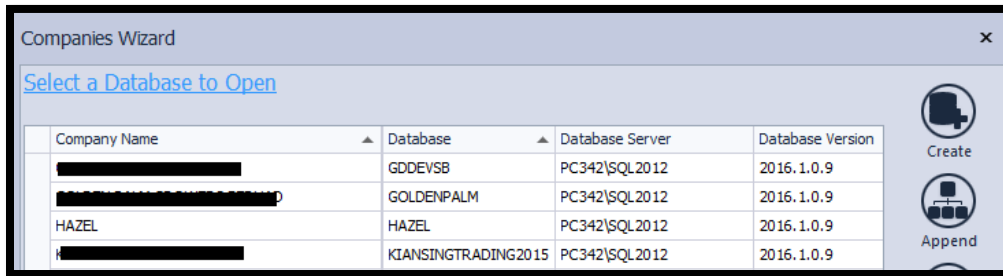

BUT if there are so many database, append one by one might be tedious.

SOLUTION:

1. Go to server pc > QNE folder (depends on where QNE located)
*Local disk C > QNE Business Solution (my QNE folder) > Bin
2. Search > WinApp.exe.config

3. Copy this file > paste to others client pc

Result as shown above
