

THE GUEST LECTURE
On
Integrating AI into English Language Learning:
-A Machine-Powered Approach
By
TRIPURANENI SUJITH
(Asst Prof in English, SRK Institute of Technology-Enikepadu.)

DATE: 29-9-2023

VENUE: WEBINAR HALL

The Resource person explained the below points

1. Automated grading and feedback: AI can accurately assess learners' performance and provide instant feedback.
2. Personalized learning paths: AI can analyze learners' strengths and weaknesses to create tailored learning plans.
3. Intelligent language analysis: AI can identify language patterns and provide insights on grammar, syntax, and vocabulary usage.
4. Virtual language assistants: AI-powered chatbots can engage learners in conversational English practice.
5. Enhanced language learning apps: AI can enhance mobile apps with interactive features, games, and exercises.

Artificial intelligence is not a substitute for human intelligence; it is a tool to amplify human creativity and ingenuity.
