INSTALLATION INSTRUCTIONS

- Unpack theme.zip file inside your magento installation directory.
- If you are running Magento 2.0.x or 2.1.x, extract the corresponding patch in root directory after unzipping the main Zip file. Patch files are named like patchx.zip, where x could be either 2.0 or 2.1.
- Folders structure after unzipping the files is as follows:
 - Magento Root/app/code/Purpletree/Base/Block
 - Magento Root/app/code/Purpletree/Base/Controller
 - Magento Root/app/code/Purpletree/Base/etc
 - Magento Root/app/code/Purpletree/Base/Helper
 - Magento Root/app/code/Purpletree/Base/Model
 - Magento Root/app/code/Purpletree/Base/Setup
 - Magento Root/app/code/Purpletree/Base/Ui
 - Magento Root/app/code/Purpletree/Base/View

 - Magento Root/app/design/frontend/Purpletree/amazing/default
 - Magento Root/app/design/frontend/Purpletree/amazing/theme1
 - Magento Root/app/design/frontend/Purpletree/amazing/theme2
 - Magento Root/app/design/frontend/Purpletree/amazing/theme3
 - Magento Root/app/design/frontend/Purpletree/amazing/theme4
 - Magento Root/app/design/frontend/Purpletree/amazing/theme5
 - Magento Root/app/design/frontend/Purpletree/amazing/theme6

 - Magento Root/pub/media/purpletree
 - Magento Root/pub/media/wysiwyg/purpletree

As the final step, from shell/command prompt, run following commands on Magento root directory:

php bin/magento setup:upgrade

php bin/magento setup:static-content:deploy

THEME CONFIGURATION

- Login to admin panel.
- Go to Content > Design > Configuration.
- Select the store for which you want to set theme.
- There will be following themes which are added by our module:
 - **Purpletree Amazing Theme (Abstract Theme)**

Do not select this theme, this is just parent theme which is used by all the following child themes, visible next in the list of themes.

- **Purpletree Amazing Theme 1**
- **Purpletree Amazing Theme 2**
- **Purpletree Amazing Theme 3**
- **Purpletree Amazing Theme 4**
- **Purpletree Amazing Theme 5**
- **Purpletree Amazing Theme 6**
- Select any **Purpletree Amazing theme** from dropdown and **Save Configuration**.
- You can set **Logo for header, welcome text etc.** from **Other Settings** below on this page.

On successful installation, a new Menu and submenu will appear in magento Admin panel with name of **Amazing**. It will have following sub menus

- Go to **Amazing>Settings > Theme Configuration**.
- Now Enter License key you get with this extension in License key field.
If you haven't received license key, please contact our support team.
- License Status – Default it is set "To be Validated". It will get validated sometime later after you enter a valid license key.

Note: Valid License Key is required to save any configuration changes. Contact theme author if you do not have it.

After changing options make sure you refresh your Magento cache.

Import CMS Blocks and Pages

Overwrite and Import Static Blocks
[global]

No ▼ Import Blocks

Select Yes to overwrite previously added/edited static block and Click Button to create all static blocks provided with this theme.

Overwrite and Import CMS Pages
[global]

No ▼ Import Pages

Select Yes to overwrite previously added/edited cms pages and Click button to create all Pages provided with this theme.

Overwrite and Import Default Configuration Settings
[store view]

Amazing Theme 1 ▼

Import Default Configuration

Select Theme and Click Button to import default settings after importing pages and blocks. This will overwrite any previous changes in Amazing Theme Configuration

- **Import Static Blocks**

Click on this button to import Default Static blocks given with theme. Set it to **“No”**, if you don’t want to overwrite previously added static blocks with same identifier. If set to **“YES”** all previous static block changes will be gone and default static blocks given with the theme will be imported afresh.

- **Import Pages**

Click on this button to import Default CMS Pages given with theme. Set it to **“No”**, if you don’t want to overwrite previously added CMS Pages with same identifier. If set to **“YES”** all previous CMS pages changes will be gone and default CMS Pages given with the theme will be overwritten.

- **Import Default Configuration Settings**

Select Theme for which you want to import configuration. And Click on this button to import and set Default Configuration settings for the selected Theme.

SET HOMEPAGE

- After Importing CMS Pages, to set homepage in Configuration
- Go to General > Web > Default Pages > CMS Homepage.
- Select Homepage Purpletree and save Config.

HOMEPAGE ITEMS

Homepage Items

Select Slider
[store view] Homepage Theme 1
Select Slider to be displayed on homepage

Block below slider
[store view] Slider Below block
Select Static block from list which will be shown below Slider on homepage

Block on right of slider
[store view] Block Right Theme 6
Select Static block from list which will be shown on right of Slider on homepage only for theme 6

Show Featured Products
[store view] Yes
Featured Products block on homepage

[store view] **Edit Homepage**

- **Slider**

Select Slider from the dropdown to show Slider on Homepage, Select “--None--”, if you don’t want to show Slider.

- **Blocks below slider**

Select Static block from list to be shown below slider. Select “--None--”, if you don’t want to show block here.

DEFAULT BLOCKS FOR THEMES

Every theme has different design and comes with its own set of blocks. Default blocks for all themes are as below:

- Amazing Theme 1,3 - **block below the slider**

- Amazing Theme 2 - **block below the slider for Theme 2**

- Amazing Theme 4 - **block below the slider for Theme 4**

- Amazing Theme 5 - **block below the slider for Theme 5**

- Amazing Theme 6 - **block below the slider for Theme 6**

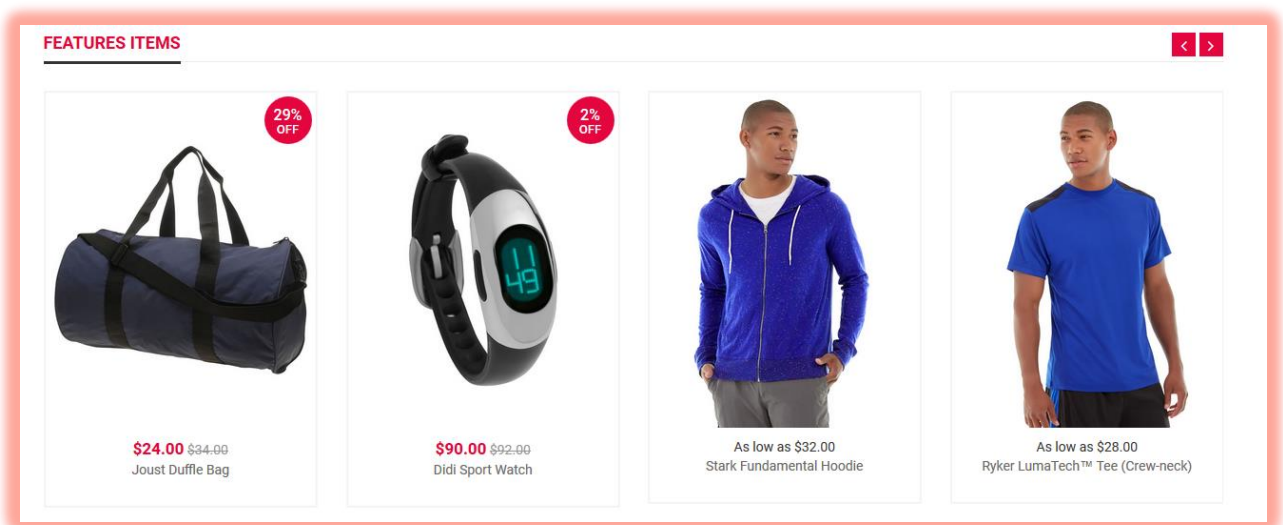

- **Blocks on the right side of slider**

Select static block from the list which should be shown on the right side of the slider on homepage only for theme 6.

- **Show Featured Products**

Set it to **“Yes”** to show Featured Products slider on homepage.

To add Featured products, go to **Admin > Catalog Products > Edit Product** and set the **Featured Product** option to YES:

Joust Duffle Bag

TO ADD ANY STATIC BLOCK

Code example:

```
{block class="Magento\\Cms\\Block\\Block" block_id="images_block_1"}}
```

In above example, **images_block_1** is static block's id.

SHOWING CATEGORY PRODUCTS

The code like following can be put in a block:

```
{{block class="Purpletree\Base\Block\Homepage\Products" limit="8"cat_id="24" name="category_block_24"
template="Purpletree_Base::homepage/products/category_products.phtml"}}
```

- **24** – is category Id.
- **category_block_24** – is unique name with category id.
- **limit="8"** – Number of products to be shown and loaded

HOODIES & SWEATSHIRTS

As low as \$47.00
Mona Pullover Hoodie

As low as \$24.00
Hera Pullover Hoodie

As low as \$57.00
Autumn Pullie

As low as \$69.00
Miko Pullover Hoodie

TO SHOW BEST SELLER PRODUCTS BLOCK

The code like following can be put in block:

```
{{block class="Purpletree\Base\Block\Homepage\Products" limit="8" name="best_seller_products"
template="Purpletree_Base::homepage/products/best_seller_products.phtml"}}
```

- **Best_seller_products** – is unique name.
- **Limit="8"**– Number of products to be shown when loaded.

BEST SELLER

 <p>Overnight Duffle \$35.00 \$45.00 Add to Cart</p>	 <p>Endeavor Daytrip Backpack \$23.00 \$33.00 Add to Cart</p>	 <p>Rival Field Messenger \$35.00 \$45.00 Add to Cart</p>	 <p>Antonia Racer Tank-S-Purple \$34.00 Add to Cart</p>
 <p>Bella Tank-XL-Blue \$29.00 Add to Cart</p>	 <p>Montana Wind Jacket-S-Green \$49.00 Add to Cart</p>	 <p>Taurus Elements Shell-S-White \$65.00 Add to Cart</p>	

Note: Bestseller products are displayed using magento logic, according to real sales of the product in the store.

HEADER OPTIONS

Header Options ⌵

Top left content block
[store view]

Select Static block from list which will be shown on top left of Header.

Show Wishlist Link
[store view]

Show Compare Link
[store view]

Menu Type
[store view]

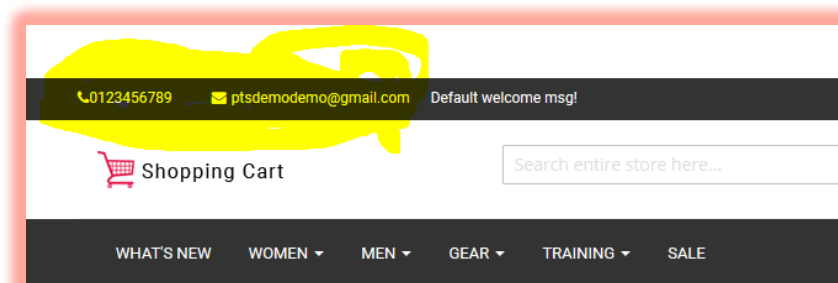

Type of menu to be visible on header.

Logo for Sticky Menu
[store view]

No file selected.

Logo to be used for Sticky Menu. Leave blank for default logo.

- **Top Left content Block**— Select Static block from list to be shown on top left side of the header.
- The default header block for all themes are as below:
 - **Amazing Theme 1 - Top Left Header**

- **Amazing Theme 3,4,5,6 - Top Left Header 1**

Welcome to Shopping Cart ! Wrap new offers / gift every single day on Weekends | Default welcome msg!

- **Wishlist Link**

Set it to “**Yes**” to show Wishlist link on Header.

- **Compare Link**

Set it to “**Yes**” to show Compare link on Header.

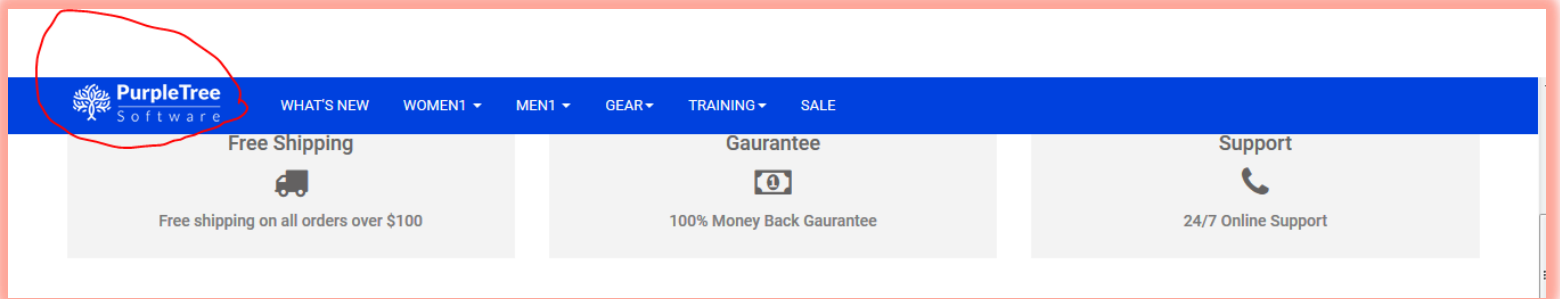

- **Menu Type**

Select Menu Type to be shown. Default is set to **Mega Menu**. You can change it to show **Default Menu** instead.

HOMEPAGE CMS PAGES SIDEBAR

Homepage Theme 2,3,4,5,6

To change Sidebar content of homepage on Themes 2 to 6, In Admin go to **Content > Pages > Select Homepage Theme.**

Design - Layout Update XML – To add/change/delete CMS block on homepage sidebar on the right side.

ADDING CMS BLOCK

Example: sidebar_block_1 – CMS Block Identifier

```
"<block class="Magento\Cms\Block\Block" name="sidebar_block_1">
```

```
<arguments>
```

```
<argument name="block_id" xsi:type="string">sidebar_block_1</argument>
```

```
</arguments>
```

```
</block>"
```

ADDING CATEGORY PRODUCTS

Example: 23 is category id, change it to view products of any other category, **5** is the number of product which can come in slide, **category_block_23** is unique name of block.

```
<block class="Purpletree\Base\Block\Homepage\Products" name="category_block_23"  
template="Purpletree_Base::homepage/products/category_products_sidebar.phtml">
```

```
<arguments>
```

```
<argument name="cat_id" xsi:type="string">23</argument>
```

```
<argument name="limit" xsi:type="string">5</argument>
```

```
</arguments>
```

```
</block>
```

HOMEPAGE CMS PAGES SIDEBAR (CATEGORY LISTING)

There is a block on sidebar in Theme 3, Theme 4, Theme 5, Theme 6, To Show list of categories on sidebar. To set it:

In Admin go to **Content > Pages > Select Homepage Theme** – Enter comma separated Category IDs.

Example:

```
<block class="Purpletree\Base\Block\Homepage\Categories" name="category-tree-sidebar"
template="Purpletree_Base::homepage/categories.phtml">
```

```
<arguments>
```

```
<argument name="cat_ids" xsi:type="string">12,13,41,48,52,56</argument>
```

```
</arguments>
```

```
</block>
```
