

## About Lyktek.io

Lyktek.io is a technology startup that believes in creating a quality-centric, values-driven and flexible work environment. Our core values are dependability, teamwork, creativity, growth and happiness, and we believe in hiring candidates with the best potential, and providing them with the right environment to belong, thrive and truly enjoy being a part of our work family.

## About the role

Lyktek.io is working with multiple Australian clients who are building web, mobile and embedded applications in e-commerce, analytics and smart home domains. The applications typically use an open source technology stack and run on cutting-edge cloud infrastructure. We need a reliable captain to steer the application development efforts and upkeep our reputation as a dependable, collaborative, high quality technology partner .

This is a full-time, work-from-home position and we support flexible work arrangements as a core principle. Lyktek.io will cover all internet and mobile network expenses associated with work. This role will be interacting with multiple team members and clients from Australia to keep them across the various initiatives in flight. The role will also manage and mentor multiple delivery teams, coordinate their efforts, and resolve any blockers they face.

## Skills and Experience

### Required Skills

- At least 10 years of industry experience, and 5 years of experience in leading globally distributed teams
- Hands-on development experience in Node.js, Java or an equivalent open-source technology
- Experience in designing and architecting large scale distributed systems
- Solid working experience in fast-paced agile environments using test-driven development, continuous integration and continuous deployment
- Ability to multi-task and steer multiple projects in parallel
- Exposure to at least one public cloud such as Amazon Web Services, Google Cloud, Microsoft Azure, etc.
- Strong analytical and troubleshooting skills
- Ability to work effectively in a globally distributed team
- High personal integrity, and ability to earn trust from others
- Strong interpersonal and communication skills
- Commitment to learning new technologies as needed
- Ability to work independently and productively in a challenging, constantly-changing environment

## **Preferred Skills**

- Experience in building senior engineering teams from the ground-up
- Experience in training and grooming engineers in various technologies
- Experience working in a smaller scale company with a growing team and client base
- Exposure to Shopify app development ecosystem including Polaris, Shopify APIs, using application proxies, and the Shopify application certification process
- Experience in security frameworks such as OAuth 2 and Open SSO
- Experience in understanding and writing API specifications using tools such as Swagger
- Exposure to AWS infrastructure and distributed application patterns including serverless framework, and IaaS tools such as Terraform or CloudFormation
- Exposure to the e-commerce and IoT domains
