# Preface

This book empowers aspiring candidates with a single, standardised high quality benchmark test to assess their corporate readiness. It is go-to resource for students to prepare for technical coding rounds, covering a wide range of previously asked software coding questions with answers in three popular programming languages: C, Java, and Python.

Key Features:

- **Comprehensive Coverage:** The book will contain a vast collection of previously asked software coding questions, ensuring students are well-prepared for any technical coding round.
- **Multilingual Support:** The book will provide answers in three languages: C, Java, and Python, catering to students with different programming language backgrounds.
- **Easy Reference:** The book will be designed for easy reference, with clear headings, concise explanations, and well-organized content, making it simple for students to quickly find and review relevant questions and answers.

Target Audience:

- **Students:** The primary target audience will be students pursuing degrees in Computer Science, Information Technology, or related fields, who need to prepare for technical coding rounds as part of their academic or professional pursuits.
- **Professionals:** The book will also be useful for professionals looking to brush up on their coding skills or prepare for technical interviews.

Benefits:

- **Improved Preparation:** The book will help students prepare thoroughly for technical coding rounds, increasing their confidence and chances of success.
- **Time-Saving:** With a comprehensive collection of questions and answers in one place, students will save time and effort in their preparation.
- **Language Flexibility:** The multilingual approach will allow students to focus on the language they are most comfortable with, while still benefiting from the comprehensive coverage of coding concepts.

# Contents

<b>Part 1:</b>	<b>Basic Data Structures</b>	<b>1-228</b>
1	Arrays	1
2	Strings	104
3	Bit Manipulation	185
<b>Part 2:</b>	<b>Basic Algorithms</b>	<b>229-315</b>
4	Searching	229
5	Sorting	304
<b>Part 3:</b>	<b>Fundamental Data Structures</b>	<b>316-402</b>
6	Stack and Queues	316
7	Heaps and Maps	353
<b>Part 4:</b>	<b>Intermediate Data Structures and Algorithms</b>	<b>403-544</b>
8	Graph	403
9	Hashing	438
<b>Part 5:</b>	<b>Intermediate to Advanced Algorithms</b>	<b>545-695</b>
10	Backtracking	545
11	Dynamic Programming	614
<b>Part 6:</b>	<b>Problem-Solving and Practice</b>	<b>696-817</b>
12	Mixed Difficulty Problems	696

## **ABOUT THE AUTHOR**

**Suraj Kenadi** is a seasoned software engineer and entrepreneur with over 12 years of extensive programming experience in training delivery, designing, moulding and shaping the careers of a thousand-plus aspiring individuals, he shares his growing passion for crafting clear, concise, and accessible technical documentation, while also navigating distinct cultural nuances in an approach to communicate and collaborate.

Deeply immersed in digital technologies utilizing modern authorizing tools, collaborative platforms, and knowledge based on experience, aiming to create documentation that is intuitive, easy to navigate, and tailored to the audience's specific needs. The rapid pace of technological advancements necessitates a commitment to lifelong learning and staying updated on new software, and industry trends.

Cracking the Technical Interview by Suraj Kenadi is considered a definitive guide for technical interview preparation, it covers common data structures, algorithms, and problem-solving techniques in various programming languages. A structured 360-degree prep strategy can go a long way in helping you bag that job in a reputed IT company, a single-point focus in helping software engineers crack technical interviews at top-tier firms.
