SEMINAR ON
UPCOMING CHALLENGES IN IT INDUSTRY

DATE : 28th July, 2016.
RESOURCE PERSON : **Dr. P. V. S. S. Gangadhar**, Ph.D. (Computer Science), Scientist "C" /District Informatics Officer, NATIONAL INFORMATICS CENTER, Ministry of Information Technology & Communications, Government of India.

DESCRIPTION OF THE PROGRAMME

The resource person spoke on "**The Value of IT Industry**" which drastically changed during past 20 years, yet it seems to be facing the same challenges year after year. He also said that the obstacles may be the same, but the way they are addressed and solved are entirely different. New technology and practices such as Cloud Computing and Data Analytics are helping IT to face issues like infrastructure capacity, project prioritization, and customer insights head on and the impact is far greater than that of solutions of the old. He inspired the students by saying that IT leaders transform their businesses digitally and the same old challenges will be met with innovative solutions.

ADDRESS BY Dr. P.V.S.S. GANGADHAR
