access information

60%

leave requests  
raised through bot

## Problem Statement:

- Difficulty in reviewing leave, travel and overtime requests
- As a policy, CEO's/Director's time was required to approve high-value travel requests
- Issues in the attendance system for operators
- Employees faced difficulty to access relevant HR information on time

## Post Implementation:

- Ubiquitous access to the Leena AI bot solved the reviewing request problem effectively
- 60% reduction in the CEO's/Director's time and effort in approving high-value travel requests
- Resolved issues in the attendance system post integration with the bot
- 50% travel requests raised through bot

“Organisations must continuously experiment and fail fast or scale fast to be ahead of the curve. One also needs a good partner who shares the curiosity of solving business problems that were limited by the technology of the past. We found the right partner in Leena AI to collaborate and convert the ideas using the AI powered Chatbots, into the tangible results for the business.”

- Alok Saxena, Associate Vice President
