MBS International School always takes pride in endowing their teachers with latest trends in education. Our two preprimary teachers got the envious opportunity to attend the workshop on “The Magic Movements in Early Years” on November 17, 2018. The workshop was organized by Teach Next Education. The facilitator, Dr. Sapna Aggarwal, Educationist, briefed the teachers how movements that come naturally to children can help them develop competence and confidence, while ensuring their holistic growth. She exhilarated them to develop their own methods of movements while learning in their curriculum. The collaboration was informative as well as amusing as it had a wide variety of stimulating activities for teachers.

It was the wonderful erudition indeed!
