Beyond materials building a **BETTER WORLD**

We, at Rajshila, see ourselves as the architects of possibility. For over 40 years, Rajshila has been the unseen force powering industries with its wide spectrum of elastomers, polymers and petrochemical solutions. Our products drive industries like automotive, footwear, wires & cables and many more. Customer gratification lies at the core of our philosophy, reflected in quality products, technical expertise and seamless single-window solutions that simplify complex processes.

At Rajshila, we don't just supply materials, we shape industries. Backed by deep technical expertise and a vast product portfolio, we turn every query into an opportunity for growth. From strategically planned inventories to a global network that senses market shifts before they arrive, we keep your operations running with certainty. With Rajshila, you gain more than materials; you gain an edge the world can't ignore.

We are a legacy woven from the dreams of three generations. Today, we stand as a force redefining industries. For us, trust isn't just built, it's nurtured with quality, care and an unbreakable promise to those we serve.

Our channel partners are an extension of the Rajshila family. Built on trust, mutual growth, and seamless information sharing, our relationships go beyond transactions. We cultivate long-term collaborations rooted in deep understanding, enabling strategic decisions together. With exemplary technical support and robust logistics, we ensure our partners are never held back by material challenges.

We are the bridge between vision and reality, empowering our partners to achieve remarkable feats within the ever-evolving landscape of elastomers.

 **Wide
Network**

 **Adequate

 **Technical
Support**

Rajshila is a single window for your business requirements. Our broad range of products has catered to a wide range of the world’s major industries and the entire spectrum of clientele.

Products

With a portfolio of over 400 specialised raw materials, Rajshila serves the needs of 30+ industries under one roof. Our range includes premium Rubbers and Polymers that build durability, Fillers and Activators that add strength and Colorants that bring precision in shade and consistency. We offer Plasticizers and Tackifying Agents for superior adhesion, while our Peroxide and Sulfur Systems, Silicone Emulsions, Pharma Grades, Mold Release Agents and Mold Cleaners ensure seamless production processes.

From Specialty Chemicals and Processing Aids to Specialty Waxes, Blowing Agents, Dry Bonding Systems and PU Systems, every product is curated to enhance manufacturing performance at every stage.

MADHU SILICA PVT. LTD. (MSPL) is the largest manufacturer of **Precipitated Silicas** in India and 4th largest (*) in the world. Our more than 50 grades of Precipitated Silicas today find usage in end applications in various industries. The company has 4 established plants capable of manufacturing 2,00,000 MT / annum. And we have planned expansion of another 2,70,000 MT / annum by H1/2019. Apart from a large Indian market, the company exports their products to all over the world.

OUR MARKET & SILICA GRADES

- Tyre / Rubber / Footwear / Misc. Rubber Applications
- Oral Healthcare / Cosmetics / Pharma Applications
- Food / Feed Types ■ Speciality Applications
- Polymers / Plastics / Paints Applications (GEL Route Silicas)

TYPICAL PRODUCT PROPERTIES

(Available both in Powder and Granule form,
below typical properties are with powder forms only)

SILICA GRADE	BET Surface area, m ² /gm	PH (5% slurry)	Loss on Drying %	Suitable Salts % Max	Bulk Density (g/l)	DBP Absorption (cc/100gm)
MFIL-200(S)	180	6.5	5.0	1.0	250	125

PRECIPITATED SILICA IN POWDER & GRANULAR FORM FOR RUBBER APPLICATIONS

GRADE	FORM	CHARACTERISTICS
1. Rice, Roller, Conveyor Belts & Misc. Rubber Products		
MFIL -200(S)	Powder	■ Super Reinforcing Properties
MFIL -200(G)	Granule	■ Better Abrasion & Tensile Properties
MFIL -200(S)DF	Dust-Free	■ Better Hardness & Modulus /
MFIL -200(HG)	Granule	Excellent Bonding Properties
MFIL -200(P)	Powder	
MFIL -150(S)	Powder	■ For Cable improving Electrical Conductivity
MFIL -135(S)	Powder	■ Imparts desired Tear, Tensile and Abrasion Properties
MFIL -125(S)	Powder	■ Superior Dispersion with highly loadability and ease
MFIL -125(S)DF	Dust-Free	in processing
MFIL -100(S)	Powder	
2. Shoe Soles & Footwears		
MFIL -200(S)	Powder	■ Optimum Hardness; Good abrasion resistance
MFIL -200(S)DF	Dust-Free	
MFIL -200(FW)	Powder	■ Better Transparency
3. Battery Separators / Condoms		
MFIL -P(S)	Powder	In Battery Separators:
A/C MILLED		■ Imparts high porosity, High puncture resistant and flexibility
		■ Low elec. resistivity, long life, maintenance free storage batteries
		■ In Condoms used as a striping aid
4. Carrier for actives used in Rubber Industry and other applications		
MFIL-P(U)	Powder	■ As a carrier for liquid & active ingredient:
MFIL-P(U) Special	Powder	■ Transforms liquids into solid form for ease in
MFIL-P(U) DF	Dust-Free	handling & precise
(Dust Free/Micro Pearl)		■ Generates minimum dust during handling
		■ Recommended for use in animal nutrition products.
		■ Good anti-caking and free flow properties
5. For Silicon Rubber Applications		
MFIL-SR	Powder	■ High purity and high transparency in
		conjunction with better heat ageing properties
		■ Better reinforcing and mechanical properties

SYNTHETIC AMORPHOUS SODIUM ALUMINOSILICATES FOR PAINT AND COATING APPLICATIONS

PRODUCT CHARACTERISTICS

- Amorphous sodium aluminosilicate in powder form for use in paints and coatings as titanium dioxide (TiO2) extender.
- High excellent whiteness and brightness properties for giving desired opacity, whiteness and brightness to water based / emulsion paints for internal and external applications.
- Lower particle size and narrow particle size distribution to act as extender to titanium dioxide giving excellent opacity.
- High excellent whiteness and brightness properties for giving desired opacity, whiteness.

BENEFITS :

- Enhanced improvement in opacity and hiding properties.
- Effective light scattering material suitable for paint formulations to increase opacity or to compensate for reduced TiO₂ content.
- Improved film forming properties, enhancement in scratch and stain resistance.
- Partial replacement of TiO₂ upto 25%, lowering formulation cost without loss of covering power.
- Better opacity, dispersion and anti-settling properties due to better fineness.

SYNTHETIC SODIUM ALUMINIOSILICATE GRADES

TYPICAL PRODUCT PROPERTIES

GRADE	% MOISTURE	pH (5% SLURRY)	OIL ABSORPTION cc /100gm	BULK DENSITY (g/l)	AVERAGE PARTICLE SIZE, MICRONS	% WHITENESS	APPLICATION BENEFIT
MASIL	5.0	10.0	120	270	5.0	99.0	TiO ₂ extender, Alkaline pH, average particle size ~5.0 microns.
MASIL - 7	5.0	7.0	120	270	5.3	99.0	TiO ₂ extender, Neutral pH, average particle size ~5.0 microns.
MASIL (8.0 Microns)	5.0	10.0	120	310	8.0	99.0	TiO ₂ extender, Alkaline pH, average particle size ~8.0 microns.
MASIL - 7 (8.0 Microns)	5.0	7.0	120	310	8.0	99.0	TiO ₂ extender, Neutral pH, average particle size ~8.0 microns.
MASIL - 723	5.0	7.0	90	300	5.3	99.0	TiO ₂ extender, Neutral pH, average particle size ~8.0 microns, with Low absorption capacity.

SYNTHETIC AMORPHOUS UNTREATED & TREATED PRECIPITATED SILICA GRADES FOR SURFACE COATING APPLICATIONS

PRODUCT CHARACTERISTICS

- Synthetic high brightness silica available in untreated & organic treated form.
- Used as matting agents for aqueous and solvent based systems.
- Organic treatment of the inert siloxane (Si-O-Si) & active silanol groups (Si-OH).
- Special manufacturing set-up in place for treated Silica.

BENEFITS

- Organically treated product provides improved smoothness and scratch resistance.
- The surface treatment coupled with lower particle size, promotes ease in incorporation & dispersibility.
- High matting efficiency & gloss reduction.
- Viscosity control & better dispersion.
- Anti-settling & anti-corrosion.
- Film flexibility and chemical resistant.
- Cost effective thickening & Thixotropic agent.
- Free flow / anti-caking agent for powder coatings.
- Products used in varying coating formulation like lacquers, polyurethane varnishes, coil coatings, wood coatings, gel coats, artificial leather coatings, foils & plastic sheet coatings etc.

UNTREATED SILICA GRADES

MFIL-HV(3.0 microns):

- Untreated Synthetic Precipitated Silica, used for Viscosity enhancement.
- High Absorption capacity, offering high Viscosity build & thixotropic properties in coatings.
- Low average particle size & narrow particle size distribution provides smooth surface finish.
- Recommended for automotive coatings, putty, primers etc.

PolySIL-MC44:

- Synthetic amorphous Silica used as matting agent in aqueous formulations, printing inks etc.
- Lower average particle size & narrow particle size distribution provides smooth surface finish.

TYPICAL PRODUCT PROPERTIES

GRADE	% MOISTURE	pH (5% SLURRY)	OIL ABSORPTION cc /100gm	BULK DENSITY (g/l)	AVERAGE PARTICLE SIZE, MICRONS	% SiO2, (ANHYDROUS BASIS)	APPLICATION BENEFIT
PolySIL - MC44	1.8	6.8	200	120	3.0	99.2	Matting agent, for aqueous coatings/ Ink formulations.
MFIL - HV (3.0 Microns)	3.5	6.5	310	55	3.0	98.8	Offers high Viscosity build/ Thixotropic properties & smooth surface in coatings

ORGANIC TREATED SILICA GRADES

- PolySIL-MCT4
- PolySIL-MCT6
- PolySIL-MCT8

Silica features viz. Porosity, Particle size and Surface treatment critically controlled to provide desired matting efficiency and smoothness as per formulation requirements. Available in different average particle sizes.

TYPICAL PRODUCT PROPERTIES

GRADE	% MOISTURE	pH (5% SLURRY)	AVERAGE PARTICLE SIZE, MICRONS	CARBON CONTENT %	APPLICATION BENEFIT
PolySIL - MCT4	3.0	7.2	5.0	7.0	Effective Matting agents available in varying particle size to achieve desired matting efficiency and smoothness as per coating formulations requirements.
PolySIL - MCT6	3.5	7.0	5.5	7.0	
PolySIL - MCT8	3.0	7.0	8.0	7.0	

SYNTHETIC AMORPHOUS PRECIPITATED HYDROPHOBIC SILICA

PRODUCT CHARACTERISTICS

- Used as matting/flatting agent in paints, coatings, defoamers, inks, powder coatings, toners, adhesives.
- The surface of the hydrophilic silica consisting of siloxane (Si-O-Si) and active silanol groups (Si-OH) are treated with silane and siloxane hydrophobizing agents
- As matting / flatting agent it introduces micro-roughness to the surface causing the light to be reflected in a diffused manner, thereby reducing the apparent gloss.
- As defoaming agent, it suppresses foaming in formulations.

BENEFITS

- High matting / flattening efficiency.
- Improved film forming properties.
- Improves shelf-life of Silicone sealants, water resistant with good rheology control.
- Effective anti-settling agent for coatings & pigment stability.
- Improved hydrophobic and rheological properties.
- The surface treatment coupled with lower particle size, promotes ease in incorporation & dispersibility.
- Free flow / anti-caking agent for powder coatings.

TYPICAL PRODUCT PROPERTIES

GRADE	% MOISTURE	pH (5% SLURRY)	AVERAGE PARTICLE SIZE, MICRONS	% SiO2, (ANHYDROUS BASIS)	BULK DENSITY, (g/l)	CARBON CONTENT %	APPLICATION BENEFIT
MFIL - TST	0.90	4.0	4.0	99.0	95	1.0	Hydrophobized Silica with low particle size for Inks/ Toners/ adhesives.
MFIL - TS1	0.90	6.8	4.5	99.2	90	1.5	Effective Matting agents available in varying particle size to achieve desired matting efficiency and smoothness as per coating formulations requirements.
MFIL - TS100	3.5	9.8	4.0	99.0	100	3.0	
MFIL - TS117	1.5	8.5	8.5	98.5	185	2.0	

Globally, SC is amongst the few completely integrated speciality carbon companies leveraging on its deep knowledge of one of the most versatile substances - Carbon. Over the years, with its core products and value-added by-products, the Company has established itself as one of the world's most extensive value chains in the Carbon segment. With access to superior, consistent and customized raw material feed from its in-house distillation unit and after its success in launching rubber grade series of carbon black, Himadri has successfully launched and marketed its speciality carbon black range that is high-performance and cater to niche applications in plasticood and non-food grade), fibre, coatings and ink among others. They are commonly used in inks, paints, plastics master batches, wire and cable etc.

SPECIALITY CARBON BLACK	DESCRIPTION
KP103	Non ASTM Speciality Black. It is a cleaner pigment black with better jetness and bluish undertone. Finds extensive use in commodity plastics, news ink and coarse staple fibres. Provides easy dispersion and excellent coverage area.
KP202	Non ASTM high performance Speciality Black. KP202 is a clean black with minimum ash content and high jetness. It is most suited for footwear and colour intensive polyolefines.
KP203	Non ASTM Speciality Black. KP203 has the finest particle size (< 25nm) and optimum structure imparting high jetness. It is a high performance black with low grit and low ash content. It acts as an excellent UV absorbent making it most suitable for PVC films and sheets. It has improved coloring strength & higher gloss.
KC101	Non ASTM Speciality Black. It is very cost effective pigment black with an optimum structure most suitable for commodity plastic masterbatch, plastic pipes, films and moulded articles. It has a bluish undertone that can be tailor made according to the customer's demand. Most suitable application is in newspaper ink and plastics masterbatch.
KC120	Non ASTM Speciality Black. KC 120 has got excellent balance between surface area and structure thereby allowing higher loadability in the polymer matrix. It has a bluish undertone and hence less prone to degradation owing to lesser wavelength of blue base. It has softer pellets which gets easily dispersed and finds extensive use in variety of inks, synthetic paints & masterbatches.
KC144	Non ASTM Speciality Black. KC 144 has excellent loading capabilities offering a good balance between cost and better performance. It is a clean black with minimum ash content and has wide applications in masterbatches, films and moulded articles. It has minimum sulfur content, hence appears jetter.
KLAREX RG 223	KLAREX RG 223 is semi reinforcing type Carbon Black similar to ASTM N550 but with improved morphological features and excellent cleanliness. At similar loading, it provides better dispersion, easier processing, fast extrusion rate and higher dimensional stability as compared to N550. Excellent cleanliness features of KLAREX RG 223 results in higher screen life and significantly lower surface imperfections as compared to N550.
Electra 273	Non ASTM Speciality Black. Electra 273 is a high structured black, extremely clean and finds extensive use in conductive applications. The Carbon Black morphology is designed to allow easy dispersion that give smooth surface finish. Electra 273 contains minimum sulfur and ash content making it most suitable for cables and semi-conductive compounds. Electra 273 is particularly suited for low and medium voltage cable application.

COLORX Speciality Carbon Blacks (Powder) for Inks, Coatings & Plastics KOHLENSTOFF® Carbon Blacks

Unleashing the power of creative Carbon Black

SPECIALITY CARBON BLACKS	PRODUCT DESCRIPTION	EXAMPLE APPLICATIONS
COLORX 12	General purpose powder carbon black pigment with low surface area to enable high loading and better flow; it is easy to disperse while offers cost effecting tinting and color.	» Tinting black for inks, plastics, and coatings » Graphitized carbon products
COLORX 13	Regular color powder speciality grade with medium structure suitable with good dispersion and processing characteristics needing a higher rheology; also available in beaded form as JETEX 105.	» Printing inks » Newspaper ink » Adhesives & sealants
COLORX 14	Similar to COLORX19 but with higher color strength; designed to give good gloss in lithographic gloss inks and other liquid inks requiring high gloss and lower viscosity. Also available in beaded form as JETEX 114.	» Letterpress & offset ink » Liquid inks
COLORX 17	Speciality powder carbon black designed for applications needing good gloss, jetness, and masstone undertone.	» Industrial and powder coatings » Inks including UV cure inks, flexo & gravure, and other ink applications
COLORX 19	General purpose low to medium color black, offering good covering power and masstone strength; its lower structure enables higher loadings or lower rheology. Also available in beaded form as JETEX 111.	» Letterpress & offset ink » Flexo & Gravure ink » Industrial & architectural masstone coatings applications
COLORX 22	Speciality carbon black with high structure and higher surface area offering good covering power, jetness, and UV protection; also available in beaded form as JETEX 205.	» Aqueous flexo ink » Powders Coatings » Industrial and decorative coatings » Adhesives & sealants » PVC compounding
COLORX 34	Speciality powder carbon black, offering excellent jetness and strength in a masstone.	» Decorative coatings, masstone coatings with good jetness and blue undertone » Adhesives & sealants
COLORX 44	General purpose pigment black offering basic color and blue tone as well as good tinting power with good viscosity and flow properties; also available in beaded form as JETEX 145.	» General inks and coatings, » Tinting in architectural paints » Letterpress printing ink » Industrial tinting coatings
COLORX 45	Powder black with low structure, offering high jetness, excellent blue undertone and good flow properties. Also available in beaded form as JETEX 345.	» Printing inks, including liquid inks (flexo/gravure) » Heat set and sheet-fed offset » UV curing inks
COLORX 70	General purpose low color black with high structure suitable for many coloring and tinting applications; it exhibits excellent dispersion and high blue undertone. Also available in beaded form as JETEX 175.	» Web offset and gravure inks » Industrial inks and coatings » Tinting for architectural paints » Under-the-hood coatings applications.
COLORX 91	Medium color powder black designed medium blackness with good bluetone and gloss; lower surface area and structure enables easier dispersion and lower viscosity than other medium color blacks. Also available as ONXY 901 beads.	» Industrial & architectural coatings, lower end automotive refinish » Colour dispersions for leather » Engineering plastics compounding
COLORX 93	Medium color powder black, offering excellent jetness, good UV protection characteristics, and blue undertone; also available in beaded form.	» Industrial & architectural coatings, lower end automotive refinish » Colour dispersions for leather » Engineering plastics compounding
COLORX 319	High structure medium color powder black, providing high color intensity; easier to disperse than other medium color blacks to provide high jetness in formulations along with good blue undertone. Also available in beaded form.	» Industrial and automotive coatings, lower end automotive refinish » Deep black aesthetic application » Specialty medium to higher jet industrial coatings

Unleashing the Power of Creative Carbon Black

Himadri offers a range of **JETEX** and **ONYX** Speciality Carbon Blacks to meet food contact requirements across regions include (but not limited to) the following:

SPECIALITY CARBON BLACKS	Tint (%)	PRODUCT DESCRIPTION	EXAMPLE APPLICATIONS
JETEX 114	125	This is a low structure high surface area black that has been specifically formulated with a high level of color intensity in mind, making it ideal for applications where high gloss and a blue undertone is desired. Its easy-to-disperse properties make it easy to process even at higher loading. Designed to give good gloss in lithographic gloss inks and other liquid inks requiring high gloss and lower viscosity.	» Letterpress & offset ink » Liquid inks » Gravure inks » Flexo inks
JETEX 345	100	JETEX 345 is a low structure high color black that has been specifically formulated with a high level of color intensity in mind, making it ideal for applications where high gloss and a blue undertone is desired. Its easy-to-disperse properties make it convenient to process even at higher loading. This black has a very high blue undertone.	» Printing inks, including liquid inks (flexo/gravure) » Heat set and sheet-fed offset » UV curing inks

Product Form & Logistics

Product Form: Powder = Regional Availability: Global = Bag Packaging Options: 10 & 20 kg paper bags

JETEX 175	55	Speciality Carbon Black providing a good balance of dispersability and colour/covering power
JETEX 107	104	Designed specifically for applications requiring UV protection; also offers good colour with blue undertone
JETEX 205	116	High-performance speciality black designed to provide superior UV protection along with good covering power
JETEX 115P/300P	100	High performing P-type carbon blacks with excellent jetness and blue tone with good dispersibility in a range of polymers

BARONX Speciality Carbon Blacks (Oxidized) for Inks and Coatings

KOHLNSTOFF® Carbon Blacks

Unleashing the power of creative Carbon Black

SPECIALITY CARBON BLACKS	PRODUCT DESCRIPTION	EXAMPLE APPLICATIONS
BARONX 09	An oxidized furnace-process carbon black designed to have a high gloss and good color strength making it suitable for a range of printing inks applications; the oxidized surface assists dispersion and good flowability in inks.	» Lithographic inks » Liquid inks » Artificial leather
BARONX 10	High-purity carbon black with a low aggregate size. It is known for its excellent jetness, opacity, printability, UV stability and ease of dispersability. BARONX 10 is used in a wide variety of applications, including printing inks, paints and coatings, plastics, adhesives, and sealants.	» Printing inks: Newspapers, magazines, books, and packaging; it is valued for its excellent jetness, opacity, and printability » Paints and coatings: Automotive finishes, industrial coatings, and architectural coatings; it is valued for its excellent jetness, opacity and durability » Also used in different types of polymer application due to its excellent jetness, and UV stability
BARONX 12	High jetness oxidized furnace process carbon black. It is easily dispersed to provide better masstone in water-based primers.	» Industrial and architectural coatings » Water-based primers
BARONX 32	This high surface area grade provides high color density in masstone paints and coatings, ideal for higher end general industrial coatings and lower-end automotive refinish, excellent jetness, UV protection, and blue undertone.	» Solvent & water-based ink (Flexo/Gravure) » UV Curing inks » High jet industrial coatings & powder coatings » Medium jet automotive applications

BARONX 37	Oxidized furnace-process carbon black offering high jetness, UV protection, and conductivity and is dispersable in water-based primers; oxidation also provides improved rheology.	» Printing and packaging inks » Automotive, architecture and industrial paints and coatings » Adhesives and sealants
BARONX 45	An oxidized furnace-process carbon black designed for liquid inks needing good opacity and ink density while offering improved blue undertone for aesthetic pleasing jetness in a masstone; the oxidized surface assists dispersion and good flowability in inks.	» Liquid inks » UV Cured Inks
BARONX 55	Himadri's highest surface area grade to give high jetness and excellent blue undertone; surface treated to enhance dispersion and wetting in both solvent- and water-borne systems	» OEM automotive coatings and high-end refinishing » High jet industrial coatings & powder coatings

ELECTRA Speciality Blacks for Electrostatic Dissipative (ESD) Applications

KOHLENSTOFF® Carbon Blacks

Unleashing the Power of Creative Carbon Black

Conductive Black for ESD Applications

Himadri's ELECTRA range of conductive carbon blacks offers compounders and formulators multiple options for their demanding conductive applications. ELECTRA speciality blacks are clean carbon blacks with low sulfur, low ionics, low physical grit that enable end-users to produce compounds that extend the performance life of the final article by protecting against damage due to sudden electrostatic discharge.

ELECTRA SPECIALITY CARBON BLACKS	PRODUCT DESCRIPTION
ELECTRA 273	Standard conductive carbon black providing conductive properties in power cable and electrostatic dissipative (ESD) applications where protection from sudden electrostatic discharge is required.
ELECTRA 275	Premium conductive carbon black with low grit achieving dissipative performance at lower loadings than ELECTRA 273 while still easy to process.
ELECTRA 295	ELECTRA 295 is a new premium conductive carbon black offering conductivity at lower loadings than ELECTRA 275 lessening the impact on the underlying mechanical performance of the polymer or substrate.

ONYX Speciality Blacks for Synthetic Fibre Applications

KOHLENSTOFF® Carbon Blacks

Unleashing the Power of Creative Carbon Black

Introducing ONYX 600-series from Himadri Speciality Chemical Ltd. Premium Speciality Carbon Blacks designed for the demanding requirements of synthetic fibre. They are specifically designed to have low physical impurities and good dispersion characteristics to enable extended spin pack life and low fibre breakage during spinning. In addition, our ONYX Speciality blacks offer:

- High colour strength and blue undertone
- Low physical impurities for low filterability
- Good dispersion and processing characteristics

Himadri's family of ONYX speciality blacks for synthetic fibre have proven performance in PET, nylon, and other polymers.

ONYX SPECIALITY BLACKS	PRODUCT DESCRIPTION
ONYX 636	ONYX 636 speciality black offers the lowest the potential filter pressure values (FPV) based on its low physical impurities specifically designed to provide long spin pack life reducing instances of fibre breakage.
ONYX 640	ONYX 640 speciality black is designed for large denier fibre, compared to ONYX 636, while offering more jetness for a darker colour.
ONYX 300F	High purity carbon black with excellent jetness and blue tone compliant with FDA regulation 21 CFR 178.3297 for contact with food when used as a colorant in polymers.(maximum allowable loading in final articles is 2.5% by weight)
ONYX 903	Medium colour furnace black offering the highest potential to achieve deepest black colour when fully dispersed.

A complete range of crosslinking peroxides

Nouryon

Nouryons range of organic peroxides for the crosslinking of elastomers and thermoplastics is very extensive. Companies all over the world depend on our Trigonox® and Perkadox® organic peroxide brands. Why? Because they are an important ingredient in the production of everything from hi-tech automotive parts such as hoses and belts to shoe soles and power distribution cables.

Examples include:

- Trigonox 311**
PEX pipes, rotomolding
- Trigonox 145**
PEX pipes, rotomolding
- Trigonox 101**
PEX pipes, polymer modification, technical rubber goods
- Trigonox T**
wire & cable (direct peroxide injection)
- Perkadox 14**
wire & cable, technical rubber goods, footwear
- Perkadox BC**
wire & cable, footwear, technical rubber goods
- Trigonox 117 and Trigonox 131**
for EVA and POE encapsulant films
- Trigonox 29**
for fast on-set of cure
- Perkadox PM-50S-ps**
extruded silicone rubber articles such as silicone rubber cable, seals & tubes (halogen free)

Much of our success is due to our philosophy of creating close partnerships with our customers. What do you want to achieve? From optimizing applications, improving efficiencies, resolving difficulties or even developing new crosslinking peroxides, were happy to meet with you to discuss your requirements.

This product guide provides an overview of our main, commercially available cross linking peroxides. We invite you to visit us at www.nouryon.com for complete product listings.

Formulations with phlegmatizers and carriers or concentrations other than those indicated, as well as unique custom made peroxide compositions can be made available with due observance of safety characteristics and the appropriate environmental and transportation regulations. Whatever your particular requirements, we can develop the product to match.

Recommended dosage levels

CM ¹	6.8 - 10.6	7.5 - 11.7	6.1 - 9.5	3.8 - 5.9	3.7 - 5.7
EVA	2.6 - 5.3	2.9 - 5.8	2.4 - 4.7	1.5 - 3.0	1.4 - 2.9
Q ²			1.0 - 2.0	0.4 - 0.8	0.4 - 0.8

¹ Addition of a coagent is recommended.
Silicone rubber can also be crosslinked with Perkadox PD-50S, Perkadox L-50S and Perkadox PM-50S.
² Required amounts of peroxide: 1.1 - 2.3 phr, 0.7 - 1.4 phr and 0.8 - 1.6 phr respectively.
Typical crosslink temperatures 90°C, 105°C and 110°C.

Peroxide versus sulfur crosslinking

Advantages of peroxide crosslinking in comparison to sulfur cure:

- Simple formulation.
- Relatively easy to trace decomposition products.
- Storage of the peroxide-containing compound without bin scorch.
- High processing temperature.
- Rapid vulcanization without reversion.
- Good compression set, particularly at elevated temperatures.
- High temperature resistance.
- Limited extractable constituents from final product.
- No staining of the finished parts.
- No discoloration of crosslinked product by contact with metals and PVC.
- Most peroxides do not cause blooming.

- Co-vulcanization of saturated and unsaturated elastomers.
- Co-vulcanization of elastomers and thermoplastics.
- Copolymerization with polymerizable plasticizers or coagents to give controlled hardness and stiffness, coupled with easy processing.
- Zinc oxide-free formulations possible.

Points of attention for peroxide crosslinking:

- Sensitivity to oxygen under curing conditions.
- Certain components of the rubber compound such as
 - fillers
 - extender oils
 - antioxidants
 - resins

must be selected with care because they may, under certain conditions, interfere with free radicals. Usually, tensile and tear strength properties are reduced by about 15%, when compared to a conventional sulfur based crosslinking system. Scorch and cure time are less flexible, since they are determined mainly by the temperature. During cure, some peroxides may lead to distinct odors. Post cure may be necessary.

¹ Trigonox B has a boiling point of 110°C and a flash point of 6°C. Therefore, this product is not recommended for standard rubber.
² Other concentrations are available on request.

Nouryon

The engineered solution
that expands your horizons

From small sphere to big idea

Its a simple concept a small thermoplastic sphere encapsulating a gas. Add heat and the gas expands while the shell softens. The result is a dramatic increase in volume and billions of new possibilities.

Expancel has dual functionality as both a lightweight filler and a blowing agent. When you need to cut manufacturing costs, reduce weight, create attractive textures, protect against damage or shield against the elements, Expancel delivers.

Expansion curves for several
Expancel products

85–230°C

Different products of Expancel are available
with expansion temperatures in the range
of 85°C to 230°C (185–446°F).

Product information

WU = Wet cake of unexpanded Expancel® microspheres
Use the product within two years after production date, if unopened.
Not all grades available in all locations. Check local sales office for availability.

A variety for every need

Expancel is available either expanded or unexpanded. Both types can be supplied in wet or dry form. We also have Masterbatch. This means Expancel works in systems with or without heat or water. We offer a variety of chemical compositions to give expansion at different temperatures.

A range of particle sizes makes it possible to achieve numerous surface effects, including matting, smoothness and roughness. The very low density gives a significant weight reduction even at small dosages.

WU Wind turbines
Add bulk without adding weight.
Increase stiffness and reduce the need for binder.

The 7 forms of Expancel

Expancel DU
Dry, unexpanded microspheres

Expancel WU
Wet, unexpanded microspheres

Expancel MB
Masterbatch, unexpanded microspheres mixed with a carrier

Expancel SL
Slurry, unexpanded microspheres dispersed in water

Expancel DE(T)
Dry, expanded microspheres

Expancel WE
Wet, expanded microspheres

Expancel FG
Microspheres for food packaging applications

One ingredient. Unlimited possibilities.

Lightweight filler	BUILDINGS & INFRASTRUCTURE				TRANSPORTATION	CONSUMER GOODS	INDUSTRIAL / OTHER
Application							
Cultured marble							Reduced weight, less risk of cracks during production, improved machinability, lower resin consumption
PU foams							Reduced weight, controlled and uniform foam structure
Model-making board							Cost savings, weight reduction, improved machinability
Polyester putties							Low volume cost, easy to apply, extraordinary sanding properties, reduced shrinkage
Underbody coatings							Improved stone chip resistance and sound damping, low UBC weight helps cut fuel consumption
Sound-damping coatings							Reduced noise and vibrations
Interior panels for car roofs/sides							Low weight, improved flexibility
Body fillers							Low weight, better sandability, good surface appearance, non-irritable dust during sanding, reduced cracking and shrinkage of the dried material, easier to apply, low hardness, low impact on curing parameters
Paper & Board							Improved bulk, bending stiffness, thermal insulation. Coated applications can give soft touch and anti-slip
Porous ceramics							Controlled and uniform pore structure
Silicone rubber							Cost savings, reduced weight, uniform and closed cell structure, dry surface
Cable-filling compound							Reduced dielectric constant, reduced water penetration, cost reduction, reduced weight
Composites							Reduced weight, reduced cost / lower resin consumption, increased stiffness
Crack filler							Sandability, easy to apply, sanding dust less irritating than with glass MS
Modeling clay							Easy to shape, low shrinkage upon drying
Paint							Reduced weight, better applicability, higher water vapor permeability, matting effect, low emission of VOC, lower transportation cost for producer
Sealants							Cost savings, weight reduction, reduced volume shrinkage during drying
Genuine leather							Outstanding filling capacity, very low shrinkage, very good buffing properties, good flexibility, soft touch feeling
Elastomeric cool roof coatings							High solar reflectance and thermal insulation, enhanced durability and weather resistance

Blowing agent	BUILDINGS & INFRASTRUCTURE				TRANSPORTATION	CONSUMER GOODS	INDUSTRIAL / OTHER
Application							
Microagglomerated cork							Excellent compressibility, ultimate seal, optimal granule structure
Synthetic cork							Reduced weight, density control, better elasticity
Food packaging							Excellent seal, no shrinkage, no water absorption
PU foams							Reduced weight, controlled and uniform foam structure
Thermoforming							Thinner sheets, shorter heating time
Wood-plastic composites							Reduced weight, easier to saw and drill
Shoe soles							Reduced weight, matt surface, improved wearing comfort due to unique cell structure
Underbody coatings							Improved stone chip resistance and sound damping, low UBC weight helps cut fuel consumption
Sound-damping coatings							Reduced noise and vibration
Interior panels for car roofs/sides							Low weight, improved flexibility
Gaskets for automatic gear boxes							Improved sealing effects, improved compression set, fills voids between matching surfaces
Expandable adhesives for cars							Low weight, improved stiffness, improved compression set, fills voids between matching surfaces, creates inner pressure and better sealing
Floor mats for cars							Low weight, anti-slip effect, matting effect, elasticity, more rubberlike appearance
Weather strips for cars							Low weight, cost savings, uniform closed cell structure, better sealing properties, narrow specification along profile compared to CBA, more stable foaming process, better surface appearance
Lightweight foam							Good absorbance and recovery
Nonwoven for composites							Cost savings, reduced weight, good insulation, increased dimensional stability, increased bulk and thickness
Paper & Board							Improved bulk, bending stiffness, thermal insulation. Coated applications can give soft touch and anti-slip
Porous ceramics							Controlled and uniform pore structure
Printing ink for wallpaper, fabrics and textiles							3D effects, matting, peach or suede look
Sheets, boards & profiles							Closed cells, foam stability, reduced weight, cost saving potential
Silicone rubber							Cost savings, reduced weight, uniform and closed cell structure, dry surface
Thermal release material							Debonding at elevated temperatures
Artificial leather							Surface modifications such as suede and nubuck effects

PBR- Poly butadiene Rubber

Polybutadiene Rubber or simply Butadiene Rubber is one of the oldest offerings of Relflex Elastomers. Marketed under the brand name, RelflexCisamer, it is an international quality product, with high Cis content, has high elasticity and is resistant to dynamic stress, thus ensuring longer product durability. Quality of RelflexCisamer PBR is benchmarked with global manufacturers linked to the standards of International Institute of Synthetic Rubber Producers (IISRP). World class manufacturing facilities (Cobalt and Nickel grades) are located at Vadodara, Gujarat.

PLANT CAPACITY 120,000 METRIC TONNES

Cobalt and Nickel based Elastomer Grades

Grade	Relflex CISAMER PBR 1220	Relflex CISAMER PBR 01
Catalyst	Cobalt (Co)	Nickel (Ni)
Cis 1, 4 Configuration (%)	96	96.5
Stabilizer (type)	non-staining	non-staining
Mooney Viscosity	45	45
ML (1+4) @ 100 °C, MU		
Volatile Matter (%)	0.4	0.5
Ash Content (%)	0.1	0.08

Compounded Properties*

Grade	Relflex CISAMER PBR 1220	Relflex CISAMER PBR 01
Compound Mooney Viscosity,	59	60
ML (1+4) @ 100 °C		
Rheological Properties : ODR : 160 °C; + 1° arc;		
100 cpm (ASTM-D 2084)		
Min. Torque (lb.in)	10.5	10.2
Max. Torque (lb.in)	38	36
Ts1 (Minutes)	4	3.5
Tc50 (Minutes)	8	8
Tc90 (Minutes)	12	11

*Compound recipe: Method ASTM D 3189, Test Method – B
RelflexCisamer PBR 1220/01 - 100.0, Carbon black IRB - 60.0, Naphthenic oil - 15.0, Zinc Oxide - 3.0,
Stearic Acid - 2.0, Accelerator TBBS - 0.9, Sulphur - 1.5

SBR -Styrene Butadiene Rubber

PLANT CAPACITY 150 KT PER ANNUM

SBR is one of the highest consumed synthetic rubbers in the world due to its versatility, enhanced abrasion resistance. Some of the major applications of E-SBR include passenger car and light truck tyres and truck tyre retreads. It is also preferred in applications such as conveyor belts, shoe soles, V-belts, moulded rubber goods etc.

Relflex Stylamer	Mooney Viscosity ML(1+4) @ 100°C, MU	Bound Styrene, %	Oil, PHR	Oil Type	Key Features	Applications
SBR 1500	52	23.5	-	-	Good tack & slightly slow curing	Tyre & conveyor belt
SBR 1502	52	23.5	-	-	Good processability & abrasion	Tyre, footwear & mechanical rubber goods.
SBR 1509	33	23.5	-	-	Enhanced processibility & easier incorporation high filler loading	Footwear, microcellular sole & injection molded article.
SBR 1712	51	23.5	37.5	DAE	Easier incorporation of filler- maintaining good processability	Tyre, conveyor belt, hose & mechanical rubber goods.
SBR 1721	54	40	37.5	DAE	Excellent road grip & good processability	Tyre tread (high performance type)
SBR 1723	48	23.5	37.5	TDAE	Alternative to SBR 1712, lower rolling resistance	Tyre, conveyor belt, hose & mechanical rubber goods.
SBR 1739	52	40	37.5	TDAE	Alternative to SBR 1721, better processing behaviour & improved abrasion resistance	Tyre tread (high performance type)
SBR 1778	49	23.5	37.5	Napthenic Oil	Alternative to SBR 1712, Good processability & easy incorporation	Footwear, hoses, light colored goods & flooring.
SBR 1783	50	23.5	37.5	RAE	Alternative to SBR 1712	Alternative to SBR 1712 Tyre, conveyor belt, hose & mechanical rubber goods.

BUTYL RUBBER

Butyl Rubber is a synthetic rubber, a copolymer of isobutylene with isoprene. The product is impermeable to air and used in many applications requiring an airtight rubber. Butyl Rubber is used in the manufacture of tyre inner liners, automotive tubes, pharmaceutical closures, ball bladders, adhesives, sealants, vibration mounts, electrical fluids and lubricants among others.

Parameter	BK-1675N/IIR-1675	Test Method
Mooney viscosity ML (1+8@125° C), MU (without rolling)	46-56	ASTM D 1646
Unsaturation, mole percent	1.4-1.8	SIBUR method
Mass fraction of calcium stearate, %, max	1.2	SIBUR method
Volatile matter content, %, max	0.3	ASTM D 5668
Non-standing Antioxidant content, % (CAS No 6683-19-8)	0.02-0.08	SIBUR method
Ash content, %, max	0.4	ASTM D 5667

Properties	IMPRAMER C 1139	Unit	Test Method
Mooney Viscosity (ML 1+8, 125°C)	33-43	MU	ASTM D 1646
Chlorine	1.15-1.35	wt %	RSEPL method
Volatile matter	max. 0.5	wt %	ASTM D5668
Non-Staining Antioxidant	min. 0.05	wt %	RSEPL method
Ash	max. 0.5	wt %	ASTM D5667

Versalis is the Eni chemical company has been leading the market in a host of businesses such as plastics and rubbers, and has recently been focusing on the bio-based business. With production levels of 5.7 million tons and a turnover of € 4.85 billion as on 31st December 2017, in particular, the company holds market stewardship in manufacturing:

- Intermediates
- Polyethylene
- Styrenics
- Elastomers

We pride ourselves on a wide range of proprietary technologies, an R&D keeping pace with the industry evolution, a comprehensive product portfolio, a wide-reaching distribution network, customized solutions and after-sales assistance. To expand our presence on a global scale, particularly towards new markets, we have developed an internationalization process focusing on making the most of all possible opportunities in order to create synergies while maintaining our constant commitment towards quality and sustainable development for the environment and the communities in the surroundings of our plants.

Versalis (Eni) is Italy's largest chemical company interfacing with markets on the international scene of the basic chemicals, plastics, rubber and, recently, bio-based industry, holding market stewardship in manufacturing intermediates, polyethylene, styrenics and elastomers. With cutting-edge facilities in Italy and Europe and a capillary commercial network, Versalis continues in its development and internationalization through synergies and collaborations in increasingly innovative areas, proving its strong commitment to the environment and to the complete integration with the surrounding communities

WACKER is one of the world’s leading and most research-intensive chemical companies. In 2017, it generated sales of around € 4.92 billion. Products range from silicones, binders and polymeric additives for diverse industrial sectors from bioengineered pharmaceutical actives to hyperpure silicone for semiconductor

and solar applications. As a technology leader focusing on sustainability, WACKER promotes products and ideas that offer high value-added potential to ensure that current and future generations enjoy a better quality of life based on energy efficiency and protection of the climate and environment.

Spanning the globe via 4 business divisions, 23 production sites and over 100 subsidiaries and sales offices in 31 countries, WACKER has established a presence in all key economic regions and growth markets. With a workforce of some 13,811 employees, WACKER sees itself as a reliable innovation partner that develops trailblazing solutions for, and in collaboration with, its customers. Our technical centres employ local specialists, who assist customers worldwide in development of products tailored to regional demands, supporting them during every stage of their complex production processes, if required.

WACKER e-solutions are online services provided via our customer portal and as integrated process solutions. Our customers and business partners thus benefit from comprehensive information and reliable service to enable projects and orders to be handled fast, reliably and efficiently.

Hunan Farida Technology Co., Ltd., one of the high & new Tech enterprises in Hunan Province, is located in Changsha National Biomedical Industrial Base, which is 15km away from Changsha Huanghua International Airport. The company mainly engages in Research and Development, Production and Sales of products such as vulcanizing agents, crosslinking agents, flame retardants, blowing agents, sodium cyanate and others.

TECHNICAL DATA SHEET OF FARIDA TAIC - P (70%)

Application	It is an outstanding and new type crosslinking coagent for Polyolefines including Polyethylene, Polypropylene, Chlorinated Polyethylene, EVA, EPDM, etc.. It is powdered from liquid TAIC, but with much more improved qualities over liquid TAIC as following: 1) Easier handling in processing; 2) Better dispersion into polyolefines in kneading.
-------------	---

TECHNICAL DATA SHEET OF FARIDA TMPTMA

Application	FARIDA TMPTMA is widely used as the active co-agent for a variety of special rubbers and thermoplastics (such as EPR, EPDM, FRM, silicon rubber, EVA and CPE), the insulating material for microelectronics products, the crosslinking agent for specialion-exchange resins, and the impact modifier and monomer for copolymers, etc.. It not only can reduce the curing time and increase the curing and crosslinking density significantly, but also can reduce to dosage of DCP, and For powdery improve the mechanical and optical properties, the resistance to abrasion, heat moisture, weather, solvent, impact, radiation, oxidation, corrosion and fire and the electrical insulation properties of products. FARIDA TMPTMA is widely used especially in the field of irradiation crosslinking.	
-------------	---	--

Specification	Product	FARIDA TMPTMA	FARIDA TMPTMA-P
	Appearance	Colorless or pale yellow liquid	white powder
	Viscosity (CPS,25°C)	35-50	N/A
	Acid value (mgKOH/g)	Max.0.2	N/A
	Hue (Pt-Co)	Max.50	N/A
	Water (%)	Max.0.2	N/A

TECHNICAL DATA SHEET OF FARIDA TAIC - S (LIQUID-100%)

Application	Widely used as crosslinking coagent, modifier and assistant vulcanizer for thermoplastics, ionexchange resin, special rubber and other polymer materials, esp. EVA, EPDM, PE, etc.. It is also an intermediate (additive) of photocurable coating, photoresists and flame retardant. TAICS is crosslinking agent for solar cell EVA encapsulated film.

Company Leading the Chemical Industry in Korea – LG Chem

Having continued to grow over 7 decades since founded in 1947, LG Chem is literally the company leading the chemical industry in Korea. The company has built the global network for production, sales and R&D not only in Korea but also in main bases across the world and has provided globally competitive products

WE
ENABLE
YOU
TO
MAKE
YOUR
FOOTWEAR

COMFORTABLE
LIGHTER
DURABLE
CIRCULAR

Extreme Durability
Hydrolysis resistant, extended storage & shelf life of finished footwear even after 10 years!

Robust Processing
Less FRD changes even after 2-3 days, Short production runs possible, No skinning issues

Operator Friendly
2 component system, Room temperature processing, less machine maintenance & breakdown

Low Carbon Footprint
*based on internal LCA analysis, cradle-to-gate, using GaBi 2023-1

Pleasant Feel & Touch
Soft rubbery feel material to delight your customer

DALTOPED® Series

Polyether PU System for Midsole, Unitsole & Outsole

Huntsman's wide and varied range of polyurethane and thermoplastic polyurethane (TPU) solutions help footwear companies get to market faster. To meet the high demands and rapidly changing trends in the footwear market, we focus our innovation efforts on sustainable solutions, automation, customization and smart manufacturing. We provide fully formulated grades and tailor-made systems, building long-term partnerships with our customers based on knowledge, trust and experience. With locations around the world, our international network of footwear specialists combines global reach with local knowledge.

Huntsman has a long and proud history of helping customers develop innovative new products to create unique designs. Our AVALON®, DALTOPED® and SMARTLITE® ranges of PU, TPU and expanded TPU products have helped manufacturers redefine what's possible in footwear performance and aesthetics. Today, we continue to develop new PU and TPU technologies which raise standards, meet higher expectations and keep footwear manufacturers ahead of the game. Alongside our customers, we work closely with industry associations, universities and research centers to stay ahead of the latest innovations and market developments. In addition, we establish partnerships with machine and equipment manufacturers in order to provide solutions for the future. It helps us keep on top of industry issues in the widest sense so we are able to provide solutions that are both sustainable and that meet the necessary regulatory standards in different parts of the world

Application	Grades	Features	Properties
 Casual Footwear	DALTOPED FF 55850 DALTOPED 55855	✓ Low density ✓ BIS Compliant ✓ Good Mechanical properties ✓ Excellent surface finish ✓ Versatile across various machines	• Density (Kg/m3) : 360- 380 • Hardness (Shore A): 50+/-2
	DALTOPED FF 55750	✓ Low density ✓ BIS compliant ✓ Good Mech. & surface finish	• Density (Kg/m3) : 360- 380 • Hardness (Shore A): 50+/-5
	DALTOPED AF 35450	✓ Ultra low density ✓ BIS Compliant ✓ Good Mechanical properties ✓ Excellent surface finish	• Density (Kg/m3) : 350 • Hardness (Shore A): 45+/-5
 Safety Footwear	DALTOPED 66860	✓ Single Density Safety Outsole ✓ High durability ✓ Excellent bonding	• Molded Density : 0.55~0.60gm/cm3 • Hardness : 55- 60 Shore A • Tensile Strength > 6 MPA
	DALTOPED 54806	✓ Double density Safety midsole ✓ High durability	• Molded density - 0.45gm/cm3 • Hardness : 42~ 47 Sh. A • Tensile > 4 MPA
	DALTOPED 16808	✓ Double density Safety midsole ✓ High durability	• M.D- 0.95~1.0gm/cm3 • Hardness : 60~70 Sh.A • Tensile > 6 MPA
 Double Density Footbed	DALTOPED 33100	✓ Excellent Rebound ✓ Shock absorbing ✓ Durable(High tear)	• Density : 0.33~0.36 g/cc • Hardness:30-38 Ask. C • Compression set <8%
	DALTOPED 32100	✓ Low Density ✓ Extra Soft ✓ Light Weight	• Density 0.30~0.33g/cc • Hardness:15-20 Ask. C • Compression set <10%
	DALTOPED 32802	✓ Low Density ✓ Light Weight ✓ Good Cushioning	• Density : 0.28g/cc • Hardness:25-30 Ask. C • Compression set <8%
 Outsole	DALTOPED 36510	✓ Light Weight ✓ Premium Cushioning ✓ Balanced Rebound	• Density : 0.32~0.35 g/cc • Hardness:25-30 Ask. C • Compression set <8%
	AVALON 65	✓ High Abrasion Resistance ✓ Excellent Flexibility	• Density : (g/cm*3) : 1.18 • Hardness (Shore A) : 65 • Tensile Strength (MPa) : 25

INTRODUCTION

TWC GROUP, a chemical major headquartered in Kolkata, India provides solutions in areas of Rubber Processing, Rubber to Reinforcement bonding, Rubber functionalization and ozone Resistance.

A technology leader in speciality chemicals in the Indian sub-continent, our products are used in companies across the globe. In over 35 countries around the world, companies make use of our business-to business solutions for eco-friendly and cost efficient operation.

DRY BONDING SYSTEM - ADHESION PROMOTER

RESORCINOL DISPERSIONS

Product	Appearance	Composition	Specific Gravity @ 25°C	Active Content (%)	Ash Content (%)	Moisture Content (%)
TECHNIC® RSB11	White to Red Brown Powder	Resorcinol and Precipitate Silica Blend	1.56	50 ± 2	46 ± 2	3.50 max
TECHNIC® RL	Orange to Red Brown Liquid	Resorcinol and HMMM	1.20	91 ± 2	NIL	3 max
TECHNIC® RDL	White to Brown Powder	Resorcinol, HMMM & Silica Blend	1.50	66 ± 2	30 ± 3	3 max
Product	Appearance	Composition	Specific Gravity @ 25°C	Active Content (%)	Softening Point (°C)	Moisture Content (%)
RUBBOND RSA	Off White Grey to Red Brown Flakes	Resorcinol and Stearic Acid Melt	1.10 - 1.30	67 ± 2 *	100 - 110	0.30 max

RESORCINOL RESINS

Product	Appearance	Composition	Specific Gravity @ 25°C	Softening Point (°C)	Free Resorcinol (%)	Moisture Content (%)
TECHNIC® B18S	Orange Red to Brown Pastilles	Resorcinol Formaldehyde Resin	1.36	100 - 110	18 max	1 max
TECHNIC® B19S	Orange Red to Brown Pastille	Resorcinol Formaldehyde Resin	1.36	100 - 114	15 max	1 max
TECHNIC® B20S	Dark Red to Brown Pastille	Modified Resorcinol Formaldehyde Resin	1.24	99 - 109	5 max	0.70 max
TECHNIC® B24S	Dark Red - Brown	Modified Resorcinol Formaldehyde Polymer	1.24	90 - 100	0.1 max	0.70 max
TECHNIC® B22Z	Dark Red to Brown Pastille	Modified Resorcinol Formaldehyde Resin	1.20	100 - 110	0.10 max	0.70 max

HMMM RESIN & DISPERSIONS

Product	Appearance	Composition	Specific Gravity @ 25°C	Active Matter (%)	Ash Content (%)	(%) Free Formaldehyde
RUBBOND HM100	Clear Viscous Liquid	Hexa Methocy Methylol Melamine (HMMM) Resin	1.20	98	NIL	0.10 max
RUBBOND HM72C	Free Flowing Powder	72% HMMM on Calcium Silicate	1.41	72 ± 1	25 ± 4	0.10 max
RUBBOND HM72	Free Flowing Powder	72% HMMM on PPT Silica	1.41	72 ± 1	26 ± 3	0.10 max
RUBBOND HM650	Free Flowing Powder	65% HMMM on PPT Silica & Oil	1.41	65 ± 1	28 ± 2	0.10 max
RUBBOND HM65	Free Flowing Powder	65% HMMM on PPT Silica	1.41	65 ± 1	33 ± 2	0.10 max
RUBBOND HM50	Free Flowing Powder	Silica 50% HMMM on PPT	1.41	50 ± 1	45 ± 2	0.10 max

Associates

OPERATIONAL FACILITIES

TWC GROUP Manages 4 state-of-the-art manufacturing facilities, namely;

- Techno Waxchem Pvt. Ltd., Unit 1 & Unit 2 in Kolkata, East of India
- Rajsha Chemicals Pvt. Ltd., Unit 1 & Unit 2 in vadodara, West of India

Managing 32,000 TPA of production capacity.

Shelf Life	Packaging	Recommended Dosage (phr)	Function & Application
12 months	15 kgs	4 - 5 phr	Resorcinol dispersed on carriers is designed to give easier mixing in rubber compounds.
6 months	25 kgs	3 - 4 phr	Single Component Bonding System with both Resorcinol & Methylene Donor present. Ideal for Hose Application.
12 months	25 kgs	3 - 4 phr	Single Component Bonding System with both Resorcinol & Methylene Donor dispersed on Silica.
Shelf Life	Packaging	Recommended Dosage (phr)	Function & Application
12 months	25 kgs	4 - 5 phr	* Other variation of 75% & 80% Active content is also available.

Shelf Life	Packaging	Recommended Dosage (phr)	Function & Application
2 years	25 kgs	3 - 4 phr	It is a reaction product of Resorcinol with Formaldehyde, reducing the free monomer content. Good for both tyre cord and brass plated tyre cord adhesion to rubber.
2 years	25 kgs	3 - 4 phr	
2 years	25 kgs	3 - 4 phr	Low Free Resorcinol, very low fuming. Very suitable for steel cord adhesion. cord adhesion
2 years	25 kgs	3 - 4 phr	Formaldehyde-free resorcinol for dry bonding, ensuring strong adhesion and excellent flex-fatigue resistance in rubber-to-tyre cords.
2 years	25 kgs	3 - 4 phr	Very Low Free Resorcinol, no fuming at all. Very suitable for steel cord adhesion

Shelf Life	Packaging	Recommended Dosage (phr)	Function & Application
12 months	200 kgs	3 - 4 phr	HMMM Methylene Donor is expected to provide about 5 - 6 formaldehyde group to make cross-linking reactions with Resorcinol bonding system in rubber compounds.
12 months	25 kgs	4 - 5 phr	HMMM improves processability of uncured rubber compounds. It enhances the
12 months	25 kgs	4 - 5 phr	physical, mechanical and dynamic properties of cured rubber compounds. It helps in maintain higher levels of adhesion after heat, humidity, steam and salt water ageing of
12 months	25 kgs	4 - 5 phr	rubber compounds. HMMM does not produces ammonia from the curing reaction and therefore, it is the methylene donor of choice for polyster and brass-coated steel cords
12 months	25 kgs	4 - 5 phr	reinforced rubber compounds. HMMM is a liquid material, for ease of handling it is dispersed on Silica, for handling ease.
12 months	25 kgs	4 - 5 phr	

HMT DISPERSIONS

Product	Appearance	Composition	Specific Gravity @ 25°C	Active Content (%)	Ash Content (%)	Moisture Content (%)
RUBBOND SCH	Free Flowing White Powder	Hexa Methylene Tetramine on Carrier	1.27	97 min	3 max	0.50 max
RUBBOND OSCH	Free Flowing White Powder	Hexa Methylene Tetramine on Carrier & Oil	1.27	90 min	4 max	0.60 max

Shelf Life	Packaging	Recommended Dosage (phr)	Function & Application
12 months	25 kgs	2 - 4 phr	It offers a balanced combination of good adhesion and excellent flex fatigue resistance in conjunction with Resorcinol donor through formation of an in-situ resin during rubber processing. Ideally it is added in the last stage of mixing with Sulphur & Accelerators.
12 months	25 kgs	2 - 4 phr	

SUPER TACKIFIER RESIN

Product	Appearance	Composition	Specific Gravity @ 25°C	Softening Point (°C)	Ash Content (%)	Moisture Content (%)
TECHNIC® KR140	Yellow to Brown Pastille	p-tert-butylphenol Acetaldehyde Resin	1.00 - 1.06	135 - 150	1 max	0.70 max
TECHNIC® TR140	Yellow to Brown Pastille	p-tert-butylphenol Formaldehyde Resin	1.00 - 1.06	135 - 145	1 max	0.70 max

Shelf Life	Packaging	Recommended Dosage (phr)	Function & Application
2 years	25 kgs	2 - 4 phr	Super Tackifier for initial high tack and longer term tack retention. Very suitable for SBR compounds with higher dosage of Silica.
2 years	25 kgs	2 - 4 phr	High Performance Tackifier for initial high tack and long term tack retention.

TACKIFIER RESIN

Product	Appearance	Composition	Specific Gravity @ 25°C	Softening Point (°C)	Ash Content (%)	Heat Loss (%)
TECHNIC® TR100	Yellow to Brown Pastille	p-octylphenol Formaldehyde Resin	1.00 - 1.04	95 - 105	1 max	0.50 max

Shelf Life	Packaging	Recommended Dosage (phr)	Function & Application
2 years	25 kgs	2 - 10 phr	General purpose Tackifier Resin for all purpose. It gives excellent initial tack. Suitable for all type of rubbers.

REINFORCING PHENOLIC RESIN

Product	Appearance	Composition	Specific Gravity @ 25°C	Softening Point (°C)	Ash Content (%)	Free Phenol (%)
RUBBOND RR90	Pastille	CNSL Modified Phenol Formaldehyde Resin	1.10	80 - 105	0.50 max	2 max
RUBBOND RR95	Pastille	Tall Oil Modified Phenol Formaldehyde Resin	1.05	90 - 105	0.50 max	2 max
RUBBOND RR110	Pastille	Phenol Formaldehyde Resin	1.10	90 - 120	0.50 max	2 max
RUBBOND RR160	Pastille	Alkyl-Phenol modified Phenol Formaldehyde Resin	1	101 - 113	0.10 max	1 max

Shelf Life	Packaging	Recommended Dosage (phr)	Function & Application
1 year	25 kgs	-	It improves hardness, tear resistance, abrasion resistance, tensile strength, reduce Mooney Viscosity and prolonged scorch time properties in rubber compound. CNSL, Tall Oil & Alkyl-Phenol modification of PF Resin are expected to have better compatibility with rubber compounds so that accelerated filler dispersions with improved processability of rubbers could be achieved. To avoid pre-vulcanisation and also to achieve good scorch properties, these resins are to be added as Methylene Acceptors in the first stage with a Methylene Donors like HMMM or HMT in the final stage along with Sulphur & Accelerators.
1 year	25 kgs	-	
1 year	25 kgs	-	
1 year	25 kgs	-	

CUT & CHIPPING RESISTANCE

Product	Appearance	Composition	Specific Gravity @ 25°C	Softening Point (°C)	Ash Content (%)	Iodine Value
TECHNIC® CCR120	Pastilles	Modified DCPD, Rosin Co-Polymer	1.07	120 - 130	0.50 max	115 - 135

Shelf Life	Packaging	Recommended Dosage (phr)	Function & Application
2 years	25 kgs	2 - 4 phr	CCR resin provides high tensile, high elongation at break, good dynamic stiffness and elongation tear strength properties, resulting in improvement of cutting, chunking & chipping of tire treads.

RESORCINOL DIPPING RESIN

Product	Appearance	Composition	Specific Gravity @ 25°C	Solids Content (%)	Free Resorcinol (%)	pH
TECHNIC® R75	Orange Red Viscous Liquid	Resorcinol Formaldehyde Resin in Aqueous Solution	1.20	75	14 - 16	0.50 - 1.50
TECHNIC® R50	Orange Red Liquid	Resorcinol Formaldehyde Resin in Aqueous Solution	1.17	50	9 - 10	1.00 - 2.00

Shelf Life	Packaging	Recommended Dosage (phr)	Function & Application
6 months	200 kgs	-	RFL dips prepared from the pre-formed RF Resin solutions showed better adhesion performance in nylon, aramid & polyester tire cords. R0 & R75 can directly be added to the latex without ageing. Due to low viscosity of R50 resin solution, pumping is easy.The final RFL Dips prepared using R50 & R75 have consistent quality for providing better adhesive performance in synthetic tire cords.
6 months	200 kgs	-	

HMT DISPERSIONS

Product	Appearance	Composition	Specific Gravity @ 25°C	Active Content (%)	Ash Content (%)	Moisture Content (%)
RUBBOND SCH	Free Flowing White Powder	Hexa Methylene Tetramine on Carrier	1.27	97 min	3 max	0.50 max
RUBBOND OSCH	Free Flowing White Powder	Hexa Methylene Tetramine on Carrier & Oil	1.27	90 min	4 max	0.60 max

OZONE PROTECTION WAXES

Product	Appearance	Composition	Specific Gravity @ 25°C	Congeaing Point (°C)	N-Paraffin Content	C Max
RUBWAX 1242	White to Light Yellow Pastilles	Blend of Paraffin Waxes and Microcrystalline Waxes	0.92	70 -78	65 - 75	24 - 26 31 - 33
RUBWAX 1244	White to Light Yellow Pastilles	Blend of Paraffin Waxes and Microcrystalline Waxes	0.92	64 - 70	75 - 85	31 - 33
RUBWAX 1250	White to Light Yellow Pastilles	Blend of Paraffin Waxes and Microcrystalline Waxes	0.92	64 - 68	60 - 70	30 - 32

-------------------	-----------------------------------	---------------------------------	-------------	---------	-----------	-------

Shelf Life	Packaging	Recommended Dosage (phr)	Function & Application
12 months	25 kgs	2 - 4 phr	It offers a balanced combination of good adhesion and excellent flex fatigue resistance in conjunction with Resorcinol donor through formation of an in-situ resin during rubber
12 months	25 kgs	2 - 4 phr	processing. Ideally it is added in the last stage of mixing with Sulphur & Accelerators.

Ash Content (%)	Shelf Life	Packaging	Function & Application
0.10	2 Years	25 kgs	Protection against Ozone attack, especially in a very low and very high temperature
0.10	2 Years	25 kgs	Protection against Ozone attack, especially in a temperature range of 10 - 50 °C
0.10	2 Years	25 kgs	Protection against Ozone attack, especially in a temperature range of 10 - 50 °C
0.10	2 Years	25 kgs	Protection against Ozone attack, especially in a temperature range of 10 - 50 °C
0.10	2 Years	25 kgs	Protection against Ozone attack, especially in a very low and very high temperature

Shelf Life	Packaging	Recommended Dosage (phr)	Function & Application
1 year	25 kgs	2 -5 phr	It improves mould flow and extrusion properties. Reduces nerve and shrinkages, improves homogeneity of elastomers and fillers. Reduces mixing cycle time, energy consumption and viscosity. Enhances Green Tack

Shelf Life	Packing	Dosage (phr)	Function & Application
2 years	25 kgs	2 - 5	An effective activator for the sulfur vulcanization of diene rubbers, especially natural rubber and improves rubber compound modulus. An effective physical peptizer for the mastication of NR, also improves processability in mixing, extrusion and molding.
2 years	25 kgs	2 - 4	An effective physical peptizer for NR compounds. Can offer cure activation for increased reversion stability, processability and compound flow.
2 years	200 kgs	1 - 3	It is a rubber soluble zinc soap and could be used as an activator for NR. It offers heat stability (reversion resistance) in NR compounds containing normal levels of sulfur, particularly with thiazole type accelerators.

Shelf Life	Packing	Dosage (phr)	Function & Application
2 years	25 kgs	2 - 3	Excellent flow promoter for rubber compounds with high level of white fillers, namely, silica, chalk, clay, et. It improves dispersion of fillers (especially minerals fillers) and has beneficial influence on batch-to-batch uniformity. Rubber Aid – PA 44 A decreases the tendency of re-agglomeration of silica. It is suitable for better extrusion and also, could be useful as processing aid in the production of radial tires, rubber belts and cables.
2 years	25 kgs	2 - 3	
2 years	25 kgs	1 - 5	Designed for high performance silica-loaded rubber compounds. Beneficial for use in high performance tires containing NR, BR, SSR, S-SSR rubbers. Improves processing and extrusion of silica loaded rubber compounds and stabilizes viscosities during extended storage conditions.
2 years	25 kgs	1 - 5	Expected to reduce viscosity and improve extrusion rate in silica filled rubber compounds. Improves downstream processing while enhancing the physical properties in silica based natural and synthetic rubber compounds. Can be used with silane coupling agents and expected to exhibit synergistic effect and improves the compound properties. Could be useful in injection and transfer molding, and also for continuous vulcanization due to its ability to stabilize vulcanization at high temperatures.
2 years	25 kgs	3 - 5

Shelf Life	Packing	Dosage (phr)	Function & Application
2 years	25 kgs	1 - 5	It is rubber stable and does not bloom from the vulcanizates due to wide solubility range. Helps in the mastication, mixing and proper dispersion of fillers in NR mixed with PBR, SBR and NBR rubbers and rubber compounds.
2 years	25 kgs	2 - 5	Could act as lubricant and can exhibit reducing effect on viscosity, facilitate mixing and processing of various rubbers. Saves energy by cooler mixing process and lower viscosities.
2 years	25 kgs	1 - 5	The double bonds present in it could stabilize free radical formation, which in turn could improve reversion resistance and tear strength of rubber compounds. Can be used to lower power consumption during mixing cycle, dumping temp, Mooney viscosity and improve filler dispersions.
2 years	25 kgs	1 - 3	Shortens the mixing time and improves the flow characteristics of the uncured compound. Improves mixing and thus enhances the incorporation of compound ingredients, and also improves flow and reduces heat build-up during extrusion process.
2 years	25 kgs	3 - 5	Fast incorporation and improves dispersion of the silica without sacrifice in wet skid resistance could be achieved. Could facilitate flow property compared with common zinc soaps as well as increased energy savings in the mixing step.
2 years	25 kgs	2 - 4	Developed specifically for use in compounds containing high loadings of fillers, particularly with high surface area silicas. Reduces compound viscosity and enhances flow property during extrusion, which could lead to improved processability. Expected to reduce the degree of filler-to-filler re-agglomeration, known as storage hardening, in silica containing rubber compounds.

Shelf Life	Packing	Dosage (phr)	Function & Application
2 years	25 kgs	2 - 3	A zinc free processing additive developed for highly filled silica compounds. Reduces the tendency of re-agglomeration of filler particles, particularly silica. Maintains low viscosity during compound storage with good extrusion and does not influence on cured compound dynamic properties.
2 years	25 kgs	2 - 5	Could prevent sticking of rubbers and compounds to rotors and rolls and its addition can reduce the risk of scorching in highly loaded rubber compounds. Improves the flow properties of the rubber compound, which could result in foiling the molds faster and under lower pressure, particularly useful in injection and transfer molding operations. Improves the dispersibility of highly active white fillers and other ingredients. > Improves flow properties of polymeric compounds by reducing viscosity and promoting slippage at the rubber-to-metal interface, which could lead to higher extrusion rates, improved dimensional stability and a constant level of die swell. > Eliminates sticking to rotors in internal mixers or open mills and calendar rolls. > An activating effect on the cross-linking rate of sulfur cross- linked polymer / rubber compounds. > Improves EPDM flow and release characteristics in injection and extrusion processes.
2 years	25 kgs	1 - 5	It providesvery good lubricating effects and helps to improve flow and mould release. Can be incorporated both in the internal mixer or on the mill and is recommended to add this additive with the fillers.
2 years	25 kgs	2 - 4	Exhibits good plasticizing properties and highly effective in polar NBR rubber compounds. Improves the flow and release properties. Prevents sticking of elastomers and rubber compounds to rotors and rolls and can reduce the risk of scorching in highly loaded compounds.
2 years	25 kgs	1 - 5	In comparison to other processing additives, it exhibits better compatibility with most polymers used in rubber industry and, could show excellent affinity to the commonly used fillers like silica, carbon black, chalk or calcined clay.

Hoshine Silicon Co., Ltd. is the core industry of Ningbo Hoshine Group. It specializes in silicon metal, polysilicon, silicone and silicon-based technology, and is the largest silicon metal producer in the world with its own coal and thermoelectricity. It is also the unique enterprise who has the complete Si industry chain from quartz, silicon metal, monomer synthesis to the downstream products. Since the foundation in 2005, equipping with leading production, R&D and world class industrial infrastructure.

STANDARD SILICON RUBBER

High glossiness with good rebound resilience, economic and demoulding performance. Suitable for high appearance required molding products

Grade	Appearance	Hardness (Shore A)	Tensile Strength (MPA) >	Tear Strength (kN/m)	Elongation (%) >	Tensile Set	Rebound (%)>
HS-3430	Translucent	27-33	5.5	13	400	8	65
HS-3440	Translucent	37-43	7.5	16	350	8	50
HS-3450	Translucent	47-53	7.5	17	300	8	50
HS-3460	Translucent	57-63	7.5	17	250	8	45
HS-3470	Translucent	67-73	6.5	16	200	8	45
HS-3480	Translucent	77-83	6	16	100	8	40

GENERAL PURPOSE SILICON RUBBER

High transparency, demoulding performance. Suitable for molding applications.

Grade	Appearance	Hardness (Shore A)	Tensile Strength (MPA) >	Tear Strength (kN/m)	Elongation (%) >	Tensile Set	Rebound (%)>
HS-3421	Translucent	17-23	4	12	700	8	63
HS-3431	Translucent	27-33	5.5	13	450	8	66
HS-3441	Translucent	37-43	7.5	16	400	9	54
HS-3451	Translucent	47-53	7.5	17	350	9	55
HS-3461	Translucent	57-63	7.5	17	300	9	48
HS-3471	Translucent	67-73	6.5	16	250	8	45
HS-3481	Translucent	77-83	6	16	150	8	42
HS-3491	Translucent	87-93	4	15	50	7	58

COMMON SILICON RUBBER FOR MOLDING

Good transparency, rebound resilience and demoulding performance. Suitable for swimming cap, various kinds of keypads, home appliances, cake molds and seals.

Grade	Appearance	Hardness (Shore A)	Tensile Strength (MPA) >	Tear Strength (kN/m)	Elongation (%) >	Tensile Set	Rebound (%)>
HS-2111	Translucent	10-15	3	9	800	10	56
HS-2121	Translucent	17-23	3	8	600	10	55
HS-2131	Translucent	27-33	5	13	550	8	60
HS-2141	Translucent	37-43	6.5	16	450	8	60
HS-2151	Translucent	47-53	6	17	350	8	55
HS-2161	Translucent	57-63	6	17	300	7	50
HS-2171	Translucent	67-73	6	16	200	7	43
HS-2181	Translucent	77-83	4	14	150	8	40

STANDARD SILICON RUBBER FOR MOLDING

High transparency, Non fluorescent additive, rebound resilience and demoulding performance. Suitable for various kinds of keypads, parts and silicone rubber products.

Grade	Appearance	Hardness (Shore A)	Tensile Strength (MPA) >	Tear Strength (kN/m)	Elongation (%) >	Tensile Set	Rebound (%)>
HS-2122	Translucent	17-23	4	11	750	8	60
HS-2132	Translucent	27-33	5	13	550	8	60
HS-2142	Translucent	37-43	6.5	16	450	8	60
HS-2152	Translucent	47-53	6	17	350	6	55
HS-2162	Translucent	57-63	6	17	300	6	50
HS-2172	Translucent	67-73	6	16	200	6	43

GENERAL SILICON RUBBER FOR EXTRUSION

High transparency, and processability for extrusion. Suitable for DCBP Sulfide and making various kinds of extrusion rubber hose, strip and wire.

Grade	Appearance	Hardness (Shore A)	Tensile Strength (MPA) >	Tear Strength (kN/m)	Elongation (%) >	Tensile Set	Rebound (%)>
HS-1131	Translucent	27-33	5.5	13	400	8	65
HS-1141	Translucent	37-43	7.5	16	350	8	50
HS-1151	Translucent	47-53	7.5	17	300	8	50
HS-1161	Translucent	57-63	7.5	17	250	8	45
HS-1171	Translucent	67-73	6.5	16	200	8	45
HS-1181	Translucent	77-83	6	16	100	8	40

PLATINUM VULCANIZATION SILICONE RUBBER FOR EXTRUSION

Good transparency and processability for extrusion. Suitable for platinum vulcanization and making various kinds of extrusion rubber hose, strip and wire.

Grade	Appearance	Hardness (Shore A)	Tensile Strength (MPA) >	Tear Strength (kN/m)	Elongation (%) >	Tensile Set	Rebound (%)>
HS-1251	Translucent	47-53	7	18	320	8	50
HS-1261	Translucent	57-63	7	18	280	8	45
HS-1271	Translucent	67-73	6.5	16	200	8	40
HS-1281	Translucent	77-83	6	16	150	8	40

STANDARD SILICONE RUBBER FOR EXTRUSION

High transparency and processability for extrusion.Suitable for the high transparency extrusion products with DCBP or platinum vulcanization.

Grade	Appearance	Hardness (Shore A)	Tensile Strength (MPA) >	Tear Strength (kN/m)	Elongation (%) >	Tensile Set	Rebound (%)>
HS-1131PT	Translucent	31±2	6	14	550	8	60
HS-1141PT	Translucent	39-43	8	18	600	6	60
HS-1151PT	Translucent	48-53	8	18	450	6	55
HS-1161PT	Translucent	58-62	8	20	350	6	50
HS-1171PT	Translucent	68-72	8	20	270	6	45

Kuraray's styrenic block copolymer

SEPTON™

SEPTON™ – High-Performance TPE

SEPTON™ is thermoplastic elastomer and its series are used in a great number of TPE compounds and can be processed in various forms. These styrenic TPEs cover a broad range of applications as below:

Mobility

Medical

Oil modification

Consumer goods

Personal care

Electronics

SEPTON™

SEPTON™ 4000-series (SEEPS)

Grade	Styrene content	MFR		Solution viscosity (Toluene solution 30°C)			Physical form	Hardness type A
	wt%	230°C, 2.16 kg (g/10 min)	200°C, 10 kg (g/10 min)	5wt% (mPa.s)	10wt% (mPa.s)	15wt% (mPa.s)		
4033	30	<0.1	<0.1	-	50	390	Crumbs	76
4044	32	No flow	No flow	22	460	-	Crumbs	-
4055	30	No flow	No flow	90	5800	-	Crumbs	-
4077	30	No flow	No flow	300	-	-	Crumbs	-
4099	30	No flow	No flow	670	-	-	Crumbs	-

Unique SEPTON™ 4000-series shows high tensile strength, moderate elongation with exceptional oil absorbancy with low gels and defects. Kuraray produces SEPTON™ 4000-series with a range of molecular weights and high quality. It is used in several applications like gels and films, automotive, soft touch compounds, PVC replacement & many more.

SEPTON™ 8000-series (SEBS)

Grade	Styrene content	MFR		Solution viscosity (Toluene solution 30°C)			Physical form	Hardness type A
	wt%	230°C, 2.16 kg (g/10 min)	200°C, 10 kg (g/10 min)	5wt% (mPa.s)	10wt% (mPa.s)	15wt% (mPa.s)		
8004	31	<0.1	<0.1	-	40	-	Crumbs	80
8006	33	No flow	No flow	42	-	-	Crumbs	-
8851*	33	No flow	No flow	42	-	-	Crumbs	-

*Available soon

With its popular mid-block structure as an industry standard material, SEPTON™ 8000-series is an excellent choice, and Kuraray's customers use SEPTON™ 8000-series in adhesives, automotive, and personal care products.

HYBRAR™ 5000-series (non-hydrogenated)

Grade	Type	Styrene content	T _g	MFR		Solution viscosity (Toluene solution 30°C)			Physical form	Hardness type A
		wt%	°C	190°C, 2.16 kg (g/10 min)	230°C, 2.16 kg (g/10 min)	15wt% (mPa.s)	20wt% (mPa.s)	30wt% (mPa.s)		
5125	Vinyl-bond rich SIS	20	-13	3	-	-	100	650	Pellet	60
5127	Vinyl-bond rich SIS	20	8	3	-	-	85	540	Pellet	84

Its damping properties make HYBRAR™ is the product of choice for sports equipment and foamable sound damping sealants. Other applications include adhesives, coatings, sealants, hearing protection, automotive, and housing and construction components.

HYBRAR™ 7000-series (hydrogenated)

Grade	Type	Styrene content	T _g	MFR		Solution viscosity (Toluene solution 30°C)			Physical form	Hardness type A
		wt%	°C	190°C, 2.16 kg (g/10 min)	230°C, 2.16 kg (g/10 min)	15wt% (mPa.s)	20wt% (mPa.s)	30wt% (mPa.s)		
7125F	Vinyl-bond rich SEPS	20	-15	0.7	4	-	60	350	Pellet	64
7311F	Vinyl-bond rich SEEPS	12	-32	0.5	2	95	240	-	Pellet	41

Hydrogenated grades show an excellent miscibility with polypropylene. When blended, this results in exceptional transparency and clarity. Medical film and tubing film manufactured using HYBRAR™ is a more environmentally friendly alternative to flexible PVC due to the absence of harmful plasticizers.

What are some examples of compounds we can make with SEPTON™?

Some of the basic formulations are shown below. We can help to predict the possible mechanical property of a compound by using our simulation system. Feel free to get in touch with Kuraray to get more assistance.

	Unit	Formulation 1	Formulation 2
Formulation			
SEPTON™ 8851	wt	100	100
Paraffin oil	wt	125	100
h-PP	wt	45	65
Properties			
Hardness (type A) 15 s	-	64	84
Tensile test (MD)			
100% modulus	MPa	2.6	3.8
Tensile strength	MPa	10.2	23.8
Elongation at break	%	730	870
Tensile test (TD)			
100% modulus	MPa	2.0	4.7
Tensile strength	MPa	15.1	18.4
Elongation at break	%	830	760
Compression set (70 °C-22 h)	%	40	53
MFR (230 °C-2.16 kg)	g/10 min	1.0	2.4
Possible applications			
	-	Soft rubber replacement (Consumer goods, grips, swimming goggles etc.)	Soft Rubber replacement (Castors, swimming fins etc.)

– **How can we improve the compatibility of SEPTON™ or HYBRAR™ with other polar resins like polyamide, PC, ABS etc.?**

- Compatibility can be improved through the use of compatibilizers.
- KURAMIRON™ U TU-S5265 is recommended for enhanced performance.
- Particularly effective with TPU, POM, PA, and PBT. Alternative compatibilizers include:
- MAh-POE (for PA) and E-GMA (for PBT). For specific formulations, consultation is advised.

– **Is printing possible on TPE compound surface?**

- Printing is feasible on SEPTON™ and HYBRAR™ compounds.
- Inks formulated for polyolefin or SBR are recommended.

– **What are the solvents recommended for dissolving SEPTON™ or HYBRAR™ for spray film application?**

- Commonly used solvents include cyclohexane and toluene.
- Additional solvent options should be selected based on solubility characteristics.

– **How to improve the weatherability and UV resistance of SEPTON™ & HYBRAR™ compound?**

- Incorporation of UV absorbers, carbon black, or HALS is recommended.
- HALS such as BTMPS are effective stabilizers.
- These additives enhance long-term durability and UV stability.

– **Are SEPTON™ / HYBRAR™ grades REACH, RoHS, SVHC, HALAL certified?**

- Substances restricted under RoHS and SVHC are not intentionally used.
- Substances listed under REACH Annex XIV are not part of the production process.
- No HALAL certification (as of March 2025).

– **At what ratio SEPTON™ grades are compatible with polyolefin resins (HDPE, LLDPE, LDPE & PP)?**

- Typical formulation range: 5–30 wt% SEPTON™.
- For polyethylene: SEPTON™ 4000 or 8000 series are recommended.
- For polypropylene: SEPTON™ 2000 series or HYBRAR™ 7000 series are suitable.
- Matching melt viscosity with base resin is advised.
- Ratios can be optimized based on desired end-use properties.

– **Is there any SEPTON™ and HYBRAR™ grades that can be used for medical application? Any data on Bio-compatibility test?**

Yes, below three grades are recommended to medical use.

- SEPTON™ 2004F
- HYBRAR™ 7125F
- HYBRAR™ 7311F

What is SEPTON™ BIO-series?

SEPTON™ BIO-series is a unique hydrogenated styrene farnesene block copolymer (HSFC). Derived from sugarcane, this bio-based TPE is a more sustainable alternative to conventional HSBCs.

Features and benefits

- Bio-based polymer with up to 80% bio content
- Lower greenhouse gas emissions than conventional HSBC's
- Excellent wet and dry grip performance
- Strong and stable adhesion force across a wide temperature range
- Good processability
- Good damping properties over a wide temperature range
- Low compression set, low permanent set
- Soft without plasticizer
- Enables adhesive applications with excellent removability and no residue

Applications*

- Adhesives, coatings, sealants
- Compounding
- Consumer goods
- Electronics
- Industrial & construction
- Mobility
- Sporting goods & footwear
- 3D printing

*For certain applications, SEPTON™ BIO-series cannot be introduced due to raw material supply relations. Please contact our sales representatives.

**Assumptions & Limitations
For detailed information on assumptions and limitations, please contact our sales representatives.

Principles & Frameworks

- Calculation principles & frameworks: ISO14040:2006 and ISO14044:2006
- Lifecycle Inventory database: IDEA (Inventory Database for Environmental Analyses) version 2.3
- LCIA model: IPCC AR5 100a

System Boundaries

- Cradle to gate
- Biogenic carbon absorption is included
- Incineration and transportation to customer sites are not included

Hanwha TotalEnergies Petrochemical is a comprehensive material and energy company that produces high value-added chemical and energy products. Since it was founded in 1988, we have led the growth of the petrochemical business in South Korea through technological innovations and by successfully executing a market expansion strategy. In 2003, we began building the foundation to become a global multi-material and energy company. We executed that plan by forming a joint venture with the TotalEnergies Group, a major French company in the energy and chemical industry. Since then, we have continued to lead South Korea's petrochemical market and grow as South Korea's leading company through product innovations, strategic diversified investments and economies of scale.

OCCL, belonging to JP Goenka Group of companies, is one of the market leaders in the production of Insoluble Sulphur for the Tyre and Rubber industry around the world both in terms of quality as well as quantity. The company is oriented towards growth in a socially and environmentally sustainable manner. It has state of the art manufacturing facilities in India at Dharuhera (Hararyana) and at Mundra (Gujarat).

Only insoluble sulphur manufacturer in India

Production capacity 33000 MT/annum

Having 23+ years of experience

Global presence

Listed both in BSE & NSE

State of the art lab & RnD facility

NINGXIA BOYUAN RUBBER CO., LTD. 宁夏博远橡胶有限公司

PRODUCTION PROCESS:

LIXING- CSM is a kind of special rubber, it is produced from polyethylene by chlorination and chlorosulphonation with chlorine and sulphur dioxide. Various Grades of Lixintg- CSM are obtained according to the degree of chlorination and chlorosulphonation as well as sort of polyethylene polymer, the molecular chain is fully saturated.

SPECIFICATIONS:

Grade	Mooney viscosity	Cl content%	Sulphur content%	Vdaf%
CSM40-3304	41~50	35±2	1 ±0.2	<1.0
CSM40-3305	51~60	35±2	1 ±0.2	<1.0
CSM40-3306	61~70	35±2	1 ±0.2	<1.0
CSM40-3307	71~80	35±2	1 ±0.2	<1.0
CSM40-3308	81~90	35±2	1 ±0.2	<1.0
CSM45	25~40	25±2	1 ±0.2	<1.0

PROPERTIES

LIXING brand CSM provides a wide range of high-performance characteristics .

- Resistant to alkali and acid
- Color stability
- Resistant to temperature extremes
- Smooth material forms to different applications
- Excellent adhesion to metals
- Good electrical properties
- Radar transparent

PHYSICAL PROPERTIES

Elongation: 100% – 800%
Hardness Range (Durometer Shore A): 45 – 95
Tensile Strength: 1,000 – 3,000 psi

Zhenjiang Wholemark
Fine Chemicals Co. Ltd

Professional producer and reliable supplier of Accelerators, Antiozonants, Antioxidants, Anti-scorching agents, Silane coupling agents, Foaming agents, Vulcanizers, Cobalt sales, and so on for Rubber & Plastics. Exclusive distributor for Celogen® in Asia-Pacific Region.

WE ARE

- Producing, treading and researching for Chemicals
- Focusing on rubber / plastic additives
- Having 7 production bases & co-producers
- Growing together with our friends both inside and outside china
- Satisfying our old & new friends
- Adding values to our friends "Business & Products"
- Continuing our innovations in Chemical Industry

A POLYBLEND OF NBR-PVC

Rubaloy is a dry/mechanical Polyblend of NBR and PVC. Polyblends have changed considerably over the last few years and are now capable of giving finer, stronger materials with unique properties and an improved finish. Different ratios of NBR:PVC used in our product (varies from grade to grade) gives it an edge over Nitrile Rubber in ozone resistance, Chloroprene in fuel resistance & cost; and oil resistance in the case of EPDM.

EXCELLENT FUEL, OIL, OZONE, SOLVENT AND ABRASION RESISTANCE

Products made from Rubaloy have excellent fuel, oil, ozone, solvent and abrasion resistance; the finish is smooth and glossy due to the presence of PVC. Specialty grades offer unique properties such as low temperature resistance, extremely low hardness, fuel ‘C’ resistance, fire retardancy, anti-static properties; and the ability to produce light weight micro-cellular products. Rubaloy also offers low cost, general purpose grades for ozone and oil resistance. Due to its selected formulations and variety of grades, optimum physical and chemical properties can be achieved, along with excellent dimension control on extrudates and moulded products.

Our product’s manufacturing process creates negligible or no pollution at all. Even though Rubaloy is a dry/mechanical blend, it has superior dispersion and therefore, enhanced physical properties. The product is RoHS compliant. Its ingredients/components are listed on the U.S. EPA TSCA 8(b) Inventory; and it also meets the all important REACH norms.

Rubaloy is packaged in 25 kg. LDPE bags for easy loading into mixers or HDPE reinforced paper bags for rough handling.

Rubaloy is manufactured by Imperial Water-proofing Industries Pvt. Ltd (An ISO 9001-2008 Company and a Government Recognized Export House), which was formed in 1959 in Mumbai, India.

NBR-PVC, as the name suggests is a combination or blend of acrylonitrile butadiene rubber (nitrile rubber/nbr) and polyvinyl chloride (pvc resin) and is categorised as a ‘polyblend’.

As a combination of nitrile rubber and pvc, it maintains most characteristics of both, making it oil, fuel, ozone, solvent and abrasion resistant.

DiamondKoteFranklynn mold release agents provide much more than release of molded parts from mold surfaces: they're a tool designed for your specific needs - permanent, semi-permanent, or sacrificial performance - on all types of rubber elastomers, urethanes, fiberglass, and other resins. Our expert chemists create innovative mold release technologies to optimize your production process and minimize scrap. Release agents customized to your process will:

Improve product finish and appearance, lowering scrap rates and improving throughput

Save time and money by reducing downtime cost of cleaning labor and material

Reduce release transfer to molded products, improving post-molding paint or bonding steps

Achieve desired cosmetic appearance (gloss, matte, overall feel, etc.)

DiamondKote™

Franklynn DiamondKote™ for General Rubber Molding

WATER-BASED PRODUCTS

DKW-4185
Premium, semi-permanent release agent that can be used on a variety of sulfur-cured elastomers; offers excellent life cycle, cleaner molds, and reduced scrap rates

DKW-157
Semi-permanent release agent for epoxy, phenolic, and composite manufacturing; improves productivity through additional molding cycles between applications

DKW-71E
Stable, low-transfer formula delivers excellent release for all halobutyl compounds; commonly used in the pharmaceutical industry

DKW-4168
Highly versatile release agent can be used on a variety of peroxide-cured elastomers; offers excellent cycle life, cleaner molds, and reduced scrap rates

DKW-4070
Semi-permanent release agent designed for use in the molding of peroxide-cured elastomers such as silicone (polysiloxanes), EPDM, and FKM

DKW-4013A / DKW-4013D
Silicone-free, semi-permanent release agent designed for silicone and fluorosilicone elastomers

DKW-4237
Silicone-free formula developed for peroxide-cured compounds, excellent for FKM and other exotic compounds

SOLVENT-BASED PRODUCTS

DKH-149
Versatile release agent for bonding natural rubber to metal in Noise Vibration Harshness (NVH) products

All products available in 3 package sizes: 5 gallon pail, 55 gallon drum, and 330 gallon tote

Franklynn DiamondKote™ for Tire Molding

WATER-BASED PRODUCTS

DKW-4550CL
Formulated for the molding of all types of rubber tires; delivers multiple molding cycles between applications

DKW-4650BL
Promotes release from tire bladders, reduces bladder buckling and extends bladder life; may be re-applied to a used bladder to promote release of green tires

DKW-4580CL
Formulated for the molding of all types of rubber tires including complex architecture tread designs; creates a superior slip-coating that allows for multiple cycles between reapplication

DKW-3178G3X
Designed to offer a high degree of mechanical slip and repeated excellent release of material

DKW-4655BL
Semi-permanent release agent designed to release tires from the curing bladder and maximize bladder life

All products available in 3 package sizes: 5 gallon pail, 55 gallon drum, and 330 gallon tote

Franklynn DiamondKote™ for Mold Cleaning

SOLVENT-BASED PRODUCTS

FRANKLEEN #23
General purpose, mold cleaner designed to cling to mold surfaces, promoting a cleaner working environment and avoiding spills and waste from runoff

FRANKLEEN #1
General purpose, mold cleaner; water-thin formula penetrates deep mold cavities for improved cleaning

All products available in 2 package sizes: 5 gallon pail and 55 gallon drum

Mold Release Types:

- Sacrificial
- Semi-Permanent
- Permanent
- Water-Based
- Solvent-Based

To optimize performance, Franklynn DiamondKote™ chemists continuously analyze and refine formulations. Testing capabilities include:

- Full Wet Chemical Testing
- FT-IR with Transmission, Reflection, and ATR
- IR and Visible Microscopy
- UV-VIS Spectroscopy
- UV-VIS Fluorescence

- SEM and EDX
- Microwave Solids Analysis
- GC-MS
- HPLC
- Atomic Absorption

- Thermal Analysis (including TGA, DSC, and DMA)
- Mechanical Testing (peel, adhesion, tensile, flexure, fatigue - Instron is a sister ITW company)
- Submicron Particle Size Analysis

- Karl Fischer Analysis
- Viscometry (disc, cone-plate)
- Melt Indexer
- Fineness of Grind
- Abrasion Testing
- Coefficient of Friction (static and dynamic)

INDUSTRY	CATEGORY	MATERIAL TYPES	VALUE
AUTOMOTIVE	NOISE VIBRATION HARSHNESS	• AEM / AECM • Butyl • FKM • HNBR • Neoprene • Nitrile • NR • Peroxide and sulfur cured EPDM • SBR • Viton®	• Increases number of cycles between applications • Reduces scrap rate • Increases tool longevity • Controls transfer minimizes problems with secondary operations including post-adhesion and post-painting
	BRAKE PADS	• NBR	• Increases number of cycles between applications • Cleaner molds • Easier release
	POWER TRANSMISSION BELTS	• CR • EPDM • NBR • NR • SBR	• Improves semi-permanency for more cycles between touch-ups • Fewer applications • Less frequent mold cleaning • Better release performance
	SOLID AND PNEUMATIC TIRES	• NR • SBR	• Reduces mold release consumption • Improves release, optimizing production process • Increases cavity lube sidewall-bladder life • Increases cycles between touchups, reducing the amount of material used • Tool longevity increases, cleaning expense minimized
	AUTO INTERIOR COMPONENTS	• Aliphatic and Aeromatic Polyurethane	• Improves release delivers superior performance in manufacturing process • Provides appropriate gloss and appearance • Limits transfer for better adhesion
SEALS & GASKETS	AUTOMOTIVE, OIL AND GAS MANUFACTURING	• AEM / AECM • All sulfur and peroxide compounds • Bisphenol A-cured fluoropolymers • EPDM • FKM (Vamac, Aflas, Viton) • HNBR • Neoprene • Nitrile • Silicone	• Increases number of cycles between applications • Reduces mold release consumption • Reduces transfer to parts for better post bonding • Less build-up on the molds, reducing downtime for cleaning • Lower scrap rates • Improves part cosmetics
	GOLF BALL CORE AND COVER	• Butyl • NR • SBR • Surlyn • Urethane	• Water-based, non-flammable, environmentally friendly formulations • Controls transfer to molded part • Excellent release-ease lasting multiple cycles per single application • Improves part cosmetics, reduces scrap rates
SPORTING GOODS & ATHLETIC APPAREL	SHOE COMPONENTS	• EVA • Polyurethane	• Improves release delivers superior performance in manufacturing process • Provides appropriate gloss and appearance • Limits transfer for better adhesion
	FIBERGLASS BOARD AND INSULATION PRODUCTS	• Acrylic	• Reduces downtime and increases productivity • Reduces mold release consumption • Improves finished product quality • Eliminates unpleasant odors • Controls transfer minimizes problems with secondary operations including post-adhesion and post-painting
BUILDING & CAPITAL EQUIPMENT	AIRPLANE CABIN INTERIORS/ WIND BLADES	• Composites • Epoxic • Phenolic	• Increases number of cycles compared to solvent-based releases • Improves productivity by greatly reducing downtime • Eliminates need for additional products (wax & sealants) during molding process • Tools remain very clean
	TEST TUBE STOPPERS	• Bromobutyl Rubber Compounds • Halobutyl	• Increases number of cycles between applications • Easier flash removal • Leaves less residue on molds/ tooling for a cleaner finished product and workplace

FINORCHEM

ABOUT US

Finorchem produces specialty chemicals and rubber additives with a strong foothold in India and Asia Pacific region. Having ambitious targets to grow we have diversified into pharma intermediates, specialty performance chemicals and constantly working on developing the next generation molecules and chemicals keeping in mind the future needs of the industry.

Trade Name	Chemical composition	Physical Form	Standard Packing	Application
ACCELERATORS				
ACCELERATORS - THIAZOLES				
Mercure MBT	2-mercapto benzothiazole (MBT)	Powder	25 kg paper bag	Semi ultra accelerator with moderate scorch safety. Used alone or in combination with booster ultra accelerator
Mercure MBTS	Di-benzothiazole disulphide (MBTS)	Powder	25 kg paper bag	
Mercure ZMBT	Zinc-2-mercapto benzothiazole (ZMBT)	Powder	25 kg paper bag	
Mercure F	Blend of MBTS & basic accelerators	Powder	25 kg paper bag	
Delayed action fast curing primary accelerators				
ACCELERATORS- SULPHENAMIDE				
Mercure CBS	N-Cyclohexyl-2-benzothiazole sulphenamide (CBS)	Pellets/ Powder	25 kg paper bag	TBSI is delayed action introsamine free accelerator base on primary amine. Rubber compounds based on diene rubbers with TBSI has lower head generation and provides execl-ent reversion resistant vulcanizates it ideal for thick articlant i.e. Tractor and earthmoving tires (OTR) & Engine moutings Has excellent storage & hydrolytic stability even under Hot and humid conditions.
Mercure TBBS	N-Tert-butyl-2-benzothiazole sulphenamide (TBBS)	Pellets/ Powder	25 kg paper bag	
Mercure MBS	2-(morpholinothio)-benzothiazole	Pellets	25 kg paper bag	
Mercure DCBS	N-dicyclohexyl benzothiazole (MBS)	Micro granules	25 kg paper bag	
Mercure TBSI	N-dicyclohexyl benzothiazole Sulfenimide	White to off white oil treated powder	25 kg paper bag	
ACCELERATORS THIURAMS				
Mercure TMT	Tetramethyl thiuram disulphide (TMTD)	Powder	25 kg paper bag	Ultra fast accelerators. Used alone or as a booster for Thaizole or Sulphenamide accelerators. TMTD & TBzTD also can be used as sulphur donor
Mercure TBzTB	Tetra benzyl thiuram disulphide (TBzTD)	Powder	25 kg paper bag	
Mercure TMTM	Tetra benzyl thiuram monosulphide (TMTM)	Powder	25 kg paper bag	
ACCELERATORS GUANIDINE				
Mercure DPG	Diphenyl guanidine (DPG)	Powder	25 kg paper bag	Used as secondary accelerator (booster) for mercapto & sulphenamide accelerators. Alone give slow onset of cure
ACCELERATORS DITHOCARBAMATES				
Mercure ZDMC	Zinc-di - methyl dithio - carbamate (ZDMC)	25 kg paper bag	Powder	Ultra fast accelerators. Used alone or as a booster for Thaizole or Sulphenamide accelerators. Most preferred accelerators for Natural/ Synthetic Rubber latex based compounds
Mercure ZDC	Zinc-di - dithio - carbamate (ZDEC)	25 kg paper bag	Powder	
Mercure ZDBC	Zinc-di - butyl dithio - carbamate (ZDBC)	25 kg paper bag	Powder	
Mercure ZBEC	Zinc-di - benzyl dithio - carbamate (ZBEC)	25 kg paper bag	Powder	
Mercure SBDC	Sodium di - N - butyl dithio - carbamate (SBDC)	200 kg drum	Liquid	
Mercure SBEC	Sodium dibenzyl dithio - carbamate (SBEC)	50/200 kg drum	Liquid	

FINORCHEM PRODUCT RANGE

Trade Name	Chemical composition	Physical Form	Standard Packing	Application
ACCELERATORS SPECIAL PURPOSE AMIN				
Mercure AHB	Aniline heptaldehyde condensate	Liquid	50/200 kgs drums	Ultra fast accelerator, used as booster accelerator in rubber latex products
ACCELERATORS SPECIAL PURPOSE AMIN				
Mercure AHB	Aniline heptaldehyde condensate	Liquid	50/200 kgs drums	Ultra fast accelerator, used as booster accelerator in rubber latex products
VULCANIZING AGENT				
Mertex HD OT - 20	Polymeric Sulfur	Powder oil treated	25 kg paper bag	At Vulkanising temperature depolmerises to solublesulpur
SULPHUR DONOR				
Merdonor DTDM	N.N.'-dithiodicaproductum (DTDC)	Powder	25 kg paper bag	Eco-friendly Sulphur donor. Vulkanising agent for Semi & EV cure system. Provide excellent heat/reversion/ageing resistance in NR & SR compound. Non blooming.
Merdonor DTDC	N.N.'-dithiodicaproductum (DTDC)	Powder	25 kg paper bag	
PROCESSING AIDS				
Antitack agent VC	Potassium salt of fatty acids	Liquid	200 kg drums	Very effective antitack agent used for separating unvulcanised rubber sheets Secondary Gelling agent, specially designed for use during latex foam manufacturing Mechanical Stabiliser, specially designed to improve the stability of latex against heatm filler & mechanical working
Merstab FS	Mixture of amides of fatty acids	Liquid	50 kg drums	
Merstab MSB	Blend of Alpha Olefins Sulphonated type Surfactant	Liquid	50/200 kg drums	
CHEMICAL PEPTISER				
Mertiser	Pentachoro-thio- phenol (PCTP) with activating & dispersing agent	Powder	25 kg paper bag	Powerful & efficient peptizing agent both on open mixing mill as well as in internal mixer
Mertiser DBD	2,2' - dibenzamido diphenyl disulfide (DBD) with activating & dispersing aids	Powder/Pellets	25 kg paper bag	
Mertiser DBD 100%	2,2' - dibenzamido diphenyl disulfide (DBD)	Powder	25 kg paper bag	
RETARDERS				
Meretard PVI	N-Cyclohexyl thio-phthaliminde (CTP)	Powder	25 kg paper bag	Very effective non staining/ discolouring retarder improve the scorch safety & prolong the flow times

Ritesh International Limited

With outstanding quality work and rich industrial experience, we, Ritesh International Limited have emerged as one of the leading manufacturers and suppliers of Stearic Acid (All Grades), Glycerine, and others.

Since our inception in 1981, we are providing superb quality products to our valued customers at national level. Moreover, our ultramodern infrastructural set up not only helps us to produce innovative products but also offer effective packaging solutions to our customers.

Trade Name	Chemical composition	Physical Form	Standard Packing	Application
RETARDERS				
Meretard PVI	N-Cyclohexyl thio-phthaliminde (CTP)	Powder	25 kg paper bag	Very effective non staining/ discolouring retarder improve the scorch safety & prolong the flow times
ANTIDEGRADANTS & ANTIOXIDANTS				
ACCELERATORS- STAINING				
Mernox 6C	N-1,3-Dimethylbutyl-N'-phenyl-p-phenylene-diamine (6PPD)	Pastille	25 kg paper bag/50 kg fibre drums	Gives good protection against Oxidative Heat ageing, Anti flex cracking, Ozone, UV & metal poison
Mernox 6C liquid	N-1,3-Dimethylbutyl-N'-phenyl-p-phenylene-diamine (6PPD)	Dark brown liquid	Road tanker	
Mernox IPPD	N-isopropyl-N'-phenyl-p-phenylene-diamine (6PPD)	Pastille	25 kg paper bag	Gives good, protection against Oxidative Head ageing, Anti flex cracking, UV & Ozone
ACCELERATORS- STAINING				
Mernox TQ	2,2,4-trimethyl 1,2-dihydroquinoline, polymerised (TMQ)	Beads/Powder	25 kg Paper bags	Give protection against oxidation & Heat ageing, Rubber poison, moderate protection against flex cracking
ACCELERATORS NON STAINING				
Mernox SP	Mixture of Styrenated Phenols (SPH)	Liquid	50/200 kg drums	Give moderate protection against heat & oxidation
Mernox SP Emulsion	Mixture of Styrenated Phenols (SPH)	Emulsion with water	50/200 kg drums	Very effective A/O especilaly for NBR. HNBR & ACM rubbers for hight tem- perature/severe performance. Give synergy with imdazoles,Phenolic & Phosphites antioxidants an excellent non-discoloring, non-staining antioxidant, specially suitable for use in rubber thrads and latex for carpet backing, foams household and surgical gloves, medi- cal products, baby bottle teats, bath mats, hot water bottles, automotive components, and paper coatings. moderate protection against heat & oxidation if use alone but used pri- marily as synergistic antioxidant in combination with other antioxidants of both amine & phenolic type.
Mernox 445	4-(1-methy-1-phenylethyl)-N-4 (1-methyl-1-phenylethyl phenil) aniline	White to off white power	25 kg drums bag	
Mernox CPL	Butylated reaction product of p-cresol and dicyclopentadiene	Cream coloured or amber powder	25 kg drums bag	
Mernox MB2	(4,5)- Methyl - 2 - mercapto benzimidazole	White to off white powder	25 kg drums bag	
CHEMICAL INTERMEDIATE & FLOATING AGENT				
Na-MBT	50% Aqueous Solution of sodium-2- mercapto-benzothiazole (Na-MBT)	Liquid	200 kgs drum or road tanker	Main intermediate for thiazole & sulphenamide accelerators. Also acts as floating agent for mining, a corrosion inhibitor, metal deactivator

Specifications

Henghe Materials has been serving in synthetic resin and fine chemical industry for more than 15 years. Especially, Henghe is the hydrocarbon resin producer, manufacturing the diverse kinds of the hydrocarbon resins which meet the customers' needs by offering a wide and innovative technology. Until now Henghe's annual capacity is over 200,000 Metric Tons, and export over 60 countries in the world.

15 Years of Experience in Synthetic Resin & Fine Chemical

Capacity 200000 MT/Annum

Export over 60 Countries

PRODUCTION CAPACITY

C5 Hydrogenated Hydrocarbon Resin	25000 ton/year
C9 Hydrogenated Hydrocarbon Resin	55000 ton/year
C5 Hydrocarbon Resin	25000 ton/year
C9 Thermal Hydrocarbon Resin	40000 ton/year
C9 Catalyst Hydrocarbon Resin	10000 ton/year
C5/C9 Copolymer Resin	15000 ton/year
Coumarone Resin	35000 ton/year
DCPD (Dicyclopentadiene)	15000 ton/year
ENB (Ethylidene Norbornene)	15000 ton/year

C9 Hydrocarbon Resin

S298	Radial	60	50	mABS,HIPS modification, vulcanized products
S299	Radial	37	25 (5.43% TSV)	mABS,HIPS modification, vulcanized products
S200	Radial	49	-	Vulcanized products

This document shows typical values and should not be interpreted as specifications.
Packaging and physical form: SSBR and LCBR available in bales, SBS available in pellets.
2022.1

VVTI PIGMENTS PVT. LTD. one of the world's largest manufacturers and exporters of Titanium Dioxide (TiO2) has its own state-of-the-art manufacturing facility located in Tamilnadu. Besides TiO2 VVTi also manufactures Ferrous Sulphate Hepta Hydrdate (FeSO4 7H2O) and Ferro Gypsum and continues to explore possibilities of adding more value-added products.

TITANIUM DIOXIDE

The most commonly used white pigment in the world!

With its versatile applications Titanium Dioxide has made a revolution in several industries and has become the most commonly-used white pigment in the world. More than four million tonnes are used annually for diverse industrial applications like manufacturing of Paint, Toothpaste, Cosmetics, Paintings Inks, Textiles and Plastics among other products.

VVTI Pigments Pvt. Ltd

SPECIFICATIONS OF OpaTi - Titanium Dioxide (ANATASE)

Application	Rubber Application
Odour	Odourless
Colour & Texture	White Soft Dry Powder
pH of the Pigment (20% slurry)	6.00 - 8.00
Purity as TiO2 % by mass	99.8 Min
Matter soluble in Water % by mass	0.30 Max
Residue on 45 microns IS sieve, % by mass	0.07 Max
Oil absorption, % by mass	21.0 - 23.0
Loss on drying, % by mass	0.35 Max
Reducing Power	Match with Standard
Dispersion	Excellent
Iron as Fe, ppm by mass	32.0 Max
L*	98.5 Min
A*	0.10 to 0.15
B*	1.30 - 1.60
YIE 313	2.45 - 3.00
WI CIE	90.0 min
457 Brightness	94.5 min

Registration Certificate

Certificate No. - 25RN07DT

This is to certify that

Rajshila Synthetics Private Limited

Corp. Office: Room No. - 116 And 117, First Floor, NDM - 2, Plot No. D-1, 2, 3, Wazirpur Distt. Centre, Netaji Subhash Place, North West Delhi, Delhi - 110034, India.

Warehouse (Delhi): Khasra No 391, 408 & 409, Extended Lal Dora, Alipur, Delhi - 110036 India.

Warehouse (Haryana): Plot No. 105, Sector - 06, Faridabad, Haryana - 121006 India.

Warehouse (Kolkata): Dag No. 161, 2266, 2267, 2268, Sankrail Industrial park, Bhagabatipur, Howrah - 711302, West Bengal, India.

has been assessed by RICL and found to comply with the requirements of

ISO 9001 : 2015 Quality Management Systems

For the following activities:

Import, Warehousing and Distribution of Natural & Synthetic Rubbers, Polymers, Filler, Activators, Colourants, Curatives (for Both Peroxide & Sulphur Systems), Plasticizers & Tackifying Agents, Cleaning Agents, Blowing Agents, Processing Aids, Pharmacy Grade Plastic Granules, Waxes and Allied Products & Chemicals.

Date of Initial Certification: 05/08/2022

Date of This Certification: 16/07/2025

Date of Current Certification: 20/07/2026

Ist Surveillance Audit Successfully Conducted.

IInd Surveillance on or before: 15/06/2027

Certification Valid Until: 15/07/2028

This certificate can be verified at www.iafcertsearch.org, www.uafaccreditation.org or at www.riclis.com

United Accreditation Foundation Inc.,
1060 Laskin Road, Suite 12B/13B, Virginia Beach VA 23451, United States of America.

UAF is member of International Accreditation Forum (IAF). Its membership status can be verified at www.iaf.nu. This Certificate has been issued by and remains the property of Royal Impact Certification Ltd., 623, Tower-B, iThum, Plot No. A - 40, Sector - 62, Noida - 201301, NCR, India and must be returned on request or if certificate is withdrawn. Validity of this certificate is subject to successful surveillance audits as per dates given above.
