INTRODUCTION

Using this extension, SMS can be sent automatically on order creation, order delivery.

Admin can also send bulk SMS to multiple customers.

Admin can set SMS verification for customer register and checkout.

Extension uses HTTP GET or POST URL based SMS sending method. This method is supported by most of the SMS APIs available in market.

SMS URL Configuration Example:

eztexting provides following HTTP GET based SMS URL for sending SMS:

```
https://app.eztexting.com/api/sending/?user=user1&pass=mypass&phonenummer=phonenummer&subject=hello&message=message&express=1
```

Here, the variables are user, pass, phonenummer, subject, message and express. Meaning of all these variables is explained by the SMS vendor, eztexting in this case. We are concerned about only 2 variables here: "Phone Number" and "Message". Rest of the values will be provided by the SMS vendor. In this case we assume sample values to be "user1", "mypass", "hello", and "1".

In "General Configuration" section, you can simply write following URL:

```
https://app.eztexting.com/api/sending/?user=user1&pass=mypass&phonenummer=_MOB_&subject=hello&message=_TEXT_&express=1
```

The extension will pick _MOB_ and _TEXT_ fields, insert appropriate data in place of those variables as required, then send SMS.

Available variables:

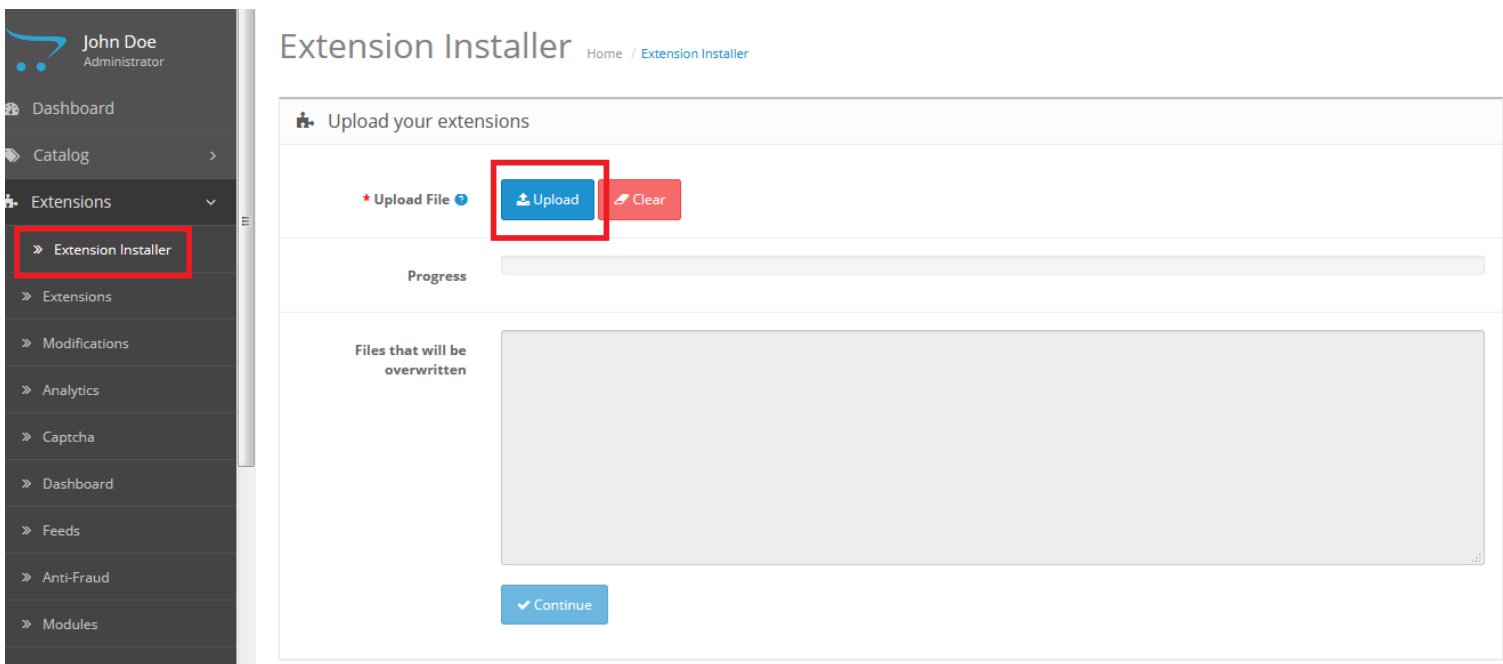

Usage	Variables	Description
SMS API URL	_MOB_	Customer mobile number
	TEXT	Message Text
Order SMS	_NAME_	Customer Name
	ORDERID	Customer order id
	AMOUNT	Total amount
Order Status SMS	_NAME_	Customer Name
	ORDERID	Customer order id

INSTALLATION

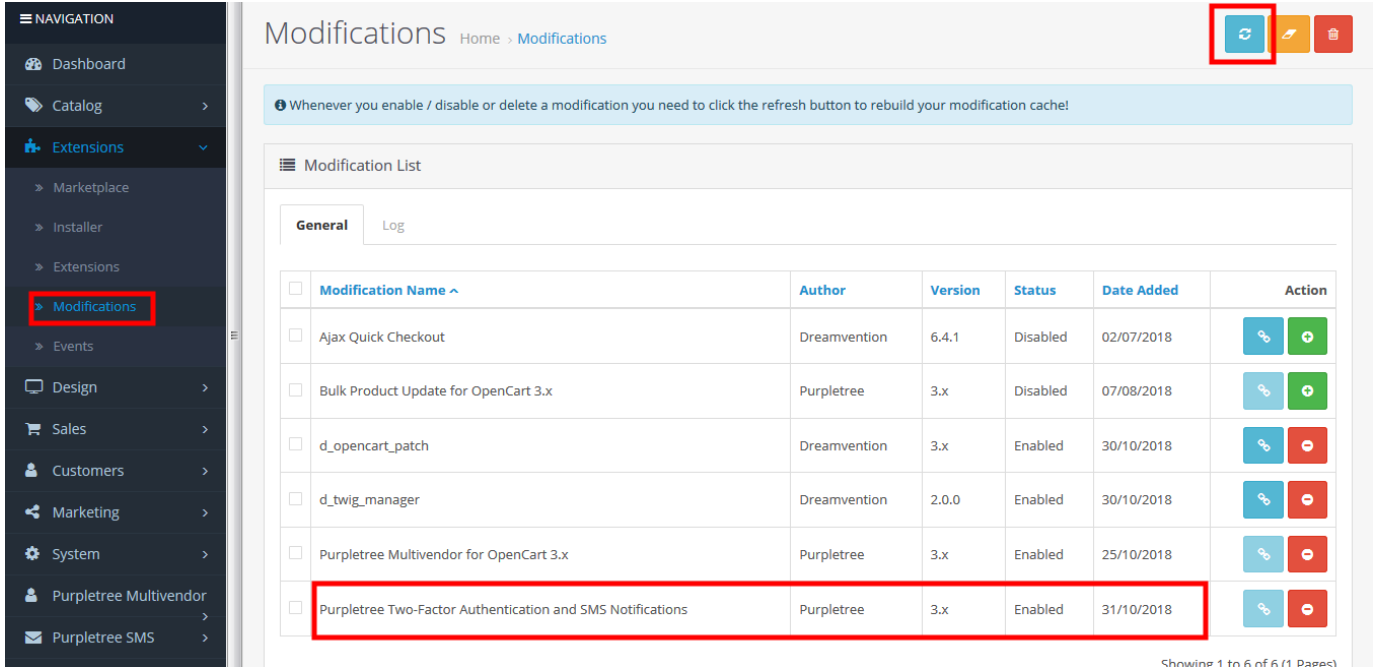

Before installation, make sure the OpenCart Extension Installer is correctly configured, especially for the FTP settings, including the FTP Root.

See <<http://docs.opencart.com/extension/installer/>> for more details.

1. Go to “Extensions” -> “Installer” (For OpenCart version 3.x) and “Extensions” -> “Extension Installer” (For OpenCart version 2.3.x)

2. Click on upload and choose appropriate extension for your OpenCart version and upload the purpletree_two_factor_authentication_and_sms_notifications_version_x.ocmod.zip
3. Go to “Extensions” -> “Modifications”. You should see an entry for this – “Purpletree Two-Factor Authentication and SMS Notifications”.

Modifications Home > Modifications

Whenever you enable / disable or delete a modification you need to click the refresh button to rebuild your modification cache!

Purpletree Two-Factor Authentication and SMS Notifications

Home > Extensions > Purpletree Two-Factor Authentication and SMS Notifications

☒ Edit Purpletree Two-Factor Authentication and SMS Notifications Module

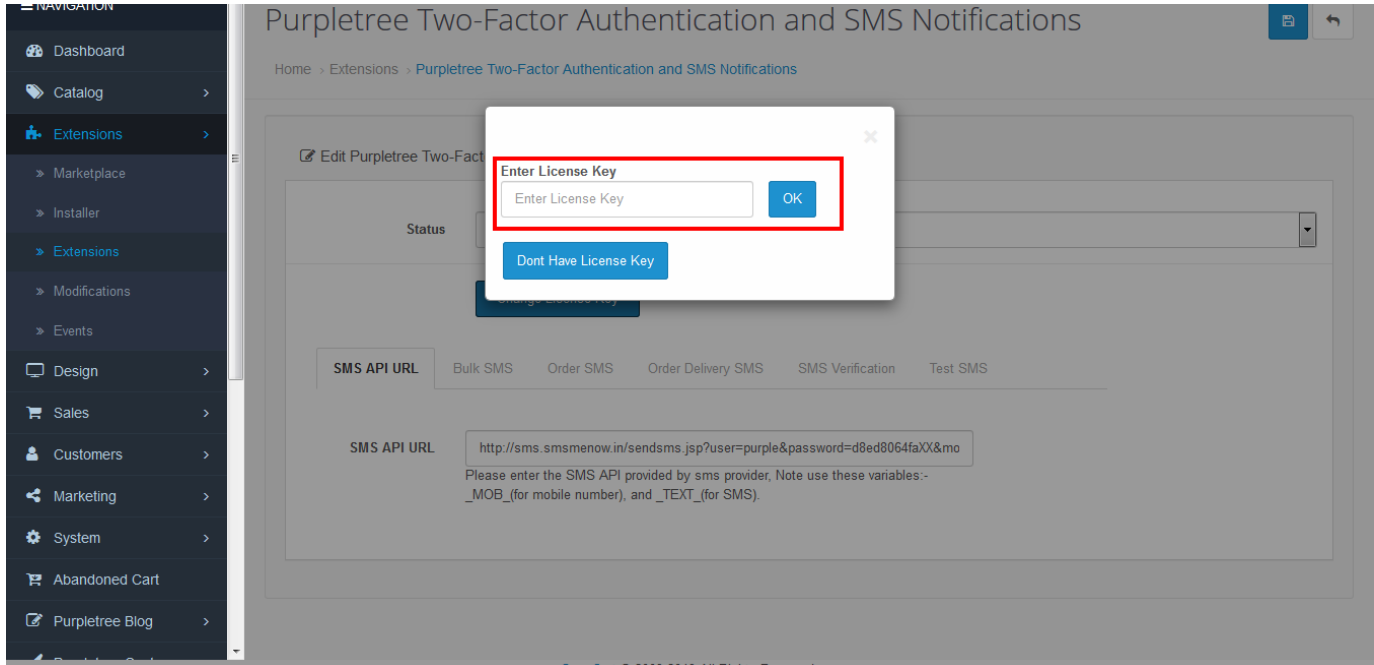

Status: Enabled

Get License → License key button

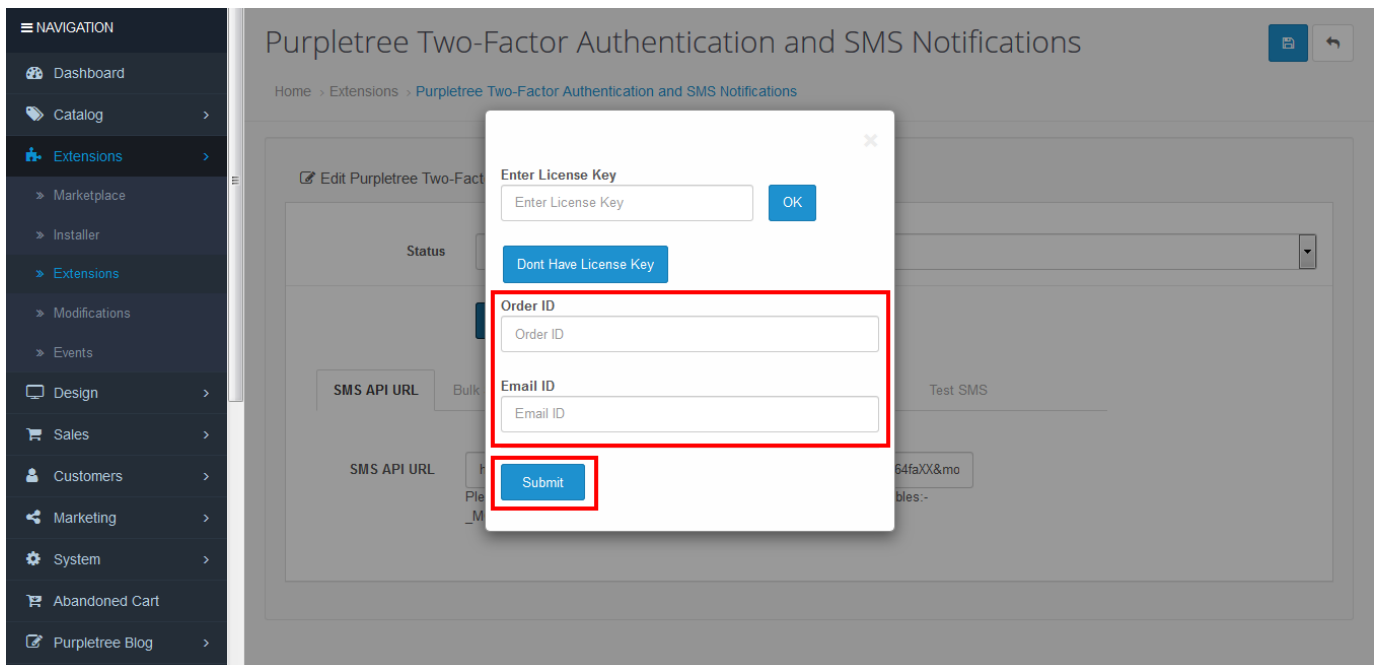

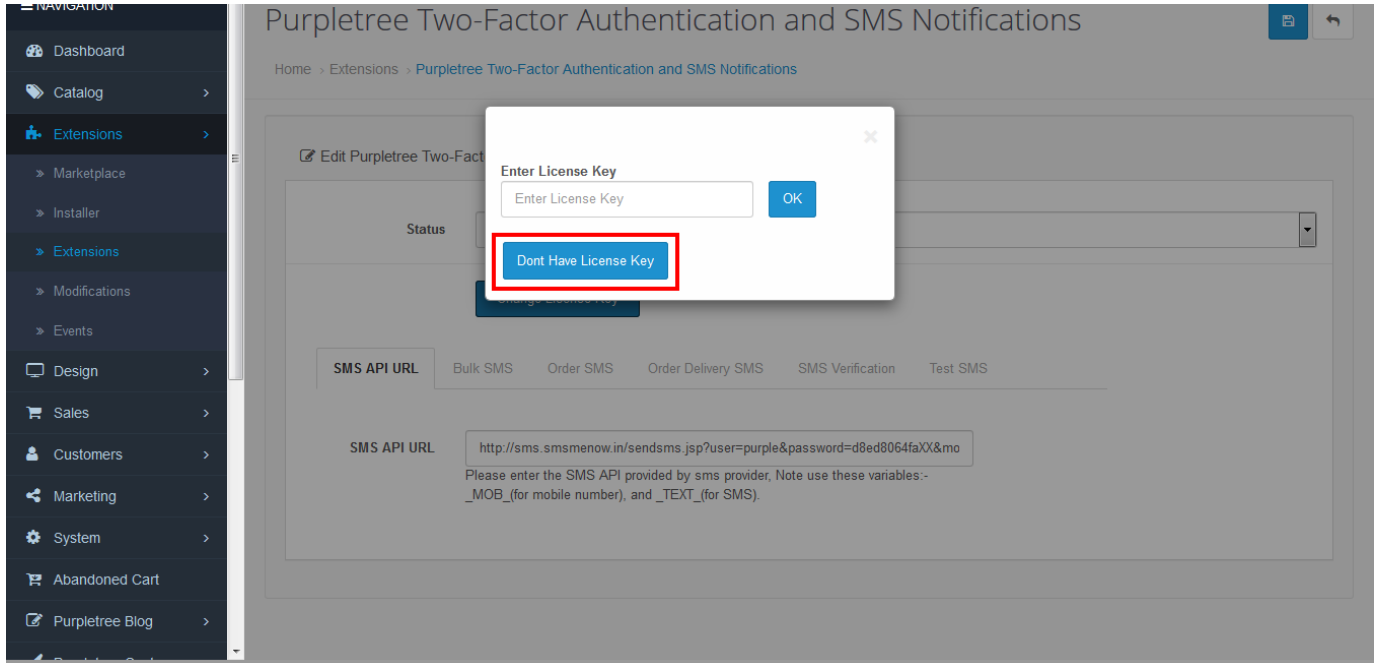

SMS API URL Bulk SMS Order SMS Order Delivery SMS SMS Verification Test SMS

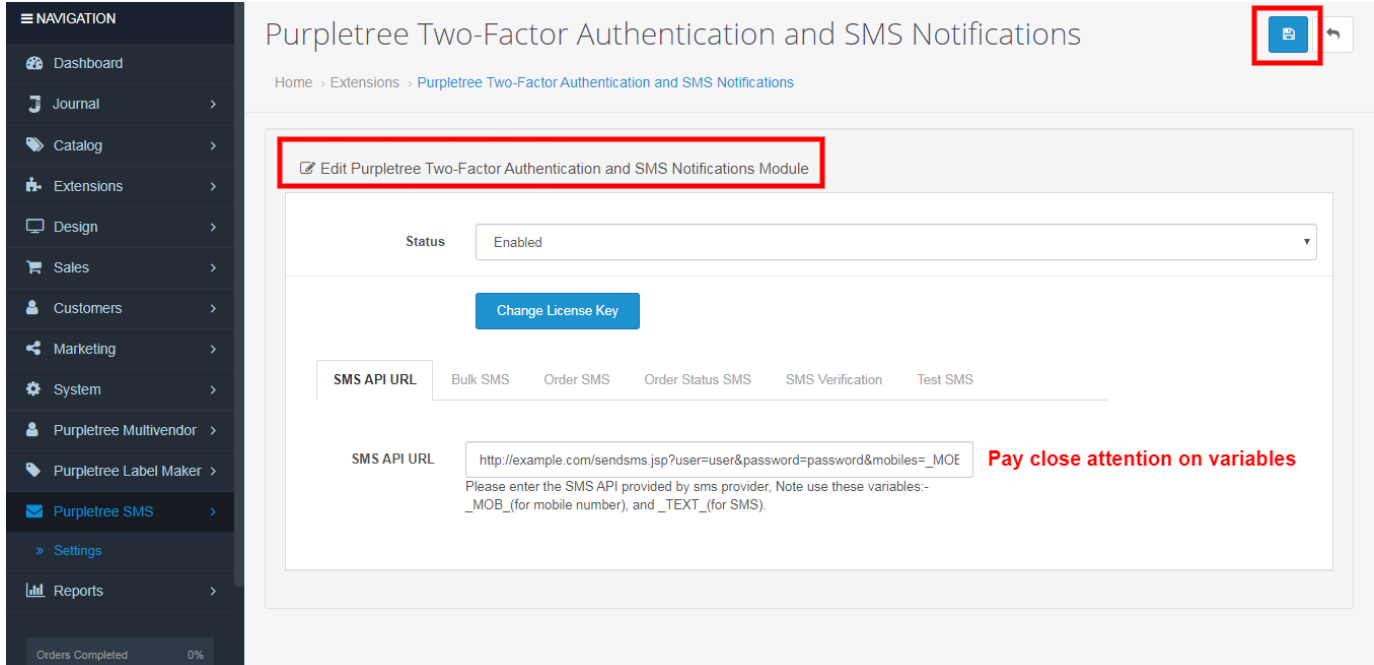

SMS API URL:

Please enter the SMS API provided by sms provider, Note use these variables:-
MOB(for mobile number), and _TEXT_(for SMS).

3. If you have not License key then, go to Admin >Extension> Extension >Purpletree Two-Factor Authentication and SMS Notifications > Edit Module > Click on “Don’t Have License key” button. Enter your Order ID which was generated when you placed an order for our extension and “Email ID”. Click on Submit Button and your license key will be filled on License key.

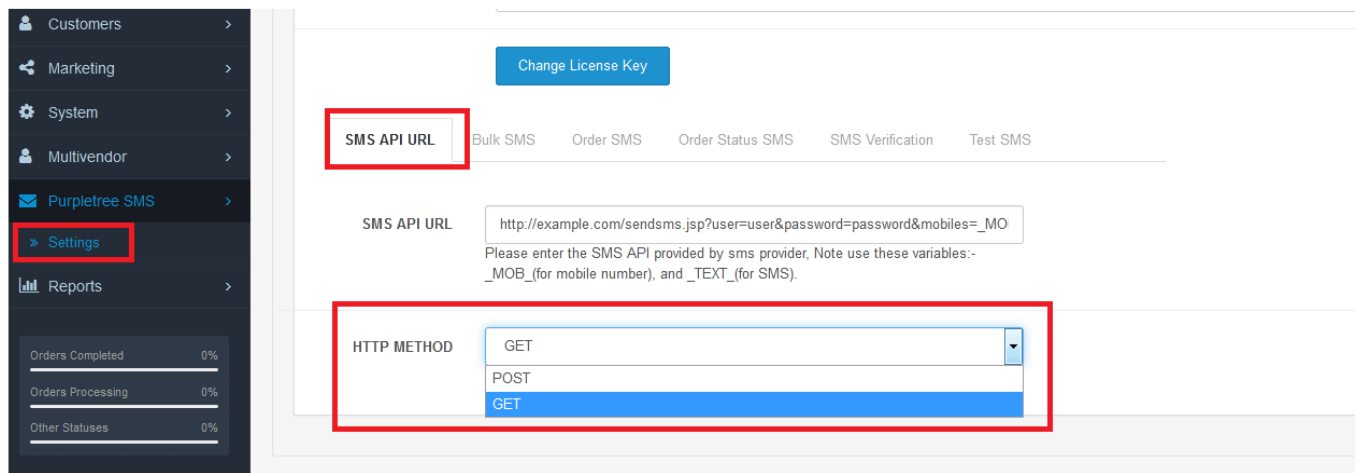

Note: Make sure to click on save button on the upper right corner after modification.

CONFIGURATION OF THE SMS API URL

For setting of this section, we go to “Admin->Purpletree SMS->Settings->SMS API URL” Tab.

You see the following screen:

In SMS API URL input field, we must enter the SMS API URL provide by SMS provider.

An example is given below.

IN CASE OF HTTP GET API

The SMS sending URL, provided by SMS company, looks like following. Here use the variable `_MOB_` for mobile number, and `_TEXT_` for SMS text.

URL example:

<http://example.com/sendsms.jsp?user=user&password=password&mobiles= MOB &sms= TEXT &senderid=abc>

IN CASE OF HTTP POST API

In this case, the SMS service vendor gives you the key-value pairs which your API can use to send the SMS. You can make a full URL using this information.

Normally the values given by SMS company are like following:

URL: <http://example.com/sendsms.jsp>

Parameter 1 Name: user, Parameter 1 Value: Your username of SMS account

Parameter 2 Name: user, Parameter 2 Value: Your password of SMS account

Parameter 3 Name: Mobiles, Parameter 3 Value: Comma separated list of mobile numbers

Parameter 4 Name: sms, Parameter 4 Value: the SMS text you want to send

Parameter 5 Name: senderid, Parameter 5 Value: Sender Id provided in your SMS account

If you use all these values, you can make an URL for sending SMS like follows:

[http://example.com/sendsms.jsp?user=user&password=password&mobiles= _MOB_&sms= TEXT_ &senderid=1](http://example.com/sendsms.jsp?user=user&password=password&mobiles=_MOB_&sms=TEXT_&senderid=1)

You may note that the SMS URL looks similar for both GET and POST methods. Both of them contains key-value pairs with two variables for mobile number and SMS text respectively. Use the variables _MOB_ for mobile number, and _TEXT_ for SMS in the URL.

Example Image:

We also have the “HTTP METHOD” field in the ‘SMS API URL’ tab. It has two dropdown values, GET and POST. If your SMS provides has GET method, then choose GET and if they support POST method then choose POST.

After selecting the value of “HTTP METHOD”, Click on save button on top right corner of the page.

CUSTOMER LOGIN/VERIFICATION OPTIONS

After Admin clicks on “customer login” tab, three Tabs will open

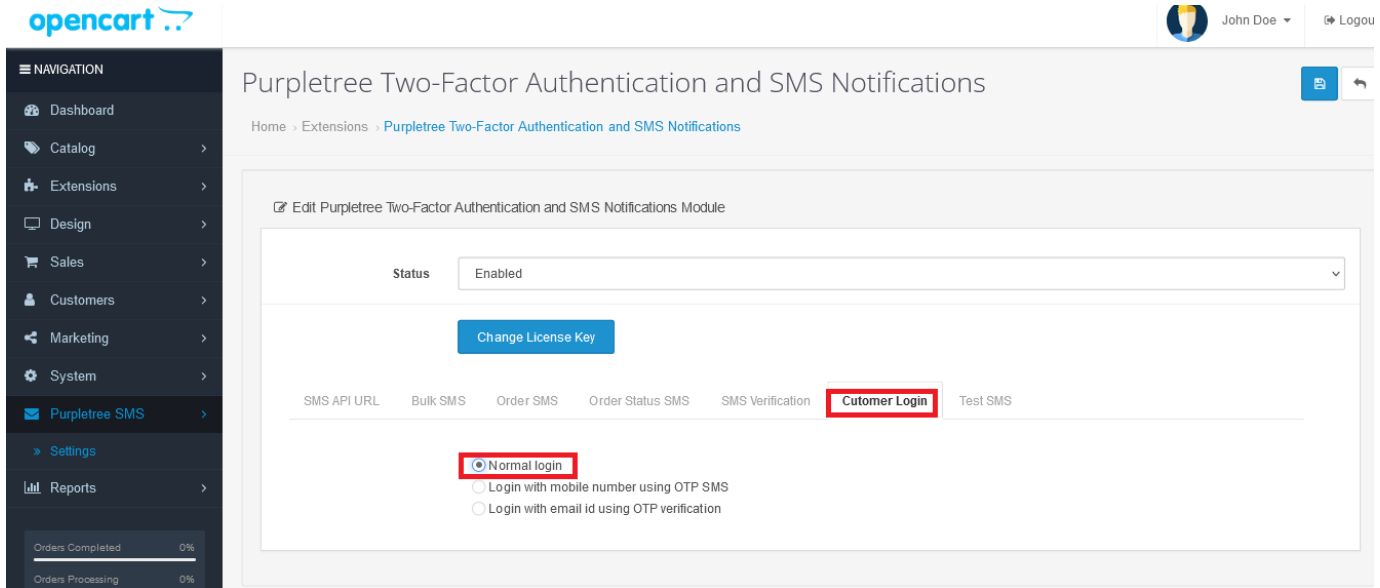

- Normal login
- Login with mobile number using OTP SMS
- Login with email id using OTP verification

The screenshot shows the OpenCart admin dashboard with the 'Purpletree Two-Factor Authentication and SMS Notifications' module settings. The 'Status' is set to 'Enabled'. A 'Change License Key' button is visible. The 'Customer Login' tab is selected and highlighted with a red box. Below it, the 'Normal login' option is selected with a radio button and highlighted with a red box. Other options include 'Login with mobile number using OTP SMS' and 'Login with email id using OTP verification'.

NORMAL LOGIN

When Admin clicks on Normal Login:

After click on Login with Mobile number

The below pop up will open

The screenshot shows the Purpletree website's login page. A modal titled "Login With Mobile Number" is open, featuring a "Mobile Number" input field and a "Send OTP" button. The background shows the "New Customer" registration section and a sidebar with links like "Login", "Register", "Forgotten Password", "My Account", "Address Book", "Wish List", "Order History", "Downloads", "Recurring payments", and "Reward Points".

- ✓ Put Mobile number in Text Field provided.
- ✓ Click on send OTP.
- ✓ Put OTP received in the POP UP opened.

This screenshot shows the same login page, but the modal is now at the "Enter OTP" step. The "Mobile Number" field contains "123456789". There is a link "OTP Not Received? Try Again" and an "Enter OTP" input field. The "Login With OTP" button is highlighted with a red box. The background elements remain the same.

- ✓ Click on Login with OTP.
- ✓ Customer will login successfully, when correct details are provided.

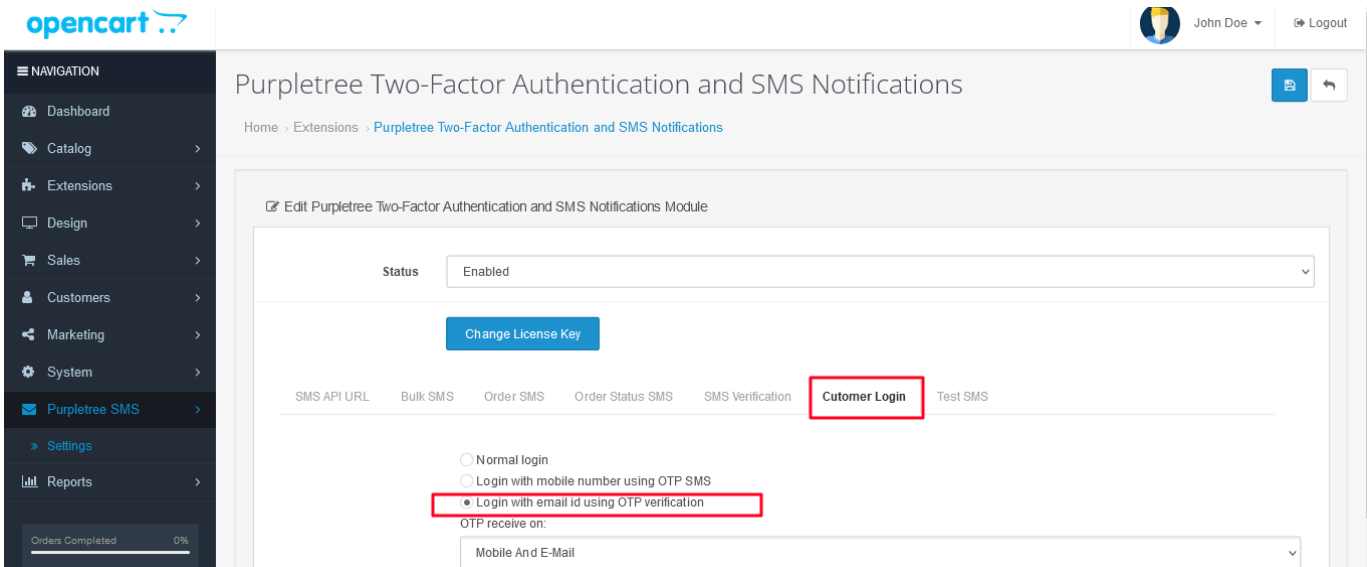

Note: - there is also option for OTP Not Received? Try Again in case if OTP is not received.

Thus, customer can very easily login using OTP and Mobile number.

LOGIN WITH EMAIL ID USING OTP VERIFICATION

If admin selects Login with email id using OTP verification, then during customer login, OTP will be received in below mediums as selected by the admin.

- a. Email.
- b. Mobile and Email.
- c. Mobile.

The screenshot shows the OpenCart admin dashboard with the Purpletree extension installed. The left sidebar contains navigation links: Dashboard, Catalog, Extensions, Design, Sales, Customers, Marketing, System, Purpletree SMS, Settings, and Reports. The main content area is titled 'Purpletree Two-Factor Authentication and SMS Notifications'. It includes a status dropdown set to 'Enabled', a 'Change License Key' button, and a tabbed interface with options: SMS API URL, Bulk SMS, Order SMS, Order Status SMS, SMS Verification, Customer Login (highlighted), and Test SMS. Under the 'Customer Login' tab, there are three radio button options: 'Normal login', 'Login with mobile number using OTP SMS', and 'Login with email id using OTP verification' (selected and highlighted). Below these options is a dropdown menu labeled 'OTP receive on:' with the value 'Mobile And E-Mail'.

For now, we have selected both Mobile and Email option.

After putting OTP click on confirm, the customer will be able to login.

Solution: when login button is not visible

If "Login with Mobile No." button is not visible on the customer login page. You can set too.

For Opencart 3.x (twig view file)

First, we need to go to the following file.

catalog > view > theme > * > template > account > login.twig

We have to check the login button code and paste the following code after the login button.

```
<!-- login with mobile no. -->

        {% if send_sms_status == 1 and login_with_mobile == 1 %}

                <button type="button" id="pts-mobile-no-otp" class="btn btn-primary"
onclick="showMobileNoBox();" >{{ entry_login_with_phone_no }}</button>

        {% endif %}

<!-- login with mobile no. -->
```

After that you will have to paste following code after footer code.

```
{% if send_sms_status == 1 and (login_with_mobile == 1 or login_with_mobile == 2) %}

<script>

    var send_sms_status = "{{ send_sms_status }}";

    var login_with_mobile = "{{ login_with_mobile }}";

    var text_login_with_otp = "{{ text_login_with_otp }}";

    var text_otp = "{{ text_otp }}";

    var text_mobile_otp = "{{ text_mobile_otp }}";

    var text_resend_otp = "{{ text_resend_otp }}";

    var text_enter_mob_no = "{{ text_enter_mob_no }}";

    var text_otp_success_msg = "{{ text_otp_success_msg }}";

    var text_login_with_mobile = "{{ text_login_with_mobile }}";

    var text_send_otp = "{{ text_send_otp }}";

    var text_mobile_no = "{{ text_mobile_no }}";

    var text_resend = "{{ text_resend }}";

</script>

<style>

    .pts-danger{
```

```
        color: #a94442;
    }
</style>

{% if send_sms_status == 1 and login_with_mobile == 1 %}

    <style>

        .swal2-popup #swal2-content {

            text-align: left;

        }

    </style>

{% endif %}

<script src="catalog/view/javascript/pts_2f_auth.js" ></script>

<script src="catalog/view/javascript/sweetalert2.all.min.js?v=3.0.40" ></script>

{% endif %}
```

For Opencart 2.x (tpl view file)

First, we need to go to the following file.

catalog > view > theme > * > template > account > login.tpl

We must check the login button code and paste the following code after the login button.

```
<!-- login with mobile no. -->

<?php if($send_sms_status == 1 and $login_with_mobile == 1){ ?>

    <button type="button" id="pts-mobile-no-otp" class="btn btn-primary"
onclick="showMobileNoBox();" ><?php echo $entry_login_with_phone_no; ?></button>

    <?php } ?>

<!-- login with mobile no. -->
```

After that you will have to paste following code after footer code.

```
<?php if($send_sms_status == 1 and ($login_with_mobile == 1 or $login_with_mobile == 2)){ ?>

<script>

    var send_sms_status = "<?php echo $send_sms_status; ?>";

    var login_with_mobile = "<?php echo $login_with_mobile; ?>";

    var text_login_with_otp = "<?php echo $text_login_with_otp; ?>";

    var text_otp = "<?php echo $text_otp; ?>";

    var text_mobile_otp = "<?php echo $text_mobile_otp; ?>";

    var text_resend_otp = "<?php echo $text_resend_otp; ?>";
```

```
var text_enter_mob_no = "<?php echo $text_enter_mob_no; ?>";

var text_otp_success_msg = "<?php echo $text_otp_success_msg; ?>";

var text_login_with_mobile = "<?php echo $text_login_with_mobile; ?>";

var text_send_otp = "<?php echo $text_send_otp; ?>";

var text_mobile_no = "<?php echo $text_mobile_no; ?>";

var text_resend = "<?php echo $text_resend; ?>";

</script>

<style>

    .pts-danger{

        color: #a94442;

    }

</style>

<?php if($send_sms_status == 1 and $login_with_mobile == 1){ ?>

    <style>

        .swal2-popup #swal2-content {

            text-align: left;

        }

    </style>

<?php } ?>

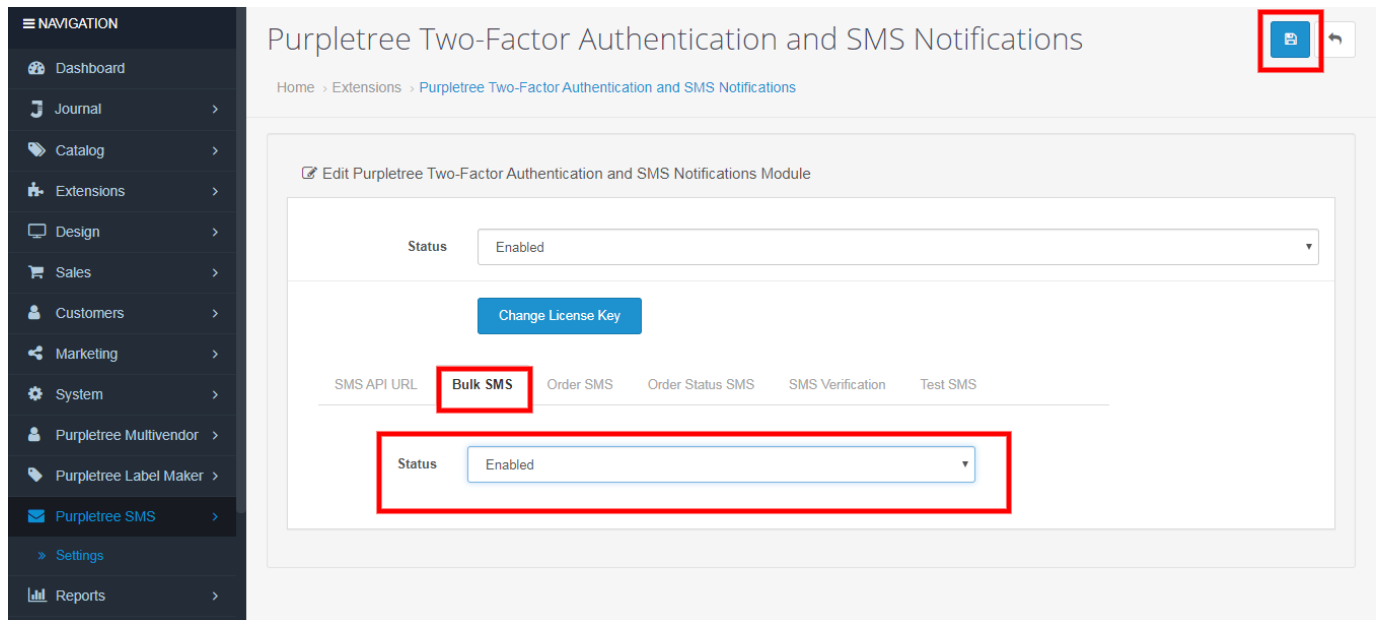

<script src="catalog/view/javascript/pts_2f_auth.js" ></script>

<script src="catalog/view/javascript/sweetalert2.all.min.js?v=3.0.40" ></script>

<?php } ?>
```

SENDING BULK SMS

1. To send message to your customers in bulk, click on the “Bulk SMS” tab and enable its status in “Edit module” panel. Make sure to click on save button after modification.

2. After enabling the bulk SMS status, a button “Send Bulk SMS” will appear on the upper-right corner on customer list page. Select customer/s and click on the “Send Bulk SMS” button. Insert the message in form and click on send button.

VERIFICATION ON CHECKOUT

1. To verify delivery of the SMS, click on the “SMS Verification” tab and set “Yes” in the given first option, then enter your OTP message template if you want else you can leave it blank in the template there is the variable called #_OTP_ this should remain constant with every message means where the OTP number is visible you need to put at the place.
2. Select “SMS verification on checkout” and select “Receive verification message on” to either of following:
 - a. Send verification code on Mobile
 - b. Send verification code on E-mail
 - c. Send verification code on E-mail and Mobile both
3. Make sure to click on Save button on top right, after making these settings. These settings should be reverted when testing is complete.

4. How to to Customer checkout with SMS or Email Verification

- Add product in cart
- Click on checkout
- Select the checkout option (if customer login then not need this step)
 - Login
 - Register Account
 - Guest Checkout

If user selects register account, then registration form is opened.

- User fills all required information and click on the continue button.
- Telephone and email Validation will be checked on pressing “continue” button.
- Thereafter SMS verification popup open and verification code will be generated.

Note – If SMS verification on Checkout option is set to “Yes” in “Purpletree SMS > Settings” then telephone and email Validation will be checked during “register account” process on checkout page.

The screenshot shows a registration form with fields for Last Name, Address 1, E-Mail, Address 2, Telephone, Password, and Password Confirm. A modal popup titled "Verify Phone No. and E-mail" is displayed in the center. The popup contains the text: "We have sent verification E-Mail on: ptsdemodemo@gmail.com and verification SMS on phone no. 21212211221". It has input fields for "E-Mail" and "Phone No.", a "Confirm" button, and a "Resend" link. At the bottom of the form, there are checkboxes for "I wish to subscribe to the Your Store newsletter." and "My delivery and billing addresses are the same." (which is checked). A "Loading..." button is at the bottom right.

- Fill billing details
- Click continue.
- Telephone and email Validation will be checked on continue button. For logged in customer email and Telephone will be used from their account.
- SMS verification popup opens, and verification code will be generated.
- Enter the verification code (verification code is sent on selected media like Mobile or E-mail).
- If customer needs to resend verification code again the click on **resend** link to regenerate verification code.
- If customer enters wrong code, then **Invalid verification** error show bellow on confirm button
- Click confirm button
- If all fields have valid data, then customer moves on **delivery details** step to fill delivery details.
- select delivery method.
- select payment method.
- click on confirm order.

Journal 3 Customer Register

The screenshot shows a mobile application interface for user registration. At the top, there's a navigation bar with links: Home, About Us, Contact, and FAQ. Below this is a header section with 'Your Store' and a search bar. A dark blue navigation bar contains 'All Departments' (with a 'Sale' badge), 'Multilevel', and 'Mega Menu'. The main content area is titled 'Registration' and includes a 'Back' button, a 'Log In' button, and a 'Forgot Password' link. The registration form has fields for First Name, Last Name, E-Mail, Telephone, Password, and Password Confirmation. A 'Continue' button is at the bottom. A modal dialog is open in the center, titled 'Verify Phone No.', with an information icon. It states 'We have sent verification SMS on phone no. : 1234567890' and has 'Confirm' and 'Resend' buttons. The background is dimmed, showing a sidebar with account-related links like 'My Account', 'Address Book', 'Wishlist', 'Order History', 'Downloads', 'Recurring Payments', 'Reward Points', 'Returns', and 'Transactions'.

ORDER STATUS CHANGE AND ORDER DELIVERY

There are two more tabs on 'edit module' page.

Enable "Order SMS" tab to send confirmation message to customers for every order.

Enable "Order Delivery SMS" tab and select a status from 'order status' to inform customer about their order status. Message will be send only on selected status from 'order status' drop-down.

Note: Make sure to click on save button on the upper right corner after modification. And do not make any changes in variables name.

SUPPORT

In case of any issues, please open a support ticket with our helpdesk at <https://helpdesk.purpletreesoftware.com>, with following information:

1. Order Id
2. FTP credentials or cpanel login credentials
3. Admin login credentials for Opencart
