

INDUSTRIAL VISIT TO K. C. P. Sugars and Industries Corporation Ltd,

DATE : 06th February, 2026
COMPANY : K. C. P. Sugars and Industries Corporation Ltd,
PARTICIPANTS : 60 Students from I, II, III B.Sc. [STATISTICS]
Accompanied by 2 faculty members.

DESCRIPTION OF THE PROGRAMME

1. Introduction

An industrial field visit was conducted to **KCP Sugar and Industries Corporation Limited, Vuyyuru**, to study the operational, technical, and statistical aspects of sugar production. The visit provided first-hand exposure to large-scale industrial processes and production management supported by quantitative data.

2. Objectives of the Visit

- To understand sugar manufacturing through statistical production data
- To observe plant capacity, output levels, and efficiency
- To study raw material utilization and by-product generation
- To analyze workforce and operational statistics

The field trip to **KCP Sugar Industry, Vuyyuru**, was highly informative and data-driven. The statistical analysis of production capacity, recovery rates, and by-product utilization enhanced our understanding of industrial efficiency. The visit successfully connected theoretical knowledge with practical industrial applications.
