

Shaping the
**FOOTWEAR
INDUSTRY'S
FOUNDATION**

Your raw material partner in crafting the future

COMMITMENT
POSSIBILITY
INNOVATION
LEGACY

Beyond materials building a **BETTER WORLD**

The world has evolved from walking barefoot on rugged paths to moving through cities, stadiums, and boardrooms. Footwear has kept pace, transforming from simple coverings to engineered designs that support every journey. At Rajshila, we believe **every step reflects human progress, resilience, and the trust** that carries us forward together.

For over 40 years, we've been the unseen force beneath these journeys, bridging the gap between suppliers and manufacturers with materials that don't just build products, but create experiences. Our portfolio begins with **high-quality polymers** that form the backbone of every footwear, followed by **fillers that optimise cost** and enhance volume. **Plasticizers** come next, adding flexibility to the compound. **Curing agents** then strengthen and stabilise the structure, while our **performance additives** and enhancers ensure superior grip, durability, and long-lasting comfort with every step.

Beyond materials, what we truly offer is trust. We stand beside our partners as allies, bringing deep technical expertise, a wide product spectrum, and strategically planned inventories backed by our understanding of market price shifts, seasonal production cycles, and demand surges that keep operations running with certainty.

Across India, Japan, America, Europe and the Middle East, our presence is rooted, trusted, and strong. From athletic shoes needing flexibility and rebound, to casual and formal footwear demanding lightweight comfort and premium finish, **our solutions ensure consistent performance and reliability, every time.**

At Rajshila, we build strong foundations for industries to stand on. Every partnership is rooted in commitment, deep understanding, and solutions that deliver real results. When you choose Rajshila, you choose quality and support that stands by you. We don't just provide products; we bring **global knowledge, market trends, and seasonal insights** that help you plan better. For us, it's not just about your next step, it's about ensuring you stand strong on solid ground.

BACKBONE BEHIND EVERY PARTNERSHIP

 **Technical expertise**

 **Global network**

 **Robust logistics**

 **End consumer supply**

 **Wide product spectrum**

 **Adequate stock level**

PEG 4000

EVA AND RUBBER HAWAI

For lightweight comfort and reliable durability that supports every step.

These materials bring flexibility, cushioning, and grip together, making them ideal for daily wear and mass-market footwear. Their ease of moulding and cost efficiency make them a preferred choice for Hawaii chappals and slippers.

Natural & Synthetic Rubbers, Polymers

- EVA 18%
- EVA 28%
- EVA 33%
- EVA 40%
- POE
- EPDM
- SBR
- SSBR
- SEBS
- PBR 1220
- Isoprene Rubber
- Silicone Rubber (Abrasion)
- Reclaim Rubber
- Rubberised Compound
- Natural Rubber

Fillers, Activators, Colourants & Processing Aids

- Calcium Carbonate
- Precipitated Silica
- Zinc Oxide (Lead Free)
- Zinc Stearate
- MC Wax 654/ 1253
- Petroleum Resin (C9/C5)
- Petroleum Jelly
- Stearic Acid
- P. Wax
- Titanium Dioxide
- Wood Rosin
- Carbon Black
- Silicone Gum
- PEG 4000
- DEG
- PA44 | ZF 16
- Technic 60 NSH | Homogenising Agent
- Carbon Black (Masterbatch)

Curatives (Peroxide and Sulphur System) & Blowing Agents

- Perkadox BC- FF (DCP 99%)
- Perkadox BC-40
- Perkadox 14S-FL
- Perkadox 14-40 B-PD
- Perkadox PD-50-SPS
- Trigonox 101
- TMPTMA
- TAIC
- Sulphur
- SP Oil
- MBT
- MBTS
- ADCL (Blowing Agent)
- Expancel (Blowing Agent)

Mold Releasing Agents, Mold Cleaner & Shining Agents

- Wacker Silicone HS
- Wacker E41 M
- Wacker E 74M
- Wacker E40
- Wacker E83
- DiamondKote W3005E
- DiamondKote W123
- Akvarel 450
- Frankleen 22% (Mold Cleaner)

PVC

For versatile, cost-effective applications that adapt to diverse footwear needs.

PVC offers excellent abrasion resistance and design flexibility, making it suitable for sandals, casual shoes, and affordable footwear segments. Its durability ensures products stay in use longer, even in tough conditions.

- PVC Resin
- DINP
- DIBP
- CPW
- DOA
- DOP
- Carbon Black
- NBR
- Stearic Acid
- Calcium Carbonate
- ADCL (Blowing Agent)
- Expancel (Blowing Agent)
- Carbon Black (Masterbatch)

PU SYSTEMS & TPU

For advanced strength, comfort, and design precision in premium footwear.

PU systems provide superior cushioning and wear resistance, while TPU adds toughness and sleek finishes to soles. Together, they enable manufacturers to craft shoes that combine comfort, aesthetics, and long-lasting performance.

Casual Footwear

- DALTOPED AF 55855
- DALTOPED FF 55750
- DALTOPED AF 35443

Low Density

- DALTOPED 32480

Double Density Midsole

- DALTOPED AF 33100
- DALTOPED AF 32802

Soft & Sports Footwear

- DALTOPED AF 40251

Safety Footwear

- DALTOPED FA 66860
- DALTOPED FA 54806
- DALTOPED FA 16808

Unit Sole

- DALTOPED AF 45100
- DALTOPED AF 65100
- DALTOPED AF 38500

Footbed

- DALTOPED AF 32100

TPU Outsole

- AVALON 65 AK
- IROGRAN 70

WHERE FORMULATION MEETS FUNCTIONALITY

TPR

For flexible, durable soles that deliver high performance with excellent grip and resilience.

TPR combines the processing ease of thermoplastics with the strength of rubber, resulting in soles that are tough yet comfortable. Its recyclability and consistent quality make it a reliable choice for a range of footwear.

- SBS
- SEBS
- EVA
- Carbon Black
- Stearic Acid
- Precipitated Silica
- Titanium Dioxide
- Petroleum Resin (C9/C5)
- Wood Rosin
- ADCL (Blowing Agent)
- Expancel (Blowing Agent)
- Carbon Black (Masterbatch)

ARTIFICIAL LEATHER

For strong, flexible, and leather-like finishes in footwear.

These materials ensure durable uppers with uniform texture, easy processing, and reliable resistance to wear and moisture.

- PVC Resin
- DOP
- DINP
- DOTP
- CPW
- Calcium Carbonate
- Carbon Black
- Titanium Dioxide
- ADCL (Blowing Agent)
- Expancel (Blowing Agent)
- Carbon Black (Masterbatch)

NATURAL & SYNTHETIC RUBBERS, POLYMERS

- RMA
- SBR
- PBR
- NBR
- SSBR
- Butyl Rubber
- Chlorobutyl Rubber
- Isoprene Rubber
- Chloroprene Rubber
- SBS (Dry & Transparent)
