

Event name : Observing Rain Water Harvesting System unit at Revenue colony park.

Date:28-1-2023

- Department of Botany Organized a field trip for II BZC students to Revenue colony park. They observed Rain Water Harvesting System.
- Water is a precious, essential and an abiotic component of the ecosystem. Today we all are heading toward the scarcity of water, and this is mainly because of the lack of water conservation and pollution of water bodies. So, let us not waste a drop of water and start conserving water for further use.
- Benefits of rain water harvesting system are as follows:
 - Drinking
 - Cooking
 - Washing vegetables
 - Agricultural purposes
 - Toilets (Bathing and Flushing Toilets)
 - Gardens, House plants and Outdoor plants
 - Lawns
 - Water for pets, wildlife, livestock
 - Pools and other water bodies
 - Washing vehicles and equipment
 - Fire protection
 - Composting
