

NATIONAL SEMINAR

National seminar was organized by the Department of Physics on “THE WONDERFUL WORLD OF MATERIALS” by Dr. Chinnakonda S. Gopinath, FASC, an outstanding scientist, National Chemical Laboratory (CSIR-NCL) Pune, India on 20th March 2024.

Total number of students participated: 200

In this Seminar, sir has explained the changes that occur in nano stage- I.e Hydrophilic, Production of colours in Optical applications & role of TiO_2 & Zn oxide in giving protection from UV -Radiation and in reducing Melanin percentage .Also he explained the changes that occur in nano size. Sir also has explained the quantum effects on & on production of colours by Carbon nano dots and how they are used in the display systems & Medical field.
