#### **Glimpse of the Workshop**

Wipro Limited is a leading global information technology, consulting and business process services company. It harnesses the power of cognitive computing, hyper-automation, robotics, cloud, analytics and emerging technologies to help the clients adapt to the digital world and make them successful. A company recognized globally for its comprehensive portfolio of services, a strong commitment to sustainability and good corporate citizenship, it has over 160,000 dedicated employees serving clients across six continents. Together, they discover ideas and connect the dots to build a better and a bold new future.

Wipro with its bright vision to fulfil its commitment towards sustainability has taken up an initiative- Wipro Earthian to sow the seeds of sustainable development in the young minds.

In regards with this program a seminar was conducted by the resource person Mr Ashish for teachers of Delhi- NCR Schools on September 21, 2019 to encourage the schools to participate in the program.

The Wipro earthian program for schools aims at providing exposure to multiple perspectives, within the students' peer group and the world around them. There are

three themes of exploration: biodiversity, water and waste. Students may select either of the three themes and register their teams for the program.

The Wipro earthian college program aims to help the students in developing a deep understanding of the prescribed themes. It ensures that individuals understand how their actions impact the environment. Through research and field reporting students will explore areas of Water, Waste and Food.

The project needs a combination of research and field reporting. The submission for the project is required to identify a key problem and highlight the role of different stakeholders – government agencies, citizens and private agencies involved. Participants will be required to explore interconnectivity between environment, economics and people in the context of the selected issue. Our school is looking forward to join hands with the organisation and promote sustainable education for our children
