

LUCENETM LC180

Polyolefin Elastomer

Applications

- · General purpose thermoplastic elastomer for polymer modification
- Shoe sole, Wire & Cable, Packaging Films

Description

- LUCENETM LC180 is an ethylene-1-octene copolymer produced using LG Chem's metallocene polymerization catalyst and solution process technology.
- LUCENETM LC180 is an excellent impact modifier for plastics and offers unique performance capabilities for compounded products.
- LUCENE™ LC180 complies with FDA regulation 21 CFR 177.1520(c)(3.2c).

Typical properties

- (2) Typical resin property values are measured on a standard compression molded specimens
- (3) Speed of 500 mm/min.

Processing information

LUCENE[™] LC180 may be processed on conventional equipment. It is recommended that
hopper feed throat should be cooled below 30°C to prevent from pellet bridging with low
melting point.
