## INSTALLATION INSTRUCTIONS

1. Create the Directorystructure `app/code/Purpletree/Marketplace/`.
  - This means you have to first move to `app/code/` directory.
  - Now create directory `Purpletree` from inside `app/code/` directory.
  - Now move to `app/code/Purpletree`, and create a directory named `Marketplace`.
2. Unpack the extension zip file inside the newly created `app/code/Purpletree/Marketplace/` directory.

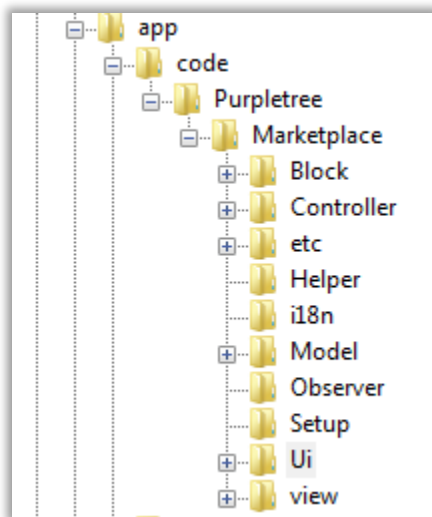

Folder Structure of extension in Magento 2 root is following:

`<Magento Root>/app/code/Purpletree/Marketplace/controller`

And

`<Magento Root>/app/code/Purpletree/Marketplace/block`

Directories.

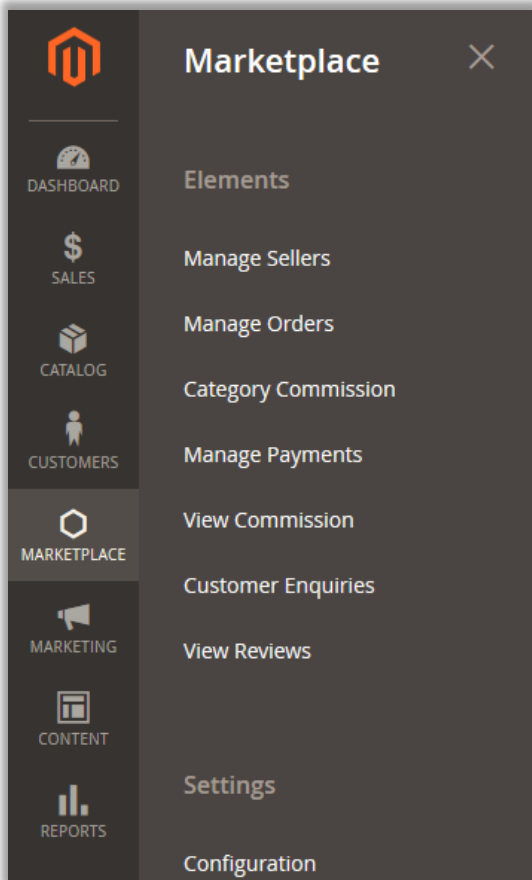

3. From shell/command prompt, run following commands on Magento root directory:
  - php bin/magentosetup:upgrade
  - php bin/magentosetup:static-content:deploy
  - php bin/magentoindexer:reindex
4. Make sure Magento Cron script is set and running fine. This is very important.

Instructions: <https://devdocs.magento.com/guides/v2.0/config-guide/cli/config-cli-subcommands-cron.html>

## CONFIGURATION

On successful installation, a new Menu will appear in Magento Admin's left panel with name of **Marketplace**. It will have following sub menus

- Marketplace
  - Elements
    - Manage Sellers
    - Manage Orders
    - Category Commission
    - Manage Payments
    - View Commissions
    - Customer Enquires
    - View Reviews
- Settings
  - Configuration

## To Configure and Enable the Extension

- Go to Marketplace>Settings >Configuration.
- In “General Configuration”, Set “Module Enable” to Yes.
- Now Enter License key you get with this extension in License key field. **(required field)**  
If you haven’t received license key, please contact our support team.
- License Status – Default it is set “To be validated”. It will get validated once you enter Valid License key.
- **Status for which Commission will calculate** –Select Status for which commission is to be calculated. Commission will only calculate if Admin Set the seller order status to this particular status for any order.
- **Commission** – Enter Commission for admin for each product sale of Seller product in percentage. Default is set to 10.
- **Allow Seller to Manage Order**–Set it to “Yes” if admin want Seller to change seller order status and generate seller order Invoice,of the order of Customer.
- **Seller Approval Required**–Set it to “Yes” id admin wants to approve the seller once it is registered.
- **Product Approval Required**– Set it to “Yes” id admin want to “Enable” each product added by seller, So that products will be visible on website only after admin approval.

- **Allow Category for Seller**– Select the categories to which seller can assign the product. Category selection for each seller is also available further explained in this document.
- **Fields to show on Storepage** – Show Following fields data on Seller store page.
  - Store Email
  - Store Phone
  - Store Address

**Note: Valid License Key is required to save any configuration changes. Please contact our helpdesk if you have not received the license key.**

#### Seller Review

Approval from Admin  
[global]

Yes

## ADMIN OPTIONS

### BULK IMPORT PRODUCTS

Admin can bulk import products along with seller ID, to save hassle of manually assigning products to sellers.

Steps are:

1. Create Magento product import sheet as per Magento product csv format. More details here: [https://docs.magento.com/m2/ce/user\\_guide/system/data-import.html](https://docs.magento.com/m2/ce/user_guide/system/data-import.html)
2. In this product sheet, create 2 columns with heading is\_seller\_product and seller\_id.
3. For all products, set value of is\_seller\_product to 1.
4. For all products, set value of seller\_id to the id of the seller.

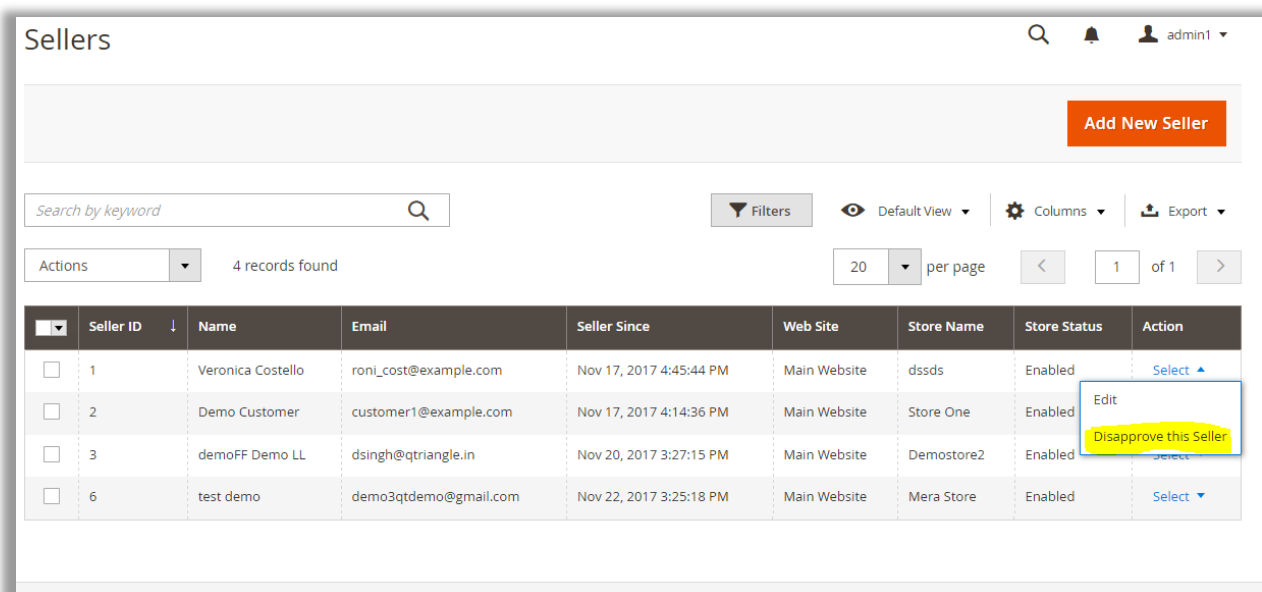

Note: The seller ID is numeric Id which you see on browser address bar when editing seller info.

Now after import completion, all products will be connected with the given sellers.

Note: As of now, **Sellers** cannot do bulk import of products from Marketplace module.

### MANAGE SELLERS

Here admin can view the sellers registered with website. Admin can approve or disapprove any seller from list.

**Sellers** admin1

## WHEN AND HOW IS THE COMMISSION CALCULATED

Commission for any product is calculated only when **“Seller Status”** of the order has been set to **completed** or as defined in Configuration. As soon as Admin Change the Seller order status admin will get the commission calculated for that order.

Commission can be set based on 3 criteria:

- a) Commission on per category basis – applicable to all products in a category
- b) Commission on per seller basis – applicable to all products of a seller
- c) Commission on global basis – applicable to all products on the website

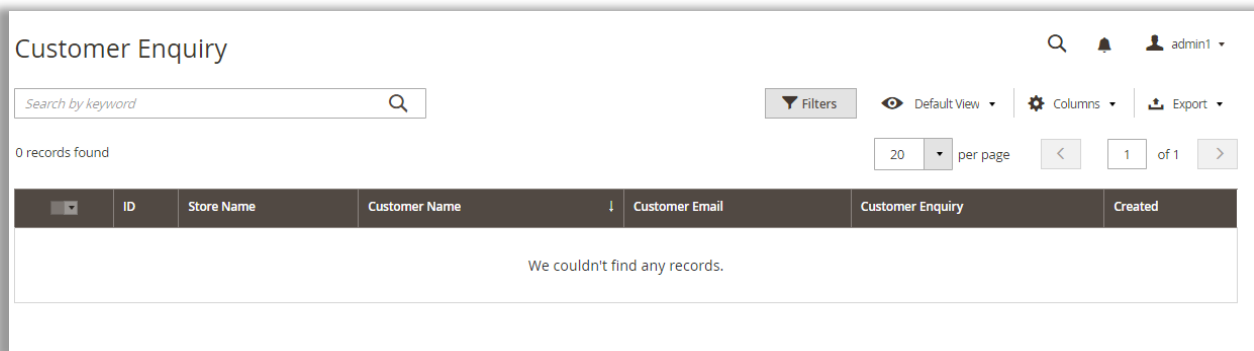

Order of commission calculation is a -> b -> c. This means commission from category is checked very first. If any product has commission set for its category, it is applied. In case a product falls in more than one category having commission, maximum value of commission is selected.

If category commission is not defined, then system looks for commission of the seller for particular product. If that is also not defined, global commission value is applied as set in Configuration.

---

## CUSTOMER ENQUIRES

Here admin can view enquires raised by customer to any particular seller.

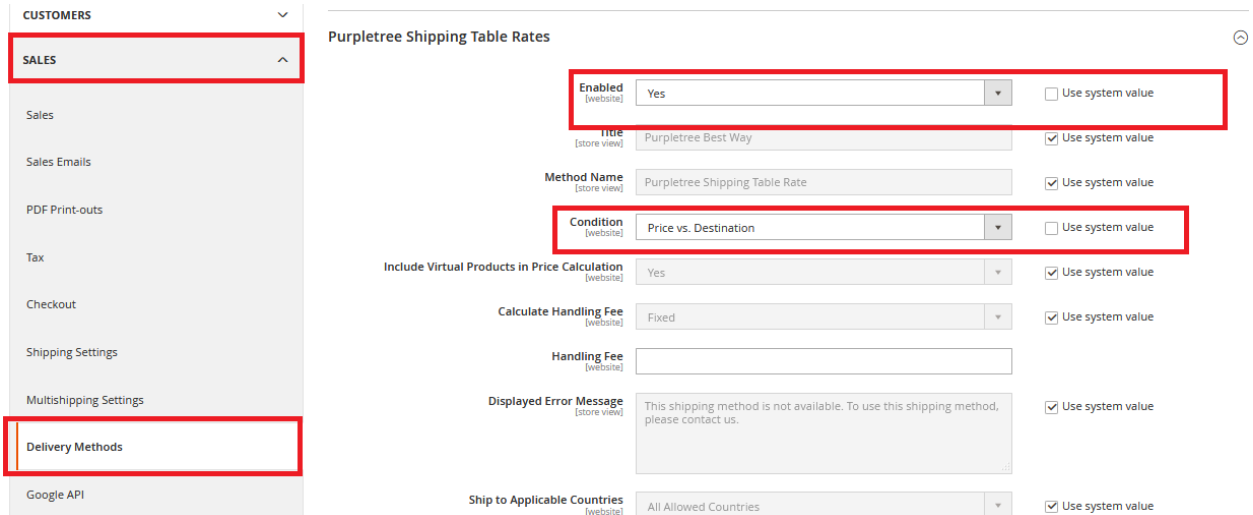

---

## VIEW REVIEWS

Here admin can view reviews left by customers to all sellers. Admin can approve or disapprove any review to be not visible in frontend.

## PURPLETREE SHIPPING TABLE RATES

- Admin can Enable Purpletree Shipping Table Rates from admin > Stores > Settings > Configuration > Sales (Tab) > Delivery Methods > Purpletree Shipping Table Rates.

**Purpletree Shipping Table Rates**

**Enabled** [website]: Yes ☐ Use system value

**Title** [store view]: Purpletree Best Way ☒ Use system value

- There are 3 conditions for this shipping method as per Magento Table Rates. Admin has to change the condition and save the settings and then again needs to Import/Export the CSV sheet
  - Shipping price as per according to Weight.

- Shipping price as per according to Total Price.
  - Shipping price as per according to number of Items.
- After saving the Condition click on Export CSV button to download CSV file.

#### Purpletree Shipping Table Rates

<b>Enabled</b> <small>[website]</small>	Yes	<input checked="" type="checkbox"/> Use Default
<b>Title</b> <small>[store view]</small>	Purpletree Best Way	<input checked="" type="checkbox"/> Use Default

<b>Calculate Handling Fee</b> <small>[website]</small>	Fixed	<input checked="" type="checkbox"/> Use Default
<b>Handling Fee</b> <small>[website]</small>		<input checked="" type="checkbox"/> Use Default

- In CSV File **Order Subtotal (and above)** would change as per according to condition saved. Add or edit rows with **Country, Region/State, Zip/Postal Code, Shipping Price and Seller Id**
  - Country to be set as Country Code.
  - Region Name to be Region Code or set it to \* for all regions.
  - Zip code as required or set to \* for all.
  - Condition - Order Subtotal (and above)** - minimum value for this shipping to apply.
  - Shipping Price to be applied if all conditions match.
  - Seller ID so that all the products could calculate shipping per seller and total would be shown in checkout.
- Browse and Import the new CSV sheet and Save the Settings.

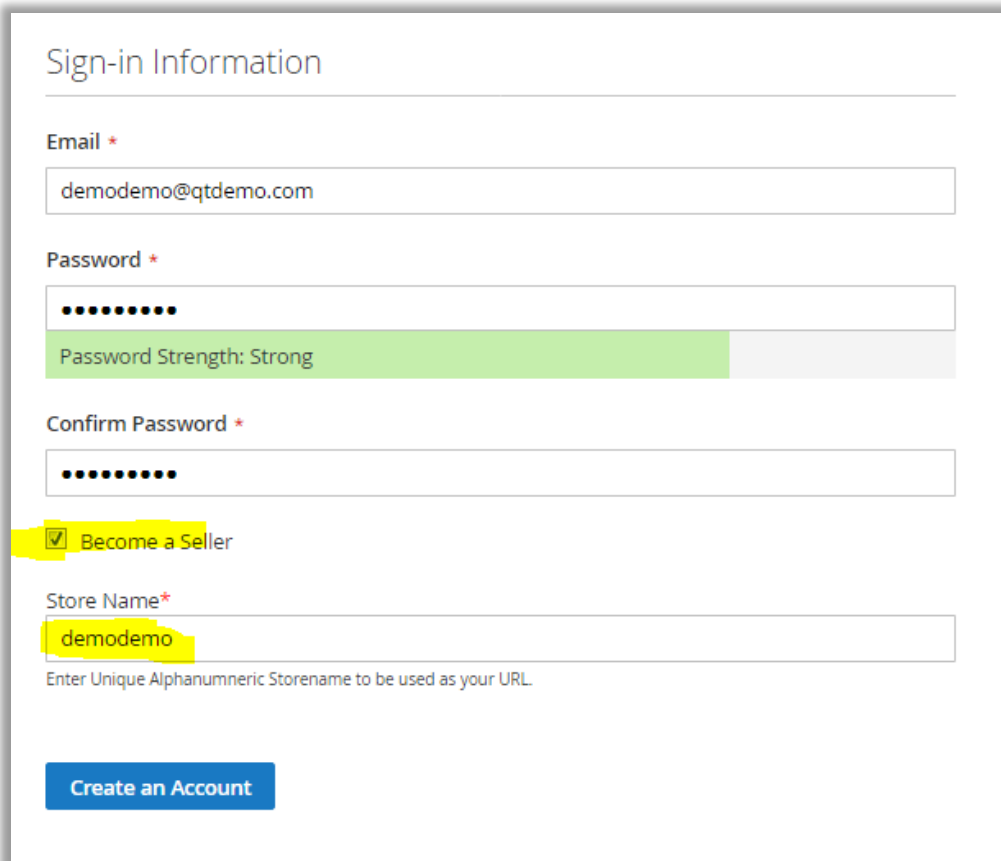

## SELLER OPTIONS

### BECOME SELLER FROM SIGN UP PAGE

Anyone can register as seller from frontend, click on become seller if user is not registered. Create customer and in the last there is a checkbox shown become seller. Click on that checkbox and enter unique store URL for your store. When you click on Create an account. An Ajax call will check if store URL is unique, so customer might have to click Create an account twice

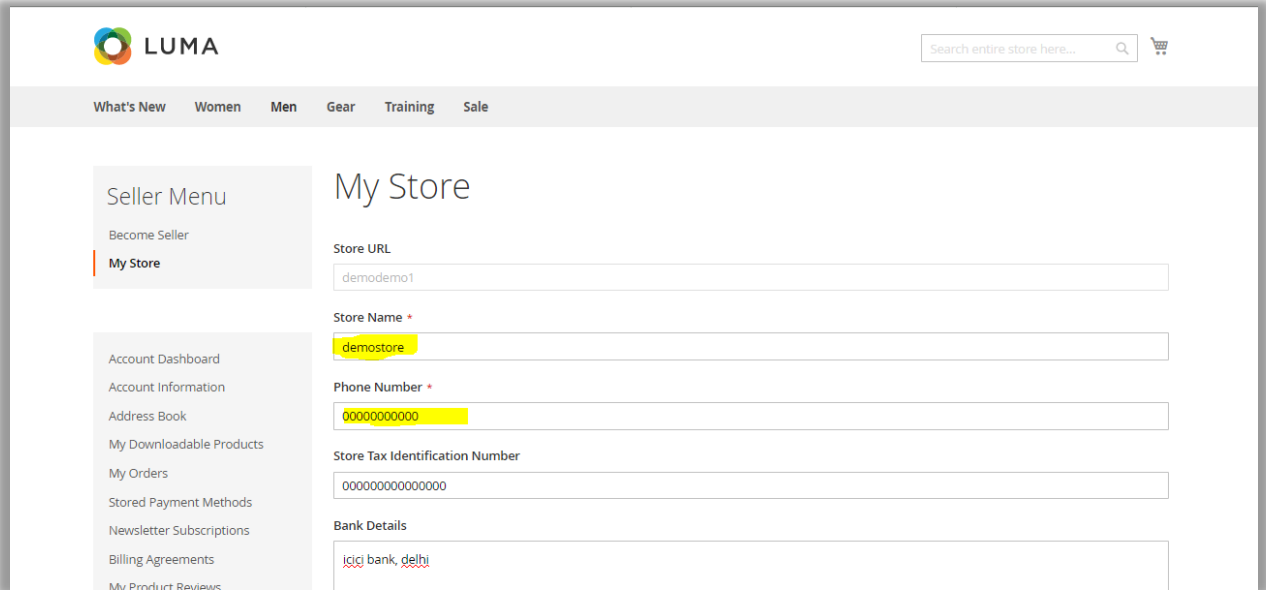

Design may be different according to theme. This is the design which is coming on magento default Luma Theme.

The screenshot shows the 'Sign-in Information' form in a Magento theme. It includes fields for Email, Password, and Confirm Password. The 'Become a Seller' checkbox is checked and highlighted with a yellow box. Below it, the 'Store Name' field is also highlighted with a yellow box and contains the text 'demodemo'. A note below the Store Name field reads: 'Enter Unique Alphanumeric Storename to be used as your URL.' At the bottom of the form is a blue button labeled 'Create an Account'.

### MY STORE

When seller is registered successfully. Enter all the details of the store in My Store Menu. If admin approval is required for seller then only two menus will be visible on seller dashboard.

**LUMA** Search entire store here...  

What's New Women Men Gear Training Sale

**Seller Menu**

- Become Seller
- My Store**

**Account Dashboard**

- Account Information
- Address Book
- My Downloadable Products
- My Orders
- Stored Payment Methods
- Newsletter Subscriptions
- Billing Agreements
- My Product Reviews

## My Store

**Store URL**

**Store Name \***

**Phone Number \***

**Store Tax Identification Number**

**Bank Details**

When admin approves the seller as explained in admin section. Following seller menus will be visible on dashboard.

- Seller Quote Requests
- Vendor Orders
- Products
- Customer Enquiries
- Store Info
- Commissions
- Payments
- Shipping Rates
- Review
- Attribute Set
- Attributes
- Brand Management
- Remove as Seller

---

## VIEW STORE

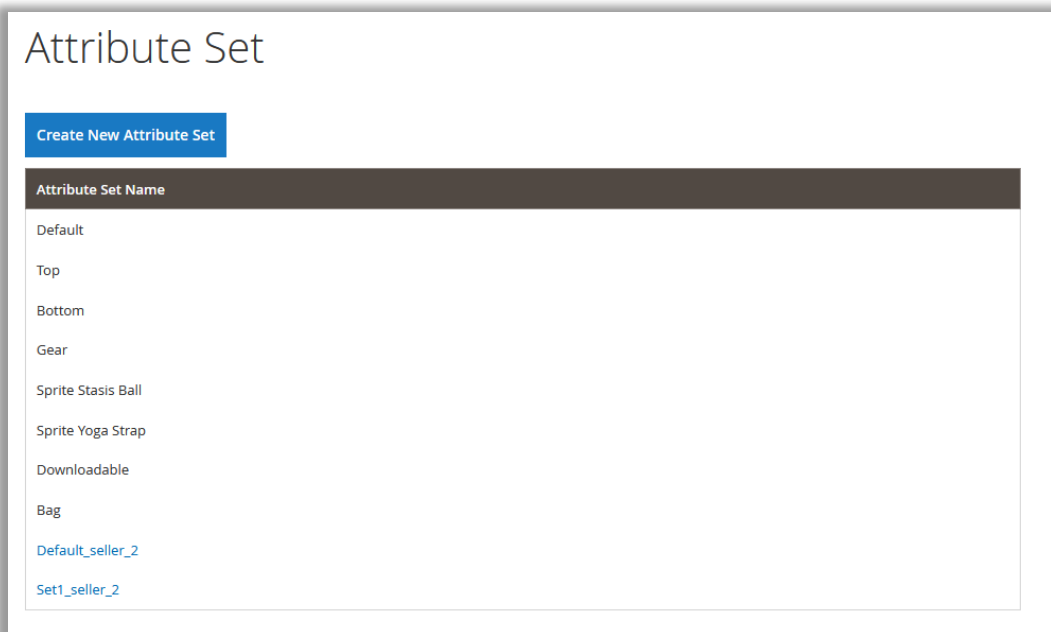

This is the page which is the seller page and is viewable by customers. Having all the details of the store and product of the store.

---

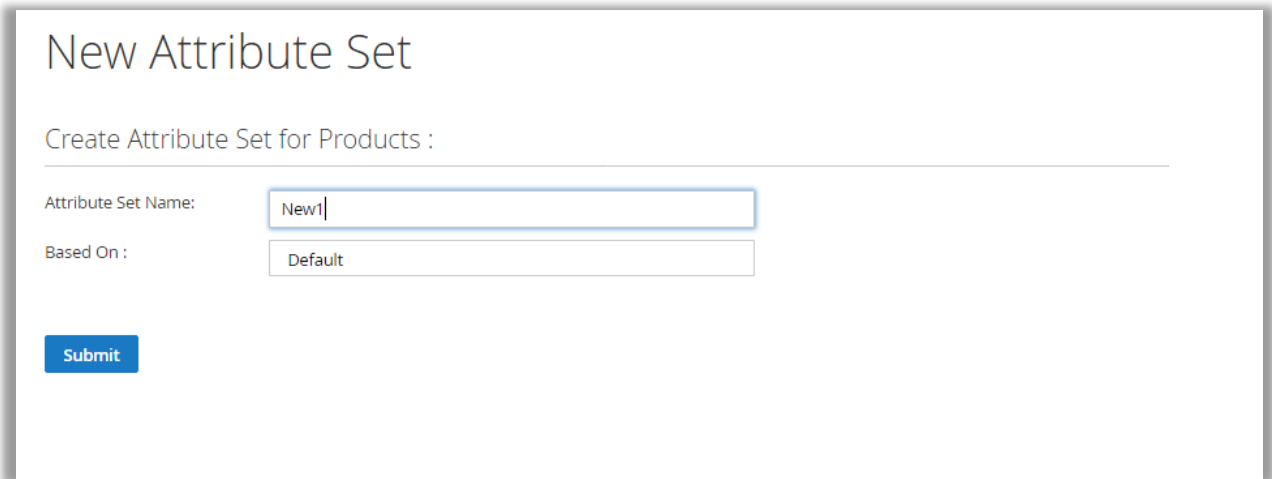

## ATTRIBUTE SET

Here listing of attributes sets of the seller will come, Default Attribute set is already available for each seller. Seller can add/rename the attribute set. Seller can view all the attribute sets created by this seller and Admin. "seller\_2" is added in each attribute set created by Seller and is added automatically and cannot be removed.

## CREATE NEW ATTRIBUTE SET

Seller can create as many attribute sets it wants. Just enter the name of attribute set and select the attribute set based on from dropdown. Seller can only edit the attribute set name. Based on cannot be changed once select during creating attribute set.

The screenshot shows a web form titled "New Attribute Set". Below the title is a subtitle "Create Attribute Set for Products :". There are two input fields: "Attribute Set Name:" with a text box containing "New1", and "Based On :" with a dropdown menu showing "Default". A blue "Submit" button is located at the bottom left of the form.

---

## ATTRIBUTES

Here the attributes listing of the attributes added by seller and admin will come. "**seller\_2**" is added in attribute code of each attribute automatically where 2 is the seller Id. Seller can only Edit and Delete attributes created by them and no action could be taken on attributes created by admin.

- **Configurable Product** – When seller select Configurable product from product type, new tab will be added in product form i.e. Configuration. Click on Create

Configuration and Select the attributes for which you want to create configurable product. Here seller can choose attributes created by this seller or admin attributes

### Configuration

Configurable products allow customers to choose options (Ex: shirt color). You need to create a simple product for each configuration (Ex: a product for each color)

Create Configurations

- Select Attributes from list and go to all steps, in the last you will get products listing which will be the Simple product for this configurable product.

### Configuration

Configurable products allow customers to choose options (Ex: shirt color). You need to create a simple product for each configuration (Ex: a product for each color)

Edit Configuration

#### Current Variations

Name	SKU	Price	Quantity	Weight	color	Actions
sssss-blank33	sssss-blank33	\$ 12	11	13	blank33	<a href="#">Remove</a>
sssss-red1	sssss-red1	\$ 12	11	13	red1	<a href="#">Remove</a>

**Downloadable Product** –New tab of downloadable product will be added in form just fill the form accordingly and save the product.

### Downloadable Information

#### Links

Title

☒ Links can be purchased separately

Title	Price	File	Sample	Shareable	Max. Downloads	
<input type="text" value="title"/>	<input type="text" value="\$ 20"/>	<input type="text" value="Upload File"/> <input type="button" value="Browse..."/> No file selected.	<input type="text" value="Upload File"/> <input type="button" value="Browse..."/> No file selected.	<input type="text" value="Yes"/>	<input type="text" value="0"/> <input type="checkbox"/> Unlimited	<a href="#">Delete</a>
<input type="text"/>	<input type="text" value="\$"/>	<input type="text" value="Upload File"/> <input type="button" value="Browse..."/> No file selected.	<input type="text" value="Upload File"/> <input type="button" value="Browse..."/> No file selected.	<input type="text" value="Yes"/>	<input type="text" value="0"/> <input type="checkbox"/> Unlimited	<a href="#">Delete</a>

#### Samples
