

PROJECT SMART BUS

The project smart bus was taken up by our students (Neha Deol & Muskan Choudhry - XI B) and teachers for the growing needs of our developing nation. Our project won the **best ideation certificate** at tinker fest held in Ramjas School on August 1st, 2018. The project used infrared sensors to sense and project that how many seats are left in the bus and depicts this information on the LED screen attached on the top of the bus.
