

ESSAY WRITING COMPETITION

DATE:24-1-2020

Topic: Pollution Control Measures.

The Department of Botany organised Essay Writing Competition on Pollution Control Measures. Students suggested some of the control measures such as:

- Use paper in limited quantities, and print double-sided.
- Look for paper that has been made with recycled materials.
- When shopping, buy in bulk in order to reduce the amount of packaging required to package the goods. Look for products made with recycled materials. Bring reusable bags to carry purchased goods in order to reduce the number of disposed paper/plastic bags.
- Use water sparingly by installing water-efficient shower heads and faucets, and install energy-efficient appliances. Make sure that sinks and hoses are not dripping. Do not excessively water plants.
- Use transportation efficiently, and utilize mass transportation when possible. Recycling by using motor oil is also a way to the disposal of a hazardous material.
- Eating locally produced foods reduces the amount of fuel required for the Food transportation.
- Degree Students bagged First, Second, and Third Prizes.
