

NATIONAL SEMINAR

National Seminar was organized by Physics Department on 29-10-2022 in association with Jana Vignana Vedika on “Working of James Webb Space Telescope”.

Resource Person: Dr.T.Venkateswaran, Sr.Scientist, DST, New Delhi.

In this program, he explained how the telescope works and its applications. They are: creation of galaxies and how they deteriorate finally due to Nuclear-Fusion. He explained about how the formation of new objects will take place due to collision of cosmic galaxies. Also he explained the formation of exoplanets and how to view light curve & web spectrum by using this James Webb Space Telescope.
