

WINDS, STORMS AND CYCLONES

Subtopic: Wind currents are generated due to uneven heating on earth.

Section 1

1 Mark T for True or F for False.

1 a. Monsoons means seasons.

1 b. Rains often create solutions to problems.

2 Choose the correct answer.

Which of the following statements are true?

- a) The regions close the equator have more heat from the sun.
- b) The temperature is more on the land than near the oceans.
- c) Both a and b.
- d) None of the above.

Section 2

3 Fill in the blanks.

In winter, the direction of the wind flows from _____.

4 Match the following

4 a. On either side of the equator - the temperature is 60 degrees.

4 b. At the poles - the temperature is 0 - 30 degrees.

Section 3

Answer the questions in brief.

5. What are called as monsoon winds?

WINDS, STORMS AND CYCLONES

Subtopic: Wind currents are generated due to uneven heating on earth.

6. What is called as rain?

7. What are the merits of rains?

8. List the demerits of rains.

Section 4

Answer the questions in detail.

9. Explain in detail the wind currents generated due to uneven heating between the equator and the poles.
