

World Space Week was celebrated by the members of Astronomy Club of SVISG on 09/10/20.

A virtual Astronomy Fair was organized for the students of classes I-V through Google meet and an Inter house astronomy quiz on the theme "Satellites" was conducted for the classes VIII-XII. It was held through Google forms and there were three participants from each house in the quiz

Videos of members of Astronomy Club, performing hands-on activities were presented to the students of classes I - V through a Google drive link. The children enjoyed the videos. They learnt the concept behind the working of a rocket, by viewing the 'Balloon Rocket Race'. The concept of safe landing using a parachute, was explained by the activity 'A-polo-naut'. Different phases of moon were shown by using Oreo biscuits in an interesting way. It was a joyful learning experience for the primary school students.

The astronomy fair not just gave a joyful experience to the students but also made them aware of importance of astronomy and space science.
