

SEMINAR ON ADVANCES IN WIRELESS NETWORKS

DATE : 7th July, 2018

RESOURCE PERSON : Dr. E. Suresh Babu, Asst. Professor, NIT, Warangal

DESCRIPTION OF THE PROGRAMME:

The resource person explained the students that Mobile and Wireless Communication systems will allow 5G support to the expected increase in data volumes and broadening the range of application domains. 5G systems are built upon the evolution of existing technologies complemented by new radio concepts that are designed to meet the challenging requirements. He also created awareness on technologies such as Cellular Telephony, Personal Communications Systems and Wireless Local Area Networks.

LECTURE BY DR. E. SURESH BABU
