

HEALTH TODAY. HAPPINESS TOMORROW.

Blockchain Powered Ecosystem for Total Health

NHCT - NanoHealthCareToken

NHCT (NanoHealthCareToken) is a blockchain based healthcare ecosystem which introduces the concept of Total Health. Our ecosystem connects users, medical and wellness service providers and insurance firms for personalizing healthcare to be more effective and efficient.

Personalized Healthcare

- Incentivizes users to be fit & healthy
- Focus on Total Health
- AI based recommendation engine for preventive care

Health Systems (Provider + Payer)

- Leverages Health Coaches to drive continuous care
- Safe and secure health data storage
- Verified data for personalized plans and research

Q1 Launch Diet Services

2020

Q1 EHR on Blockchain

Why did we decide to use Blockchain?

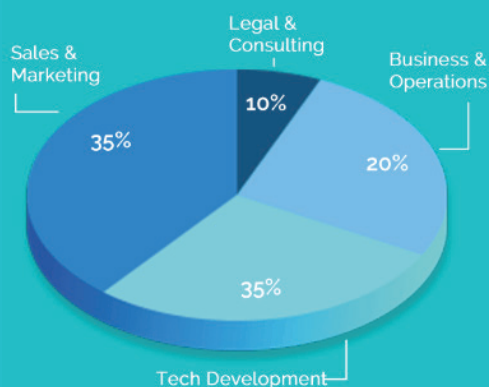

- Scale NanoHealth's value proposition globally across users, payers and providers
- Use blockchain to store health and wellness data securely and safely
- Incentivize users to create 100% verified medical data
- Reduced transaction and overhead costs
