NURTURING SPECIALTY GROWTH

ANNUAL REPORT 2017-18

Reaching People. Touching Lives.

Nurturing Specialty Growth

Given the shifting dynamics of the global pharmaceutical market, progressive investments in innovative specialty products show the way forward for us.

At Sun Pharma, we have identified specialty as an additional growth engine; and a means to move up the pharmaceutical value chain through development and global commercialisation of branded patented products. We have invested significant resources in this initiative in the past; and will continue to invest in building the business further in the coming years.

We are meticulously nurturing the specialty business; and have built a portfolio of about 10 specialty products, of which five are already in the market, two more likely to be commercialised in the next few quarters; and two more awaiting USFDA approval.

The current financial year is likely to be a very important year in this journey with the potential launch of key specialty products in the US market. We are reinforcing our global specialty business with focused investments and strategies; and in the long-term, we expect the contribution of specialty products to increase substantially in our overall business.

Notice

The cover design of this year's annual report focuses on the theme of 'Nurturing Specialty Growth'. The visual treatment to help convey this sentiment has been developed around the idea of connectivity, direction, the sum of parts, particles, and science being the cornerstone of any development and future growth.

Key Performance Indicators (Consolidated)

* During FY11, each equity share of ₹5 was split into five equity shares of ₹1 each.

* During FY14, the Company issued bonus shares in the ratio of one equity share of ₹1 for every share held.

* During FY16, the Company's equity shares have increased to 2,407 Million due to the merger of erstwhile Ranbaxy Laboratories Ltd. (RLL) with the Company, wherein 0.80 equity share of ₹1 each of the Company have been allotted to the shareholders of RLL for every 1 share of ₹5 each held by them.

The Company has adopted Ind-AS accounting standards with effect from 01 April, 2015. Hence, FY16 onwards, the financials are reported as per Ind-AS and are not strictly comparable with previous years. For FY15, the balance sheet items are as per Ind-AS.

Managing Director's Letter

Dear Shareholders,

The global pharmaceutical industry offers significant opportunities to service the healthcare needs of a growing and ageing global population. The industry has witnessed major investments in developing innovative medicines like monoclonal anti-bodies, immunotherapy drugs and gene therapies. Many of these medicines have seen significant success as they are serving the unmet medical needs of patients, resulting in improved medical outcomes and thus changing the lives of patients. However, pricing in key markets like the US has come under severe pressure in the last two years. The industry will have to adapt to this changed scenario, although it also offers significant learning opportunities.

These changing dynamics are also likely to have an impact on competition since return ratios on investments in the US generics business are coming down and not every generics company will be able to remain economically viable at the current rate of price erosion. As a result, companies will have to optimise their future R&D investments.

The US generics market has been an important driver of growth and profitability for Indian pharmaceutical companies between 2005-15. However, now with the changed dynamics, the importance of other markets has increased. It has also become imperative for companies to identify new engines of growth and invest more in innovation. It is in this context, that Sun Pharma has been investing in building its global specialty business since the last few years. Through this initiative we are trying to gradually move up in the pharmaceutical value chain.

The other key focus area for us will be cost control and product rationalisation, with these efforts spread across R&D projects, manufacturing footprint and other areas. These steps will ensure that we continue to earn reasonable returns on our investments.

Highlights of FY18

As guided at the start of the fiscal, FY18 was a tough year. While we witnessed a decline in our financial performance for the year, the challenges also offer us an opportunity to improve our processes and hence emerge as a much stronger company. Our FY18 revenues degrew by 14% to ₹261 Billion mainly due to decline in our US sales. We have recorded steady growth in all other markets except the US.

Operational Performance

Revenues in the US declined 34% to US\$ 1.36 Billion due to higher base of FY17 wherein we had the benefit of 180-day exclusivity on generic Imatinib. Our subsidiary Taro recorded 25% decline in overall revenues for the year. This decline was mainly driven by more intense competition among manufacturers, new entrants to the market, buying consortium pressures, and a higher ANDA approval rate from the USFDA.

We recorded a 4% growth in our India formulations business. Overall growth for the domestic market was impacted by the temporary disruption in the trade channel due to the implementation of the Goods & Services Tax (GST) during the year. Adjusted for this impact, our India revenues have grown by about 9%.

We grew by 11% in emerging markets for the year. This growth was broad-based across various markets. Our sales in the Rest of World (RoW) markets grew by 20% for the year.

R&D

R&D is the backbone of our business and a key determinant of our future growth and profitability. Our efforts to move up the pharmaceutical value chain mandate that we keep investing in R&D. Our R&D investments for the year were ₹22 Billion, targeted mainly at developing complex generics and specialty products. We continue to be disciplined in identifying future R&D projects for the generics market while simultaneously investing in developing a global specialty portfolio. We are also investing in enhancing our product pipeline for emerging markets and other non-US developed markets.

Nurturing specialty growth

Our journey of building a global specialty business commenced a few years ago, and over the years, we have nurtured this evolving business through increased focus and investments. We have allocated significant resources in building the specialty business.

Our specialty initiatives are directed at achieving two main objectives – to build an additional engine of future growth and secondly to move up the pharmaceutical value chain through development and commercialisation of branded patented products. While we intend to target the global market with our specialty products, developed markets are likely to be key contributors to this strategy.

Our specialty portfolio targets Dermatology, Ophthalmic, Oncology and CNS segments. We are developing our specialty products pipeline with a focus on improving patient outcomes either by addressing unmet medical needs or by enhancing patient convenience through differentiated dosage forms.

Over the past two years, we have also focused on establishing the requisite front-end capabilities for our specialty business. This involves setting up a relevant sales force (for promoting these products to doctors), establishing the required regulatory and market access teams, along with support staff.

Commercialisation of key specialty products

FY18 was a busy year for our specialty business and we crossed many important milestones. We filed two of our important products – Ilumya (Tildrakizumab) and OTX-101 with the USFDA and also received final

approval for Ilumya in the US. We also focused on building the relevant front-end presence in the US for marketing and promoting our specialty products. Some of the key highlights for the year were:

- The USFDA approved our Biologics Licence Application (BLA) for Ilumya in March 2018. Ilumya is an IL-23p19 inhibitor approved for the treatment of moderate-to-severe plaque psoriasis in the US. Launch preparations for Ilumya are ongoing for a potential commercialisation in the US in FY19. Ilumya was also filed with the European Medicines Agency (EMA) in March 2017. EMA's approval for Ilumya is awaited.
- Our New Drug Application (NDA) for OTX-101 was accepted by USFDA in December 2017. This is an important product for Sun Pharma's specialty ophthalmology portfolio. We are awaiting final approval for this product from the USFDA.
- Post the close of the year, we announced USFDA approval for Yonsa® (abiraterone acetate), a novel formulation in combination with methylprednisolone, for the treatment of patients with metastatic castration-resistant prostate cancer (mCRPC). Sun Pharma had acquired Yonsa® from Churchill Pharmaceuticals LLC. Churchill is eligible to receive upfront and sales-linked milestone payments, and royalties on sales from Sun Pharma. Yonsa® in combination with methylprednisolone was filed as a New Drug Application (NDA) under the 505(b)(2) regulatory pathway and will be promoted as a branded specialty product in the US. Sun Pharma has already commercialised Yonsa® in the US market.
- We also received approval from the USFDA for a new label for Odomzo® (sonidegib), an oral hedgehog inhibitor to treat patients with locally advanced basal cell carcinoma (laBCC) that has recurred following surgery or radiation therapy, or those who are not candidates for surgery or radiation therapy. The new label incorporates long-term data from the 30-month analysis of BOLT trial, in which Odomzo® continued to show sustained durable tumour response of 26 months with no new safety concerns.
- We have recently initiated investments in the development of two new indications for Ilumya, viz., psoriatic arthritis and ankylosing spondylitis. Although the clinical trials for these new indications will require large front-ended investments, a successful outcome of the trials will significantly expand the addressable market for Ilumya globally.
- The clearance of the Halol facility by the USFDA paves the way for potential approvals for Elepsia XR (Levetiracetam Extended Release tablets) and Xelpros (Latanoprost BAK-free eye drops). These specialty products were in-licensed from Sun Pharma Advanced Research Company Ltd. (SPARC).

Ranbaxy synergies

FY18 was the most important year in terms of accrual of the synergy benefits from the Ranbaxy acquisition. The targeted synergy benefits for FY18 was US\$ 300 Million and we are happy to have achieved this important milestone. As indicated before, we have utilised these synergy benefits to fund our evolving global specialty business.

Global cGMP compliance

Worldwide, pharmaceutical regulatory agencies are focusing on improving the quality of products approved by them. This has mandated adherence to very stringent cGMP standards by pharmaceutical manufacturers with a need to focus on 24x7 compliance status. Ability to successfully adhere to these cGMP standards has become a key determinant of future for the pharmaceutical industry.

During the year, Sun Pharma made significant progress towards 24x7 cGMP compliance. Many of our facilities underwent successful audits by multiple regulatory agencies, including the USFDA. At the same time, remediation work continued at some of the facilities, which had been impacted by cGMP deviations.

Our Halol facility, which was impacted by cGMP deviations in FY15, underwent a re-inspection by the USFDA in February 2018. On completion of the re-inspection, the USFDA issued three observations for the facility. Subsequently in June 2018, the USFDA issued the establishment inspection report (EIR) for the facility, thus clearing the facility. With this clearance, new approvals from this facility for the US market are likely to start coming through gradually.

Restructuring and rationalisation

Given the tough pricing conditions in the US generics market, we continue to make efforts towards optimising our costs. It mandates an unwavering focus on cost control across the organisation. We are trying to achieve better results with lower resources as we try to make the organisation more efficient.

Our efforts in this direction will cover multiple operational aspects. The focus will be on optimising our manufacturing footprint as well as generics R&D investments, to ensure a reasonable return on investment as well as overall cost management.

Overall outlook

We are gradually ramping up our global specialty business. We plan to increase its contribution to our consolidated revenues in the long term. This will entail significant front-ended investments, with commensurate revenue streams accruing only over a period of time.

Some of our key specialty products are likely to be commercialised in the US in FY19 and hence we expect to incur significant pre-launch and branding costs along with increasing sales force costs.

The short-term outlook for the US generics market continues to be challenging given the pricing pressures. We expect normalisation of the India business in FY19 post the disruption in FY18 due to GST implementation. Favourable demographics will ensure reasonable volume growth in India. However, government-mandated price reductions/policy changes continue to be potential risks for this business. We are also expecting reasonable growth in our emerging markets business, however, as always, currency fluctuations continue to be a risk.

Given these factors, we expect a low double-digit topline growth in our consolidated revenues for FY19 over FY18. Our consolidated R&D investments for FY19 will be about 8-9% of revenues.

Our talented team of employees will be the key driver of all the above initiatives. We are also grateful to our Board of Directors for their guidance and support.

We are thankful for your support as a shareholder. You have continuously supported our endeavors over the past many years and we hope that you will continue to repose your confidence in us.

Warm regards,

Dilip Shanghvi
Managing Director
Sun Pharmaceutical Industries Ltd.

Management Discussion and Analysis

The global spending on medicines is expected to reach over US\$ 1.4 Trillion by 2022, growing at an average CAGR of 3-6% from US\$ 1.13 Trillion in 2017.

Global pharmaceutical industry¹

The global spending on medicines is expected to reach over US\$ 1.4 Trillion by 2022, growing at an average compound annual growth rate (CAGR) of 3-6% from US\$ 1.13 Trillion in 2017. Demographic changes in population and advances in medical treatments are expected to translate into a rise in spending. Innovation in medicines, along with economic progress, will result in a rise in volume for the pharmaceutical industry. Market growth is likely to occur concurrently with greater pharmaceutical cost controls, improving access and affordability.

In developed markets, ageing population and development of new specialty medicines will continue to drive pharmaceutical growth. In developing nations, growing population and rising disposable incomes among the middle-class, increasing aspirations for better healthcare and gradually increasing penetration of insurance coverage will drive the growth momentum.

Emerging trends for 2018-22¹

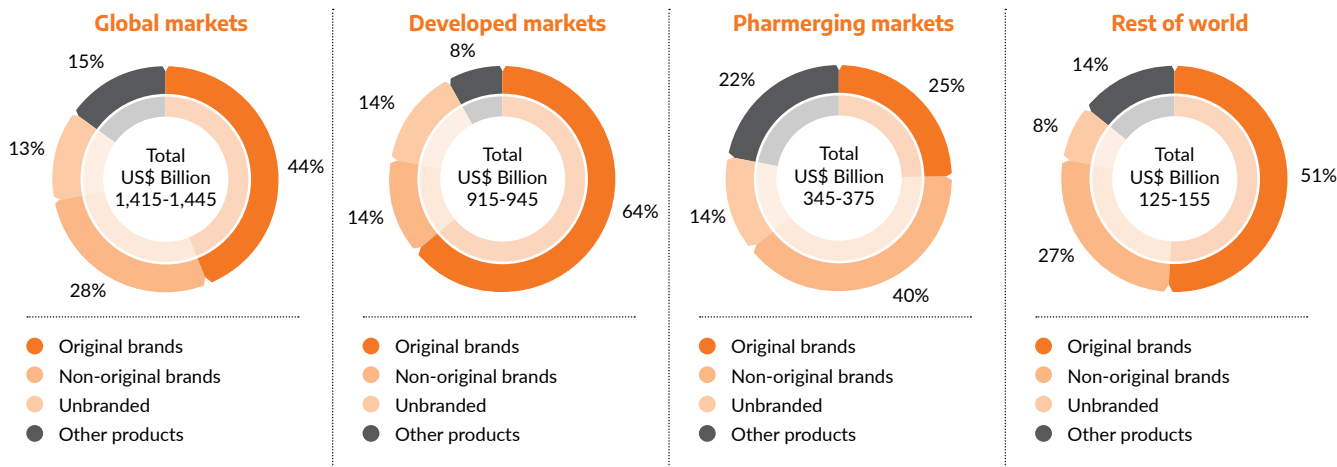

Pharmaceutical spending in developed markets is likely to grow at 2-5% CAGR between 2018-22 compared to 5.8% in the 2013-17 period. While launch of innovative products is likely to drive growth, is expected to be balanced by patent expiries of existing products.

- Specialty medicines will drive medicine spending in developed markets, partly offsetting the decline in spending on traditional medicines.
- The requirement to replenish product portfolios impacted by patent expiries will continue to drive acquisitions and in-licensing for the specialty segment.
- For pharmerging markets, policies designed to achieve universal healthcare will be an intricate formula that induces investment, while protecting affordability. However, sluggish economic conditions in these markets and relatively higher out-of-pocket costs for patients will offset some of the gains in access. Medicine spending in these markets is likely to grow at 6-9% CAGR for 2018-22 compared to nearly 10% for the 2013-17 period.

- Innovation in new drug development, immunotherapy, next generation biotherapeutics, including cell-based gene therapies and digital health tools will gain importance in the future of the global healthcare industry.

- Generic medicines will continue to be an important part of the efforts to reduce overall global healthcare costs.

Innovation in new drug development, immunotherapy, next generation biotherapeutics, including cell-based gene therapies and digital health tools will gain importance in the future of the global healthcare industry.

Chart 3 Global medicine spending by product type in 2022²

Global generics market³

The global generics market is estimated to grow at 5% CAGR for the 2017-22 period to reach US\$ 104 Billion by 2022. Governments worldwide are facing pressures of rising healthcare costs, thus emphasising on the importance of generics and their role in making pharmaceutical products affordable to those in need. Patent expiry for branded drugs in developed markets has a bearing on the potential of generics in those markets. In the emerging world, the branded generics markets will be driven primarily by rising per capita incomes, increasing healthcare awareness and enhanced incidence of chronic ailments.

Chart 4 Global generics market growth³ (US\$ Billion)

Growth enablers of global pharmaceutical industry⁴

Ageing population

Global population is likely to cross 9.3 Billion by 2050 and the proportion of individuals aged 60 and above will account for 21% of it. The growing average life expectancy has been accompanied by a rise in different diseases, leading to the deployment of more resources for research and innovation to improve the quality of life for an ageing population.

Rising pollution

Rising air and water pollution is resulting in increased incidence of various diseases, leading to higher pharmaceutical consumption.

Changing lifestyles

Individual lifestyle choices are increasingly affected by stress, resulting in higher risk for obesity, hypertension, depression, diabetes and cardiovascular problems. Moreover, with rise in disposable incomes for global middle-class families, the demand for better healthcare is gradually increasing.

Cost controls

Governments, particularly in emerging economies, are shifting towards affordable, universal healthcare with reduced out-of-pocket spending for patients. Although they deepen market access, the cost-containment policies of governments will neutralise some of these gains for the pharmaceutical industry.

Technology

Empowered by technological advances such as mobile apps, wearable healthcare devices and greater awareness, patients are increasingly taking better and more well-informed healthcare choices.

Outlook

Changing lifestyles will increasingly make chronic diseases a global health issue. Developed markets growth will be driven by ageing population and adoption of emerging medical technologies.

In developing markets, besides growing populations, the pharmaceutical industry will benefit from higher incomes of consumers. The entry of wearables in the global market will facilitate access to accurate, real-world data. Subsequently, the quality of diagnostic services will improve thus leading to increased pharmaceutical consumption.

Specialty medicines¹

In the previous decade, new medications have witnessed a gradual and continuous shift towards specialty medicines (defined as those that treat chronic, complex or rare conditions). The share of specialty medicines in global spend in 2017 stood at 32%, up from 19% in 2007.

In the US and EU5 markets, the contribution of specialty medicines to overall pharmaceutical spending has almost doubled over the preceding 10 years. This trend is likely to continue. While specialty medicines are more expensive than traditional therapies, the availability of insurance funding is helping in making them affordable to the population of these countries.

The share of specialty medicines in pharmerging markets has not grown much over the preceding 10 years. This is primarily due to the higher proportion of out-of-pocket funding by patients in these countries, which limits affordability of higher priced specialty medicines.

Developed markets¹

Pharmaceutical spending in developed markets is estimated to grow at 2-5% CAGR from US\$ 753.2 Billion in 2017 to US\$ 915-945 Billion in 2022. The US will continue to be the key contributor of the growth in developed markets. In other such markets, where access and costs are mostly managed by single payers growth will be sluggish.

Table 3 Pharmaceutical spending and growth in developed markets²

(US\$ Billion)

Region/Country	2017	2013-17 CAGR	2022	2018-22 CAGR
US	466.6	7.3%	585-615	4-7%
EU5	154.4	4.4%	170-200	1-4%
Germany	45.1	4.9%	51-61	2-5%

US

The US pharmaceutical market is estimated to grow by 4-7% CAGR from US\$ 466.6 Billion in 2017 to US\$ 585-615 Billion in 2022. The gains from a free-market pricing will continue to be partly offset by price rebates negotiated by payers. Patent expiry and subsequent loss of brand exclusivity will continue to aggravate the situation, whereas price increases and introduction of new specialty medicines will drive the spending growth.

Europe (EU5)

The CAGR for the next five years for EU5 markets is estimated at 1-4%, with overall spending in these markets likely to escalate from US\$ 154.4 Billion in 2017 to US\$ 170-200 Billion in 2022. Spending will be primarily driven by the ageing population of countries and increased incidence of chronic ailments coupled with increasing adoption of specialty medicines.

Chart 5 US pharmaceutical spending and growth (US\$ Billion)

Chart 6 EU5 pharmaceutical spending and growth (US\$ Billion)

Japan

Spending on pharmaceuticals in Japan is likely to continue to grow at a sluggish pace, from US\$ 84.8 Billion in 2017 to US\$ 85-89 Billion in 2022. High life expectancy with low birth and migration rates have contributed to a declining Japanese population.

Challenges in the form of complex regulatory framework and periodic price cuts have hampered the sector's growth. However, the volume share of generic drugs in Japan has nearly doubled in recent years, with government policies promoting the use of generics. This trend is expected to continue.

Pharmerging markets¹

The pharmaceutical spending in pharmerging markets stood at around US\$ 269.6 Billion in 2017. It is estimated to grow at 6-9% CAGR during 2018-22 to reach US\$ 345-375 Billion in 2022.

It is likely to be driven by the efforts of individual governments to expand public access to healthcare, higher incidence of chronic ailments and rising per capita incomes, leading to enhanced healthcare awareness.

Branded generic medicines comprise the largest proportion of medicine spending in these economies. Payments, primarily out-of-pocket for consumers, reflect a correlation between economic growth and pharmaceutical spending growth.

Chart 7 Pharmaceutical spending and growth in pharmerging markets (US\$ Billion)

Spending in pharmerging markets, driven mainly by volume increases and the use of generics, is likely to grow by 7-8% in 2018, making it the third consecutive year that the growth will be less than 10%. China, the largest pharmerging market, will grow at a modest 5-8% in the next half decade, reaching US\$ 145-175 Billion in 2022.

India and Russia are expected to grow faster, in comparison, averaging at 10% in the same time span, while the other pharmerging markets will average 6-9%. India's spending on medicines will propel its entry into the top 10 countries in 2018, and to the ninth position overall between 2019 and 2022.

Table 4 Pharmaceutical spending and growth in pharmerging markets (US\$ Billion)

Region/Country	2017	2013-17 CAGR	2022	2018-22 CAGR
China	122.6	9.4%	145-175	5-8%
Tier 2 markets	67.3	11.2%	89-93	7-10%
Brazil	33.1	11.5%	38-42	5-8%
India	19.3	11.0%	26-30	9-12%
Russia	14.9	10.8%	20-24	7-10%
Tier 3 markets	79.7	8.9%	95-125	6-9%
Total	269.6	9.7%	345-375	6-9%

Global consumer healthcare industry⁵

The global consumer healthcare (GCH) market grew by 4.1% in 2017 to reach US\$ 127 Billion. The US and China continue to be the largest GCH markets and together account for 46% of the global share. For 2017, North America and European markets recorded 2.5-3% growth, Asia-Pacific was up 4.3%, while Latin America (+11.8%) and the Middle East & Africa (+6.7%) grew fastest. Among emerging markets, Brazil, Russia and India account for almost 9% of the global market.

Vitamins, minerals & supplements, cough, cold and allergy segments account for over 50% of market spend. Growing healthcare awareness and internet penetration have empowered people to seek various available treatments. This is leading to self-medication and driving market momentum.

Active Pharmaceutical Ingredients (API)⁶

Geriatric healthcare solutions, biopharmaceutical sector growth and advancements in API manufacturing will be the key drivers for the API

industry. The prevalence of chronic diseases such as cancer, diabetes and cardiovascular ailments contribute to the market growth. Growing demand for quick action, efficient drugs and innovations in drug manufacturing also fuel its growth.

Led by increasing expenditure on medical research, North America will continue to dominate the global API market. Asia-Pacific regions are increasingly favoured for setting up API manufacturing facilities due to the availability of affordable labour and low manufacturing costs.

Indian pharmaceutical market^{7,8}

India's pharmaceutical industry is the world's largest supplier of generic drugs, accounting for 20% of global export volume. The domestic market accounts for over 3% of the global pharmaceutical industry in value terms and 10% in volume. It is predicted to grow at a CAGR of 9-12% in the 2018-22 period to reach a size of US\$ 26-30 Billion.

Branded generic drugs account for nearly 80% of the Indian pharmaceutical market by sales. The market is highly fragmented and competitive. Cost-efficiency coupled with a skilled workforce continues to make it an attractive destination for investment and research.

Out-of-pocket expenses for patients in India continue to constitute the biggest share of total medical spending for the average

household. As a proportion of GDP, the average healthcare expenditure for India is one of the lowest among BRICS nations.

The Government of India has made efforts to make pharmaceutical products more affordable and step up the promotion of generics. Moreover, government-sponsored programmes provide healthcare benefits for the low-income section of the population.

Growth Strategies

Create sustainable revenue streams

- Enhance share of specialty business globally
- Achieve differentiation by focussing on technically complex products
- Focus on key markets to achieve critical mass
- Speed to market
- Ensure sustained compliance with global regulatory standards

Business development

- Use acquisitions to bridge critical capability and portfolio gaps
- Focus on access to products, technology and market presence
- Ensure acquisitions yield high return on investment
- Concentrate on payback timelines

Balance profitability and investments for future

- Increasing contribution of specialty and complex products
- Direct future investments towards differentiated products

Cost leadership

- Vertically integrated operations
- Optimise operational costs

Building a robust specialty portfolio

- In-licensed ILUMYA™ (a monoclonal antibody targeting IL-23) from MSD for treating chronic plaque psoriasis in 2014. Biologics Licence Application (BLA) for ILUMYA™ filed with the USFDA and EMA for the European market and subsequently received final approval from USFDA in March 2018. Launch preparations for commercialising the product in the US are ongoing.
- Acquired Ocular Technologies for access to global rights for OTX-101 for treating Dry Eye Disease; announced positive outcomes from confirmatory Phase-3 trials in January 2017; filed NDA with USFDA in December 2017; evaluating other markets for filing OTX-101.
- Acquired branded oncology product – Odomzo – in December 2016; the product is approved in 30 countries, including the US, Europe and Australia; currently marketed in the US and Germany.
- Launched BromSite – first specialty ophthalmology product in the US – in November 2016.
- Currently marketing Levulan Kerastick (a drug-device combination for treating actinic keratosis) and Absorica (for treating acne) in the US dermatology market.
- Two ophthalmic molecules undergoing clinical trials as a part of the InSite Vision pipeline.
- In-licensed Xelpros (ophthalmology) and Elepsia (CNS) products from Sun Pharma Advanced Research Company (SPARC). Both these products are awaiting USFDA approval.

FY18 operational highlights

- In May 2017, the Company received the U.S. Food and Drug Administration (USFDA) acceptance of the Biologics Licence Application (BLA) for ILUMYA™. The USFDA filing acceptance followed the acceptance of the regulatory filing of ILUMYA™ by the European Medicines Agency (EMA) in March 2017. ILUMYA™ is an IL-23p19 inhibitor approved for the treatment of moderate-to-severe plaque psoriasis in the US. The BLA filing for ILUMYA™ with the USFDA was based on two pivotal Phase III trials (reSURFACE 1 and 2), which included over 1,800 patients across more than 200 clinical trial sites, including some patients who have been treated with ILUMYA™ for up to three-and-a-half years. Data from these trials were presented at the 2017 American Academy of Dermatology (AAD) Annual Meeting and previously presented at the 25th European Academy of Dermatology and Venereology Congress. Subsequently, in March 2018, Sun Pharma announced USFDA approval for ILUMYA™ (tildrakizumab-asmn) to treat adults with moderate-to-severe plaque psoriasis who are candidates for systemic therapy or phototherapy.
- In June 2017, the Company received final approval from USFDA for its Abbreviated New Drug Application (ANDA) for generic version of Zetia® (ezetimibe) Tablets 10mg. These generic ezetimibe tablets are therapeutic equivalents of Merck's Zetia® tablets. According to IQVIA, ezetimibe tablets had annual sales of approximately US\$ 2.7 Billion in the US for the 12 months ended April 2017.
- In June 2017, Sun Pharma in partnership with The National Institute of Virology (NIV), Pune, an institution of the Indian Council of Medical Research, Department of Health Research, Ministry of Health and Family Welfare, New Delhi, announced that they have signed an agreement for testing phyto-pharmaceutical, biologic and chemical entities developed by Sun Pharma against zika, chikungunya and dengue viruses. Sun Pharma will provide drug molecules to NIV for testing against zika, chikungunya and dengue in model systems. Candidate molecules with encouraging data will then be taken forward for commercial development. Sun Pharma and NIV aim to promote discovery sciences, translational health research and development of medical products, which is in sync with the direction provided by the Government of India's 'Make In India' initiative. Sun Pharma's agreement with NIV follows its MoU with the Indian Council of Medical Research (ICMR) for conducting joint scientific research and innovation for testing of drugs, biosimilars and vaccines for disease control and elimination programmes.
- In July, 2017, Sun Pharma and Samsung BioLogics announced a strategic long-term manufacturing agreement for ILUMYA™. The agreement was entered into by Sun Pharma's wholly-owned subsidiary and Samsung BioLogics. According to the agreement, Sun Pharma has appointed Samsung BioLogics to manufacture future supplies of ILUMYA.
- In September 2017, Sun Pharma announced that one of its wholly-owned subsidiaries has received approval from the USFDA for a new label for Odomzo® (sonidegib), an oral hedgehog inhibitor to treat patients with locally advanced basal cell carcinoma (laBCC) that has recurred following surgery or radiation therapy, or those who are not candidates for surgery or radiation therapy. Odomzo® was approved by the USFDA in July 2015, based on 12-month follow-up results from the pivotal Phase II Basal Cell Carcinoma Outcomes with LDE225 Treatment (BOLT) clinical trial, a multicentre, double-blind study involving 194 patients with laBCC and 36 patients with metastatic basal cell carcinoma (mBCC). The new label incorporates long-term data from the 30-month analysis of BOLT trial, in which Odomzo® continued to show sustained durable tumour response of 26 months with no new safety concerns.
- In October 2017, Sun Pharma announced that one of its wholly-owned subsidiaries has received final approval from the USFDA for its ANDA for generic version of Coreg CR®, (carvedilol phosphate) extended release capsules, 10mg, 20mg, 40mg and 80mg, which are therapeutic equivalents of GSK's Coreg CR® extended release capsules. As per IQVIA, Coreg CR® had annual sales of approximately US\$ 208 Million in the US for the 12 months ended August 2017.
- In December 27, 2017, the Company announced that the USFDA has accepted a New Drug Application (NDA), filed by its wholly-owned subsidiary, for OTX-101 (cyclosporine A, ophthalmic solution) 0.09%, a novel nanomicellar formulation of cyclosporine A 0.09% in a clear, preservative-free aqueous solution. OTX-101 is currently under review for approval by the USFDA.
- In January 2018, Sun Pharma announced that its wholly-owned subsidiaries have reached an agreement with Ironwood Pharmaceuticals, Inc. and Allergan plc. to resolve the patent litigation regarding submission of an ANDA for a generic version of Linzess® (Linaclotide capsules) in the US. Pursuant to the terms of the settlement, Sun Pharma's wholly owned subsidiaries will be eligible to market a generic version of Linzess® in the United States beginning 01 February, 2031, (subject to USFDA approval) or earlier under certain circumstances.
- In February 2018, Sun Pharma's Halol facility underwent an inspection by the USFDA. Post the closure of the inspection, the USFDA issued the Form-483 to the facility citing three deviations. Sun Pharma filed its response to the USFDA in March 2018, citing proposed measures to address the deviations. Subsequently in June 2018, the USFDA issued the establishment inspection report (EIR) for Halol, thus clearing the facility.
- In February 2018, Sun Pharma Science Foundation, a non-profit organisation announced the Sun Pharma Science Awards to Indian scientists for their outstanding work and exemplary contribution to medical research. The awards were presented in two categories:
 - The Sun Pharma Research Awards for outstanding scientists.
 - Sun Pharma Science Scholar Awards for young researchers.
 The winners for both these awards are identified in two sub-categories:
 - Medical Sciences
 - Pharmaceutical Sciences

An eminent jury panel comprising well-known scientists from India selected the winners. These awards are presented annually to Indian scientists and young researchers working in India and abroad.

FY19 outlook and guidance

The US generics industry continues to face pricing pressure driven by increasing competitive intensity and customer consolidation. Despite these adverse dynamics, the Company expects low double-digit growth in consolidated revenues for FY19.

Sun Pharma continues to invest in enhancing its global specialty and complex generics pipeline. Investments will also continue for setting

up the requisite front-end capabilities for the specialty business in the US as well as on clinical trials for some of the specialty products. These investments may not have commensurate revenues in FY19 but are likely to drive growth in the longer-term. The consolidated R&D investments for FY19 will be about 8-9% of consolidated revenues. The Company expects a gradually increasing tax rate over the next few years.

Progress in FY18

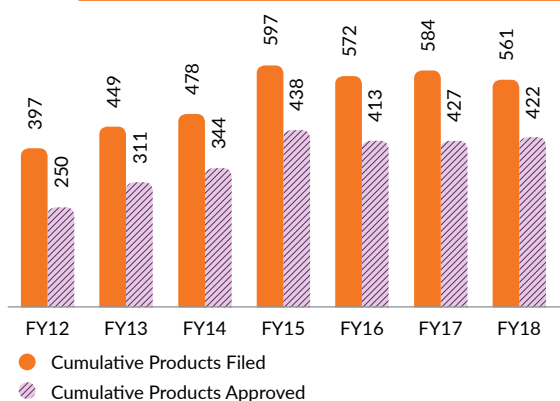

The Company's consolidated US revenues de-grew by 36% in FY18 to ₹87,466 Million. The US generics market continues to face a challenging environment driven by customer consolidation and faster pace of generics approvals by the USFDA. Revenues were also impacted by delay in approvals from the Halol facility for the US market.

Key products which drove revenues down were:

1. **Imatinib Mesylate** – Revenues declined as expected post the expiry of the 180-day exclusivity
2. **Absorica** – Revenues declined due to changes in co-pay programme
3. **Liposomal Doxorubicin** – Faced increased competition from other generics
4. **Authorised generic versions of Olmesartan** – These were launched in FY17 and hence faced competitive intensity in FY18

The US revenues for Taro (a 75% subsidiary) declined by 25% for FY18, driven primarily by a difficult generics pricing environment. This resulted from a more intense competition among manufacturers, new market entrants, buying consortium pressures, and a higher ANDA approval rate from the USFDA.

Outlook & future growth drivers

- India's pharmaceutical market offers good long-term potential, driven by increasing per capita income, rising healthcare awareness, higher incidence of chronic ailments and gradually increasing insurance coverage.
- Government-mandated price controls and other regulatory changes coupled with competitive intensity will continue to be the key industry challenges.

Future focus

- Enhancing the productivity of domestic business and strengthening leadership in a hyper-competitive landscape.
- Innovating consistently to ensure high brand equity with doctors.
- Widening the product basket through in-house drug development and in-licensing.

Progress in FY18

- Revenue from emerging markets grew by 7% to ₹48,392 Million in FY18.
- The growth is broad-based among emerging markets.

Future growth drivers

- Given the favourable macroeconomic parameters, emerging markets offer encouraging long-term potential.
- This will be counterbalanced by efforts from various governments to make pharmaceutical products more affordable to their population.

Future focus

- Focus on developing and commercialising more products across therapeutic segments to exploit this growth opportunity.
- Explore opportunities to enhance presence in key markets.
- Improve business profitability in emerging markets by launching complex products and reducing presence in low profitable non-core product segments.

Progress in FY18

- Revenues for RoW markets increased by 15% to ₹29,740 Million in FY18.
- Growth was primarily driven by the full-year inclusion of sales of acquired brands in Japan.

Future growth drivers

- Enhanced drug demand in geriatric care and lifestyle diseases such as obesity, hypertension, depression and diabetes will drive pharmaceutical consumption in these markets.
- Adoption of newer medical technologies as well as government policies of promoting low-cost generics will propel growth in these markets.

The Company's major markets are India, Russia, Romania, Nigeria, South Africa and Myanmar. It also has significant presence in Ukraine, Poland, Belarus, Kazakhstan, Thailand, Morocco and UAE, where it is scaling up at a steady pace. The Company has presence across OTC sub-categories like Vitamins and Minerals, Cold and Flu, Analgesics, Digestive and Dermatology.

Progress in FY18

As per Euromonitor 2017 report, Sun Pharma's consumer healthcare business in India recorded over 10% growth during the year and has grown at 12.6% CAGR over the preceding six years. Sun Pharma commands a 2.8% market share in India's consumer healthcare market.

Future growth drivers

- Indian consumer healthcare market will be driven by emerging middle-class and rising healthcare consumption.
- Globally, emerging markets like Russia, Romania, Nigeria, South Africa and Myanmar are projected to see sustained growth, driven by enhanced healthcare awareness.

Focus areas

- Continuing to invest in the accelerating OTC business across key markets through brand building and brand extensions.
- Expanding presence across OTC sub-categories in various markets.
- Maintaining leadership in existing markets by offering innovative solutions to consumers.

Research & development - delivering through innovation

Sun Pharma services both regulated and emerging pharmaceutical markets with its diverse product range of branded and generics products. Its robust research and development (R&D) capabilities has helped the Company develop technology-intensive products and deliver them at affordable prices to international markets. It has a wide-ranging portfolio of 2,000+ products across the world.

The Company's capable team of research scientists underpins its research and development capacities. It has many state-of-the-art research centres located across the world that provide facilities for developing generic drugs, Active Pharmaceutical Ingredients (APIs) and Novel Drug Delivery Systems (NDDS). Moreover, it is focussing on development of New Chemical Entities (NCEs) for global markets and has made significant investments in this field. Sun Pharma's R&D centres have been successfully audited and approved by international regulatory authorities, including the USFDA and European authorities.

The Company has commercialised a formidable product pipeline with successful offerings in liposomal products, lyophilised injections, nasal sprays, ointments, liquids and oral products among others.

R&D is critical for Sun Pharma and remains a key determinant of its future growth. Thus, Sun Pharma spent 8.6% of its sales on R&D during FY18. The Company is focussing more on developing specialty products and technically complex offerings to differentiate itself from competition. It also has a robust Intellectual Property Rights team, enabling it to patent its innovations globally and develop non-infringing products.

Managing talent

Sun Pharma has a global and diverse talent pool comprising over 50 nationalities. The Company considers its human assets to be its pivotal driving force and harbours a congenial work culture that encourages people (irrespective of race, gender and nationality) to contribute their best and accomplish the organisation's common objectives.

The Company offers several skill development opportunities to its 32,000+ workforce which includes various management programmes for employees to enhance their skills. Moreover, it has a wide range of knowledge sharing platforms that empower employees to grow professionally and be future-ready.

The Company promotes equal opportunities for all and values a healthy work-life balance. It has several employee engagement initiatives that minimise attrition.

Quality adherence

Quality is considered critical at all Sun Pharma's R&D centres, manufacturing units and testing and distribution facilities. It is committed to implementing a robust global quality management system. This dedication stems from Sun Pharma's determination to sustain a culture of operational excellence and meeting and exceeding stakeholders' — regulators, patients and customers — expectations. The Company firmly believes in the motto of 'putting patients first'.

Sun Pharma's global Quality Management Team ensures every product it manufactures and distributes complies with internationally accepted good practices and standards of quality, purity, efficacy and safety. The Company has distinct procedures and systems in every facility to maintain global quality standards, and to ensure compliance with the requirements of the Current Good Manufacturing Practices (cGMP), WHO, PICs and EU GMP. Sun Pharma ensures that its operating procedures meet the exacting standards of all global regulators like the USFDA, EMA, WHO and TGA, among others.

Sun Pharma has well-trained personnel for quality control at each site, who along with a regulatory affairs department, ensure strict adherence to quality systems and procedures. The teams are guided by a Corporate Quality Unit (CQU). CQU supervises the translation of the latest GMP updates to guidelines, standard operating procedures (SOPs) and protocols. The teams oversee the implementation of these guidelines to deliver quality products every time. Additionally, Sun Pharma's manufacturing plants are audited by an autonomous Corporate Compliance Department to establish 24x7 compliance and conformance.

During FY18, many of the Company's facilities underwent successful audits by various global regulatory authorities, including the USFDA. The Halol facility underwent a re-inspection by the USFDA in February 2018. On completion of the re-inspection, the USFDA issued three observations for the facility. Subsequently in June 2018, the USFDA issued the establishment inspection report (EIR) for Halol, thus clearing it.

Internal control

Sun Pharma believes that internal control is a prerequisite of the principle of governance and that freedom should be exercised within a framework of checks and balances. The Company has a well-established internal control framework, which is designed to continuously assess the adequacy, effectiveness and efficiency of financial and operational controls. The management is committed to ensuring an effective internal control environment, commensurate with the size and complexity of the business, which provides an assurance on compliance with internal policies, applicable laws, regulations and protection of resources and assets.

An independent and empowered Global Internal Audit Function at the corporate level carries out risk-focused audits across all businesses (both in India and overseas), which actively identifies areas, where business process controls are ineffective or may need enhancement. These reviews include financial, operational and compliance controls and risk mitigation plans. The Audit Committee of the Board periodically reviews key findings and provides strategic guidance. The Company's operating management closely monitors the internal control environment and ensures that the recommendations are effectively implemented.

DIVIDEND DISTRIBUTION POLICY

1. OBJECTIVES AND SCOPE:

The Board of Directors (the "Board") of the Sun Pharmaceutical Industries Limited (the "Company") recognizes the need to lay down a broad framework for considering decisions by the Board of the Company, with regard to distribution of dividend (including any interim dividend) to its equity shareholders and/or retaining or plough back of its profits.

The Policy sets out the circumstances and different factors for consideration by the Board at the time of taking such decisions of distribution or of retention of profits, in the interest of providing transparency to the equity shareholders. The Policy is not an 'alternative' but a 'Guide' to the decision of the Board for recommending dividend, which may be made after taking into consideration all the relevant circumstances enumerated hereunder and such other factors as may be decided as relevant by the Board.

While recommendation of Dividend shall be guided by this Policy, in extraordinary circumstances, the Board shall have complete liberty to recommend dividend in deviation to this policy, if so deemed necessary in the best interests of the Company and its stakeholders.

The Policy reflects the intent of the Company to reward its equity shareholders by sharing a portion of its profits after adjusting for accumulated losses, if any, and also retaining sufficient funds for future growth of the Company. The Company intends to pay, subject to the circumstances and factors enlisted hereon, dividend, which shall be consistent with the performance of the Company over the years.

Subject to the considerations as provided in the Policy, the Board shall determine the dividend payout in a particular year after taking into consideration the operating and financial performance of the Company, the advice of executive management including the CFO, and other relevant factors.

The Policy shall not apply to:

- Determination and declaring dividend on preference shares, if any.

2. RELEVANT REGULATIONS

The Securities and Exchange Board of India ("SEBI") vide its Notification dated July 08, 2016 has amended the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 (the "Listing Regulations") by inserting Regulation 43A in order to make it mandatory to have a Dividend Distribution Policy in place by the top five hundred listed companies based on their market capitalisation calculated as on the 31st day of March of every year. The Company, being one of the top five hundred listed Companies in India on the basis of market capitalisation, requires to comply with the requirements of Regulation 43A.

3. EFFECTIVE DATE

The Policy shall become effective from the date of its adoption by the Board i.e. 10th November, 2016.

4. CATEGORY OF DIVIDENDS

The Board of Directors shall have the power to recommend final dividend to the equity shareholders for their approval in the Annual General Meeting of the Company. Subject to compliance with the provisions of Companies Act, 2013 including the Rules made thereunder and other relevant regulations, if any, the Board of Directors shall also have the absolute power to declare interim dividend during any financial year out of the surplus in the profit and loss account and out of profits of the financial year in which such interim dividend is sought to be declared, as and when they consider it fit in compliance with Companies Act, 2013 and other relevant regulations. Interim Dividend may be paid in order to supplement the annual dividend or in exceptional circumstances.

5. PAYMENT OF DIVIDEND FROM RESERVES

Dividend shall normally be declared from the profit earned by the Company during the relevant financial year after adjusting for accumulated losses & unabsorbed depreciation, if any and out of the carried forward profits not transferred to any reserves. However, under special circumstances, Dividend may be declared out of the accumulated profits earned by it in previous years and transferred by it to the free reserves, subject to compliance with the requirements of the relevant provisions of the Companies Act, 2013 including the Rules made thereunder.

6. CIRCUMSTANCES TO BE CONSIDERED WHILE DETERMINING DIVIDEND PAY-OUT

The Board shall consider the circumstances provided below before determination of any dividend payout after analyzing the prospective opportunities and threats, viability of the options of dividend payout or retention etc. The decision of dividend payout shall, majorly be based on the aforesaid factors considering the balanced interest of the stakeholders and the business requirements of the Company.

- Accumulated Losses, if any

The profits earned by the Company during any financial year shall be first utilized to set off the accumulated losses/ unabsorbed depreciation, if any of the Company from the previous financial years.

- Operating cash flow of the Company

The Board will consider the impact of proposed dividend on the operating cash flow of the Company and shall satisfy itself of its adequacy before taking a decision on whether to declare dividend or retain its profits.

- **Transfer to Reserves and other Statutory Requirements**

The Board shall examine the implication of relevant statutory requirements including payment of Dividend Distribution Tax, transfer of a certain portion of profits to Reserves etc., if applicable, on the financials of the Company at the time of taking decision with regard to dividend declaration or retention of profit.

- **Covenants with lenders/ Debenture Trustees, if any**

The decision of dividend pay-out shall also be subject to compliance with covenants contained in any agreement entered into by the Company with the Lenders/ Debenture Trustee's, from time to time, if any.

- **Prudential & Strategic requirements**

The Board shall analyse the ongoing and prospective projects and strategic decisions including need for replacement of capital assets, expansion and modernization etc., before recommending Dividend Pay-out for any financial year with an object to build a healthy reserve of retained earnings to augment long term strength and to build a pool of internally generated funds to provide long-term resources as well as resource-raising potential for the Company.

- **Expectations of major stakeholders, including small shareholders**

The Board, while considering the decision of dividend pay-out or retention of a certain amount or entire profits and/or out of the accumulated profits of the Company, shall, as far as possible, consider the expectations of the major stakeholders including the small shareholders of the Company who generally expect a regular dividend payout.

7. THE FINANCIAL PARAMETERS THAT SHALL BE CONSIDERED WHILE DECLARING/ RECOMMENDING DIVIDEND

In addition to the circumstances covered under point 6 above, the Board shall, inter alia, consider the following financial parameters, while taking decisions of a dividend payout during a particular year-

- **Return on invested capital**

The efficiency with which the Company uses its capital will impact the decision of dividend declaration.

- **Magnitude of earnings of the Company**

Since dividend is directly linked with the availability of earning over the long haul, the magnitude of earnings will significantly impact the dividend declaration decisions of the Company.

- **Cost of borrowings**

The Board will analyze the requirement of necessary funds considering the long term or short term projects proposed to be undertaken by the Company and the viability of the options in terms of cost of raising necessary funds from outsiders such as bankers, lending institutions or by issuance of debt securities or plough back its own funds.

- **Obligations to creditors**

The Company should be able to repay its debt obligations without much difficulty over a reasonable period of time.

The decision of dividend declaration shall be taken after considering the volume of such obligations and time period of repayment.

- **Adequacy of profits**

If during any financial year, the Board determines that the profits of the Company are inadequate on standalone basis and/or consolidated basis, the Board may decide not to declare dividends for that financial year.

- **Post dividend Earning Per Share (EPS)**

The post dividend EPS can have strong impact on the funds of the Company, thus, impacting the overall operations on day-to-day basis and therefore, affects the profits and can impact the decision for dividend declaration during a particular year.

8. FACTORS THAT MAY AFFECT DIVIDEND PAYOUT

- **Internal Factors**

- **Product/ Project expansion plan**

The Company's growth oriented decision to conserve cash in the Company for future expansion plan impacts shareholders expectation for the long run which shall have to be considered by the Board before taking dividend decision.

- **General Working capital requirement**

In addition to the above, the general working capital requirements within the Company will also impact the decision of dividend declaration.

- **Past performance/ reputation of the Company**

The trend of the performance/ reputation of the Company that has been during the past years determine the expectation of the shareholders.

- **External Factors**

- **Macroeconomic conditions**

Considering the state of economy in the Country, the policy decisions that may be formulated by the Government and other similar conditions prevailing in the international market which may have a bearing on or affect the business of the Company, during uncertain or recessionary economic and business conditions, the Board may consider retaining a larger part of the profits to have sufficient reserves to absorb unforeseen circumstances.

- **Capital Market**

When the markets are favorable, dividend pay-out can be liberal. However, in case of unfavorable Capital market conditions, Board may resort to a conservative dividend pay-out in order to conserve cash outflows.

- **Statutory Restrictions**

The Board will keep in mind any restrictions on payment of dividends by virtue of any regulation or loan covenant, as may be applicable to the Company at the time of declaration of dividend.

- **Tax implications**

Dividend distribution tax or any tax deduction at source as required by applicable tax regulations in India, as may be

applicable at the time of declaration of dividend shall have bearing on the quantum of Dividend declared by the Company.

9. RANGE OF DIVIDEND PAY-OUT

The Company is committed to deliver sustainable value to all its stakeholders. The Company strives to distribute an optimal and appropriate level of the profits earned by it in its business and investing activity, with the equity shareholders, in the form of dividend. As explained in the earlier part of this Policy, determining the dividend pay-out is dependent upon several factors, both internal to a business and external to it. Taking into consideration the aforementioned factors, the Board shall have absolute discretion to determine & recommend appropriate Dividend pay-out for the relevant financial year.

10. MANNER OF UTILISATION OF RETAINED EARNINGS

The Board may retain its earnings in order to make better utilisation of the available funds and increase the value of the stakeholders in the long run. The retained earnings of the Company may, inter alia, be utilized for the following purposes:

- To meet the working capital/ business needs of the Company
- To fund the project expansion plans of the Company
- To fund the research expenditures of ongoing research projects specifically those in the advanced development stages
- Towards replacement/ up-gradation /modernization of equipment's & plants
- Towards investment in long term/ short term strategic joint ventures &/or partnerships and/or subsidiary companies
- To fund new acquisitions & investments
- Towards diversification of business
- Such other manner as the Board may deem fit from time to time

11. REVIEW AND AMENDMENT

The Board may review and amend or modify this policy in whole or in part, at any time.

[#] Resigned w.e.f. June 19, 2017

^{##} Appointed w.e.f. June 19, 2017

⁽¹⁾ Remuneration to Non-Executive Directors consists only of sitting fees and is based on the number of meetings attended during the year. No commission was paid to Non-Executive Directors for the year 2017-18.

⁽²⁾ The increase in percentage of remuneration as per Form 16 is due to Bonus of previous year paid in the current year and due to increase in the notional value of perquisite as per Income Tax Act, however there was no increase in his total remuneration payable for the year 2017-18.

⁽³⁾ Mr. Kalyanasundaram Subramanian, Whole-time Director of the Company, does not receive any remuneration from the Company, however he is receiving remuneration from Sun Pharma Laboratories Limited (SPLL), the wholly owned subsidiary of the Company, where he is also Whole-time Director and Chief Executive Officer.

Note: There was no increase in the total remuneration entitled to the Managing Director and Whole-time Directors, for the financial year 2017-18 as compared to previous financial year 2016-17. However during the year, the Company received an Order from Ministry of Corporate Affairs (MCA) for approval of remuneration of ₹ 2,02,29,000 each to Mr. Dilip S. Shanghvi and Mr. Sudhir V. Valia for the Financial Year 2016-17 and balance remuneration amounts of ₹ 91,47,601 and ₹ 89,27,010 were refunded by Mr. Dilip S. Shanghvi and Mr. Sudhir V. Valia respectively, to the Company. The remuneration, net of refund, for the financial year 2016-17 and the remuneration actually paid (in accordance with Schedule V to the Companies Act, 2013) in the financial year 2017-18 to Mr. Dilip S. Shanghvi and Mr. Sudhir V. Valia have been compared to arrive at the percentage increase and ratio of remuneration to median remuneration of employees for the financial year 2017-18.

Thus, the percentage increase in the remuneration paid for financial year 2017-18 is due to refund order of the Ministry of Corporate Affairs (MCA) for the remuneration pertaining to financial year 2016-17, as detailed below:

Name of Director	Remuneration as per Form 16 for 2016-17 after refund as per MCA Order	Remuneration paid as per Form 16 for 2017-18 (including perquisites)	Ratio of remuneration of each Director to median remuneration of employees	(₹ In Million)
				% increase / (decrease) in Remuneration in the Financial Year 2017-18
Dilip S. Shanghvi	20.23	30.09	65.80*	48.7%*
Sudhir V. Valia	20.23	29.94	65.48*	48.0%*

*The Company has made an application to the Central Government for approval of remuneration of Mr. Dilip S. Shanghvi and Mr. Sudhir V. Valia as per their entitlement of ₹ 39.3 million each for the financial year 2017-18 as approved by the Board of Directors within the limits approved by the Members of the Company. However, in view of the aforesaid approval for application of remuneration being awaited, the Company has paid remuneration within the ceiling limit prescribed under Schedule V to the Companies Act, 2013 i.e. upto ₹ 30.4 million each, to Mr. Dilip S. Shanghvi and Mr. Sudhir V. Valia. On receipt of the approval from the Central Government of India, the balance amount of remuneration for the year 2017-18, if any, as per their entitlement, shall be paid to them, as applicable, and the same shall be given effect to in the year in which the approval is received. Excess remuneration, if any, after final approval in respect of the application for revision is received, shall be refunded by them. The percentage and ratios may further increase or decrease depending on the Order being passed by the MCA / Central Government. In case the approval from MCA is received for the amount of remuneration entitled of ₹ 39.3 million each to Mr. Dilip S. Shanghvi and Mr. Sudhir V. Valia for the year 2017-18, then the ratio and the percentage increase in remuneration will be 85.93 and 94.2% respectively. In case the approval is received for lesser amount, then the ratio and the percentage will change accordingly.

- ii) The percentage increase in the median remuneration of employees in the financial year 2017-18 (Median -2018/Median 2017) : 5.20%
- (iii) The number of permanent employees on the rolls of the Company as on March 31, 2018: 17789
- (iv) Average percentile increase already made in the salaries of employees other than the managerial personnel in the last financial year and its comparison with the percentile increase in the managerial remuneration and justification thereof and point out if there are any exceptional circumstances for increase in the managerial remuneration:

Average percentage increase made in the salaries of employees other than the Key Managerial Personnel in the financial year ending March 31, 2018 was approximately 11.5% and the average increase in the Key Managerial Personnel remuneration was 33.18%. As explained above the increase in percentage of KMP's is due to refund of remuneration of Managing Director and Whole-time Director in during the year, as per the MCA order. The remuneration of Key Managerial Personnel has been decided in line with our overall reward philosophy of paying for performance (individual as well as Company performance) and ensuring market competitiveness.

- (v) It is hereby affirmed that the remuneration paid is as per the Remuneration Policy for Directors, Key Managerial Personnel and other Employees.

(All the details of remuneration given above are as per Form 16 as per Income Tax Act, and the ratios are calculated on that basis.)

CSR ACTIVITIES

Sun Pharmaceutical Industries Limited ("Sun Pharma") has engaged various stakeholders through CSR Projects and Programmes and the main purpose of company's CSR activities is to give back to the society by extending helping hand to the needy and the underprivileged communities. Health, education, water, livelihood, environment and disaster relief are some of our key priorities in the area of CSR as a part of CSR Policy of the Company and identified community needs.

The main objective of Sun Pharma's CSR is to emphasize on social transformation and ensuring the sustainability, hence our implementation approach is strategic in nature, and is more inclined towards the sustainability of the projects, addressing community needs, focusing poorest of the poor and weaker sections of society.

Vision:

Sun Pharma's CSR policy emphasizes on striving to bring about the holistic development of underserved communities in a sustainable and impactful manner.

Following CSR Projects and programmes have been implemented during financial year 2017-18:

(1) Mobile Medical Unit:

In order to provide primary healthcare facilities in peripheral villages falling in the vicinity of manufacturing plant locations, Sun Pharma has undertaken Mobile Medical Facilities through

van and other preventive and promotive healthcare awareness programmes in villages.

Mobile Medical Unit, a flagship project related to primary health care programme, is being known for catering basic healthcare benefits to the targeted beneficiaries at their doorstep. It is an outreach service of medical check-up and medicine distribution by professionals while on travelling to remote villages. A full-time committed health van, visits the selected nodal locations at a regular frequency. It is manned by a dedicated team of qualified experienced doctor and ANMs, who provide medical check-ups, medicines, expert counselling and referral services for free of cost.

The Programme is being implemented with the help of partner organization namely "Sun Pharma Community Healthcare Society" and "HelpAge India" and it aims to address the following health related issues:-

- To deliver primary healthcare services to the underserved rural areas.
- To reduce Infant and Maternal Mortality and improve the health status of adolescent girls.
- Prevention & control of communicable and non-communicable / other prevalent diseases.

- Promote awareness on all health related issues /HIV/AIDS and female foeticide.
- To address problems of unaffordability, inaccessibility and non-availability of basic essential healthcare to poor elderly.

In FY 2017-18, ₹ 21.51 million was invested towards this program covering 137 villages across various locations – Halol, Panoli, Ankleswar and Karkhadi in Gujarat, Nagar in Maharashtra, Mohali, Toansa in Punjab, Paonta Sahib in Himachal Pradesh, Madurantakam in Tamilnadu and Dewas and Malanpur in Madhya Pradesh. The total numbers of patients treated were 1,18,180 and in addition to this clinical treatments 68,788 people also benefitted through various Promotive and Preventive healthcare awareness programme organized in different villages.

(2) Sanitation Project:

Sun Pharma is working towards achieving aim of promoting “Swachh Bharat” which is a national agenda of sanitation and cleanliness by 2019. This is to change the socio economic situation of communities; the Company has decided to make villages free from open defecation practices. Sun Pharma has undertaken CSR Project on Construction of Individual Households Toilets and Behavioral Change Communication to promote sanitation across different plant locations in India located at Ahmednagar, Halol, Silvassa and Madurantakam.

This programme is implemented by the CSR Department in PPP model and also with the help of implementing agency GVT-Dahod :

- To construct toilets for the community with provision of 100% coverage in villages.
- To conduct intensive Information, Education and Communication (IEC) campaign about sanitation with the involvement of PRIs, Co-operatives, ASHAs, Anganwadi workers, Women Groups, Self Help Groups, NGOs etc.

To achieve the objective of zero open defecation, 201 Individual Household Toilets were constructed during FY 2017-18 with an investment of ₹ 3.21 million.

(3) Education Programme

Sun Pharma believes that “Education is a key to development” and hence we have been working on concept of MHRD’s on ‘model school development’, in which various programmes were executed like up-gradation of classroom, renovation and up keeping of schools, providing proper drinking water facilities at rural schools and other required up-gradation in school infrastructure so that it converts into model schools over a period of years. Educational Programme was implemented at Ahmednagar, Halol, Madurantakam, Panoli, Silvassa, Toansa and Malanpur. The programme has benefitted 5770 students with an investment of ₹ 1.60 million during the FY 2017-18.

(4) Kidney Dialysis Project:

Kidney dialysis project was focused upon providing free kidney dialysis services to poor and unprivileged sections of society and is being implemented with the help of implementing agency Rogi Kalyan Samiti at Silvassa. There are many poor patients who require dialysis treatment several times a week and are in immense need of financial assistance in order to undergo dialysis treatment. The project has proven as a boon for them and benefitted 127 such patients with an investment of ₹ 0.40 million during the FY 2017-18.

(5) Drinking water Projects

Sun Pharma has installed a tubewell and pump house was also constructed for provision of drinking water in village Toansa through underground pipeline. The same was operated and maintained by Sun Pharma for providing drinking water on regular basis. It has benefitted 210 households with the cost involvement of ₹ 0.15 million.

(6) Healthcare Programme

As a part of continuous efforts to provide health facilities for local peripheral areas of plants, Sun Pharma renovated one abandoned dispensary of Zila Parishad providing all infrastructural needs and required equipment’s and medicines in addition to the Government supply. Company is maintaining this dispensary since 2009 as continuous project which covers population of nearby villages i.e. Bholewal, Toansa and Railmajra with the following given objectives:

- To deliver primary health care services to the underserved rural areas staying close to the dispensary to ensure medical health services to all.
- To reduce Infant and Maternal Mortality and improve the health status of adolescent girls.
- Prevention & control of communicable diseases and non-communicable/other prevalent diseases.
- Promote awareness on HIV/AIDS.

About 7200 beneficiaries of three villages benefitted out of these medical services that are being provided at the Dispensary. Sun Pharma has invested ₹ 0.07 million in this project during the FY 2017-18.

(7) Green Belt Development

Tree plantation is one of the effective measures to control problems of air pollution and further to its economic benefits; it effectively addresses several important environmental and sustainable development objectives. This effort will also brighten the surrounding of the community, over and above offering ecological benefits. Company has undertaken roadside plantation at Panoli with an investment of ₹ 0.03 million during the FY 2017-18.

3. Capital investment on energy conservation equipments

- Capital investment of ₹ 54.8 million is done on energy conservation equipments.

(B) Technology Absorption, Adaptation and Innovation**1. Efforts in brief, made towards technology absorption, adaptation and innovation**

The company continues to invest on R&D, both as revenue expenses as well as capital investments. Part of this spending is for complex products, specialty products, generic filings for the US, and API technologies that are complex and may require dedicated manufacturing blocks. Investments have been made in creating research sites, employing scientifically skilled and experienced manpower, adding equipment, sponsored research and in accessing world class consultants to continuously upgrade the research understanding of the scientific team in the technologies and therapy areas of our interest.

There has been thrust on the development of novel technologies like use of green reagents for chemical transformations in API synthesis and ultrasonic crystallisation for achieving required particle size, capillary flow reactors for continuous process and safety related studies using reaction calorimetry. Product Life Cycle management has been undertaken for key products. Backward integration is a key strategic objective and many of our products enjoy the benefit of this backward integration.

Process robustness has been implemented for wide range of products with the objective to reduce cost and increase in process capability.

Novel compact dosage forms having differentiation with regards to improved stability and/or reduced pharmacokinetic variability have been developed for the Indian market. Stable liquid oral formulations of labile products are also being developed.

Independent Auditor's Report

To the Members of Sun Pharmaceutical Industries Limited

Report on the Standalone Ind AS Financial Statements

We have audited the accompanying standalone Ind AS financial statements of Sun Pharmaceutical Industries Limited ("the Company"), which comprise the Balance Sheet as at March 31, 2018, the Statement of Profit and Loss, including the statement of Other Comprehensive Income, the Cash Flow Statement and the Statement of Changes in Equity for the year then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Standalone Ind AS Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these standalone Ind AS financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under section 133 of the Act, read with the Companies (Indian Accounting Standards) Rules, 2015, as amended. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial control that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these standalone Ind AS financial statements based on our audit. We have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder. We conducted our audit of the standalone Ind AS financial statements in accordance with the Standards on Auditing, issued by the Institute of Chartered Accountants of India, as specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the standalone Ind AS financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Company's preparation of the standalone Ind AS financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of the accounting estimates made by the Company's Directors, as well as evaluating the overall presentation of the standalone Ind AS financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the standalone Ind AS financial statements.

Opinion

In our opinion and to the best of our information and according to the explanations given to us, the standalone Ind AS financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2018, its loss including other comprehensive income, its cash flows and the changes in equity for the year ended on that date.

Other Matter

The Ind AS financial statements of the Company for the year ended March 31, 2017, included in these standalone Ind AS financial statements, have been audited by the predecessor auditor who expressed an unmodified opinion on those statements on May 26, 2017.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's report) Order, 2016 ("the Order") issued by the Central Government of India in terms of sub-section (11) of section 143 of the Act, we give in the Annexure 1 a statement on the matters specified in paragraphs 3 and 4 of the Order.

Independent Auditor's Report

To the Members of Sun Pharmaceutical Industries Limited

ANNEXURE 2 TO THE INDEPENDENT AUDITOR'S REPORT OF EVEN DATE ON THE STANDALONE FINANCIAL STATEMENTS OF SUN PHARMACEUTICAL INDUSTRIES LIMITED

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of Sun Pharmaceutical Industries Limited ("the Company") as of March 31, 2018 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's Management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting with reference to these standalone financial statements based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing as specified under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting with reference to these standalone financial statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls over financial reporting with reference to these standalone financial statements and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting with reference to these standalone financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls over financial reporting with reference to these standalone financial statements.

Meaning of Internal Financial Controls over Financial Reporting with Reference to these Financial Statements

A company's internal financial control over financial reporting with reference to these standalone financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting with reference to these standalone financial statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

ANNEXURE 2 TO THE INDEPENDENT AUDITOR'S REPORT OF EVEN DATE ON THE STANDALONE FINANCIAL STATEMENTS OF SUN PHARMACEUTICAL INDUSTRIES LIMITED

Inherent Limitations of Internal Financial Controls over Financial Reporting with Reference to these Standalone Financial Statements

Because of the inherent limitations of internal financial controls over financial reporting with reference to these standalone financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting with reference to these standalone financial statements to future periods are subject to the risk that the internal financial control over financial reporting with reference to these standalone financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, adequate internal financial controls over financial reporting with reference to these standalone financial statements and such internal financial controls over financial reporting with reference to these standalone financial statements were operating effectively as at March 31, 2018, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Notes to the Standalone Financial Statements

for the year ended March 31, 2018

1. GENERAL INFORMATION

Sun Pharmaceutical Industries Limited ("the Company") is a public limited company incorporated and domiciled in India, having its registered office at Vadodara, Gujarat, India and has its listing on the Bombay Stock Exchange Limited and National Stock Exchange of India Limited. The Company is in the business of manufacturing, developing and marketing a wide range of branded and generic formulations and Active Pharmaceutical Ingredients (APIs). The Company has various manufacturing locations spread across the country with trading and other incidental and related activities extending to the global markets.

The standalone financial statements were authorised for issue in accordance with a resolution of the directors on May 25, 2018.

2. SIGNIFICANT ACCOUNTING POLICIES

2.1 Statement of compliance

These financial statements are separate financial statements of the Company (also called standalone financial statements). The Company has prepared financial statements for the year ended March 31, 2018 in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 (as amended) together with the comparative period data as at and for the year ended March 31, 2017.

2.2 Basis of preparation and presentation

The financial statements have been prepared on the historical cost basis, except for: (i) certain financial instruments that are measured at fair values at the end of each reporting period; (ii) Non-current assets classified as held for sale which are measured at the lower of their carrying amount and fair value less costs to sell; (iii) derivative financial instrument and (iv) defined benefit plans – plan assets that are measured at fair values at the end of each reporting period, as explained in the accounting policies below:

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

The standalone financial statements are presented in ₹ and all values are rounded to the nearest Million (₹ 000,000) upto one decimal, except when otherwise indicated.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for

measurement and/or disclosure purposes in these financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of Ind AS 102, leasing transactions that are within the scope of Ind AS 17, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in Ind AS 2 or value in use in Ind AS 36.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

The Company has consistently applied the following accounting policies to all periods presented in these financial statements.

a. Current vs. Non-current

The Company presents assets and liabilities in the balance sheet based on current / non-current classification. An asset is treated as current when it is:

- Expected to be realised or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or

Notes to the Standalone Financial Statements

for the year ended March 31, 2018

- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

The Company classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

b. Foreign currency

On initial recognition, transactions in currencies other than the Company's functional currency (foreign currencies) are translated at exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated into the functional currency at the exchange rate at that date. Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous period are recognised in profit or loss in the period in which they arise except for:

- exchange differences on foreign currency borrowings relating to assets under construction for future productive use, which are included in the cost of those assets when they are regarded as an adjustment to interest costs on those foreign currency borrowings (see note 2.2.r).
- exchange differences on transactions entered into in order to hedge certain foreign currency risks (see note 2.2.i below for hedging accounting policies).

Non-monetary items that are measured in terms of historical cost in foreign currency are measured using the exchange rates at the date of initial transaction.

c. Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker. The chief operating decision maker of the Company is responsible for allocating resources and assessing performance of the operating segments.

d. Property, plant and equipment

Items of property, plant and equipment are stated in balance sheet at cost less accumulated depreciation and accumulated impairment losses, if any. Freehold land is not depreciated.

Assets in the course of construction for production, supply or administrative purposes are carried at cost, less any recognised impairment loss. Cost includes purchase price, borrowing costs if capitalisation criteria are met and directly attributable cost of bringing the asset to its working condition for the intended use. Subsequent expenditures are capitalised only when they increase the future economic benefits embodied in the specific asset to which they relate. Such assets are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other assets, commences when the assets are ready for their intended use.

When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of property, plant and equipment and is recognised in profit or loss.

Items of property, plant and equipment acquired through exchange of non-monetary assets are measured at fair value, unless the exchange transaction lacks commercial substance or the fair value of either the asset received or asset given up is not reliably measurable, in which case the acquired asset is measured at the carrying amount of the asset given up.

Depreciation is recognised on the cost of assets (other than freehold land and Capital work-in-progress) less their residual values on straight-line method over their useful lives as indicated in Part C of Schedule II of the Companies Act, 2013. Leasehold improvements are depreciated over period of the lease agreement or the useful life, whichever is shorter. Depreciation methods,

Notes to the Standalone Financial Statements

for the year ended March 31, 2018

useful lives and residual values are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

The estimated useful lives are as follows:

Asset Category	No. of years
Leasehold land	60-99
Factory Buildings	30
Buildings other than Factory Buildings	60
Buildings given under operating lease	30
Plant and equipment	3-20
Plant and equipment given under operating lease	15
Vehicles	5-10
Office equipment	2-5
Furniture and fixtures	10

Software for internal use, which is primarily acquired from third-party vendors and which is an integral part of a tangible asset, including consultancy charges for implementing the software, is capitalised as part of the related tangible asset. Subsequent costs associated with maintaining such software are recognised as expense as incurred. The capitalised costs are amortised over the lower of the estimated useful life of the software and the remaining useful life of the tangible fixed asset.

e. Goodwill and Intangible assets

Goodwill

Goodwill represents the excess of consideration transferred, together with the amount of non-controlling interest in the acquiree, over the fair value of the Company's share of identifiable net assets acquired. Goodwill is measured at cost less accumulated impairment losses.

Intangible assets

Intangible assets that are acquired by the Company and that have finite useful lives are measured at cost less accumulated amortisation and accumulated impairment losses, if any. Subsequent expenditures are capitalised only when they increase the future economic benefits embodied in the specific asset to which they relate.

Research and development

Expenditure on research activities undertaken with the prospect of gaining new scientific or technical knowledge and understanding are recognised as an expense when incurred. Development activities involve a plan or design for the production of new or substantially improved products and processes. An internally-generated intangible asset arising from development is recognised if and only if all of the following have been demonstrated:

- development costs can be measured reliably;
- the product or process is technically and commercially feasible;
- future economic benefits are probable; and
- the Company intends to and has sufficient resources/ability to complete development and to use or sell the asset.

The expenditure to be capitalised include the cost of materials and other costs directly attributable to preparing the asset for its intended use. Other development expenditure is recognised in profit or loss as incurred.

Payments to third parties that generally take the form of up-front payments and milestones for in-licensed products, compounds and intellectual property are capitalised since the probability of expected future economic benefits criterion is always considered to be satisfied for separately acquired intangible assets.

Acquired research and development intangible assets which are under development, are recognised as In-Process Research and Development assets ("IPR&D"). IPR&D assets are not amortised, but evaluated for potential impairment on an annual basis or when there are indications that the carrying value may not be recoverable. Any impairment charge on such IPR&D assets is recognised in profit or loss. Intangible assets relating to products under development, other intangible assets not available for use and intangible assets having indefinite useful life are tested for impairment annually, or more frequently when there is an indication that the assets may be impaired. All other intangible assets are tested for impairment when there are indications that the carrying value may not be recoverable.

The consideration for acquisition of intangible asset which is based on reaching specific milestone that are dependent on the Company's future activity is recognised only when the activity requiring the payment is performed.

Subsequent expenditures are capitalised only when they increase the future economic benefits embodied in the specific asset to which they relate. All other expenditures, including expenditures on internally generated goodwill and brands, are recognised in the statement of profit and loss as incurred.

Amortisation is recognised on a straight-line basis over the estimated useful lives of intangible assets. Intangible

Notes to the Standalone Financial Statements

for the year ended March 31, 2018

assets that are not available for use are amortised from the date they are available for use.

The estimated useful lives for Product related intangibles and Other intangibles ranges from 5 to 20 years.

The estimated useful life and the amortisation method for intangible assets with a finite useful life are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

De-recognition of intangible assets

Intangible assets are de-recognised either on their disposal or where no future economic benefits are expected from their use. Gain or loss arising on such de-recognition is recognised in profit or loss, and are measured as the difference between the net disposal proceeds, if any, and the carrying amount of respective intangible assets as on the date of de-recognition.

f. Investments in the nature of equity in subsidiaries and associates

The Company has elected to recognise its investments in equity instruments in subsidiaries and associates at cost in the separate financial statements in accordance with the option available in Ind AS 27, 'Separate Financial Statements'. Impairment policy applicable on such investments is explained in Note 2.2.g.

g. Impairment of non-financial assets

The carrying amounts of the Company's non-financial assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated in order to determine the extent of the impairment loss, if any.

The recoverable amount of an asset or cash generating unit (as defined below) is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or the cash generating unit for which the estimates of future cash flows have not been adjusted. For the purpose of impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows

from continuing use that are largely independent of the cash inflows of other assets or groups of assets (the "cash generating unit").

An impairment loss is recognised in the profit or loss if the estimated recoverable amount of an asset or its cash generating unit is lower than its carrying amount. Impairment losses recognised in respect of cash generating units are allocated to reduce the carrying amount of the other assets in the unit on a pro-rata basis.

In respect of other asset, impairment losses recognised in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

h. Non-current assets held for sale

Non-current assets and disposal groups are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the asset (or disposal group) is available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such asset (or disposal group) and its sale is highly probable. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

Non-current assets (and disposal groups) classified as held for sale are measured at the lower of their carrying amount and fair value less costs to sell. Non-current assets are not depreciated or amortised.

i. Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets

Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation

Notes to the Standalone Financial Statements

for the year ended March 31, 2018

or convention in the market place (regular way trades) are recognised on the date the Company commits to purchase or sale the financial assets.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- Debt instruments at amortised cost
- Debt instruments at fair value through other comprehensive income (FVTOCI)
- Debt instruments and equity instruments at fair value through profit or loss (FVTPL)
- Equity instruments measured at fair value through other comprehensive income (FVTOCI)

Debt instruments at amortised cost

A 'debt instrument' is measured at the amortised cost if both the following conditions are met:

- a) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
- b) Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in Other Income in the profit or loss. The losses arising from impairment are recognised in the profit or loss.

Debt instrument at FVTOCI

A 'debt instrument' is measured as at FVTOCI if both of the following criteria are met:

- a) The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
- b) The contractual terms of the instrument give rise on specified dates to cash flows that are SPPI on the principal amount outstanding.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date

at fair value. Fair value movements are recognised in the other comprehensive income (OCI). However, the Company recognises interest income, impairment losses and reversals and foreign exchange gain or loss in the profit or loss. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to profit or loss. Interest earned whilst holding FVTOCI debt instrument is reported as interest income using the EIR method.

Debt instrument at FVTPL

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorisation as at amortised cost or as FVTOCI, is classified as at FVTPL.

In addition, the Company may elect to designate a debt instrument, which otherwise meets amortised cost or FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch').

Debt instruments included within the FVTPL category are measured at fair value with all the changes in the profit or loss.

Equity instruments

All equity instruments in scope of Ind AS 109 are measured at fair value. Equity instruments which are held for trading are classified as at FVTPL. For all other equity instruments, the Company may make an irrevocable election to present subsequent changes in the fair value in OCI. The Company makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, including foreign exchange gain or loss and excluding dividends, are recognised in the OCI. There is no recycling of the amounts from OCI to profit or loss, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognised in the profit or loss.

Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e. removed from the Company's balance sheet) when:

Notes to the Standalone Financial Statements

for the year ended March 31, 2018

- The contractual rights to receive cash flows from the asset have expired, or
- The Company has transferred its rights to receive contractual cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in OCI and accumulated in equity is recognised in profit or loss if such gain or loss would have otherwise been recognised in profit or loss on disposal of that financial asset.

Impairment of financial assets

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the Trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 18.

The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables or any contractual right to receive cash or another financial asset.

The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition. As a practical expedient, the Company uses a provision matrix to determine impairment loss allowance

on portfolio of its trade receivables. The provision matrix is based on its historically observed default rates over the expected life of the trade receivables and is adjusted for forward-looking estimates. At every reporting date, the historical observed default rates are updated and changes in the forward-looking estimates are analysed.

Financial liabilities and equity instruments

Classification as debt or equity

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company are recognised at the proceeds received, net of direct issue costs.

Repurchase of the Company's own equity instruments is recognised and deducted directly in equity. No gain or loss is recognised in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

Compound financial instruments

The component parts of compound financial instruments (convertible notes) issued by the Company are classified separately as financial liabilities and equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Initial recognition and measurement

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts, financial guarantee contracts and derivative financial instruments.

Subsequent measurement

All financial liabilities are subsequently measured at amortised cost using the effective interest method or at FVTPL.

Financial liabilities at fair value through profit or loss

Financial liabilities are classified as at FVTPL when the financial liability is held for trading or is designated upon

Notes to the Standalone Financial Statements

for the year ended March 31, 2018

initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred principally for the purpose of repurchasing in the near term or on initial recognition it is part of a portfolio of identified financial instruments that the Company manages together and has a recent actual pattern of short-term profit-taking. This category also includes derivative financial instruments that are not designated as hedging instruments in hedge relationships as defined by Ind AS 109. Gains or losses on liabilities held for trading are recognised in the profit or loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated as such at the initial date of recognition, and only if the criteria in Ind AS 109 are satisfied. For instruments not held-for-trading financial liabilities designated as at FVTPL, fair value gains/ losses attributable to changes in own credit risk are recognised in OCI, unless the recognition of the effects of changes in the liability's credit risk in OCI would create or enlarge an accounting mismatch in profit or loss, in which case these effects of changes in credit risk are recognised in profit or loss. These gains/ loss are not subsequently transferred to profit or loss. All other changes in fair value of such liability are recognised in the statement of profit or loss.

Financial liabilities subsequently measured at amortised cost

Financial liabilities that are not held-for-trading and are not designated as at FVTPL are measured at amortised cost in subsequent accounting periods. The carrying amounts of financial liabilities that are subsequently measured at amortised cost are determined based on the effective interest rate (EIR) method. Interest expense that is not capitalised as part of costs of an asset is included in the 'Finance costs' line item in the profit or loss.

After initial recognition, such financial liabilities are subsequently measured at amortised cost using the EIR method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the profit or loss.

Financial guarantee contracts

Financial guarantee contracts are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts are recognised initially as a liability at fair value, adjusted for transaction costs that are directly attributable to

the issuance of the guarantee. If not designated as at FVTPL, are subsequently measured at the higher of the amount of loss allowance determined as per impairment requirements of Ind AS 109 and the amount initially recognised less cumulative amount of income recognised.

Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

Embedded derivatives

Derivatives embedded in non-derivative host contracts that are not financial assets within the scope of Ind AS 109 are accounted for as separate derivatives and recorded at fair value if their economic characteristics and risks are not closely related to those of the host contracts and the host contracts are not held for trading or designated at fair value through profit or loss. These embedded derivatives are measured at fair value with changes in fair value recognised in profit or loss, unless designated as effective hedging instruments.

Reclassification of financial assets

The Company determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent. The Company's senior management determines change in the business model as a result of external or internal changes which are significant to the Company's operations. Such changes are evident to external parties. A change in the business model occurs when the Company either begins or ceases to perform an activity that is significant to its operations. If the Company reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediately next reporting period following the change in business model. The Company does not restate any previously recognised gains, losses (including impairment gains or losses) or interest.

Derivative financial instruments and hedge accounting

Initial recognition and subsequent measurement

The Company uses derivative financial instruments, such as forward currency contracts, full currency swap, options and interest rate swaps to hedge its foreign currency risks and interest rate risks respectively. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value at the end of each reporting period. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Any gains or losses arising from changes in the fair value of derivatives are taken directly to profit or loss, except for the effective portion of cash flow hedges, which is recognised in OCI and later reclassified to profit or loss when the hedge item affects profit or loss or treated as basis adjustment if a hedged forecast transaction subsequently results in the recognition of a non-financial asset or non-financial liability.

For the purpose of hedge accounting, hedges are classified as:

- Fair value hedges when hedging the exposure to changes in the fair value of a recognised asset or liability or an unrecognised firm commitment.
- Cash flow hedges when hedging the exposure to variability in cash flows that is either attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction or the foreign currency risk in an unrecognised firm commitment.

At the inception of a hedge relationship, the Company formally designates and documents the hedge relationship to which the Company wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge. The documentation includes the Company's risk management objective and strategy for undertaking hedge, the hedging/economic relationship, the hedged item or transaction, the nature of the risk being hedged, hedge ratio and how the entity will assess the effectiveness of changes in the hedging instrument's fair value in offsetting the exposure to changes in the hedged item's fair value or cash flows attributable to the hedged risk. Such hedges are expected to be highly effective in achieving offsetting changes in fair value or cash flows and are assessed on an ongoing basis to determine that they actually have been highly

effective throughout the financial reporting periods for which they were designated.

Hedges that meet the strict criteria for hedge accounting are accounted for, as described below:

(i) Fair value hedges

Changes in fair value of the designated portion of derivatives that qualify as fair value hedges are recognised in profit or loss immediately, together with any changes in the fair value of the hedged asset or liability that are attributable to the hedged risk.

(ii) Cash flow hedges

The effective portion of changes in the fair value of the hedging instrument is recognised in OCI in the cash flow hedge reserve, while any ineffective portion is recognised immediately in profit or loss. The Company uses forward currency contracts as hedges of its exposure to foreign currency risk in forecast transactions and firm commitments. Amounts recognised as OCI are transferred to profit or loss when the hedged transaction affects profit or loss, such as when a forecast sale occurs. When the hedged item is the cost of a non-financial asset or non-financial liability, the amounts recognised as OCI are transferred to the initial carrying amount of the non-financial asset or liability.

If the hedging instrument expires or is sold, terminated or exercised or if its designation as a hedge is revoked, or when the hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss previously recognised in OCI remains separately in equity until the forecast transaction occurs or the foreign currency firm commitment is met. When a forecast transaction is no longer expected to occur, the gain or loss accumulated in equity is recognised immediately in profit or loss.

Treasury shares

The Company has created an Employee Benefit Trust (EBT) for providing share-based payment to its employees. The Company uses EBT as a vehicle for distributing shares to employees under the employee remuneration schemes. The Company treats EBT as its extension and shares held by EBT are treated as treasury shares.

Own equity instruments that are reacquired (treasury shares) are deducted from equity. No gain or loss is recognised in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments. Consideration paid or received shall be recognised directly in equity.

Notes to the Standalone Financial Statements

for the year ended March 31, 2018

Dividend distribution to equity holders of the Company

The Company recognises a liability to make dividend distributions to equity holders of the Company when the distribution is authorised and the distribution is no longer at the discretion of the Company. As per the corporate laws in India, a distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity.

j. Leases

A lease that transfers substantially all the risks and rewards incidental to ownership to the lessee is classified as a finance lease. All other leases are classified as operating leases.

Company as a lessee

Finance leases are capitalised at the commencement of the lease at the inception date fair value of the leased assets or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the balance sheet as a finance lease obligation. Lease payments are apportioned between finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recognised in profit or loss as finance costs. Contingent rentals are recognised as expenses in the periods in which they are incurred.

Operating lease payments are generally recognised as an expense in the profit or loss on a straight-line basis over the lease term. Where the rentals are structured solely to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases, such increases are recognised in the year in which such benefits accrue. Contingent rentals arising under operating leases are also recognised as expenses in the periods in which they are incurred.

Company as a lessor

Rental income from operating lease is generally recognised on a straight-line basis over the term of the relevant lease. Where the rentals are structured solely to increase in line with expected general inflation to compensate for the Company's expected inflationary cost increases, such increases are recognised in the year in which such benefits accrue. Initial direct costs incurred in negotiating and arranging an operating lease are added to

the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

Amounts due from lessees under finance leases are recorded as receivables at the Company's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the Company's net investment outstanding in respect of the leases.

k. Inventories

Inventories consisting of raw materials and packing materials, work-in-progress, stock-in-trade, stores and spares and finished goods are measured at the lower of cost and net realisable value. The cost of all categories of inventories is based on the weighted average method.

Cost of raw materials and packing materials, stock-in-trade, stores and spares includes cost of purchases and other costs incurred in bringing the inventories to its present location and condition.

Cost of work-in-progress and finished goods comprises direct material, direct labour and an appropriate proportion of variable and fixed overhead expenditure, the latter being allocated on the basis of normal operating capacity.

Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and costs necessary to make the sale.

The factors that the Company considers in determining the allowance for slow moving, obsolete and other non-saleable inventory include estimated shelf life, planned product discontinuances, price changes, ageing of inventory and introduction of competitive new products, to the extent each of these factors impact the Company's business and markets. The Company considers all these factors and adjusts the inventory provision to reflect its actual experience on a periodic basis

l. Cash and cash equivalents

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

Notes to the Standalone Financial Statements

for the year ended March 31, 2018

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

m. Provisions, contingent liabilities and contingent assets

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of obligation. When the Company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is certain. The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement.

If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Restructuring

A provision for restructuring is recognised when the Company has a detailed formal restructuring plan and has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement the plan or announcing its main features to those affected by it. The measurement of a restructuring provision includes only the direct expenditure arising from the restructuring, which are those amounts that are both necessarily entailed by the restructuring and not associated with the ongoing activities of the entity.

Onerous contracts

Present obligations arising under onerous contracts are recognised and measured as provisions. An onerous contract is considered to exist where the Company has a contract under which the unavoidable costs of meeting the obligations under the contract exceed the economic benefit expected to be received from the contract.

Contingent liabilities and contingent assets

Contingent liability is disclosed for,

- (i) Possible obligations which will be confirmed only by future events not wholly within the control of the Company, or
- (ii) Present obligations arising from past events where it is not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount of the obligation cannot be made.

Contingent assets are not recognised in the financial statements.

n. Revenue

Revenue from sale of goods is measured at the fair value of the consideration received or receivable. Revenue is stated exclusive of sales tax, value added tax, goods and service tax and net of returns, chargebacks, rebates and other similar allowances. Revenue is inclusive of excise duty till the period, provision of excise duty was levied on sale of goods.

Sale of goods

Revenue from sale of goods is recognised when the significant risks and rewards of ownership have been transferred to the buyer, usually on delivery of goods, it is probable that the economic benefit will flow to the Company, the associated costs and possible return of goods can be estimated reliably, there is neither continuing management involvement to the degree usually associated with ownership nor effective control over the goods sold and the amount of revenue can be measured reliably. The Company is principal in all of its revenue arrangements, since it is the primary obligor in all of the revenue arrangements, as it has pricing latitude and is exposed to inventory and credit risks.

Provisions for chargeback, rebates, discounts and medicaid payments are estimated and provided for in the year of sales and recorded as reduction of revenue.

Sales returns

The Company accounts for sales returns accrual by recording an allowance for sales returns concurrent with the recognition of revenue at the time of a product sale. This allowance is based on the Company's estimate of expected sales returns. With respect to established

Notes to the Standalone Financial Statements

for the year ended March 31, 2018

products, the Company considers its historical experience of sales returns, levels of inventory in the distribution channel, estimated shelf life, product discontinuances, price changes of competitive products, and the introduction of competitive new products, to the extent each of these factors impact the Company's business and markets. With respect to new products introduced by the Company, such products have historically been either extensions of an existing line of product where the Company has historical experience or in therapeutic categories where established products exist and are sold either by the Company or the Company's competitors.

Rendering of services

Revenue from services rendered is recognised in the profit or loss as the underlying services are performed. Upfront non-refundable payments received are deferred and recognised as revenue over the expected period over which the related services are expected to be performed.

Royalties

Royalty revenue is recognised on an accrual basis in accordance with the substance of the relevant agreement (provided that it is probable that economic benefits will flow to the Company and the amount of revenue can be measured reliably). Royalty arrangements that are based on production, sales and other measures are recognised by reference to the underlying arrangement.

o. Dividend and interest income

Dividend income is recognised when the Company's right to receive the payment is established, which is generally when shareholders approve the dividend.

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

p. Government grants

The Company recognises government grants only when there is reasonable assurance that the conditions attached to them will be complied with, and the grants will be received. When the grant relates to an expense item, it is recognised as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed. When the grant

relates to an asset, the Company deducts such grant amount from the carrying amount of the asset.

q. Employee benefits

Defined benefit plans

The Company operates a defined benefit gratuity plan which requires contribution to be made to a separately administered fund.

The liability in respect of defined benefit plans is calculated using the projected unit credit method with actuarial valuations being carried out at the end of each annual reporting period. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds. The currency and term of the government bonds shall be consistent with the currency and estimated term of the post-employment benefit obligations. The current service cost of the defined benefit plan, recognised in the profit or loss as employee benefits expense, reflects the increase in the defined benefit obligation resulting from employee service in the current year, benefit changes, curtailments and settlements. Past service costs are recognised in profit or loss in the period of a plan amendment. The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in employee benefit expense in profit or loss. Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to OCI in the period in which they arise and is reflected immediately in retained earnings and is not reclassified to profit or loss.

Termination benefits

Termination benefits are recognised as an expense at the earlier of the date when the Company can no longer withdraw the offer of those benefits and when the entity recognises costs for a restructuring that is within the scope of Ind AS 37 and involves the payment of termination benefits.

Short-term and other long-term employee benefits

Accumulated leave, which is expected to be utilised within the next 12 months, is treated as short-term employee benefit. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

Notes to the Standalone Financial Statements

for the year ended March 31, 2018

The Company treats accumulated leave expected to be carried forward beyond twelve months, as long-term employee benefit for measurement purposes. Such long-term compensated absences are provided for based on the actuarial valuation using the projected unit credit method at the year-end. Actuarial gains/losses are immediately taken to the statement of profit and loss and are not deferred.

The Company's net obligation in respect of other long term employee benefits is the amount of future benefit that employees have earned in return for their service in the current and previous periods. That benefit is discounted to determine its present value.

Defined contribution plans

The Company's contributions to defined contribution plans are recognised as an expense as and when the services are received from the employees entitling them to the contributions. The Company does not have any obligation other than the contribution made.

Share-based payment arrangements

The grant date fair value of options granted to employees is recognised as an employee expense, with a corresponding increase in equity, on a straight line basis, over the vesting period, based on the Company's estimate of equity instruments that will eventually vest. At the end of each reporting period, the Company revises its estimate of the number of equity instruments expected to vest. The impact of the revision of the original estimates, if any, is recognised in profit or loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to the equity-settled employee benefits reserve.

For cash-settled share-based payments, a liability is recognised for the goods or services acquired, measured initially at the fair value of the liability. At the end of each reporting period until the liability is settled, and at the date of settlement, the fair value of the liability is remeasured, with any changes in fair value recognised in profit or loss for the year.

r. Borrowing costs

Borrowing costs that are directly attributable to the construction or production of a qualifying asset are capitalised as part of the cost of that asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of

funds. Borrowing costs also include exchange differences to the extent regarded as an adjustment to the borrowing costs. A qualifying asset is one that necessarily takes substantial period of time to get ready for its intended use.

s. Income tax

Income tax expense consists of current and deferred tax. Income tax expense is recognised in profit or loss except to the extent that it relates to items recognised in OCI or directly in equity, in which case it is recognised in OCI or directly in equity respectively. Current tax is the expected tax payable on the taxable profit for the year, using tax rates enacted or substantively enacted by the end of the reporting period, and any adjustment to tax payable in respect of previous years. Current tax assets and tax liabilities are offset where the Company has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit.

Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the end of the reporting period. Deferred tax assets and liabilities are offset if there is a legally enforceable right to set off corresponding current tax assets against current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same tax authority on the Company.

A deferred tax asset is recognised to the extent that it is probable that future taxable profits will be available against which the temporary difference can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised. Withholding tax arising out of payment of dividends to shareholders under the Indian income tax regulations is not considered as tax expense for the Company and all such taxes are recognised in the statement of changes in equity as part of the associated dividend payment.

Minimum Alternate Tax ('MAT') credit is recognised as deferred tax asset only when and to the extent there is convincing evidence that the Company will pay normal

Notes to the Standalone Financial Statements

for the year ended March 31, 2018

income tax during the period for which the MAT credit can be carried forward for set-off against the normal tax liability. MAT credit recognised as an asset is reviewed at each Balance Sheet date and written down to the extent the aforesaid convincing evidence no longer exists.

t. Earnings per share

The Company presents basic and diluted earnings per share ("EPS") data for its equity shares. Basic EPS is calculated by dividing the profit or loss attributable to equity shareholders of the Company by the weighted average number of equity shares outstanding during the period. Diluted EPS is determined by adjusting the profit or loss attributable to equity shareholders and the weighted average number of equity shares outstanding for the effects of all dilutive potential ordinary shares, which includes all stock options granted to employees.

The number of equity shares and potentially dilutive equity shares are adjusted retrospectively for all periods presented for any share splits and bonus shares issues including for changes effected prior to the approval of the financial statements by the Board of Directors.

u. Recent Accounting pronouncements

Standards issued but not yet effective and not early adopted by the Company

Ind AS 115, Revenue from Contracts with Customers

In March 2018, the Ministry of Corporate Affairs ("MCA") has notified Ind AS 115, Revenue from Contracts with Customers, which is effective for accounting periods beginning on or after April 1, 2018. This comprehensive new standard will supersede existing revenue recognition guidance, and requires an entity to recognise revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The new standard also will result in enhanced disclosures about revenue, provide guidance for transactions that were not previously

addressed comprehensively (for example, service revenue and contract modifications) and improve guidance for multiple-element arrangements.

Ind AS 115 is effective for annual reporting periods beginning on or after April 1, 2018.

The Company intends to adopt Ind AS 115 effective April 1, 2018, using the modified retrospective method. The Company is evaluating the requirements of the standard and its impact on its financials.

Amendments to Ind AS 7 Statement of Cash Flows:

The amendments require entities to provide disclosure of changes in their liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes (such as foreign exchange gains or losses). The Company has provided the information for the current period in Cash Flow Statement. Since amendment is effect from April 1, 2017, no comparative period information is required.

Other Amendments:

On March 28, 2018, the MCA, issued certain amendments to Ind AS. The amendments relate to the following standards:

- Ind AS 40, Investment Property
- Ind AS 21, The Effects of Changes in Foreign Exchange Rates
- Ind AS 12, Income Taxes
- Ind AS 28, Investments in Associates and Joint Ventures
- Ind AS 112, Disclosure of Interests in Other Entities

The amendments are effective April 1, 2018. The Company believes that the aforementioned amendments will not materially impact the financial position, performance or the cash flows of the Company.

Nature and purpose of each reserve

Capital reserve - During amalgamation / merger / acquisition, the excess of net assets taken, over the consideration paid, if any, is treated as capital reserve.

Securities premium reserve - The amount received in excess of face value of the equity shares is recognised in securities premium reserve. In case of equity-settled share based payment transactions, the difference between fair value on grant date and nominal value of share is accounted as securities premium reserve. This reserve is utilised in accordance with the provisions of the Companies Act 2013.

Share options outstanding account - The fair value of the equity settled share based payment transactions is recognised to share options outstanding account.

Notes to the Standalone Financial Statements

for the year ended March 31, 2018

Amalgamation reserve - The reserve was created pursuant to scheme of amalgamation in earlier years.

Capital redemption reserve - The Company has recognised capital redemption reserve on buyback of equity shares from its retained earnings. The amount in capital redemption reserve is equal to nominal amount of the equity shares bought back.

General reserve: The reserve arises on transfer portion of the net profit pursuant to the earlier provisions of the Companies Act, 1956. Mandatory transfer to general reserve is not required under the Companies Act, 2013.

Equity instrument through OCI - The Company has elected to recognise changes in the fair value of certain investment in equity instrument in other comprehensive income. This amount will be reclassified to retained earnings on derecognition of equity instrument.

Debt instrument through OCI - This represents the cumulative gain and loss arising on fair valuation of debt instruments measured through other comprehensive income. This amount will be reclassified to profit or loss account on derecognition of debt instrument.

Effective portion of cash flow hedges - The cash flow hedging reserve represents the cumulative effective portion of gains or losses arising on changes in fair value of designated portion of hedging instruments entered into for cash flow hedges. The cumulative gain or loss arising on the changes of the fair value of the designated portion of the hedging instruments that are recognised and accumulated under the cash flow hedge reserve will be reclassified to profit or loss only when the hedged transaction affects the profit or loss, or included as a basis adjustment to the non-financial hedged item.

Legal proceedings :

The Company and/or its subsidiaries are involved in various legal proceedings including product liability, contracts, employment claims, anti-trust and other regulatory matters relating to conduct of its business. Most of these legal proceedings involve various complex issues on account of which, making a reliable estimate of the expected financial effect is not always attainable and involves significant uncertainties. To the extent that the Company concludes that a liability is probable and estimable based on the status of these cases, advice of the counsel, management assessment of the likely damages etc. the Company records a provision in the financial statements. The Company carries product liability insurance / is contractually indemnified by the manufacturer, for an amount it believes is sufficient for its needs. In respect of other claims, the Company believes, these claims do not constitute material litigation matters and with its meritorious defences the ultimate disposition of these matters are not expected to have material adverse effect on its Financial Statements.

Footnote:

Future cash outflows in respect of the above matters are determinable only on receipt of judgements / decisions pending at various forums / authorities.

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.

Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly.

Level 3 inputs are unobservable inputs for the asset or liability.

The investments included in Level 3 of fair value hierarchy have been valued using the cost approach to arrive at their fair value. The cost of unquoted investments approximates the fair value because there is wide range of possible fair value measurements and the costs represents estimate of fair value within that range.

These investments in equity instruments are not held for trading. Instead, they are held for medium or long-term strategic purpose. Upon the application of Ind AS 109, the Company has chosen to designate these investments in equity instruments as at fair value through other comprehensive income as the management believes that this provides a more meaningful presentation for medium or long-term strategic investments, than reflecting changes in fair value immediately in profit or loss.

There were no transfers between Level 1 and 2 in the periods.

The management considers that the carrying amount of financial assets and financial liabilities carried at amortised cost approximates their fair value.

NOTE : 44 CAPITAL MANAGEMENT

The Company's capital management objectives are:

- to ensure the Company's ability to continue as a going concern; and
- to provide an adequate return to shareholders through optimisation of debts and equity balance.

The Company monitors capital on the basis of the carrying amount of debt less cash and cash equivalents, term deposits and current investments as presented on the face of the financial statements. The Company's objective for capital management is to maintain an optimum overall financial structure.

This proposed dividend is subject to the approval of shareholders in the ensuing annual general meeting and hence not recognised as liability.		

NOTE : 45 FINANCIAL RISK MANAGEMENT

The Company's activities expose it to a variety of financial risks, including market risk, credit risk and liquidity risk. The Company's risk management assessment and policies and processes are established to identify and analyze the risks faced by the Company, to set appropriate risk limits and controls, and to monitor such risks and compliance with the same. Risk assessment and management policies and processes are reviewed regularly to reflect changes in market conditions and the Company's activities.

Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's receivables from customers, loans and investments. Credit risk is managed through credit approvals, establishing credit limits and continuously monitoring the creditworthiness of counterparty to which the Company grants credit terms in the normal course of business.

Investments

The Company limits its exposure to credit risk by generally investing in liquid securities and only with counterparties that have a good credit rating. The Company does not expect any significant losses from non-performance by these counter-parties, and does not have any significant concentration of exposures to specific industry sectors or specific country risks.

Notes to the Standalone Financial Statements

for the year ended March 31, 2018

Trade receivables

The Company has used expected credit loss (ECL) model for assessing the impairment loss. For the purpose, the Company uses a provision matrix to compute the expected credit loss amount. The provision matrix takes into account external and internal risk factors and historical data of credit losses from various customers.

Other than trade receivables, the Company has no significant class of financial assets that is past due but not impaired. The Company has recognised an allowance of ₹ 4.5 Million (March 31, 2017 : ₹ 731.4 Million) against a past due loan including interest.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. The Company manages its liquidity risk by ensuring, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risk to the Company's reputation.

The Company has unutilised working capital lines from banks of ₹ 41,769.0 Million as on March 31, 2018, ₹ 32,128.0 Million as on March 31, 2017.

Market risk

Market risk is the risk of loss of future earnings, fair values or future cash flows that may result from adverse changes in market rates and prices (such as interest rates, foreign currency exchange rates and commodity prices) or in the price of market risk-sensitive instruments as a result of such adverse changes in market rates and prices. Market risk is attributable to all market risk-sensitive financial instruments, all foreign currency receivables and payables and all short term and long-term debt. The Company is exposed to market risk primarily related to foreign exchange rate risk, interest rate risk and the market value of its investments. Thus, the Company's exposure to market risk is a function of investing and borrowing activities and revenue generating and operating activities in foreign currencies.

Foreign exchange risk

The Company's foreign exchange risk arises from its foreign operations, foreign currency revenues and expenses, (primarily in US Dollars, Euros, South African Rand and Russian Rouble) and foreign currency borrowings (primarily in US Dollars). As a result, if the value of the Indian rupee appreciates relative to these foreign currencies, the Company's revenues and expenses measured in Indian rupees may decrease or increase and vice-versa. The exchange rate between the Indian rupee and these foreign currencies have changed substantially in recent periods and may continue to fluctuate substantially in the future. Consequently, the Company uses both derivative and non-derivative financial instruments, such as foreign exchange forward contracts, option contracts, currency swap contracts and foreign currency financial liabilities, to mitigate the risk of changes in foreign currency exchange rates in respect of its highly probable forecasted transactions and recognised assets and liabilities.

b) Sensitivity

For the years ended March 31, 2018 and March 31, 2017, every 5% strengthening in the exchange rate between the Indian rupee and the respective currencies for the above mentioned financial assets/liabilities would decrease the Company's loss and increase the Company's equity by approximately ₹ 1,852.7 Million and ₹ 1,760.6 Million respectively. A 5% weakening of the Indian rupee and the respective currencies would lead to an equal but opposite effect.

In management's opinion, the sensitivity analysis is unrepresentative of the inherent foreign exchange risk because the exposure at the end of the reporting period does not reflect the exposure during the year.

c) Derivative contracts

The Company is exposed to exchange rate risk that arises from its foreign exchange revenues and expenses, primarily in US Dollars, Euros, South African Rand and Russian Rouble, and foreign currency debt is primarily in US Dollars. The Company uses foreign currency forward contracts, foreign currency option contracts and currency swap contracts (collectively, "derivatives") to mitigate its risk of changes in foreign currency exchange rates. The counterparty for these contracts is generally a bank or a financial institution.

Hedges of highly probable forecasted transactions

The Company designates its derivative contracts that hedge foreign exchange risk associated with its highly probable forecasted transactions as cash flow hedges and measures them at fair value. The effective portion of such cash flow hedges is recorded as in other comprehensive income, and re-classified in the income statement as revenue in the period corresponding to the occurrence of the forecasted transactions. The ineffective portion of such cash flow hedges is immediately recorded in the statement of profit and loss.

In respect of the aforesaid hedges of highly probable forecasted transactions, the Company has recorded a gain of ₹ 26.6 Million for the year ended March 31, 2018 and loss of ₹ 26.6 Million for the year ended March 31, 2017 in other comprehensive income. The Company also recorded hedges as a component of revenue, loss of ₹ Nil for the year ended March 31, 2018 and ₹ 521.5 Million for the year ended March 31, 2017 on occurrence of forecasted sale transaction.

Changes in the fair value of forward contracts and option contracts that economically hedge monetary assets and liabilities in foreign currencies, and for which no hedge accounting is applied, are recognised in the statement of profit and loss. The changes in fair value of the forward contracts and option contracts, as well as the foreign exchange gains and losses relating to the monetary items, are recognised in the statement of profit and loss.

Notes to the Standalone Financial Statements

Interest rate swaps	USD	Buy	INR	\$ 150.0	\$ 150.0

Interest rate risk

The Company has loan facilities on floating interest rate, which exposes the Company to risk of changes in interest rates. The Company's Treasury Department monitors the interest rate movement and manages the interest rate risk by evaluating interest rate swaps etc. based on the market / risk perception.

For the years ended March 31, 2018 and March 31, 2017, every 50 basis point decrease in the floating interest rate component applicable to its loans and borrowings would decrease the Company's loss by approximately ₹ 122.2 Million and ₹ 160.5 Million respectively. A 50 basis point increase in floating interest rate would have led to an equal but opposite effect.

Commodity rate risk

Exposure to market risk with respect to commodity prices primarily arises from the Company's purchases and sales of active pharmaceutical ingredients, including the raw material components for such active pharmaceutical ingredients. These are commodity products, whose prices may fluctuate significantly over short periods of time. The prices of the Company's raw materials generally fluctuate in line with commodity cycles, although the prices of raw materials used in the Company's active pharmaceutical ingredients business are generally more volatile. Cost of raw materials forms the largest portion of the Company's cost of revenues. Commodity price risk exposure is evaluated and managed through operating procedures and sourcing policies. As of March 31, 2018, the Company had not entered into any material derivative contracts to hedge exposure to fluctuations in commodity prices.

NOTE : 48 EMPLOYEE BENEFIT PLANS

Defined contribution plan

Contributions are made to Regional Provident Fund (RPF), Family Pension Fund, Employees State Insurance Scheme (ESIC) and other Funds which covers all regular employees. While both the employees and the Company make predetermined contributions to the Provident Fund and ESIC, contribution to the Family Pension Fund and other Statutory Funds are made only by the Company. The contributions are normally based on a certain percentage of the employee's salary. Amount recognised as expense in respect of these defined contribution plans, aggregate to ₹ 676.3 Million (March 31, 2017 : ₹ 613.7 Million).

Defined benefit plan

a) Gratuity

In respect of Gratuity, a defined benefit plan, contributions are made to LIC's Recognised Group Gratuity Fund Scheme. It is governed by the Payment of Gratuity Act, 1972. Under the Gratuity Act, employees are entitled to specific benefit at the time of retirement or termination of the employment on completion of five years or death while in employment. The level of benefit provided depends on the member's length of service and salary at the time of retirement/termination age. Provision for Gratuity is based on actuarial valuation done by an independent actuary as at the year end. Each year, the Company reviews the level of funding in gratuity fund. The Company decides its contribution based on the results of its annual review. The Company aims to keep annual contributions relatively stable at a level such that the fund assets meets the requirements of gratuity payments in short to medium term.

b) Pension fund

The Company has an obligation towards pension, a defined benefit retirement plan, with respect to certain employees, who had already retired before March 01, 2013, will continue to receive the pension as per the pension plan.

Risks

These plans typically expose the Company to actuarial risks such as: investment risk, interest rate risk, longevity risk and salary risk.

- Investment risk - The present value of the defined benefit plan liability is calculated using a discount rate determined by reference to the market yields on government bonds denominated in Indian Rupees. If the actual return on plan asset is below this rate, it will create a plan deficit. However, the risk is partially mitigated by investment in LIC managed fund.
- Interest rate risk - A decrease in the bond interest rate will increase the plan liability. However, this will be partially offset by an increase in the return on the plan's debt investments.

Notes to the Standalone Financial Statements

for the year ended March 31, 2018

- iii) Longevity risk - The present value of the defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants both during and after their employment. An increase in the life expectancy of the plan participants will increase the plan's liability.
- iv) Salary risk - The present value of the defined benefit plan liability is calculated by reference to the future salaries of plan participants. As such, an increase in the salary of the plan participants will increase the plan's liability.

Other long term benefit plan

Actuarial Valuation for Compensated absences is done as at the year end and the provision is made as per Company rules with corresponding (gain) / charge to the statement of profit and loss amounting to ₹ (78.7) Million (March 31, 2017: ₹ 331.3 Million) and it covers all regular employees. Major drivers in actuarial assumptions, typically, are years of service and employee compensation.

Obligation in respect of defined benefit plan and other long term employee benefit plans are actuarially determined as at the year end using the 'Projected Unit Credit' method. Gains and losses on changes in actuarial assumptions relating to defined benefit obligation are recognised in other comprehensive income whereas gains and losses in respect of other long term employee benefit plans are recognised in profit or loss.

NOTE : 50 EMPLOYEE SHARE-BASED PAYMENT PLANS

Erstwhile Ranbaxy Laboratories Limited (RLL) had Employee Stock Option Schemes ("ESOS's") namely, Employees Stock Option Scheme -II (ESOS-II), Employees Stock Option Scheme 2005 (ESOS 2005) and Employees Stock Option Plan 2011 (ESOP 2011) for the grant of stock options to the eligible employees and Directors of the Erstwhile RLL and its subsidiaries. ESOS-II had been discontinued from 17th January, 2015. The ESOS's are administered by the Compensation Committee ("Committee"). Options are granted at the discretion of the Committee to selected employees depending upon certain criterion. Each option comprises one underlying equity share.

Notes to the Standalone Financial Statements

for the year ended March 31, 2018

ESOS 2005 provided that the grant price of options would be the latest available closing price on the stock exchange on which the shares of the erstwhile RLL were listed, prior to the date of the meeting of the Committee in which the options were granted. If the shares are listed on more than one stock exchange, then the stock exchange where there was highest trading volume on the said date were considered. The options vested evenly over a period of five years from the date of grant. Options lapse, if they are not exercised prior to the expiry date, which was ten years from the date of grant.

ESOP 2011 provided that the grant price of options would be the face value of the equity share i.e. ₹ 5 per share. The options vested evenly over a period of three years from the date of grant. Options lapse, if they were not exercised prior to the expiry date, which was three months from the date of the vesting. An ESOP Trust had been formed to administer ESOP 2011. Shares issued to the ESOP Trust were allocated to the eligible employees upon exercise of stock options from time to time.

The Shareholders' Committee of Erstwhile RLL had approved issuance of options under the ESOS's as per details given below:

Date of approval	Scheme	Original No. of options approved
25 June 2003	ESOS-II	4,000,000
30 June 2005	ESOS 2005	4,000,000
09 May 2011	ESOP 2011	3,000,000

In accordance with the above approval of issuance of options, stock options have been granted from time to time.

The stock options outstanding as on June 30, 2005 are proportionately adjusted in view of the sub-division of equity shares of the Erstwhile RLL from the face value of ₹ 10 each into 2 equity shares of ₹ 5 each.

Pursuant to the Scheme of Amalgamation, Sun Pharmaceutical Industries Limited ("transferee company") formulated two Employee Stock Option Schemes, namely, (i) SUN Employee Stock Option Scheme-2015 (SUN-ESOS 2015) to administer ESOS 2005 (ii) SUN Employee Stock Option Plan-2015 (SUN-ESOP 2015) to administer ESOP 2011. These scheme provide that the number of transferee options issued shall equal to the product of number of transferor options outstanding on effectiveness of Scheme multiplied by the Share exchange ratio (0.80) and each transferee option shall have an exercise price per equity share equal to transferor option exercise price per equity shares divided by the share exchange ratio (0.80) and fractions rounded off to the next higher whole number. The terms and conditions of ESOS, of transferee company are not less favourable than those of ESOS's of erstwhile RLL. No new grants shall be made under these schemes and these schemes shall operate only for the purpose of administering the exercise of options already granted / vested on an employee pursuant to SUN-ESOS 2015 and SUN-ESOP 2015.

Notes to the Standalone Financial Statements

for the year ended March 31, 2018

During the current year, the Company has recorded a Stock-based employee compensation expense / (gain) of ₹ (1.0) Million (March 31, 2017 : ₹ 30.8 Million). The amount has been determined under a fair value method wherein the grant date fair value of the options was calculated by using Black Scholes pricing model.

The following table summarizes the assumptions used in calculating the grant date fair value for instrument granted in the year ended March 31, 2015: @@

Particulars	Year ended March 31, 2015
Grant Date	08-May-14
Dividend yield	0.43%
Expected life of options from the date(s) of grant	1.25, 2.25 and 3.25 years
Risk free interest rate	8.57% (1.25 years) 8.65% (2.25 years) 8.71% (3.25 years)
Expected volatility	40.47%
Grant date fair value	₹ 462.39 (1.25 years) ₹ 460.79 (2.25 years) ₹ 459.16 (3.25 years)

@@ Assumptions used are as applicable at the date of grant in the context of erstwhile RLL

The Black Scholes option-pricing model was developed for estimating fair value of trade options that have no vesting restrictions and are fully transferable. Since options pricing models require use of subjective assumptions, changes therein can materially affect fair value of the options. The options pricing models do not necessarily provide a reliable measure of fair value of options. The volatility in the share price is based on volatility of historical stock price of the erstwhile RLL for last 60 months.

NOTE : 55

Expenditure related to Corporate Social Responsibility as per Section 135 of the Companies Act, 2013 read with Schedule VII thereof: ₹ 27.0 Million (Previous Year ₹ 24.1 Million).

NOTE : 56

- 1 Zenotech Laboratories Limited ('Zenotech'), an associate of the Company, undertook a rights issue of its equity shares in which the Company participated and subscribed to equity shares worth ₹ 855 Million. On account of such participation, Zenotech became a subsidiary of the Company effective July 25, 2017. In compliance with the relevant provisions of IND AS 103, the Company has reversed impairment in the books to the extent of fair value of equity shares determined on the basis of rights issue price amounting to ₹ 725.7 Million.
- 2 Intangible assets consisting of trademarks, designs, technical know-how, non compete fees and other intangible assets are available to the Company in perpetuity. The amortisable amount of intangible assets is arrived at based on the management's best estimates of useful lives of such assets after due consideration as regards their expected usage, the product life cycles, technical and technological obsolescence, market demand for products, competition and their expected future benefits to the Company.
- 3 The Company is a defendant in respect of a civil antitrust litigation relating to a product Modafinil, in which the plaintiff's have alleged that the Company excluded its generic version of Modafinil from the US market and hence have claimed damages under the Sherman Act of US. This case is pending in the United States District Court for the Eastern District of Pennsylvania. The Company and one of its wholly owned subsidiaries entered into settlements with certain plaintiffs (Apotex Corporation and Retailer Purchasers) in the month of July 2017 and September 2017 whereby the Company agreed to pay an aggregate amount of USD 147 Million (₹ 9,505.0 Million). This amount has been provided for in the standalone financial statements and disclosed as an exceptional item. The Company continues to litigate the case against the other plaintiff's (other than those settled).
- 4 Out of a MAT credit entitlement of ₹ 8,222.7 Million which was written down by the erstwhile RLL during the quarter ended December 31, 2014, an amount of ₹ 7,517.0 Million was recognised by the Company in the year ended March 31, 2015, on a reassessment by the Management, based on convincing evidence that the combined amalgamated entity would pay normal income tax during the specified period and would therefore be able to utilize the MAT credit entitlement so recognised.
- 5 Since the US-FDA import alert at Karkhadi facility in March 2014, the Company remained fully committed to implement all corrective measures to address the observations made by the US-FDA with the help of third party consultant. Substantial progress has been made at the Karkhadi facility in terms of completing all the action items to address the observations made by the US-FDA in its warning letter issued in May 2014. The Company is continuing to work closely and co-operatively with the US-FDA to resolve the matter. The contribution of this facility to Company's revenues is not significant.
- 6 The US-FDA, on January 23, 2014, had prohibited using API manufactured at Toansa facility for manufacture of finished drug products intended for distribution in the U.S. market. Consequentially, the Toansa manufacturing facility was subject to certain provisions of the consent decree of permanent injunction entered in January 2012 by erstwhile Ranbaxy Laboratories Ltd (which was merged with Sun Pharmaceutical Industries Ltd in March 2015). In addition, the Department of Justice of the USA ('US DOJ'), United States Attorney's Office for the District of New Jersey had also issued an administrative subpoena dated March 13, 2014 seeking information primarily related to Toansa manufacturing facility for which a Form 483 containing findings of the US-FDA was issued in January 2014. The Company is continuing to fully co-operate and provide requisite information to the US DOJ.
- 7 In December 2015, the USFDA issued a warning letter to the manufacturing facility at Halol. Post the November 2016 inspection, the USFDA re-inspected Halol facility in February 2018. At the conclusion of the inspection, USFDA issued a Form-483 with three observations. The Company has submitted its response documenting the corrective measures to resolve the Form-483 observations. The Company continues to manufacture and distribute products to the U.S from Halol facility and at the same time is working closely and co-operatively with the USFDA to resolve the matter.
- 8 In September 2013, the USFDA had put the Mohali facility under import alert and was also subjected to certain provisions of the consent decree of permanent injunction entered in January 2012 by erstwhile Ranbaxy Laboratories Ltd (which was merged with Sun Pharmaceutical Industries Ltd in March 2015). In March 2017, the USFDA lifted the import alert and indicated that the facility was in compliance with the requirements of cGMP provisions mentioned in the consent decree. The facility will continue to demonstrate sustainable cGMP compliance for a fixed period of time as required by the consent decree. The Company has started manufacturing and distributing products to the U.S from Mohali facility.
- 9 In accordance with Ind AS 108 "Operating Segments", segment information has been given in the consolidated Ind AS financial statements, and therefore, no separate disclosure on segment information is given in these financial statements.

Notes to the Standalone Financial Statements

for the year ended March 31, 2018

- 10 The board of directors of the Company at its meeting held on May 25, 2018, approved the scheme of arrangement between the Company, Sun Pharma (Netherlands) B.V. and Sun Pharmaceutical Holdings USA Inc. (both being wholly owned subsidiaries of the Company) which inter-alia, envisages spin-off of the specified investment undertaking of the Company. Further, the board of directors of the Company at its meeting held on November 14, 2017, had approved the scheme of arrangement between Company and Sun Pharma Global FZE (wholly owned subsidiary of the Company) which inter-alia, envisages demerger of unbranded generic pharmaceutical undertaking of Sun Pharma Global FZE into the Company. The above schemes shall be effective post receipt of required approvals and accordingly, the above financial statements do not reflect the impact, if any, on account of the schemes.
- 11 Post implementation of Goods and Service Tax ("GST") with effect from July 01, 2017, sale of products is disclosed net of GST. Sale of products for the previous year included excise duty which is now subsumed in GST. Sale of products for the year ended March 31, 2018 includes excise duty for the period ended June 30, 2017. Accordingly, sale of products for the year ended March 31, 2018 are not comparable with year ended March 31, 2017.
- 12 The Company completed buy-back of 7,500,000 equity shares of ₹ 1 each (representing 0.31% of total pre buy back paid up equity capital) on October 18, 2016, from the shareholders on a proportionate basis by way of a tender offer at a price of ₹ 900 per equity share for an aggregate amount of ₹ 6750.0 Million in accordance with the provisions of the Companies Act, 2013 and the SEBI (Buy Back of Securities) Regulations, 1998. This buyback of equity shares was approved by the Board of Directors of the Company at its meeting held on June 23, 2016.
- 13 The Board of Directors of the Company at their meeting held on November 10, 2016 and the shareholders and unsecured creditors of the Company at their respective meetings held on June 20, 2017 approved the proposed scheme of arrangement u/s 230 to 232 of the Companies Act, 2013 for amalgamation of Sun Pharma Medisales Private Limited, Ranbaxy Drugs Limited, Gufic Pharma Limited and Vidyut Investments Limited into the Company with effect from April 01, 2017, the appointed date. On completion of all the formalities of the merger of the above companies with the Company, the said merger became effective September 8, 2017.
- Consequent to the amalgamation prescribed by the Scheme, all the assets and liabilities of transferor companies were transferred to and vested in the Company with effect from April 01, 2017 ("the Appointed Date")
- The amalgamation was accounted under the "pooling of interest" method prescribed under Ind AS 103 - Business Combinations, as prescribed by the Scheme.
- Accordingly, all the assets, liabilities and other reserves of transferor companies were aggregated with those of the Company at their respective book values from the earliest period presented. As prescribed by the Scheme no consideration was paid as the transferor Companies were wholly owned subsidiaries of the Company. Accordingly, the resultant difference amounting to ₹ 535.6 Million was credited to capital reserve account.
- 14 The Company has sold 175,000,000 (March 31, 2017 : 475,000,000) optionally convertible preference shares of Sun Pharma Holdings to wholly owned subsidiary Sun Pharma Laboratories Limited. The Company has recorded gain of ₹ 1,328 Million (March 31, 2017 : ₹ 2,307.8 Million).

Independent Auditor's Report

To the Members of Sun Pharmaceutical Industries Limited

Report on the Consolidated Ind AS Financial Statements

We have audited the accompanying consolidated Ind AS financial statements of Sun Pharmaceutical Industries Limited (hereinafter referred to as "the Holding Company"), its subsidiaries (the Holding Company and its subsidiaries together referred to as "the Group") its associates and joint ventures, comprising of the consolidated Balance Sheet as at March 31, 2018, the consolidated Statement of Profit and Loss including other comprehensive income, the consolidated Cash Flow Statement, the consolidated Statement of Changes in Equity for the year then ended, and a summary of significant accounting policies and other explanatory information (hereinafter referred to as "the consolidated Ind AS financial statements").

Management's Responsibility for the Consolidated Ind AS Financial Statements

The Holding Company's Board of Directors is responsible for the preparation of these consolidated Ind AS financial statements in terms of the requirement of the Companies Act, 2013 ("the Act") that give a true and fair view of the consolidated financial position, consolidated financial performance including other comprehensive income, consolidated cash flows and consolidated statement of changes in equity of the Group including its Associates and Joint Ventures in accordance with accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under Section 133 of the Act, read with the Companies (Indian Accounting Standard) Rules, 2015, as amended. The respective Board of Directors of the companies included in the Group and of its associates and joint ventures are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Group and of its associates and joint ventures and for preventing and detecting frauds and other irregularities; the selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the consolidated Ind AS financial statements by the Directors of the Holding Company, as aforesaid.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated Ind AS financial statements based on our audit. While conducting the audit, we have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder. We conducted our audit in accordance with the Standards on Auditing, issued by the Institute of Chartered Accountants of India, as specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Holding Company's preparation of the consolidated Ind AS financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of the accounting estimates made by the Holding Company's Board of Directors, as well as evaluating the overall presentation of the consolidated financial statements. We believe that the audit evidence obtained by us and the audit evidence obtained by the other auditors in terms of their reports referred to in sub-paragraph (a) of the Other Matters paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the consolidated Ind AS financial statements.

Opinion

In our opinion and to the best of our information and according to the explanations given to us and based on the consideration of reports of other auditors on separate financial statements and on the other financial information of the subsidiaries, associates and joint ventures, the aforesaid consolidated Ind AS financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India of the consolidated state of affairs of the Group, its associates and joint ventures as at March 31, 2018, their consolidated profit including other comprehensive income, their consolidated cash flows and consolidated statement of changes in equity for the year ended on that date.

Other Matter

- (a) We did not audit the financial statements and other financial information, in respect of 24 subsidiaries, whose Ind AS financial statements, without giving effect to elimination of intra group transactions, include total assets of ₹ 566,133.5 Million and net assets of ₹ 418,322.5 Million as at March 31, 2018, and total revenues of ₹ 185,173.2 Million and net cash outflows of ₹ 6,056.8 Million for the year ended on that date. These financial statement and other financial information have been audited by other auditors, which financial

statements, other financial information and auditor's reports have been furnished to us by the management. The consolidated Ind AS financial statements also include the Group's share of net loss of ₹ 254.4 Million for the year ended March 31, 2018, as considered in the consolidated financial statements, in respect of 8 associates and joint ventures, whose financial statements, other financial information have been audited by other auditors and whose reports have been furnished to us by the Management. Our opinion on the consolidated Ind AS financial statements, in so far as it relates to the amounts and disclosures included in respect of these subsidiaries, joint ventures and associates, and our report in terms of sub-sections (3) of Section 143 of the Act, in so far as it relates to the aforesaid subsidiaries, joint ventures and associates, is based solely on the reports of such other auditors.

Certain of these subsidiaries are located outside India whose financial statements and other financial information have been prepared in accordance with accounting principles generally accepted in their respective countries and which have been audited by other auditors under generally accepted auditing standards applicable in their respective countries. The Company's management has converted the financial statements of such subsidiaries located outside India from accounting principles generally accepted in their respective countries to accounting principles generally accepted in India. We have audited these conversion adjustments made by the Company's management. Our opinion in so far as it relates to the balances and affairs of such subsidiaries located outside India is based on the report of other auditors and the conversion adjustments prepared by the management of the Company and audited by us.

- (b) The accompanying consolidated Ind AS financial statements include unaudited financial statements and other unaudited financial information in respect of 39 subsidiaries, whose financial statements and other financial information, without giving effect to elimination of intra group transactions, reflect total assets of ₹ 217,210.8 Million and net assets of ₹ 208,537.0 Million as at March 31, 2018, and total revenues of ₹ 6,131.0 Million and net cash outflows of ₹ 496.9 Million for the year ended on that date. These unaudited financial statements and other unaudited financial information have been furnished to us by the management. Our opinion, in so far as it relates amounts and disclosures included in respect of these subsidiaries, joint ventures and associates, and our report in terms of sub-sections (3) of Section 143 of the Act in so far as it relates to the aforesaid subsidiaries, joint ventures and associates, is based solely on such unaudited financial statement and other unaudited financial information. In our opinion and according to the information and explanations given to us by the Management, these financial statements and other financial information are not material to the Group.
- (c) The consolidated Ind AS financial statements of the Company for the year ended March 31, 2017, included in these consolidated Ind AS financial statements, have been audited by the predecessor auditor who expressed an unmodified opinion on those statements on May 26, 2017.

Our opinion above on the consolidated Ind AS financial statements, and our report on Other Legal and Regulatory Requirements below, is not modified in respect of the above matters with respect to our reliance on the work done and the reports of the other auditors and the financial statements and other financial information certified by the Management.

Report on Other Legal and Regulatory Requirements

As required by section 143 (3) of the Act, based on our audit and on the consideration of report of the other auditors on separate financial statements and the other financial information of subsidiaries, associates and joint ventures, as noted in the 'other matter' paragraph we report, to the extent applicable, that:

- (a) We / the other auditors whose reports we have relied upon have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit of the aforesaid consolidated Ind AS financial statements;
- (b) In our opinion proper books of account as required by law relating to preparation of the aforesaid consolidation of the financial statements have been kept so far as it appears from our examination of those books and reports of the other auditors;
- (c) The consolidated Balance Sheet, consolidated Statement of Profit and Loss including the Statement of Other Comprehensive Income, the consolidated Cash Flow Statement and consolidated Statement of Changes in Equity dealt with by this Report are in agreement with the books of account maintained for the purpose of preparation of the consolidated Ind AS financial statements;
- (d) In our opinion, the aforesaid consolidated Ind AS financial statements comply with the Indian Accounting Standards specified under section 133 of the Act, read with Companies (Indian Accounting Standard) Rules, 2015, as amended;

Independent Auditor's Report

To the Members of Sun Pharmaceutical Industries Limited

- (e) On the basis of the written representations received from the directors of the Holding Company as on March 31, 2018 taken on record by the Board of Directors of the Holding Company and the reports of the statutory auditors who are appointed under Section 139 of the Act, of its subsidiary companies, associate companies and joint ventures incorporated in India, none of the directors of the Group's companies, its associates and joint ventures incorporated in India is disqualified as on March 31, 2018 from being appointed as a director in terms of Section 164 (2) of the Act.
- (f) With respect to the adequacy and the operating effectiveness of the internal financial controls over financial reporting with reference to these consolidated Ind AS financial statements of the Holding Company and its subsidiary companies, refer to our separate report in "Annexure 1" to this report;
- (g) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, as amended, in our opinion and to the best of our information and according to the explanations given to us and based on the consideration of the report of the other auditors on separate financial statements as also the other financial information of the subsidiaries, associates, joint ventures, as noted in the 'Other matter' paragraph:
- i. The consolidated Ind AS financial statements disclose the impact of pending litigations on its consolidated financial position of the Group, its associates and joint ventures – Refer Note 40 to the consolidated Ind AS financial statements;
 - ii. Provision has been made in the consolidated Ind AS financial statements, as required under the applicable law or accounting standards, for material foreseeable losses, if any, on long-term contracts including derivative contracts – Refer (a) Note 23 and Note 29 to the consolidated Ind AS financial statements in respect of such items as it relates to the Group, its associates and joint ventures and (b) the Group's share of net profit/loss in respect of its associates;
 - iii. There has been no delay in transferring amounts, required to be transferred, to the Investor Education and Protection Fund by the Holding Company, its subsidiaries, associates and joint ventures incorporated in India, except a sum of ₹ 16.9 Million, which is held in abeyance due to pending legal cases.

ANNEXURE 1 TO THE INDEPENDENT AUDITOR'S REPORT OF EVEN DATE ON THE CONSOLIDATED FINANCIAL STATEMENTS OF SUN PHARMACEUTICAL INDUSTRIES LIMITED

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

In conjunction with our audit of the consolidated financial statements of Sun Pharmaceutical Industries Limited as of and for the year ended March 31, 2018, we have audited the internal financial controls over financial reporting of Sun Pharmaceutical Industries Limited (hereinafter referred to as the "Holding Company") and its subsidiary companies, which are companies incorporated in India, as of that date.

Management's Responsibility for Internal Financial Controls

The respective Board of Directors of the Holding Company, its subsidiary companies, which are companies incorporated in India, are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Holding Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the respective company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor's Responsibility

Our responsibility is to express an opinion on the company's internal financial controls over financial reporting with reference to these consolidated financial statements based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, both, issued by Institute of Chartered Accountants of India, and deemed to be prescribed under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting with reference to these consolidated financial statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls over financial reporting with reference to these consolidated financial statements and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting with reference to these consolidated financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained and the audit evidence obtained by the other auditors in terms of their reports referred to in the Other Matters paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls over financial reporting with reference to these consolidated financial statements.

Meaning of Internal Financial Controls Over Financial Reporting With Reference to these Consolidated Financial Statements

A company's internal financial control over financial reporting with reference to these consolidated financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting with reference to these consolidated financial statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

ANNEXURE 1 TO THE INDEPENDENT AUDITOR'S REPORT OF EVEN DATE ON THE CONSOLIDATED FINANCIAL STATEMENTS OF SUN PHARMACEUTICAL INDUSTRIES LIMITED

Inherent Limitations of Internal Financial Controls Over Financial Reporting With Reference to these Consolidated Financial Statements

Because of the inherent limitations of internal financial controls over financial reporting with reference to these consolidated financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting with reference to these consolidated financial statements to future periods are subject to the risk that the internal financial control over financial reporting with reference to these consolidated financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Holding Company and its subsidiary companies, which are companies incorporated in India, have, maintained in all material respects, adequate internal financial controls over financial reporting with reference to these consolidated financial statements and such internal financial controls over financial reporting with reference to these consolidated financial statements were operating effectively as at March 31, 2018, based on the internal control over financial reporting criteria established by the Holding Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Other Matters

Our report under Section 143(3)(i) of the Act on the adequacy and operating effectiveness of the internal financial controls over financial reporting with reference to these consolidated financial statements of the Holding Company, insofar as it relates to these 3 subsidiary companies, which are companies incorporated in India, is based on the corresponding reports of the auditors of such subsidiary, incorporated in India.

Notes to the Consolidated Financial Statements

for the year ended March 31, 2018

1. GENERAL INFORMATION

Sun Pharmaceutical Industries Limited ("the Parent Company") is a public limited company incorporated and domiciled in India, having its registered office at Vadodara, Gujarat, India and has its listing on the Bombay Stock Exchange Limited and National Stock Exchange of India Limited. The Company is in the business of manufacturing, developing and marketing a wide range of branded and generic formulations and Active Pharmaceutical Ingredients (APIs). The Parent Company and its subsidiaries (hereinafter referred to as "the Company" or "the Group") have manufacturing locations spread across the world with trading and other incidental and related activities extending to the global markets.

The consolidated financial statement were authorised for issue in accordance with a resolution of the directors on May 25, 2018.

2. SIGNIFICANT ACCOUNTING POLICIES

2.1 Statement of compliance

The Group has prepared its consolidated financial statements for the year ended March 31, 2018 in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 (as amended) together with the comparative period data as at and for the year ended March 31, 2017.

2.2 Basis of preparation and presentation

The consolidated financial statements have been prepared on the historical cost basis, except for: (i) financial instruments that are measured at fair values at the end of each reporting period; (ii) Non-current assets classified as held for sale which are measured at the lower of their carrying amount and fair value less costs to sell; (iii) derivative financial instrument and (iv) defined benefit plans – plan assets that are measured at fair values at the end of each reporting period, as explained in the accounting policies below:

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

The consolidated financial statements are presented in ₹ and all values are rounded to the nearest Million (₹ 000,000) upto one decimal, except when otherwise indicated.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for

measurement and/or disclosure purposes in these consolidated financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of Ind AS 102, leasing transactions that are within the scope of Ind AS 17, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in Ind AS 2 or value in use in Ind AS 36.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

The Group has consistently applied the following accounting policies to all periods presented in these consolidated financial statements.

a. Basis of consolidation

The consolidated financial statements comprise the financial statements of the Parent Company, and its subsidiaries as disclosed in Note 39. Control exists when the parent has power over the entity, is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns by using its power over the entity. Power is demonstrated through existing rights that give the ability to direct relevant activities, those which significantly affect the entity's returns. Subsidiaries are consolidated from the date control commences until the date control ceases.

Profit or loss and each component of other comprehensive income are attributed to the owners of the Company and to the non-controlling interests. Total comprehensive income of subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

The financial statements of the Group companies are consolidated on a line-by-line basis and intra-group balances, transactions including unrealised gain /

Notes to the Consolidated Financial Statements

for the year ended March 31, 2018

loss from such transactions and cash flows relating to transactions between members of the Group are eliminated upon consolidation. These financial statements are prepared by applying uniform accounting policies in use at the Group.

Changes in the Group's ownership interests in existing subsidiaries

Changes in the Group's ownership interests in subsidiaries that do not result in the Group losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the Group's interests and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognised directly in equity and attributed to owners of the Company.

When the Group loses control of a subsidiary, a gain or loss is recognised in profit or loss and is calculated as the difference between (i) the aggregate of the fair value of the consideration received and the fair value of any retained interest and (ii) the previous carrying amount of the assets (including goodwill) and liabilities of the subsidiary and any non-controlling interests. All amounts previously recognised in other comprehensive income in relation to that subsidiary are accounted for as if the Group had directly disposed off the related assets or liabilities of the subsidiary (i.e. reclassified to profit or loss or transferred to another category of equity as specified/ permitted by applicable Ind AS). The fair value of any investment retained in the former subsidiary at the date when control is lost is regarded as the fair value on initial recognition for subsequent accounting under Ind AS 109, or, when applicable, the cost on initial recognition of an investment in an associate or a joint venture.

Investments in Associates and Joint Ventures

Associates are those entities over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the entities but is not control or joint control of those policies.

A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint arrangement. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control.

The results and assets and liabilities of associates or joint ventures are incorporated in these consolidated financial statements using the equity method of accounting, except when the investment, or a portion thereof, is classified as held for sale, in which case it is accounted for in accordance with Ind AS 105. Under the equity method, an investment in an associate or a joint venture is initially recognised in the consolidated balance sheet at cost and adjusted thereafter to recognise the Group's share of the profit or loss and other comprehensive income of the associate or joint venture. Distributions received from an associate or a joint venture reduce the carrying amount of the investment. The carrying value of the Group's investment includes goodwill identified on acquisition, net of any accumulated impairment losses. When the Group's share of losses of an associate or a joint venture exceeds its interest in that associate or joint venture, the carrying amount of that interest (including any long-term investments) is reduced to zero and the recognition of further losses is discontinued except to the extent that the Group has obligations or has made payments on behalf of the associate or joint venture.

An investment in an associate or a joint venture is accounted for using the equity method from the date on which the investee becomes an associate or a joint venture and discontinues from the date when the investment ceases to be an associate or a joint venture, or when the investment is classified as held for sale.

The difference between the carrying amount of the associate or joint venture at the date the equity method was discontinued, and the fair value of any retained interest and any proceeds from disposing of a part interest in the associate or joint venture is included in the determination of the gain or loss on disposal of the associate or joint venture. In addition, the Group accounts for all amounts previously recognised in other comprehensive income in relation to that associate or joint venture on the same basis as would be required if that associate or joint venture had directly disposed off the related assets or liabilities.

When a Group entity transacts with an associate or a joint venture of the Group, profits and losses resulting from the transactions with the associate or joint venture are recognised in the Group's consolidated financial statements only to the extent of interests in the associate or joint venture that are not related to the Group.

b. Current vs. Non-current

The Group presents assets and liabilities in the balance sheet based on current / non-current classification. An asset is treated as current when it is:

Notes to the Consolidated Financial Statements

for the year ended March 31, 2018

- Expected to be realised or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

The Group classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Group has identified twelve months as its operating cycle.

c. Business combinations

The Group uses the acquisition method of accounting to account for business combinations that occurred on or after April 01, 2015. The acquisition date is generally the date on which control is transferred to the acquirer. Judgment is applied in determining the acquisition date and determining whether control is transferred from one party to another. Control exists when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through power over the entity. In assessing control, potential voting rights are considered only if the rights are substantive. The Group measures goodwill as of the applicable acquisition date at the fair value of the consideration transferred, including the recognised amount of any non-controlling interest in the acquiree and the fair value of the acquirer's previously held equity interest in the acquiree (if any), less the net recognised amount of the identifiable assets acquired and liabilities

assumed. When the fair value of the net identifiable assets acquired and liabilities assumed exceeds the consideration transferred, a bargain purchase gain is recognised immediately in the OCI and accumulates the same in equity as Capital Reserve where there exists clear evidence of the underlying reasons for classifying the business combination as a bargain purchase else the gain is directly recognised in equity as Capital Reserve. Consideration transferred includes the fair values of the assets transferred, liabilities incurred by the Group to the previous owners of the acquiree, and equity interests issued by the Group. Consideration transferred also includes the fair value of any contingent consideration. Changes in the fair value of the contingent consideration that qualify as measurement period adjustments are adjusted retrospectively, with corresponding adjustments against goodwill or capital reserve, as the case maybe. The subsequent accounting for changes in the fair value of the contingent consideration that do not qualify as measurement period adjustments depends on how the contingent consideration is classified. Contingent consideration that is classified as equity is not remeasured at subsequent reporting dates and its subsequent settlement is accounted for within equity. Contingent consideration that is classified as an asset or a liability is remeasured at fair value at subsequent reporting dates with the corresponding gain or loss being recognised in profit or loss. Consideration transferred does not include amounts related to settlement of pre-existing relationships.

A contingent liability of the acquiree is assumed in a business combination only if such a liability represents a present obligation and arises from a past event, and its fair value can be measured reliably. On an acquisition-by-acquisition basis, the Group recognises any non-controlling interest in the acquiree either at fair value or at the non-controlling interest's proportionate share of the acquiree's identifiable net assets. Transaction costs that the Group incurs in connection with a business combination, such as finder's fees, legal fees, due diligence fees and other professional and consulting fees, are expensed as incurred.

If the business combination is achieved in stages, any previously held equity interest is re-measured at its acquisition date fair value and any resulting gain or loss is recognised in profit or loss or OCI, as appropriate.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted during the measurement period (see above), or additional

Notes to the Consolidated Financial Statements

for the year ended March 31, 2018

assets or liabilities are recognised, to reflect new information obtained about facts and circumstances that existed at the acquisition date that, if known, would have affected the amounts recognised at that date.

d. Foreign currency

Foreign currency transactions

In preparing the financial statements of each individual Group entity, transactions in currencies other than the entity's functional currency (foreign currencies) are translated at exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated into the functional currency at the exchange rate at that date. Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous period are recognised in profit or loss in the period in which they arise except for:

- exchange differences on foreign currency borrowings relating to assets under construction for future productive use, which are included in the cost of those assets when they are regarded as an adjustment to interest costs on those foreign currency borrowings (see note 2.2.r).
- exchange differences on transactions entered into in order to hedge certain foreign currency risks (see note 2.2.j below for hedging accounting policies).
- exchange differences on monetary items receivable from or payable to a foreign operation for which settlement is neither planned nor likely to occur (therefore forming part of the net investment in the foreign operation) are recognised in other comprehensive income / (loss) and presented within equity as a part of Foreign Currency Translation Reserve. On disposal of the foreign operation, the relevant amount in the Foreign Currency Translation Reserve is reclassified to profit or loss.

Non-monetary items that are measured in terms of historical cost in foreign currency are measured using the exchange rates at the date of initial transaction.

Foreign operations

For the purposes of presenting these consolidated financial statements, the assets and liabilities of Group's foreign operations, are translated to the Indian Rupees at exchange rates at the end of each reporting period. The income and expenses of such foreign operations are translated at the average exchange rates for the period.

Resulting foreign currency differences are recognised in other comprehensive income / (loss) and presented within equity as part of Foreign Currency Translation Reserve (and attributed to non-controlling interests as appropriate). When a foreign operation is disposed off, the relevant amount in the Foreign Currency Translation Reserve is reclassified to profit or loss.

In addition, in relation to a partial disposal of a subsidiary that includes a foreign operation that does not result in the Group losing control over the subsidiary, the proportionate share of accumulated exchange differences are re-attributed to non-controlling interests and are not recognised in profit or loss. For all other partial disposals (i.e. partial disposals of associates or joint arrangements that do not result in the Group losing significant influence or joint control), the proportionate share of the accumulated exchange differences is reclassified to profit or loss.

Goodwill and fair value adjustments to identifiable assets acquired and liabilities assumed through acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and translated at the rate of exchange prevailing at the end of each reporting period. Exchange differences arising are recognised in other comprehensive income.

e. Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker. The chief operating decision maker of the Company is responsible for allocating resources and assessing performance of the operating segments.

f. Property, plant and equipment

Items of property, plant and equipment are stated in consolidated balance sheet at cost less accumulated depreciation and accumulated impairment losses, if any. Freehold land is not depreciated.

Assets in the course of construction for production, supply or administrative purposes are carried at cost, less any recognised impairment loss. Cost includes purchase price, borrowing costs if capitalisation criteria are met and directly attributable cost of bringing the asset to its working condition for the intended use. Subsequent expenditures are capitalised only when they increase the future economic benefits embodied in the specific asset to which they relate. Such assets are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as

Notes to the Consolidated Financial Statements

for the year ended March 31, 2018

other assets, commences when the assets are ready for their intended use. When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of property, plant and equipment and is recognised in profit or loss.

Items of property, plant and equipment acquired through exchange of non-monetary assets are measured at fair value, unless the exchange transaction lacks commercial substance or the fair value of either the asset received or asset given up is not reliably measurable, in which case the acquired asset is measured at the carrying amount of the asset given up.

Depreciation is recognised on the cost of assets (other than freehold land and Capital work-in-progress) less their residual values on straight-line method over their useful lives. Leasehold improvements are depreciated over period of the lease agreement or the useful life, whichever is shorter. Depreciation methods, useful lives and residual values are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

The estimated useful lives are as follows:

Asset Category	No. of Years
Leasehold land	50-196
Leasehold improvements	3-10
Buildings	5-100
Buildings taken under finance lease	10-40
Buildings given under operating lease	30
Plant and equipment	3-25
Plant and equipment given under operating lease	2-15
Vehicles	3-15
Office equipment	2-21
Furniture and fixtures	2-17

Software for internal use, which is primarily acquired from third-party vendors and which is an integral part of a tangible asset, including consultancy charges for implementing the software, is capitalised as part of the related tangible asset. Subsequent costs associated with maintaining such software are recognised as expense as incurred. The capitalised costs are amortised over the

lower of the estimated useful life of the software and the remaining useful life of the tangible fixed asset.

g. Goodwill and other intangible assets

Goodwill

Goodwill represents the excess of consideration transferred, together with the amount of non-controlling interest in the acquiree, over the fair value of the Group's share of identifiable net assets acquired. Goodwill is measured at cost less accumulated impairment losses. A cash-generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. The goodwill acquired in a business combination is, for the purpose of impairment testing, allocated to cash-generating units that are expected to benefit from the synergies of the combination. Any impairment loss for goodwill is recognised directly in profit or loss. An impairment loss recognised for goodwill is not reversed in subsequent periods.

On disposal of a cash-generating unit to which goodwill is allocated, the goodwill associated with the disposed cash-generating unit is included in the carrying amount of the cash-generating unit when determining the gain or loss on disposal.

Other intangible assets

Other intangible assets that are acquired by the Group and that have finite useful lives are measured at cost less accumulated amortisation and accumulated impairment losses, if any. Subsequent expenditures are capitalised only when they increase the future economic benefits embodied in the specific asset to which they relate.

Research and development

Expenditure on research activities undertaken with the prospect of gaining new scientific or technical knowledge and understanding are recognised as an expense when incurred. Development activities involve a plan or design for the production of new or substantially improved products and processes. An internally-generated intangible asset arising from development is recognised if and only if all of the following have been demonstrated:

- development costs can be measured reliably;
- the product or process is technically and commercially feasible;
- future economic benefits are probable; and
- the Group intends to and has sufficient resources/ability to complete development and to use or sell the asset.

Notes to the Consolidated Financial Statements

for the year ended March 31, 2018

The expenditure to be capitalised include the cost of materials and other costs directly attributable to preparing the asset for its intended use. Other development expenditure is recognised in profit or loss as incurred.

Payments to third parties that generally take the form of up-front payments and milestones for in-licensed products, compounds and intellectual property are capitalised since the probability of expected future economic benefits criterion is always considered to be satisfied for separately acquired intangible assets.

Acquired research and development intangible assets which are under development, are recognised as In-Process Research and Development assets ("IPR&D"). IPR&D assets are not amortised, but evaluated for potential impairment on an annual basis or when there are indications that the carrying value may not be recoverable. Any impairment charge on such IPR&D assets is recognised in profit or loss. Intangible assets relating to products under development, other intangible assets not available for use and intangible assets having indefinite useful life are tested for impairment annually, or more frequently when there is an indication that the assets may be impaired. All other intangible assets are tested for impairment when there are indications that the carrying value may not be recoverable.

The consideration for acquisition of intangible asset which is based on reaching specific milestone that are dependent on the Group's future activity is recognised only when the activity requiring the payment is performed.

Subsequent expenditures are capitalised only when they increase the future economic benefits embodied in the specific asset to which they relate. All other expenditures, including expenditures on internally generated goodwill and brands, are recognised in the statement of profit and loss as incurred.

Amortisation is recognised on a straight-line basis over the estimated useful lives of intangible assets. Intangible assets that are not available for use are amortised from the date they are available for use.

The estimated useful lives for Product related intangibles and Other intangibles ranges from 5 to 20 years.

The estimated useful life and the amortisation method for intangible assets with a finite useful life are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

De-recognition of intangible assets

Intangible assets are de-recognised either on their disposal or where no future economic benefits are expected from their use. Gain or loss arising on such de-recognition is recognised in profit or loss, and are measured as the difference between the net disposal proceeds, if any, and the carrying amount of respective intangible assets as on the date of de-recognition.

h. Impairment of non-financial assets other than goodwill

The carrying amounts of the Group's non-financial assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated in order to determine the extent of the impairment loss, if any.

The recoverable amount of an asset or cash generating unit (as defined below) is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or the cash generating unit for which the estimates of future cash flows have not been adjusted. For the purpose of impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets (the "cash generating unit").

An impairment loss is recognised in the profit or loss if the estimated recoverable amount of an asset or its cash generating unit is lower than its carrying amount. Impairment losses recognised in respect of cash generating units are allocated first to reduce the carrying amount of any goodwill allocated to the units and then to reduce the carrying amount of the other assets in the unit on a pro-rata basis.

In respect of assets other than goodwill, impairment losses recognised in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's

Notes to the Consolidated Financial Statements

for the year ended March 31, 2018

carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

i. Non-current assets held for sale

Non-current assets and disposal groups are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the asset (or disposal group) is available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such asset (or disposal group) and its sale is highly probable. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

When the Group is committed to a sale plan involving loss of control of a subsidiary, all of the assets and liabilities of that subsidiary are classified as held for sale when the criteria described above are met, regardless of whether the Group will retain a non-controlling interest in its former subsidiary after the sale.

When the Group is committed to a sale plan involving disposal of an investment, or a portion of an investment, in an associate or joint venture, the investment or the portion of the investment that will be disposed off is classified as held for sale when the criteria described above are met, and the Group discontinues the use of the equity method in relation to the portion that is classified as held for sale.

Any retained portion of an investment in an associate or a joint venture that has not been classified as held for sale continues to be accounted for using the equity method. The Group discontinues the use of the equity method at the time of disposal when the disposal results in the Group losing significant influence over the associate or joint venture.

After the disposal takes place, the Group accounts for any retained interest in the associate or joint venture in accordance with Ind AS 109 unless the retained interest continues to be an associate or a joint venture, in which case the Group uses the equity method (see the accounting policy regarding investments in associates or joint ventures above).

Non-current assets (and disposal groups) classified as held for sale are measured at the lower of their carrying amount and fair value less costs to sell. Non-current assets are not depreciated or amortised.

j. Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets

Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the date the group commits to purchase or sale the financial assets.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- Debt instruments at amortised cost
- Debt instruments at fair value through other comprehensive income (FVTOCI)
- Debt instruments and equity instruments at fair value through profit or loss (FVTPL)
- Equity instruments measured at fair value through other comprehensive income (FVTOCI)

Debt instruments at amortised cost

A 'debt instrument' is measured at the amortised cost if both the following conditions are met:

- a) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
- b) Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in Other Income in the profit or loss. The losses arising from impairment are recognised in the profit or loss.

Debt instrument at FVTOCI

A 'debt instrument' is measured as at FVTOCI if both of the following criteria are met:

- a) The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
- b) The contractual terms of the instrument give rise on specified dates to cash flows that are SPPI on the principal amount outstanding.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognised in the other comprehensive income (OCI). However, the Group recognises interest income, impairment losses and reversals and foreign exchange gain or loss in the profit or loss. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to profit or loss. Interest earned whilst holding FVTOCI debt instrument is reported as interest income using the EIR method.

Debt instrument at FVTPL

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorisation as at amortised cost or as FVTOCI, is classified as at FVTPL.

In addition, the Group may elect to designate a debt instrument, which otherwise meets amortised cost or FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch').

Debt instruments included within the FVTPL category are measured at fair value with all the changes in the profit or loss.

Equity instruments

All equity instruments in scope of Ind AS 109 are measured at fair value. Equity instruments which are held for trading and contingent consideration recognised by an acquirer in a business combination to which Ind AS 103 applies are classified as at FVTPL. For all other equity instruments, the Group may make an irrevocable election to present subsequent changes in the fair value in OCI. The Group makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Group decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, including foreign exchange gain or loss and excluding dividends, are recognised in the OCI. There is no recycling of the amounts from OCI to profit or loss, even on sale of investment. However, the Group may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognised in the profit or loss.

Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e. removed from the Group's consolidated balance sheet) when:

- The contractual rights to receive cash flows from the asset have expired, or
- The Group has transferred its rights to receive contractual cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Group continues to recognise the transferred asset to the extent of the Group's continuing involvement. In that case, the Group also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in OCI and accumulated in equity is recognised in profit or loss if such gain or loss would have otherwise been recognised in profit or loss on disposal of that financial asset.

Impairment of financial assets

In accordance with Ind AS 109, the Group applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the Trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 18.

The Group follows 'simplified approach' for recognition of impairment loss allowance on trade receivables or any contractual right to receive cash or another financial asset. The application of simplified approach does not require the Group to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

As a practical expedient, the Group uses a provision matrix to determine impairment loss allowance on portfolio of its trade receivables. The provision matrix is based on its historically observed default rates over the expected life of the trade receivables and is adjusted for forward-looking estimates. At every reporting date, the historical observed default rates are updated and changes in the forward-looking estimates are analysed.

Financial liabilities and equity instruments

Classification as debt or equity

Debt and equity instruments issued by a Group entity are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by a Group entity are recognised at the proceeds received, net of direct issue costs.

Repurchase of the Parent Company's own equity instruments is recognised and deducted directly in equity. No gain or loss is recognised in profit or loss on the purchase, sale, issue or cancellation of the Parent Company's own equity instruments.

Compound financial instruments

The component parts of compound financial instruments (convertible notes) issued by the Group are classified separately as financial liabilities and equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Initial recognition and measurement

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts, financial guarantee contracts and derivative financial instruments.

Subsequent measurement

All financial liabilities are subsequently measured at amortised cost using the effective interest method or at FVTPL.

Financial liabilities at fair value through profit or loss

Financial liabilities are classified as at FVTPL when the financial liability is either contingent consideration recognised by the Group as an acquirer in a business combination to which Ind AS 103 applies or is held for trading or is designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred principally for the purpose of repurchasing in the near term or on initial recognition it is part of a portfolio of identified financial instruments that the Group manages together and has a recent actual pattern of short-term profit-taking. This category also includes derivative financial instruments that are not designated as hedging instruments in hedge relationships as defined by Ind AS 109. Gains or losses on liabilities held for trading are recognised in the profit or loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated as such at the initial date of recognition, and only if the criteria in Ind AS 109 are satisfied. For instruments not held-for-trading financial liabilities designated as at FVTPL, fair value gains/ losses attributable to changes in own credit risk are recognised in OCI, unless the recognition of the effects of changes in the liability's credit risk in OCI would create or enlarge an accounting mismatch in profit or loss, in which case these effects of changes in credit risk are recognised in profit or loss. These gains/ loss are not subsequently transferred to profit or loss. All other changes in fair value of such liability are recognised in the consolidated statement of profit or loss.

Financial liabilities subsequently measured at amortised cost

Financial liabilities that are not held-for-trading and are not designated as at FVTPL are measured at amortised cost in subsequent accounting periods. The carrying

Notes to the Consolidated Financial Statements

for the year ended March 31, 2018

amounts of financial liabilities that are subsequently measured at amortised cost are determined based on the effective interest rate (EIR) method. Interest expense that is not capitalised as part of costs of an asset is included in the 'Finance costs' line item in the profit or loss.

After initial recognition, such financial liabilities are subsequently measured at amortised cost using the EIR method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the profit or loss.

Financial guarantee contracts

Financial guarantee contracts are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts are recognised initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. If not designated as at FVTPL, are subsequently measured at the higher of the amount of loss allowance determined as per impairment requirements of Ind AS 109 and the amount initially recognised less cumulative amount of income recognised.

Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

Embedded derivatives

Derivatives embedded in non-derivative host contracts that are not financial assets within the scope of Ind AS 109 are accounted for as separate derivatives and recorded at fair value if their economic characteristics and risks are not closely related to those of the host contracts and the host contracts are not held for trading or designated at fair value through profit or loss. These embedded derivatives are measured at fair value with changes in fair value recognised in profit or loss, unless designated as effective hedging instruments.

Reclassification of financial assets

The Group determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent. The Group's senior management determines change in the business model as a result of external or internal changes which are significant to the Group's operations. Such changes are evident to external parties. A change in the business model occurs when the Group either begins or ceases to perform an activity that is significant to its operations. If the Group reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediately next reporting period following the change in business model. The Group does not restate any previously recognised gains, losses (including impairment gains or losses) or interest.

Derivative financial instruments and hedge accounting

Initial recognition and subsequent measurement

The Group uses derivative financial instruments, such as forward currency contracts, full currency swap, options and interest rate swaps to hedge its foreign currency risks and interest rate risks respectively. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value at the end of each reporting period. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Any gains or losses arising from changes in the fair value of derivatives are taken directly to profit or loss, except for the effective portion of cash flow hedges, which is recognised in OCI and later reclassified to profit or loss when the hedge item affects profit or loss or treated as basis adjustment if a hedged forecast transaction subsequently results in the recognition of a non-financial asset or non-financial liability.

For the purpose of hedge accounting, hedges are classified as:

- Fair value hedges when hedging the exposure to changes in the fair value of a recognised asset or liability or an unrecognised firm commitment.

Notes to the Consolidated Financial Statements

for the year ended March 31, 2018

- Cash flow hedges when hedging the exposure to variability in cash flows that is either attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction or the foreign currency risk in an unrecognised firm commitment
- Hedges of a net investment in a foreign operation.

At the inception of a hedge relationship, the Group formally designates and documents the hedge relationship to which the Group wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge. The documentation includes the Group's risk management objective and strategy for undertaking hedge, the hedging/economic relationship, the hedged item or transaction, the nature of the risk being hedged, hedge ratio and how the entity will assess the effectiveness of changes in the hedging instrument's fair value in offsetting the exposure to changes in the hedged item's fair value or cash flows attributable to the hedged risk. Such hedges are expected to be highly effective in achieving offsetting changes in fair value or cash flows and are assessed on an ongoing basis to determine that they actually have been highly effective throughout the financial reporting periods for which they were designated.

Hedges that meet the strict criteria for hedge accounting are accounted for, as described below:

(i) Fair value hedges

Changes in fair value of the designated portion of derivatives that qualify as fair value hedges are recognised in profit or loss immediately, together with any changes in the fair value of the hedged asset or liability that are attributable to the hedged risk.

(ii) Cash flow hedges

The effective portion of changes in the fair value of the hedging instrument is recognised in OCI in the cash flow hedge reserve, while any ineffective portion is recognised immediately in profit or loss. The Group uses forward currency contracts as hedges of its exposure to foreign currency risk in forecast transactions and firm commitments. Amounts recognised as OCI are transferred to profit or loss when the hedged transaction affects profit or loss, such as when a forecast sale occurs. When the hedged item is the cost of a non-financial asset or non-financial liability, the amounts recognised as OCI are transferred to the initial carrying amount of the non-financial asset or liability.

If the hedging instrument expires or is sold, terminated or exercised or if its designation as a hedge is revoked, or when the hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss previously recognised in OCI remains separately in equity until the forecast transaction occurs or the foreign currency firm commitment is met. When a forecast transaction is no longer expected to occur, the gain or loss accumulated in equity is recognised immediately in profit or loss.

(iii) Net Investment Hedge

The group designates certain foreign currency liability as hedge against certain net investment in foreign subsidiaries. Hedges of net investments in foreign operations are accounted similar to cash flow hedges. Any gain or loss on the hedging instrument relating to the effective portion of the hedge is recognised in other comprehensive income and held in foreign currency translation reserve ('FCTR')- a component of equity. The ineffective portion of the gain or loss on these hedges is immediately recognised in the statement of profit and loss. The amounts accumulated in equity are included in the statement of profit and loss when the foreign operation is disposed or partially disposed.

Treasury shares

The Group has created an Employee Benefit Trust (EBT) for providing share-based payment to its employees. The Group uses EBT as a vehicle for distributing shares to employees under the employee remuneration schemes. The Group treats EBT as its extension and shares held by EBT are treated as treasury shares.

Own equity instruments that are reacquired (treasury shares) are deducted from equity. No gain or loss is recognised in profit or loss on the purchase, sale, issue or cancellation of the Group's own equity instruments. Consideration paid or received shall be recognised directly in equity.

Dividend distribution to equity holders of the Parent

The Parent Company recognises a liability to make dividend distributions to equity holders of the parent when the distribution is authorised and the distribution is no longer at the discretion of the Parent Company. As per the corporate laws in India, a distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity.

k. Leases

A lease that transfers substantially all the risks and rewards incidental to ownership to the lessee is classified as a finance lease. All other leases are classified as operating leases.

Notes to the Consolidated Financial Statements

for the year ended March 31, 2018

Group as a lessee

Finance leases are capitalised at the commencement of the lease at the inception date fair value of the leased assets or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the consolidated balance sheet as a finance lease obligation. Lease payments are apportioned between finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recognised in profit or loss as finance costs. Contingent rentals are recognised as expenses in the periods in which they are incurred.

Operating lease payments are generally recognised as an expense in the profit or loss on a straight-line basis over the lease term. Where the rentals are structured solely to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases, such increases are recognised in the year in which such benefits accrue. Contingent rentals arising under operating leases are also recognised as expenses in the periods in which they are incurred.

Group as a lessor

Rental income from operating lease is generally recognised on a straight-line basis over the term of the relevant lease. Where the rentals are structured solely to increase in line with expected general inflation to compensate for the Group's expected inflationary cost increases, such increases are recognised in the year in which such benefits accrue. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

Amounts due from lessees under finance leases are recorded as receivables at the Group's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the Group's net investment outstanding in respect of the leases.

l. Inventories

Inventories consisting of raw materials and packing materials, work-in-progress, stock-in-trade, stores and spares and finished goods are measured at the lower of cost and net realisable value. The cost of all categories of inventories is based on the weighted average method. Cost of raw materials and packing materials, stock-in-trade, stores and spares includes cost of purchases and other costs incurred in bringing the inventories to their

present location and condition. Cost of work-in-progress and finished goods comprises direct material, direct labour and an appropriate proportion of variable and fixed overhead expenditure, the latter being allocated on the basis of normal operating capacity.

Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and costs necessary to make the sale.

The factors that the Company considers in determining the allowance for slow moving, obsolete and other non-saleable inventory include estimated shelf life, planned product discontinuances, price changes, ageing of inventory and introduction of competitive new products, to the extent each of these factors impact the Company's business and markets. The Company considers all these factors and adjusts the inventory provision to reflect its actual experience on a periodic basis

m. Cash and cash equivalents

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the consolidated statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Companies cash management.

n. Provisions, contingent liabilities and contingent assets

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of obligation. When the Company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is certain. The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement.

If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Notes to the Consolidated Financial Statements

for the year ended March 31, 2018

Restructuring

A provision for restructuring is recognised when the Group has a detailed formal restructuring plan and has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement the plan or announcing its main features to those affected by it. The measurement of a restructuring provision includes only the direct expenditure arising from the restructuring, which are those amounts that are both necessarily entailed by the restructuring and not associated with the ongoing activities of the entity.

Onerous contracts

Present obligations arising under onerous contracts are recognised and measured as provisions. An onerous contract is considered to exist where the Group has a contract under which the unavoidable costs of meeting the obligations under the contract exceed the economic benefit expected to be received from the contract.

Contingent liabilities and contingent assets

Contingent liability is disclosed for,

- (i) Possible obligations which will be confirmed only by future events not wholly within the control of the Company, or
- (ii) Present obligations arising from past events where it is not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount of the obligation cannot be made.

Contingent assets are not recognised in the consolidated financial statements.

o. Revenue

Revenue from sale of goods is measured at the fair value of the consideration received or receivable. Revenue is stated exclusive of sales tax, value added tax, goods and service tax and net of returns, chargebacks, rebates and other similar allowances. Revenue is inclusive of excise duty till the period, provision of excise duty was levied on sale of goods.

Sale of goods

Revenue from sale of goods is recognised when the significant risks and rewards of ownership have been transferred to the buyer, usually on delivery of goods, it is probable that the economic benefit will flow to the Group, the associated costs and possible return of goods can be estimated reliably, there is neither continuing

management involvement to the degree usually associated with ownership nor effective control over the goods sold and the amount of revenue can be measured reliably. The company is principal in all of its revenue arrangements, since it is the primary obligor in all of the revenue arrangements, as it has pricing latitude and is exposed to inventory and credit risks.

Provisions for chargeback, rebates, discounts and medicaid payments are estimated and provided for in the year of sales and recorded as reduction of revenue.

Sales returns

The Company accounts for sales returns accrual by recording an allowance for sales returns concurrent with the recognition of revenue at the time of a product sale. This allowance is based on the Company's estimate of expected sales returns. With respect to established products, the Company considers its historical experience of sales returns, levels of inventory in the distribution channel, estimated shelf life, product discontinuances, price changes of competitive products, and the introduction of competitive new products, to the extent each of these factors impact the Company's business and markets. With respect to new products introduced by the Company, such products have historically been either extensions of an existing line of product where the Company has historical experience or in therapeutic categories where established products exist and are sold either by the Company or the Company's competitors.

Rendering of services

Revenue from services rendered is recognised in the consolidated statement profit and loss as the underlying services are performed. Upfront non-refundable payments received are deferred and recognised as revenue over the expected period over which the related services are expected to be performed.

Royalties

Royalty revenue is recognised on an accrual basis in accordance with the substance of the relevant agreement (provided that it is probable that economic benefits will flow to the Group and the amount of revenue can be measured reliably). Royalty arrangements that are based on production, sales and other measures are recognised by reference to the underlying arrangement.

p. Dividend and interest income

Dividend income is recognised when the Group's right to receive the payment is established, which is generally when shareholders approve the dividend.

Notes to the Consolidated Financial Statements

for the year ended March 31, 2018

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Group and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

q. Government grants

The Group recognises government grants only when there is reasonable assurance that the conditions attached to them will be complied with, and the grants will be received. When the grant relates to an expense item, it is recognised as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed. When the grant relates to an asset, the Company deducts such grant amount from the carrying amount of the asset.

r. Employee benefits

Defined benefit plans

The Company operates a defined benefit gratuity plan which requires contribution to be made to a separately administered fund.

The liability in respect of defined benefit plans is calculated using the projected unit credit method with actuarial valuations being carried out at the end of each annual reporting period. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds. The currency and term of the government bonds shall be consistent with the currency and estimated term of the post-employment benefit obligations. The current service cost of the defined benefit plan, recognised in the profit or loss as employee benefits expense, reflects the increase in the defined benefit obligation resulting from employee service in the current year, benefit changes, curtailments and settlements. Past service costs are recognised in profit or loss in the period of a plan amendment. The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in employee benefit expense in profit or loss. Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to OCI in the period in which they arise and is reflected immediately in retained earnings and is not reclassified to profit or loss.

Termination benefits

Termination benefits are recognised as an expense at the earlier of the date when the Group can no longer withdraw the offer of those benefits and when the entity recognises costs for a restructuring that is within the scope of Ind AS 37 and involves the payment of termination benefits.

Short-term and other long-term employee benefits

Accumulated leave, which is expected to be utilised within the next 12 months, is treated as short-term employee benefit. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The Group treats accumulated leave expected to be carried forward beyond twelve months, as long-term employee benefit for measurement purposes. Such long-term compensated absences are provided for based on the actuarial valuation using the projected unit credit method at the year-end. Actuarial gains/losses are immediately taken to the statement of profit and loss and are not deferred.

The Group's net obligation in respect of other long-term employee benefits is the amount of future benefit that employees have earned in return for their service in the current and previous periods. That benefit is discounted to determine its present value.

Defined contribution plans

The Group's contributions to defined contribution plans are recognised as an expense as and when the services are received from the employees entitling them to the contributions. The Group does not have any obligation other than the contribution made.

Share-based payment arrangements

The grant date fair value of options granted to employees is recognised as an employee expense, with a corresponding increase in equity, on a straight line basis, over the vesting period, based on the Group's estimate of equity instruments that will eventually vest. At the end of each reporting period, the Group revises its estimate of the number of equity instruments expected to vest. The impact of the revision of the original estimates, if any, is recognised in profit or loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to the equity-settled employee benefits reserve.

Notes to the Consolidated Financial Statements

for the year ended March 31, 2018

For cash-settled share-based payments, a liability is recognised for the goods or services acquired, measured initially at the fair value of the liability. At the end of each reporting period until the liability is settled, and at the date of settlement, the fair value of the liability is remeasured, with any changes in fair value recognised in profit or loss for the year.

s. Borrowing costs

Borrowing costs that are directly attributable to the construction or production of a qualifying asset are capitalised as part of the cost of that asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing costs also include exchange differences to the extent regarded as an adjustment to the borrowing costs. A qualifying asset is one that necessarily takes substantial period of time to get ready for its intended use.

t. Income tax

Income tax expense consists of current and deferred tax. Income tax expense is recognised in profit or loss except to the extent that it relates to items recognised in OCI or directly in equity, in which case it is recognised in OCI or directly in equity respectively. Current tax is the expected tax payable on the taxable profit for the year, using tax rates enacted or substantively enacted by the end of the reporting period, and any adjustment to tax payable in respect of previous years. Current tax assets and tax liabilities are offset where the Company has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax is not recognised for the temporary differences that arise on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profits and taxable temporary differences arising upon the initial recognition of goodwill.

Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences

when they reverse, based on the laws that have been enacted or substantively enacted by the end of the reporting period. Deferred tax assets and liabilities are offset if there is a legally enforceable right to set off corresponding current tax assets against current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same tax authority on the Company.

A deferred tax asset is recognised to the extent that it is probable that future taxable profits will be available against which the temporary difference can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised. Withholding tax arising out of payment of dividends to shareholders under the Indian income tax regulations is not considered as tax expense for the Company and all such taxes are recognised in the statement of changes in equity as part of the associated dividend payment.

Minimum Alternate Tax ('MAT') credit is recognised as deferred tax asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the period for which the MAT credit can be carried forward for set-off against the normal tax liability. MAT credit recognised as an asset is reviewed at each Balance Sheet date and written down to the extent the aforesaid convincing evidence no longer exists.

u. Earnings per share

The Parent Company presents basic and diluted earnings per share ("EPS") data for its equity shares. Basic EPS is calculated by dividing the profit or loss attributable to equity shareholders of the Parent Company by the weighted average number of equity shares outstanding during the period. Diluted EPS is determined by adjusting the profit or loss attributable to equity shareholders and the weighted average number of equity shares outstanding for the effects of all dilutive potential ordinary shares, which includes all stock options granted to employees.

The number of equity shares and potentially dilutive equity shares are adjusted retrospectively for all periods presented for any share splits and bonus shares issues including for changes effected prior to the approval of the financial statements by the Board of Directors.

v. Recent Accounting pronouncements

Standards issued but not yet effective and not early adopted by the Company

Ind AS 115, Revenue from Contracts with Customers

In March 2018, the Ministry of Corporate Affairs ("MCA") has notified Ind AS 115, Revenue from Contracts with Customers, which is effective for accounting periods beginning on or after April 01, 2018. This comprehensive new standard will supersede existing revenue recognition guidance, and requires an entity to recognise revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The new standard also will result in enhanced disclosures about revenue, provide guidance for transactions that were not previously addressed comprehensively (for example, service revenue and contract modifications) and improve guidance for multiple-element arrangements.

Ind AS 115 is effective for annual reporting periods beginning on or after April 01, 2018.

The Group intends to adopt Ind AS 115 effective April 01, 2018, using the modified retrospective method. The Group is evaluating the requirements of the standard and its impact on its financials.

Amendments to Ind AS 7 Statement of Cash Flows:

The amendments require entities to provide disclosure of changes in their liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes (such as foreign exchange gains or losses). The Company has provided the information for the current period in Consolidated Cash Flow Statement. Since amendment is effect from April 01, 2017, no comparative period information is required.

Other Amendments:

On March 28, 2018, the MCA, issued certain amendments to Ind AS. The amendments relate to the following standards:

- Ind AS 40, Investment Property
- Ind AS 21, The Effects of Changes in Foreign Exchange Rates
- Ind AS 12, Income Taxes
- Ind AS 28, Investments in Associates and Joint Ventures
- Ind AS 112, Disclosure of Interests in Other Entities

The amendments are effective April 01, 2018. The Group believes that the aforementioned amendments will not materially impact the financial position, performance or the cash flows of the Group.

Notes to the Consolidated Financial Statements

for the year ended March 31, 2018

Nature and purpose of each reserve

Capital reserve - During amalgamation / merger / acquisition, the excess of net assets taken, over the consideration paid, if any, is treated as capital reserve.

Securities premium reserve - The amount received in excess of face value of the equity shares is recognised in securities premium reserve. In case of equity-settled share based payment transactions, the difference between fair value on grant date and nominal value of share is accounted as securities premium reserve. This reserve is utilised in accordance with the provisions of the Companies Act, 2013.

Debenture redemption reserve - The Company is required to create a debenture redemption reserve out of the profits which is available for payment of dividend. This reserve will be transferred to retained earning on redemption of debentures.

Share options outstanding account - The fair value of the equity settled share based payment transactions is recognised to share options outstanding account.

Amalgamation reserve - The reserve was created pursuant to scheme of amalgamation in earlier years.

Capital redemption reserve - The Company has recognised capital redemption reserve on buyback of equity shares from its retained earnings. The amount in capital redemption reserve is equal to nominal amount of the equity shares bought back.

Legal reserve - The reserve has been created by an overseas subsidiary in compliance with requirements of local laws.

General reserve: The reserve arises on transfer portion of the net profit pursuant to the earlier provisions of the Companies Act, 1956.

Mandatory transfer to general reserve is not required under the Companies Act, 2013.

Debt instrument through OCI - This represents the cumulative gain and loss arising on fair valuation of debt instruments measured through other comprehensive income. This amount will be reclassified to profit and loss account on derecognition of debt instrument.

Equity instrument through OCI - The Company has elected to recognise changes in the fair value of certain investment in equity instrument in other comprehensive income. This amount will be reclassified to retained earnings on derecognition of equity instrument.

Foreign currency translation reserve - Exchange differences relating to the translation of the results and net assets of the Group's foreign operations from their functional currencies to the Group's presentation currency (i.e. ₹) are recognised directly in the other comprehensive income and accumulated in foreign currency translation reserve. Exchange difference in the foreign currency translation reserve are reclassified to profit or loss on the disposal of the foreign operation.

Effective portion of cash flow hedges - The cash flow hedging reserve represents the cumulative effective portion of gains or losses arising on changes in fair value of designated portion of hedging instruments entered into for cash flow hedges. The cumulative gain or loss arising on the changes of the fair value of the designated portion of the hedging instruments that are recognised and accumulated under the cash flow hedges reserve will be reclassified to profit or loss only when the hedged transaction affects the profit or loss, or included as a basis adjustment to the non-financial hedged item.

III) Legal proceedings		
The Company and/or its subsidiaries are involved in various legal proceedings including product liability, contracts, employment claims, anti-trust and other regulatory matters relating to conduct of its business. Most of these legal proceedings involve various complex issues on account of which, making a reliable estimate of the expected financial effect is not always attainable and involves significant uncertainties. To the extent that the Company concludes that a liability is probable and estimable based on the status of these cases, advice of the counsel, management assessment of the likely damages etc. the Company records a provision in the financial statements. The Company carries product liability insurance / is contractually indemnified by the manufacturer, for an amount it believes is sufficient for its needs. In respect of other claims, the Company believes, these claims do not constitute material litigation matters and with its meritorious defences the ultimate disposition of these matters are not expected to have material adverse effect on its Financial Statements.

Notes to the Consolidated Financial Statements

for the year ended March 31, 2018

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.

Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly.

Level 3 inputs are unobservable inputs for the asset or liability.

The investments included in Level 3 of fair value hierarchy have been valued using the cost approach to arrive at their fair value. The cost of unquoted investments approximates the fair value because there is wide range of possible fair value measurements and the costs represents estimate of fair value within that range.

The investments which are fair valued through other comprehensive income, are not held for trading. Instead, they are held for medium or long-term strategic purpose. Upon the application of Ind AS 109, the Group has chosen to designate these investments in equity instruments as at fair value through other comprehensive income as the management believe that this provides a more meaningful presentation for medium or long-term strategic investments, than reflecting changes in fair value immediately in consolidated statement of profit and loss.

There were no transfers between Level 1 and 2 in the periods.

The management considers that the carrying amount of financial assets and financial liabilities carried at amortised cost approximates their fair value.

46 CAPITAL MANAGEMENT

- a) The Group's capital management objectives are:
- to ensure the Group's ability to continue as a going concern; and
 - to provide an adequate return to shareholders through optimisation of debts and equity balance.

The Group monitors capital on the basis of the carrying amount of debt less cash and cash equivalents, bank balances (excluding earmarked balances with banks) and current investments as presented on the face of the consolidated financial statements. The Group's objective for capital management is to maintain an optimum overall financial structure.

Dividends not recognised at the end of the reporting period

The Board of Directors at its meeting held on May 25, 2018 have recommended payment of final dividend of ₹ 2 per share of face value of ₹ 1 each for the year ended March 31, 2018. The same amounts to ₹ 4,798.7 Million.

This proposed dividend is subject to the approval of shareholders in the ensuing annual general meeting and hence not recognised as liability.

47 FINANCIAL RISK MANAGEMENT

The Group's activities expose it to a variety of financial risks, including market risk, credit risk and liquidity risk. The Group's risk management assessment and policies and processes are established to identify and analyse the risks faced by the Group, to set appropriate risk limits and controls, and to monitor such risks and compliance with the same. Risk assessment and management policies and processes are reviewed regularly to reflect changes in market conditions and the Group's activities.

Credit risk

Credit risk is the risk of financial loss to the Group, if a customer or counterparty to a financial instrument fails to meet its contractual obligations and arises principally from the Group's receivables from customers, loans and investments. Credit risk is managed through credit approvals, establishing credit limits and continuously monitoring the creditworthiness of counterparty to which the Group grants credit terms in the normal course of business.

Investments

The Group limits its exposure to credit risk by generally investing in liquid securities and only with counterparties that have a good credit rating. The Group does not expect significant any losses from non-performance by these counter-parties, and does not have any significant concentration of exposures to specific industry sectors or specific country risks.

Trade receivables

The Group has used expected credit loss (ECL) model for assessing the impairment loss. For this purpose, the Group uses a provision matrix to compute the expected credit loss amount. The provision matrix takes into account external and internal risk factors and historical data of credit losses from various customers.

Other than trade receivables, the Group has no significant class of financial assets that is past due but not impaired. The Group has recognised an allowance of ₹ 4.5 Million (March 31, 2017 : ₹ 732.2 Million) against a past due loan including interest.

Liquidity risk

Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they become due. The Group manages its liquidity risk by ensuring, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risk to the Group's reputation.

The Group had unutilised working capital lines from banks of ₹ 47,081.4 Million as on March 31, 2018, ₹ 62,162.2 Million as on March 31, 2017.

Market risk

Market risk is the risk of loss of future earnings, fair values or future cash flows that may result from adverse changes in market rates and prices (such as interest rates, foreign currency exchange rates and commodity prices) or in the price of market risk-sensitive instruments as a result of such adverse changes in market rates and prices. Market risk is attributable to all market risk-sensitive financial instruments, all foreign currency receivables and payables and all short term and long-term debt. The Group is exposed to market risk primarily related to foreign exchange rate risk, interest rate risk and the market value of its investments. Thus, the Group's exposure to market risk is a function of investing and borrowing activities and revenue generating and operating activities in foreign currencies.

Notes to the Consolidated Financial Statements

for the year ended March 31, 2018

Foreign exchange risk

The Group's foreign exchange risk arises from its foreign operations, foreign currency revenues and expenses, (primarily in US Dollar, Euro, South African Rand and Russian Rouble) and foreign currency borrowings (primarily in US Dollar). As a result, if the value of the Indian rupee appreciates relative to these foreign currencies, the Group's revenues and expenses measured in Indian rupees may decrease or increase and vice-versa. The exchange rate between the Indian rupee and these foreign currencies has changed substantially in recent periods and may continue to fluctuate substantially in the future. Consequently, the Group uses both derivative and non-derivative financial instruments, such as foreign exchange forward contracts, option contracts, currency swap contracts and foreign currency financial liabilities, to mitigate the risk of changes in foreign currency exchange rates in respect of its highly probable forecasted transactions and recognised assets and liabilities.

a) Significant foreign currency risk exposure relating to trade receivables, cash and cash equivalents, borrowings and trade payables

	43,287.0	1,386.1	0.3	161.4	298.1	45,132.9

b) Sensitivity

For the years ended March 31, 2018 and March 31, 2017 every 5% strengthening in the exchange rate between the Indian Rupee and the respective major currencies for the above mentioned financial assets/liabilities would increase Group's profit and equity by approximately ₹ 1,077.0 Million and ₹ 1,054.5 Million. A 5% weakening of the Indian Rupee and the respective major currencies would lead to an equal but opposite effect.

In management's opinion, the sensitivity analysis is unrepresentative of the inherent foreign exchange risk because the exposure at the end of the reporting period does not reflect the exposure during the year.

c) Derivative contracts

The Group is exposed to exchange rate risk that arises from its foreign exchange revenues and expenses, primarily in US Dollar, Euro, South African Rand and Russian Rouble and foreign currency debt is primarily in US Dollar. The Group uses foreign currency forward contracts, foreign currency option contracts and currency swap contracts (collectively, "derivatives") to mitigate its risk of changes in foreign currency exchange rates. The counterparty for these contracts is generally a bank or a financial institution.

Hedges of highly probable forecasted transactions

The Group designates its derivative contracts that hedge foreign exchange risk associated with its highly probable forecasted transactions as cash flow hedges and measures them at fair value. The effective portion of such cash flow hedges is recorded as in other comprehensive income, and re-classified in the income statement as revenue in the period corresponding to the occurrence of the forecasted transactions. The ineffective portion of such cash flow hedges is immediately recorded in the consolidated statement of profit and loss.

Notes to the Consolidated Financial Statements

for the year ended March 31, 2018

In respect of the aforesaid hedges of highly probable forecasted transactions, the Group has recorded a loss of ₹ 75.7 Million for the year ended March 2018 and gain of ₹ 46.2 Million for year ended March 31, 2017 in other comprehensive income. The Group also recorded as a component of revenue, gain of ₹ 47.6 Million for year ended March 31, 2018 and loss of ₹ 559.7 Million for year ended March 31, 2017 due to occurrence of forecasted sale transaction.

Changes in the fair value of forward contracts and option contracts that economically hedge monetary assets and liabilities in foreign currencies, and for which no hedge accounting is applied, are recognised in the consolidated statement of profit and loss. The changes in fair value of the forward contracts and option contracts, as well as the foreign exchange gains and losses relating to the monetary items, are recognised in the consolidated statement of profit and loss.

The following table gives details in respect of the notional amount of outstanding foreign exchange derivative contracts:

Interest rate risk

The Group has loan facilities on floating interest rate, which exposes the Group to risk of changes in interest rates. The Group monitors the interest rate movement and manages the interest rate risk by evaluating interest rate swaps etc. based on the market / risk perception.

For the year ended March 31, 2018 and March 31, 2017, every 50 basis point decrease in the floating interest rate component applicable to its loans and borrowings would increase the Group's profit before tax by approximately ₹ 162.2 Million and ₹ 196.2 Million respectively. A 50 basis point increase in floating interest rate would have led to an equal but opposite effect.

Commodity rate risk

Exposure to market risk with respect to commodity prices primarily arises from the Group's purchases and sales of active pharmaceutical ingredients, including the raw material components for such active pharmaceutical ingredients. These are commodity products, whose prices may fluctuate significantly over short periods of time. The prices of the Group's raw materials generally fluctuate in line with commodity cycles, although the prices of raw materials used in the Group's active pharmaceutical ingredients business are generally more volatile. Cost of raw materials forms the largest portion of the Group's cost of revenues. Commodity price risk exposure is evaluated and managed through operating procedures and sourcing policies. As of March 31, 2018, the Group had not entered into any material derivative contracts to hedge exposure to fluctuations in commodity prices.

Add/ (less): Foreign currency translation difference	109.5	(1,098.8)
Closing balance	56,067.1	55,362.2

The carrying amount of goodwill are stated above. The recoverable amounts have been determined based on value in use calculations which uses cash flow projections covering generally a period of five years (which are based on key assumptions such as margins, expected growth rates based on past experience and Management's expectations/ extrapolation of normal increase/ steady terminal growth rate) and appropriate discount rates that reflects current market assessments of time value of money and risks specific to these investments. The cash flow projections included estimates for five years developed using internal forecasts and terminal growth rate thereafter. The planning horizon reflects the assumptions for short to mid-term market developments. The average growth rate used in extrapolating cash flows beyond the planning period ranged from -8% to 2% for the year ended March 31, 2018, March 31, 2017. Discount rate reflects the current market assessment of the risks specific to a CGU or group of CGUs. The discount rate is estimated on the weighted average cost of capital for respective CGU or group of CGUs. Discount rate used ranged from 0.7% to 7.1% for the year ended March 31, 2018, March 31, 2017. The management believes that any reasonable possible change in key assumptions on which recoverable amount is based is not expected to cause the aggregate carrying amount to exceed the aggregate recoverable amount of the cash generating unit. However, based on the impairment assessment, the Management has determined that in respect of certain subsidiaries, an impairment loss considering the above criteria/ factors aggregating to ₹ Nil (March 31, 2017: ₹ Nil) in the value of goodwill has been recognised.

53 SEGMENT REPORTING

The Chief Operating Decision Maker ('CODM') evaluates the Group's performance and allocates resources based on an analysis of various performance indicators by reportable segments. The Group's reportable segments are as follows:

1. India
2. United States of America
3. Emerging Markets
4. Rest of World

The reportable segments derives their revenues from the sale of pharmaceuticals products (generics, speciality, API, etc.). The CODM reviews revenue as the performance indicator. The measurement of each segment's revenues, expenses and assets is consistent with the accounting policies that are used in preparation of the Group's consolidated financial statements.

Defined benefit plan

a) Gratuity

In respect of Gratuity, a defined benefit plan, contributions are made to LIC's Recognised Group Gratuity Fund Scheme. It is governed by the Payment of Gratuity Act, 1972. Under the Gratuity Act, employees are entitled to specific benefit at the time of retirement or termination of the employment on completion of five years or death while in employment. The level of benefit provided depends on the member's length of service and salary at the time of retirement/termination age. Provision for Gratuity is based on actuarial valuation done by an independent actuary as at the year end. Each year, the Parent and Indian subsidiaries reviews the level of funding in gratuity fund. The Parent and Indian subsidiaries decides its contribution based on the results of its annual review. The Parent and Indian subsidiaries aims to keep annual contributions relatively stable at a level such that the fund assets meets the requirements of gratuity payments in short to medium term.

b) Pension fund

The Parent and Indian subsidiaries has an obligation towards pension, a defined benefit retirement plan, with respect to certain employees, who had already retired before March 01, 2013, will continue to receive the pension as per the pension plan.

Risks

These plans typically expose the Parent and Indian subsidiaries to actuarial risks such as: investment risk, interest rate risk, longevity risk and salary risk.

- i) Investment risk - The present value of the defined benefit plan liability is calculated using a discount rate determined by reference to the market yields on government bonds

denominated in Indian Rupees. If the actual return on plan asset is below this rate, it will create a plan deficit. However, the risk is partially mitigated by investment in LIC managed fund.

- ii) Interest rate risk - A decrease in the bond interest rate will increase the plan liability. However, this will be partially offset by an increase in the return on the plan's debt investments.
- iii) Longevity risk - The present value of the defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants both during and after their employment. An increase in the life expectancy of the plan participants will increase the plan's liability.
- iv) Salary risk - The present value of the defined benefit plan liability is calculated by reference to the future salaries of plan participants. As such, an increase in the salary of the plan participants will increase the plan's liability.

Other long term benefit plan

Actuarial valuation for compensated absences is done as at the year end and the provision is made as per the Parent and Indian subsidiaries rules with corresponding (gain) / charge to the consolidated statement of profit and loss amounting to gain of ₹ 51.4 Million (March 31, 2017 loss of ₹ 499.6 Million) and it covers all regular employees. Major drivers in actuarial assumptions, typically, are years of service and employee compensation.

Obligation in respect of defined benefit plan and other long term employee benefit plans are actuarially determined as at the year end using the 'Projected Unit Credit' method. Gains and losses on changes in actuarial assumptions relating to defined benefit obligation are recognised in other comprehensive income whereas gains and losses in respect of other long term employee benefit plans are recognised in the consolidated statement of profit and loss.

57 Taro Pharmaceutical Industries Ltd and its Israeli subsidiaries are required to make severance or pension payments to dismissed employees and to employees terminating employment under certain other circumstances. Deposits are made with a pension fund or other insurance plans to secure pension and severance rights for the employees in Israel.

58 EMPLOYEE SHARE-BASED PAYMENT PLANS

Erstwhile Ranbaxy Laboratories Limited (RLL) had Employee Stock Option Schemes ("ESOS's") namely, Employees Stock Option Scheme -II (ESOS-II), Employees Stock Option Scheme 2005 (ESOS 2005) and Employees Stock Option Plan 2011 (ESOP 2011) for the grant of stock options to the eligible employees and Directors of the Erstwhile RLL and its subsidiaries. ESOS-II had been discontinued from January 17, 2015. The ESOS's are administered by the Compensation Committee ("Committee"). Options are granted at the discretion of the Committee to selected employees depending upon certain criterion. Each option comprises one underlying equity share.

ESOS 2005 provided that the grant price of options would be the latest available closing price on the stock exchange on which the shares of the erstwhile RLL were listed, prior to the date of the meeting of the Committee in which the options were granted. If the shares are listed on more than one stock exchange, then the stock exchange where there was highest trading volume on the said date were be considered. The options vested evenly over a period of five years from the date of grant. Options lapse, if they are not exercised prior to the expiry date, which was ten years from the date of grant.

Notes to the Consolidated Financial Statements

for the year ended March 31, 2018

ESOP 2011 provided that the grant price of options would be the face value of the equity share i.e. ₹ 5 per share. The options vested evenly over a period of three years from the date of grant. Options lapse, if they were not exercised prior to the expiry date, which was three months from the date of the vesting. An ESOP Trust had been formed to administer ESOP 2011. Shares issued to the ESOP Trust were allocated to the eligible employees upon exercise of stock options from time to time.

The Shareholders' Committee of erstwhile RLL had approved issuance of options under the ESOS's as per details given below:

Date of approval	Scheme	Original No. of options approved
June 25, 2003	ESOS-II	4,000,000
June 30, 2005	ESOS 2005	4,000,000
May 09, 2011	ESOP 2011	3,000,000

In accordance with the above approval of issuance of options, stock options have been granted from time to time.

The stock options outstanding as on June 30, 2005 are proportionately adjusted in view of the sub-division of equity shares of the Erstwhile RLL from the face value of ₹ 10 each into 2 equity shares of ₹ 5 each.

Pursuant to the Scheme of Amalgamation, Sun Pharmaceutical Industries Limited ('transferee company') formulated two Employee Stock Option Schemes, namely, (i) SUN Employee Stock Option Scheme-2015 (SUN-ESOS 2015) to administer ESOS 2005 (ii) SUN Employee Stock Option Plan-2015 (SUN-ESOP 2015) to administer ESOP 2011. These scheme provide that the number of transferee options issued shall equal to the product of number of transferor options outstanding on effectiveness of Scheme multiplied by the Share exchange ratio (0.80) and each transferee option shall have an exercise price per equity share equal to transferor option exercise price per equity shares divided by the share exchange ratio (0.80) and fractions rounded off to the next higher whole number. The terms and conditions of ESOS, of transferee company are not less favourable than those of ESOS's of erstwhile RLL. No new grants shall be made under these schemes and these schemes shall operate only for the purpose of administering the exercise of options already granted / vested on an employee pursuant to SUN-ESOS 2015 and SUN-ESOP 2015.

During the current year, the Parent Company has recorded a Stock-based employee compensation expense / (gain) of ₹ (1.0) Million (March 31, 2017: ₹ 32.3 Million). The amount has been determined under a fair value method wherein the grant date fair value of the options was calculated by using Black Scholes pricing model.

The following table summarises the assumptions used in calculating the grant date fair value for instrument granted in the year ended March 31, 2015: @@

Particulars	Year ended March 31, 2015
Grant Date	May 08, 2014
Dividend yield	0.43%
Expected life of options from the date(s) of grant	1.25, 2.25 and 3.25 years
Risk free interest rate	8.57% (1.25 years)
	8.65% (2.25 years)
	8.71% (3.25 years)
Expected volatility	40.47%
Grant date fair value	₹ 462.39 (1.25 years)
	₹ 460.79 (2.25 years)
	₹ 459.16 (3.25 years)

@@ Assumptions used are as applicable at the date of grant in the context of erstwhile RLL.

The Black Scholes option-pricing model was developed for estimating fair value of trade options that have no vesting restrictions and are fully transferable. Since options pricing models require use of subjective assumptions, changes therein can materially affect fair value of the options. The options pricing models do not necessary provide a reliable measure of fair value of options. The volatility in the share price is based on volatility of historical stock price of the erstwhile RLL for last 60 months.

14. At the Extra Ordinary General Meeting of the members of the Company held on Monday, September 1, 2003, the members had approved, by way of a Special Resolution, certain amendments whereby few Articles were inserted in the Articles of Association of the Company relating to enabling the Company to implement any instruction from member(s) of the Company to waive/forgo his/their right to receive the dividend (interim or final) from the Company for any financial year. The above referred amendments as approved at the aforesaid Extra Ordinary General Meeting have been retained and are inter alia forming part of new set of Articles of Association adopted

at the 24th Annual General Meeting of the Company held on Saturday, September 17, 2016. Thus, the members of the Company can waive/forgo, if he/they so desire(s), his/their right to receive the dividend (interim or final) for any financial year effective from the dividend recommended by the Board of Directors of the Company for the year ended March 31, 2004 on a year to year basis, as per the rules framed by the Board of Directors of the Company from time to time for this purpose. The member, if so wishes to waive/forgo the right to receive Dividend for the year ended March 31, 2018, shall fill up the form and send it to the Company's Registrars on or before Tuesday, September 18, 2018. The form prescribed by the Board of Directors of the Company for waiving/forgoing the right to receive Dividend for any year shall be available for download on the Company's website www.sunpharma.com under section "Investor - Shareholder's Information- Statutory Communication" or can also be obtained from the Company's Registrar and Share Transfer Agents, Link Intime India Pvt. Ltd.

The Board of Directors of the Company at its meeting held on September 1, 2003 have framed the following rules under old Article 190A (corresponding Article no. 142 as per the new set of Articles of Association) of the Articles of Association of the Company for members who want to waive/forgo the right to receive dividend in respect of financial year 2002-2003 or for any year thereafter:

- I. A Shareholder can waive/forgo the right to receive the dividend (either final and/or interim) to which he is entitled, on some or all the Equity Shares held by him in the Company as on the Record Date/ Book-closure Date fixed for determining the names of Members entitled for such dividend. However, the Shareholder cannot waive/ forgo the right to receive the dividend (either final and/or interim) for a part of percentage of dividend on a share(s).
- II. The Equity Shareholder(s) who wish to waive/forgo the right to receive the dividend for any year shall inform the Company in the form prescribed by the Board of Directors of the Company only.
- III. In case of joint holders holding the Equity Shares of the Company, all the joint holders are required to intimate to the Company in the prescribed form their decision of waiving/forgoing their right to receive the dividend from the Company.
- IV. The Shareholder, who wishes to waive/forgo the right to receive the dividend for any year shall send his irrevocable instruction waiving/ forgoing dividend so as to reach the Company before the Record Date /Book Closure Date fixed for the payment of such dividend. Under no circumstances, any instruction received for waiver/ forgoing of the right to receive the dividend for any year after the Record Date / Book Closure Date fixed for the payment of such dividend for that year shall be given effect to.
- V. The instruction once given by a Shareholder intimating his waiver/forgoing of the right to receive the dividend

for any year for interim, final or both shall be irrevocable and can not be withdrawn for that particular year for such waived/forgone the right to receive the dividend. But in case, the relevant Shares are sold by the same Shareholder before the Record Date/Book Closure Date fixed for the payment of such dividend, the instruction once exercised by such earlier Shareholder intimating his waiver/forgoing the right to receive dividend will be invalid for the next succeeding Shareholder(s) unless such next succeeding Shareholder(s) intimates separately in the prescribed form, about his waiving/ forgoing of the right to receive the dividend for the particular year.

VI. The Equity Shareholders who wish to waive/forgo their right to receive the dividend for any year can inform the Company in the prescribed form only after the beginning of the relevant financial year for which the right to receive the dividend is being waived/forgone by him.

VII. The instruction by a Shareholders to the Company for waiving/ forgoing the right to receive dividend for any year is purely voluntary on the part of the Shareholder(s). There is a no interference with a Shareholder's Right to receive the dividend, if he does not wish to waive/forgo his right to receive the dividend. No action is required on the part of Shareholder who wishes to receive dividends as usual. Such Shareholder will automatically receive dividend as and when declared.

VIII. The decision of the Board of Directors of the Company or such person(s) as may be authorized by Board of Directors of the Company shall be final and binding on

the concerned Shareholders on issues arising out of the interpretation and/or implementation of these Rules.

IX. These Rules can be amended by the Board of Directors of the Company from time to time as may be required.
