Activity-1

What I have to do? To obtain fibres from a fabric.

What I require? Cotton fabric and a magnifying glass

What do I need to know? There are two types of fibres: natural fibres and synthetic fibres.

Teacher's Activity: Teacher will ask students to

- (1) take a cotton fabric
- (2) find a loose thread or yarn at one of the edges and pull it out. If no loose yarns are visible, gently pull out a yarn with a pin or needle.

- (1) place the piece of yarn on the table and press one end of the yarn with your thumb.
- (2) scratch the other end of the yarn along its length with their nail.

What have I observed?

The yarn splits up into thin strands. These thin strands of thread are called _____. It is made up of a number of threads interwoven with each other.

Pull out the fibres from the yarn and paste them in your notebook.

Activity 2- Collect some samples of different types of fabrics and paste in your Science notebook. Write their name and some special features:

1. texture- smooth/ rough
2. shine/ dull
3. transparent/ translucent / opaque
4. hard/soft
