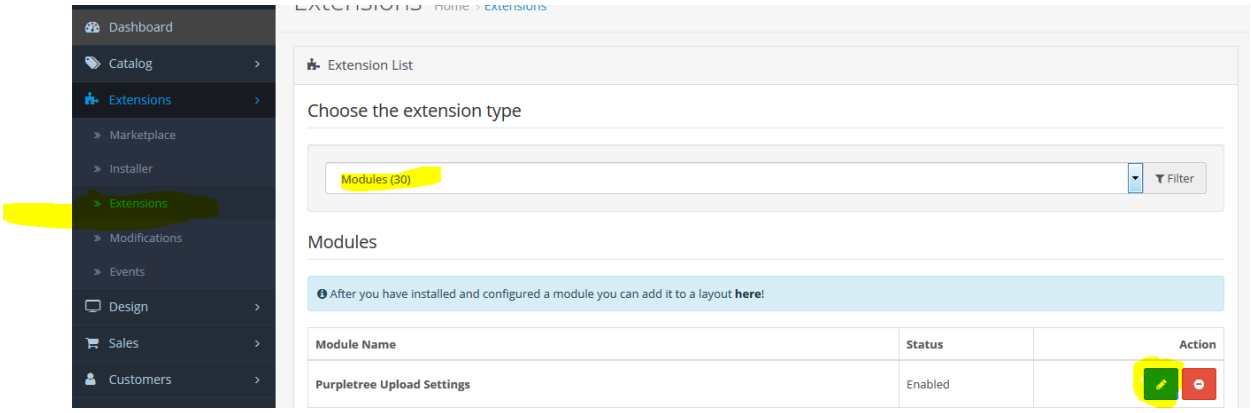
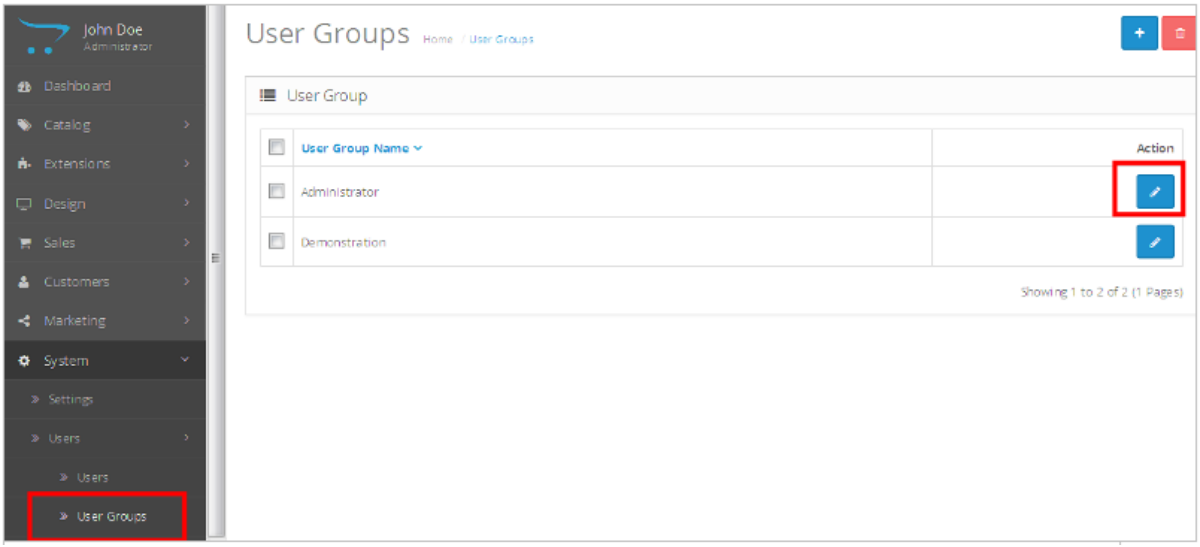
Support 18

Configuration

- Install the extension from Admin > Extensions >Installer.
- Go to Admin > Extensions > Extensions > Modules > Purpletree Upload Settings.

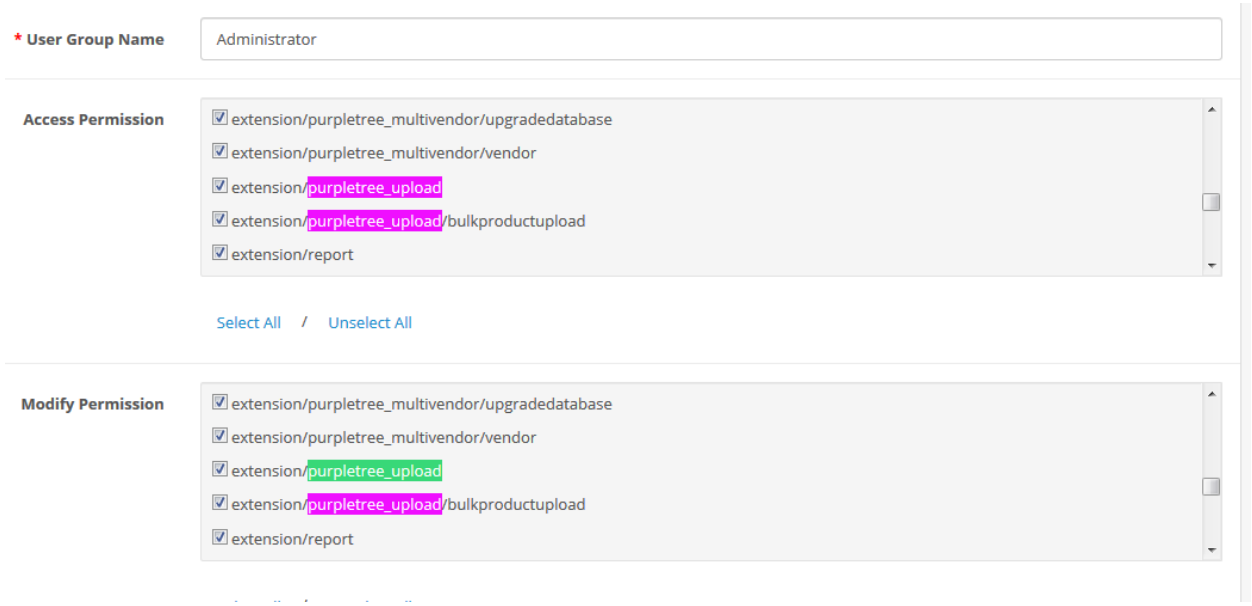


- we need to give permission for the module to Administrators of the store.



- Go to “System -> Users -> User Group > Edit Administrator” as shown below.
- Give Access and Modify Permission to following paths
  - extension/purpletree_upload
  - extension/purpletree_upload/bulkproductupload

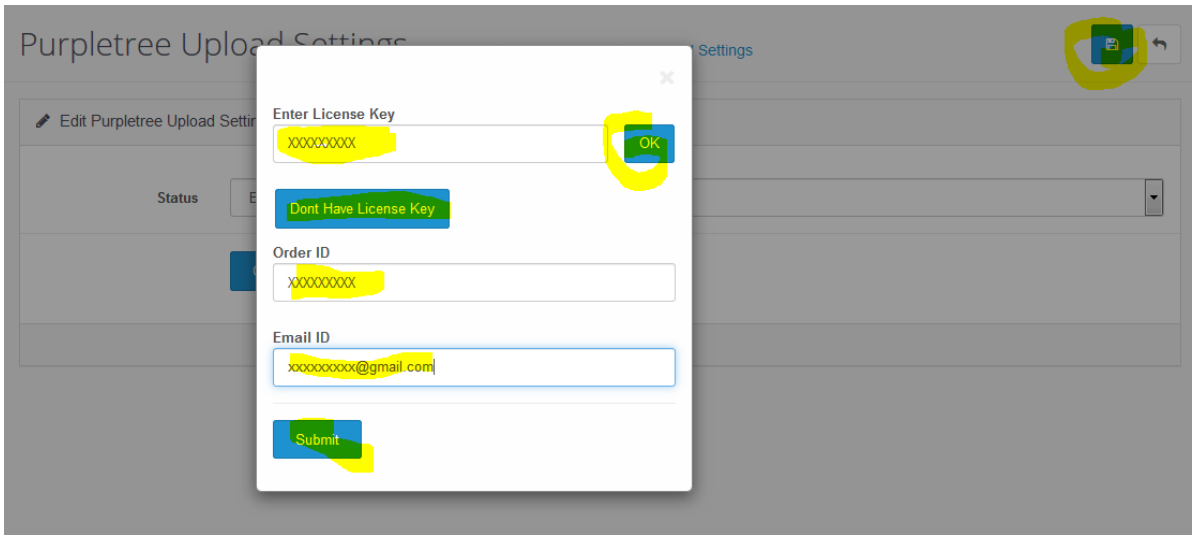
- extension/module/purpletree_upload



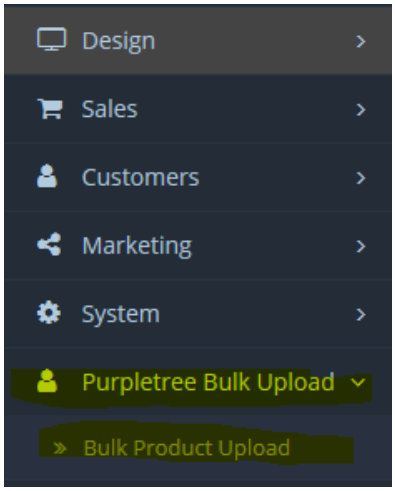
- Go to Admin > Extensions > Extensions > Modules > Purpletree Upload Settings.
- Click on edit. Enable the module.
- Click on Get License/Change License key.
- Enter License key – This key is provided when you purchase the extension.

  or

- Enter your Order ID which was generated when you placed an order for our extension and “Email ID”. Click on Submit Button.



- Now Click on save button
- Now New menu will appear on Admin left panel with Purpletree Bulk Upload Menu and Bulk Product Upload.



Extension Supports Multiple Languages

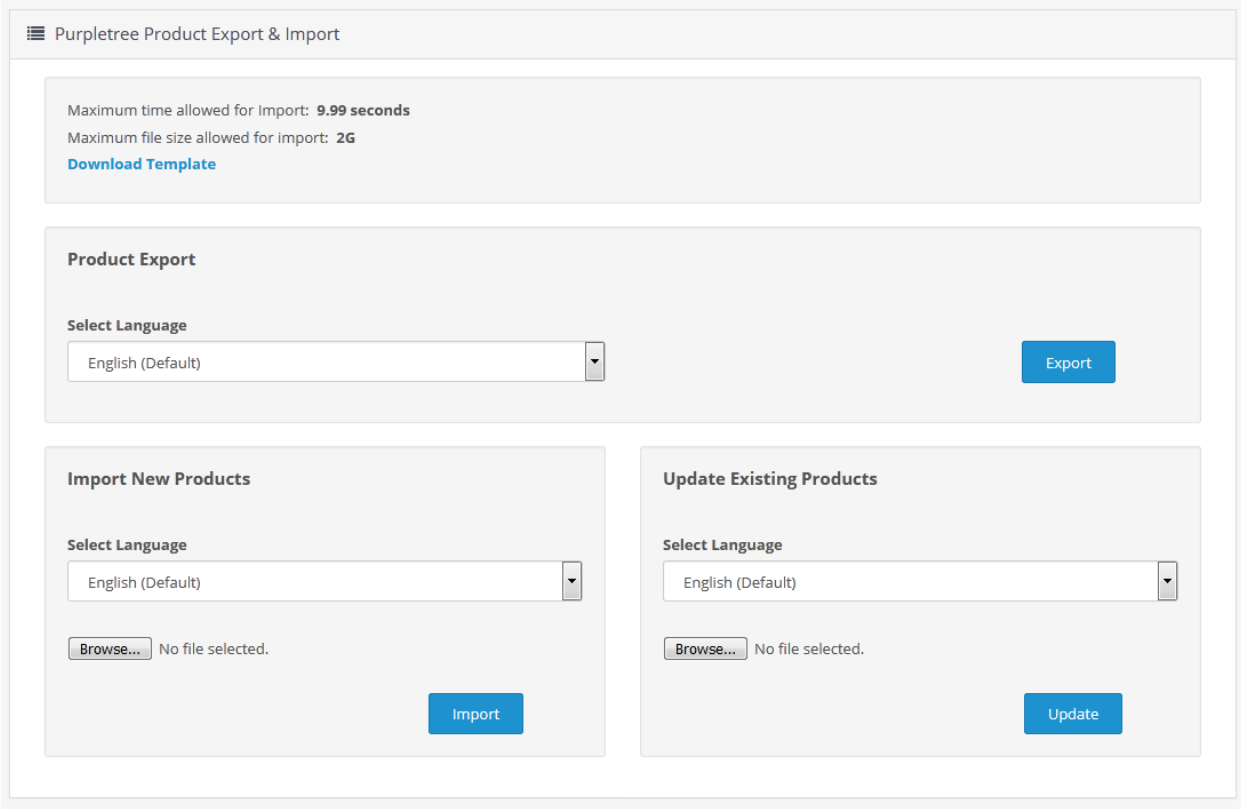
This extension provides full support for the following languages, i.e., these languages are built in.

Just change the languages from admin settings, and you are done.

- French
- German
- Arabic
- Portuguese
- Turkish
- Russian

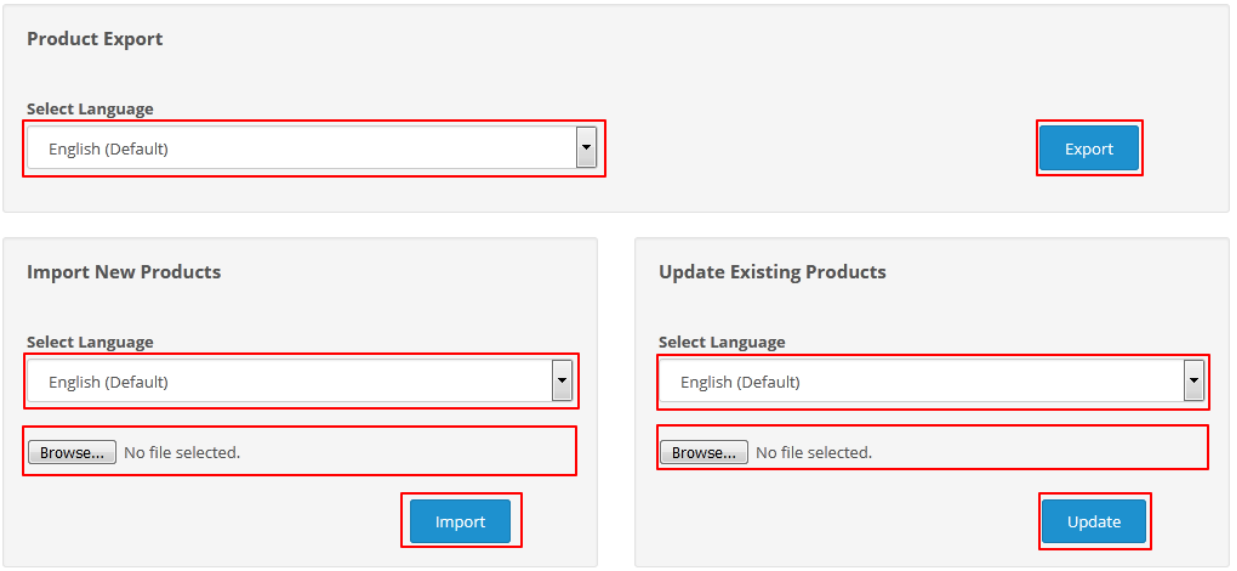
Usage Instructions

Admin can Export and Import Products data.



- Login to admin Panel >Purpltree Bulk upload> Bulk Product Upload.
- On top it shows **Maximum time allowed for upload** and **Maximum file size allowed for upload**. Make sure values are high enough configured on your server for bulk data to import.
- **Export Data -** Select Language from dropdown and click on Export button to Export Data.
- **Import New Products Data –** Use downloaded template data sheet to import new products. Click on import button. Admin will have to use 'Import new product' section to import new products.
    - Select Language from list.
    - If you want to add new product data then the product id will work as a reference id.
    - As Explained below in Excel sheet there are 13 tabs. In **General and Data** Tab if any error occurs to insert or update data. No data row will be inserted or updated for that particular product id in any of the tabs afterwards.

- **Updating Existing Products Data –** Use Exported data sheet to update existing products or to edit any products. Exported Data sheet will have 13 tabs for all data.
    - Select Language from list.
    - If you want to update data and not sure if it already exits simply use exported sheet format and update data accordingly. Click on update button.
    - As Explained below in Excel sheet there are 13 tabs. In **General and Data** Tab if any error occurs to update data. No data row will be inserted or updated for that particular product id in any of the tabs afterwards.



- **Export/Import Excel Sheet Data –** Excel Sheet format and tabs data. There are 13 tabs. In **General and Data** Tab if any error occurs to insert or update data. No data row will be inserted or updated for that particular product id in any of the tabs afterwards.

    - **General –** The data in this tab is to be entered same as entered in General Tab of add/edit product. If any validation failed for any particular product id in this tab, no data will be inserted/updated for any of the tabs for that particular product id.
