IMPORTANT NOTES

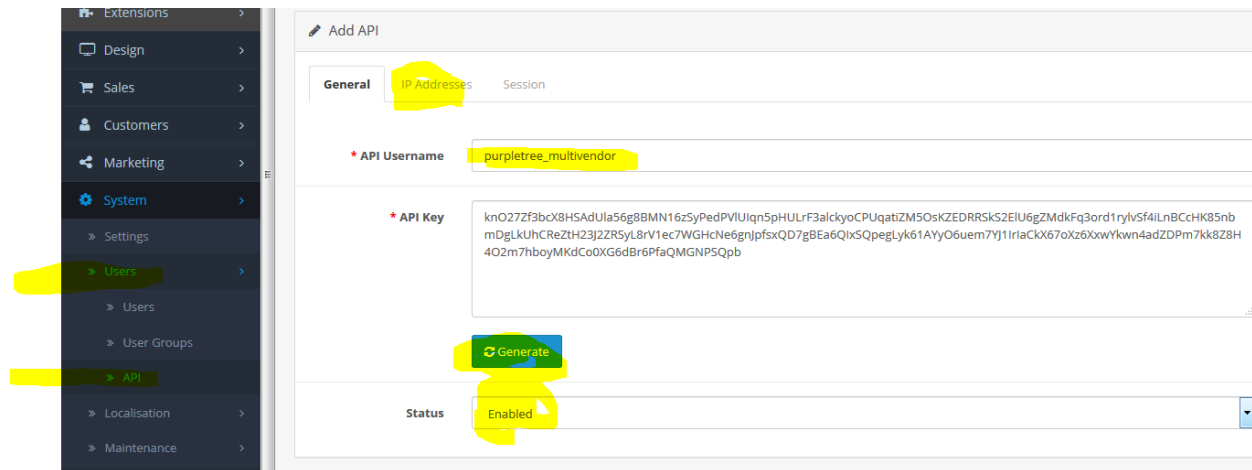

- This API provides data for customer and seller accounts.
- For customer and seller, the API assumes that opencart session is available with seller/customer logged in. Values from opencart session are used to fetch corresponding data.

INITIAL SETUP

We use opencart's API subsystem for setup of our API.

Steps:

- Login to admin Panel.
- Go to **System > Users > API**
- Create New API.
- Enter API Username as “**purpletree_multivendor**”.
- Generate **API Key**.
- Set Status to **Enable**.
- In IP Address Tab, enter **your IP address**. This is just a required field. We are not using this IP Address in calling API as anyone can access API data only with **API Username** and **API KEY**

✎ Add API

General **IP Addresses** Session

Below you can create a list of IP's allowed to access the API. Your current IP is 103.99.37.81

IP	
103.99.37.81	
	

- Click on Save button on top right.
- Now with each request from mobile. This **username** as **key** and **API Key** as **value** must be passed in Header request.
- **Send Data in header request as below in each request – Value will be your API Key generated**
 Example:
 Key: **purpletree_multivendor]**
 Value:
 "knO27Zf3bcX8HSAduIa56g8BMN16zSyPedPVIUIqn5pHULrF3alckyoCPUqatiZM5OsKZEDRRSkS2
