

Guest Lecture on Development of Science and its Usefulness to the Society

Arranged a guest lecture on *Development of Science and its Usefulness to the Society* on 09-09-2016.

Participants:

A total number of 80 students and faculty.

Resource person:

Dr.K. Venkateswara Rao, Reader in Chemistry (Retd), Osmania University, Writer and Editor of Telugu Academy Books.

Description of the programme:

The resource person clearly explained that how science now a days respond to social needs and global challenges. He told how it will benefit our society in creating new knowledge and ultimately how it increases our quality of lives. He has given many examples about the applications of scientific knowledge, how it satisfies the basic human needs and helps in improving living standards. Students understood that the Applied Science is nothing but the application of existing scientific knowledge to practical application. By this lecture the students understood the value of basic sciences.

“Science will never be a finished book. Any development over time reveals more and deeper difficulties” –Albert Einstein
