PUBLICATIONS

Simplified **AGRICULTURE**

Genetics and Plant breeding & Plant physiology

A comprehensive book for IBPS AFO | FCI | NABARD & all other Agri. Exams.

INDEX

SECTION-A: GENETICS AND PLANT BREEDING

1. **INTRODUCTION TO GENETICS** 07
Definition of Genetics, History (Pre-Mendelian Genetics) and Scope.
2. **MENDELIAN GENETICS** 10
Mendel's Experiments, Theory of Inheritance, Mendel's failures and re-discovery, Exceptions of Mendel's discovery-Co-dominance, Incomplete Dominance, Multiple Alleles, Linkage, Epistasis. Sex determination and disorders-Sex determination in Humans, Birds, Drosophila, Grasshopper, Sex Limited Traits, Sex Linked and Sex Influenced Traits.
3. **DNA-STRUCTURE & FUNCTION** 19
DNA Structure and Packaging-Double Helical Structure of DNA, COMPONENTS OF DNA, FEATURES OF DNA DOUBLE HELIX, FORMS OF DNA, DIFFERENCE BETWEEN DNA & DNA Replication, DNA Replication Mechanism, modes of replication in dna, Meselson and Stahl Experiment: Semi-Conservative DNA Replication, GENE, CLASSIFICATION OF GENE
4. **CELL- STRUCTURE, FUNCTION & DIVISION** 24
Cell, Cell theory, Cell Organelles and their Functions, Difference Between Prokaryotes and Eukaryotes, Plant Cell and Animal Cell, Cell Division-Mitosis and Meiosis.
5. **CYTOGENETICS (CHROMOSOME-STRUCTURE & FUNCTIONS)** 35
Nucleosomes, Chromatin, Chromosome-Structure and Types- Different Parts of Chromosomes, Autosomes, Sex Chromosomes, Giant Chromosomes-Polytene Chromosome, Lamp Brush Chromosome Chromosomal, Structural and Numerical aberrations etc.
6. **MUTATION** 38
Mutation, Mutagens, Types of Mutations, Gene Mutation, Frame Shift Mutation, Point Mutation.
7. **SYNTHESIS OF PROTEIN** 40
DNA Replication-Enzymes Involved, Procedure, Transcription-Enzymes Involved, Procedure, Translation-Enzymes Involved, Procedure, RNA Editing- Antisense RNA, Micro RNA, mRNA, tRNA, rRNA, Gene Silencing.
8. **HARDY-WEINBERG PRINCIPLE (POPULATION GENETICS)** 43
Hardy-Weinberg's Law- Random Mating Population, Mendelian Population, Gene and Genotypic Frequencies, Quantitative Genetics- Variance, Range, Heredity, ANOVA, Metagenomics, Epigenomics.
9. **INTRODUCTION TO PLANT BREEDING** 46
History of Plant Breeding (Pre- and post-Mendelian Era); Objectives of Plant Breeding, Scope and Characteristics Improved by Plant Breeding. Germplasm Collection- Origin of Diversity, *in-situ* and *ex-situ* Conservation, Gene Bank, Seed Bank, etc.
10. **MODE OF REPRODUCTION IN PLANTS** 51
Sexual Reproduction and Asexual Reproduction, Types of Pollination- Self-Pollination, Cross Pollination, Double Fertilization, Triple Fusion, Gametogenesis, Apomixes- Apospory, Apogamy.
11. **METHODS OF BREEDING IN CROPS-I** 55
Mating Systems, Selection Response, Selection in Self-Pollinated- Pure-Line Selection, Mass, Back Cross, Bulk, Pedigree method, Single Seed Descent Method, Selection in Cross Pollinated Crops- Recurrent Selection, Family Selection, Sib Mating, Reciprocal Recurrent, Breeding for Abiotic Stress- Drought

Resistance Methods, Submergence, Cold, Heat, Breeding For Biotic Stress- Pathogens and Insect Resistance, Breeding for Quality Traits-Improving Protein Content, Oil Content, Etc. Male Sterility- CMS, CGMS, GMS, Transgenic CHA, Self-Incompatibility- Types, Advantages, Disadvantages.

12. METHODS OF BREEDING IN CROPS-II 70

Multiline Variety-Procedure, Advantages, Disadvantages, Synthetic and Composite Varieties Procedure, Advantages, Disadvantages, Multiple Factor Hypothesis-Heterosis And Inbreeding-Types, Dominance Hypothesis, Overdominance, Hybridization-Procedure, Advantages, Disadvantages, Mutation Breeding-Procedure, Advantages, Disadvantages, Transgressive Breeding, Ideotype Breeding-Procedure, Advantages, Disadvantages, Evolution of Crops-Cotton Wheat Sugarcane Tobacco, Release of New Varieties-Procedure and Trials.

13. BIOTECHNOLOGY AND GENETICS ENGINEERING 78

Biotechnology and Its Relevance in Agriculture; Definitions, Terminologies and Scope in Plant Breeding, Molecular Markers- RFLP, RAPD, AFLP, SSR, SNPS, ESTS etc., Marker Assisted Selection Procedure-Advantages and Disadvantages, etc., Transgenic Crops-Vectors, Recombinants Selection, Gene Transfer, Mapping Populations- MAGIC, F2, BC1, BC2, Mapping- Genomic, Linkage Mapping, Genomic Library, cDNA Library, Genetically Modified Plants and Animals, Tissue culture- History, Callus, Suspension Cultures, Cloning; Regeneration; Somatic Embryogenesis; Anther Culture; Meristem, Ovary and Embryo Culture.

14. INTELLECTUAL PROPERTY RIGHTS (IPR) 107

Patent, Copy Right, Trademarks, PPVFR

POINTS TO REMEMBER 109

SECTION-B: SEED SCIENCE

1. SEED BIOLOGY 117

Seed Morphology, Types of Seed- Monocot and dicot seed, Orthodox and Recalcitrant seeds, Chemical composition of seed.

Dormancy- Type, cause and methods of breaking dormancy.

Seed germination- Requirements, Imbibition pattern, Physiological and Biochemical changes in seed during germination, Role of hormones during germination.

2. SEED TECHNOLOGY 124

Seed technology-definition, Difference between seeds and grains, Role of seed technology, Goals of seed technology, Characteristics of good quality seed, Factors influencing seed production.

3. SEED PRODUCTION-I 127

Variety testing, Release and notification, Concept of genetic purity and factors responsible for deterioration of varieties, Maintenance breeding, General System of Seed multiplication Seed classes, Agronomic Principles of Seed production, Techniques of hybrid seed production.

4. SEED PRODUCTION-II. 137

Seed Production in Cereals- Paddy, Wheat, Sorghum, Pearl Millet, Maize Seed Production in Pulses- Chickpea, Pigeon Pea, Green Gram, Black Gram and Cowpea Seed Production in Oilseed- Groundnut, Brassica, Sesame, Sunflower, Castor, Soybean, Seed Production in Fibre crops- Cotton and Jute, Seed Production in Vegetable crops- Tomato, Brinjal, Okra, Chilli, Cole crops and Cucurbits, TPS Production in Potato

5. SEED PROCESSING 171

Seed processing-sequence of operations-seed drying methods, principles of seed processing, seed processing equipments, grading, seed treatment.

6. SEED QUALITY CONTROL-I	179
The Indian Seeds Act, 1966, Statutory bodies and agencies established in India under the seeds act, 1966, Seed Production Organization, Seed Certification-seed certification procedure.	
7. SEED QUALITY CONTROL-II	186
Seed testing-objective, seed testing laboratories, components of seed testing- Seed sampling- different methods of sampling, sampling equipments, Seed moisture- types and ISTA methods of measuring seed moisture, Physical purity, Germination test, Seed Vigor & viability Testing- types of seed vigour tests and their principles, types of viability tests- Tetrazolium test, embryo culture, Potassium permanganate method, etc., Seed health test-seed borne diseases, seed contamination, Phytosanitary certificate, Quarantine, Genetic purity test-Grow out test (GOT).	
8. SEED STORAGE	201
Factors influencing seed storage-Biotic and Abiotic, Harrington's Thumb Rule, Types of storage, Seed deterioration-factors influencing seed deterioration, physiological and biological changes during seed deterioration, methods of controlling seed deterioration, seed storage structure, types of storage structure, storage of germplasm and cryopreservation.	

Section-C: Plant Physiology

1. Plant physiology	210
Plant physiology, Absorption, translocation & metabolism of nutrients 2-7	
2. Mineral nutrition	214
Mineral nutrition, Hidden hunger, Criteria for essentiality of elements, Mechanism of nutrient uptake Role of essential mineral elements	
3. Photosynthesis	218
Photosynthesis, Photosynthetic pigments, Mechanism of photosynthesis, Light reaction or primary photochemical reaction or hill's reaction, Dark reaction or blackman's reaction or path of carbon in photosynthesis, Kranz anatomy, Factors affecting photosynthesis	
4. Photorespiration	224
Photorespiration, Mechanism of photorespiration, Respiration, Types of respiration, Respiratory substrate, Mechanism of respiration, Glycolysis, Aerobic breakdown of pyruvic acid (kreb's cycle),Electron transport system/ terminal oxidation / oxidative phosphorylation, Pentose phosphate pathway	
5. Growth and development of plants	229
Growth and development of plants, Phases of growth, Factors influencing growth, Growth analysis	
6. Plant growth regulators	232
Plant growth regulators	
7. Physiological Disorders in Crop Plants	235
Physiological Disorders in Crop Plants
